The Victorian State Railways.

In connection with suggestions which have been made in the daily papers as to the future of the Intercolonial Ry., whether it should be managed by a commission appointed by the Government, or leased to some railway company, the report of the Victorian Railways, which are managed by a Commission, is of considerable interest and importance. The Commission consists of three members, Thos. Tait, formerly Manager of Transportation, C.P.R., being chairman. The present Commissioners were appointed in 1902, and the report for the year ended June 30 deals with the second full year which they have had control of the lines. The Commission manages 3,725.16 miles of main tracks, and 552.59 miles of sidings, including 3,082.04 miles of single track, 303.98 miles of double track, 2.46 miles of three track line, 2.22 miles of four track line, and 3.15 miles of six track line. With the exception of 81.60 miles of 2 ft. 6 in. gauge, the track is all of 5 ft. 3 in. The gross revenue was £3,582,265 12s. 1d., an increase of £144,124 14s. 11d. over 1903-04; the working expenses showed an increase of £68,826 14s. 9d., and the net revenue amounted to £1,711,127 15s. 11d., an increase of £75,298 0s. 2d. The special expenditures and charges in reduction of extraordinary liabilities taken over by the Commissioners July 1, 1903, amounted to £248,485 7s. 10d., an increase of £128,929 18s. 11d. over 1904, leaving a balance of net revenue of £1,462,642 8s. 1d. After meeting the interest charges and expenses there remained a balance of £648 8s. 1d. of a surplus which has been credited to the consolidated revenue, against a surplus of £519 6s. 10d. for the year 1903-04. The figures contained in the report show a reduction in total train mileage of 2,261,579 miles, equal to 20%, as compared with the year 1901-02 (the year with the largest gross revenue prior to the present administration), notwithstanding that the gross revenue was 6.4% more than in that year. Of this reduction 995,696 miles were in freight train service and 723,563 miles in mixed train service. The total number of passengers carried was 59,702,050, and 3,628,237 tons of freight were carried against 54,282,003 passengers and 3,439,203 tons carried in 1903-04. The increased freight traffic was handled by increasing the average tonnage of the trains hauled, the increase being 42% as compared with 1901-02. The gross revenue shows an increase of $1,043,521 compared with 1901-02, and there is a decrease in the working expenses of $874,720, in comparison with the same year. The gross revenue per train mile was 7s. 11.28d., the highest since 1877. The net revenue is the largest yet earned, being $366,450 more than for the first year of the present administration, and $1,638,251 more than for any year prior thereto. The net revenue per mile of railway is the highest for 16 years, and per train mile the highest for 26 years, while the percentage of working expenses per mile of gross revenue, 56.23%, is the lowest since 1879. The interest charges on the railway debt were paid in full this, as well as last fiscal year, and in addition $1,791,133 has been applied during the last two years towards the reduction of extraordinary liabilities taken over by the Commissioners, July 1, 1903, as well as $559,666 repaid to the State Treasury on account of loan funds advanced by the Government to the railways for the purchase of stores prior to the present administration. Along with these agreeable improvements has gone a corresponding improvement in the conditions of the working staff, which are in every respect more favorable now than ever before. The improved condition of the railways has not been brought about by any reduction in the wages of employes, but, on the other hand, increases have been granted in recognition of good service equivalent to more than $135,000 per annum.

HUGH A. ALLAN,
President of the Shipping Federation of Canada.

The Melbourne Age, in referring to the report, points out that last year's total revenue was a record, exceeding £3,500,000 for the first time in the history of the department. While this was mainly due to the prosperity prevailing, it does not in itself give proof of the reform at work in the railways. In the details of the report the evidence of sound business control is abundant. Particular mention is made of the introduction of diagrams to represent the rise and fall of the figures from year to year, "typical of the advent of much needed enlightenment at the head of our railway management." The line for net revenue, which since 1890 had fallen below the amount required for interest charges, expressing thus the loss of £1,000 a day, has for the last two years shot up against the interest curve. The deficit has been wiped out and converted into a small profit by keeping a vigorous grip on the working expenses. The article further points out that £500,000 more revenue was earned than two years ago and with 2,000 or less train miles, by preventing the despatching of large numbers of small and almost empty freight trains over all the lines. The doing away with deficits brought about by this system was the first task of the Commissioners, who have now to grapple with the problem of reducing the heavy freights at present charged.

Two years ago the Commission undertook the construction of locomotives at its shops at Newport, and about a year ago a Royal Commission was appointed to report on the actual cost of building locomotives at these shops as compared with the actual cost of manufacture at private shops at Ballarat, at which place a large number of locomotives for the State railways had been purchased in the past. The matter was gone into very exhaustively and a report was issued showing that there was a considerable difference in the cost price of the locomotives in favor of the Newport shops. A specific instance is given in connection with the construction of 10 standard 10-wheel locomotives, which cost at the State's Newport shops £3,364 each, while five subsequently built at the Ballarat Company's shops cost £4,402 each.

Galena-Signal Oil Company,

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated Galena COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

Guarantee cost per thousand miles, for from one to five years, when conditions warrant it.

Maintain Expert Department, which is an organization of skilled railway mechanics of wide and varied experience.

Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY.

Please write home office for further particulars.

Subscription Agents Wanted.

We want an agent at each railway and shipping centre in the Dominion to secure new subscriptions to THE RAILWAY AND MARINE WORLD, for which we will pay liberal commissions.

The work is easy, the paper recommending itself, and is specially adapted for clerks in transportation offices. It can be done at odd times without interfering with other duties.

For terms and other particulars, address
THE RAILWAY AND MARINE WORLD,
Toronto.

NOTICE.—The British Columbia Southern Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time for the commencement and completion of the railway from Fort Steele to Golden in British Columbia and branches therefrom, and also branch lines from the company's main line, which the company has been duly authorized to construct, and for other purposes.

H. C. OSWALD,
Secretary.

Dated 30th November, 1905.

PROFESSIONAL CARDS.

THE RAILWAY AND SHIPPING WORLD is especially adapted for the publication of professional cards of engineers, inspectors, analysts, electrical experts, naval, grain elevator and other architects, solicitors, etc., who desire to bring themselves under the notice of the managements and officials of the various steam and electric railway, steamship, grain elevator, telegraph, telephone and power companies throughout Canada, as well as the locomotive, car and ship builders, contractors and promoters of railway enterprises. THE RAILWAY AND SHIPPING WORLD is the only one medium through which all these important classes can be reached.

Rates will be quoted on application.

G.T.R. SEMI-ANNUAL MEETING.

The President, Sir C. Rivers Wilson, in moving the adoption of the report published in our Nov. issue and the declaration of the dividends recommended therein, at the recent annual meeting, said:

The retrospect of the operations during the six months offers a pleasant contrast with that of the corresponding half-year of 1904. Since then the company have entirely recovered from the set-back experienced at that time, and he thought he might confidently say that in all probability they would be able to show quite as good, if not better, results for the current year than in 1903, which was the best year in the history of the company. He reviewed the figures at length, showing that although about 11% more traffic was carried, the gross receipts only increased a little over 7%. This decrease in the rates, he said, is beyond the control of any one company, and can only be met by improving the capacity of the rolling stock and the facilities for dealing with traffic. The working expenses showed an increase of £27,868, while the proportion they bore to the gross earnings showed a decrease of over 3½%, due mainly to the diminution of £94,267 in conducting transportation, which forcibly illustrated the marked difference in the figures produced when the winter and spring seasons are more or less normal as compared with a period of unusual severity such as was experienced in the early part of 1904. Notwithstanding the large increase in passenger and freight traffic—which necessitated the running of 572,000 additional train miles—there was a decrease of over £50,000 in the cost of fuel for locomotives. In the item of car mileage balance is shown the largest saving of any—about £66,000—resulting from the more favorable season. Under the present method of settling for the interchange of rolling stock with other companies, on the per diem basis, as against the mileage basis formerly prevailing, there is, in addition to the charge of 20c. per day, a penalty accruing after 30 days' detention to a foreign car of $1 a car per day, and in the item of penalty alone the company paid out this year £3,073, and collected £15,605, while in 1904 £33,395 was paid out and £10,010 collected, an adverse balance of £23,385, so that the actual saving on penalties for the six months of 1905 was £35,917. The balance to credit in this item is made up by the quicker movement over the line, and consequent less per diem payments, and is also to some extent due to the additional cars acquired during the latter half of 1903, from which, owing to the severity of the weather in 1904, full benefit was not derived. Although the early part of 1905 was by no means favorable, the contrast with 1904 was so favorable that the company had been able to carry out the usual work of repairs and renewals of permanent way and buildings, and also to resume the charge against revenue on account of bridge renewal fund, and, in consequence the charges under the various heads naturally show increases; but it will be found that these charges compare very favorably with those of 1903, and show in the aggregate a reduction of £10,000. It was hoped to completely extinguish the charge for bridge renewals in about a year's time, there being now £74,000 to make up. When the whole amount has been expended all the bridges on the main lines will have been put into a condition sufficient to enable them to carry the very heaviest traffic.

"The ultimate result is," proceeded the President, "that there was a surplus on the half-year's working of £285,033, which, added to the balance brought forward of £6,619, makes the total amount available for dividend £291,652, out of which we propose to ask you to authorize the payment of the full dividends for the half-year on the 4% guaranteed and 1st and 2nd preference stocks. The expenditure on capital account during the past six months was again of a very moderate amount, and was incurred principally in connection with the doubling of the track between Hamilton and Sarnia, and for the purchase of land in proximity to the principal points on our system. The amount expended on the double track was £49,078, and it is anticipated that before next winter the whole of the double track on that portion of the line will be completed, except short distances between London and Hyde Park Jct., and Paris and Lynden. I mentioned to you two years ago an arrangement which was being made with the city of Brantford whereby that city was to be brought upon the main line by means of a slight deviation. That has been effected, and on Sept. 30 the first through train on the main line passed through Brantford. The cost of this deviation was partly met by a contribution from the city of Brantford. The amount expended on the purchase of land was £31,827, of which £28,000 was for property in the neighborhood of Montreal, Toronto and London, which it was necessary to acquire in order to facilitate the handling of the traffic. The expenditure on new stations and works for the half-year amounted to £14,708.

"The gross receipts of the G.T. Western Ry. showed an increase of £6,848, which was accompanied by a decrease of £3,436 in working expenses, thus showing an increase in net profits of £10,284. The net revenue charges of that line for the half-year were £76,121, so that there was a net revenue surplus for the half-year of £7,436, from which, as the accounts of this company are made up annually to June 30, there had to be deducted the net revenue deficiency to Dec. 31, 1904, of £4,637, so that the actual surplus of the working for the year was £2,799, and adding to this amount the balance, £634, carried forward from June 30, 1904, there is an amount of £3,433 available for the payment of 1% interest on the second mortgage income bonds for the year to June 30 last, and I hope and believe that that will be materially increased in the near future. When in Canada a few months ago I made a careful inspection of the G.T. Western, and I have again to express how pleased I am with all I saw upon that road, and how wise I think the arrangement was to reorganize the old Chicago and G.T. Ry. Co., and to allow of the double tracking of the line between Port Huron and Chicago. One important feature in connection with that line is the contemplated removal of our locomotive works from Port Huron to Battle Creek, which is about midway between Port Huron and Chicago, a much more convenient position. We have been able to acquire 200 acres of land at Battle Creek for this purpose. Battle Creek was unable to afford us the pecuniary assistance which in other circumstances it might have been willing to tender towards the establishment there of our shops, because, like other municipalities, it has been somewhat extravagant in its expenditure and has exhausted its powers of borrowing, but a number of spirited citizens came forward and bought the necessary land at a cheap rate owing to local arrangements they were able to make, and then handed it over to us at the price they had paid. The consequence is that we shall very shortly be in possession of fine new locomotive works situated in the most convenient position on the road.

The result of the working of the Detroit, Grand Haven and Milwaukee Ry. for the half-year was more satisfactory than for a considerable time, the gross receipts showing an increase of £17,025, and the working expenses an increase of only £7,902, so that there was an increase of net revenue of £9,123 compared with the corresponding period, and consequently there was a reduction of practically that amount in the sum to be provided by the G.T.R. Co. to meet the interest on the bonds. As that line showed a surplus after providing for the interest on its bonds for the half-year ended Dec. 31, 1904, of over £14,000, there is every prospect that the working of the line for the current year will be sufficient to provide for the interest on its bonds without any charge being made upon the G.T.R. Co., which has not been the case since 1886. In connection with the working of these western lines, I may mention that the Detroit and Toledo Shore Line Ry., the acquisition of which by the G.T. Western and the Toledo, St. Louis and Western railways, has fully answered the expectations. In the first year, in consequence of money that had to be spent in improving the line, the earnings were not quite sufficient to pay the interest on the bonds, but since then it has not only been able to earn its charges, but has made sufficient to repay the advances made by the companies, and it is likely to prove in the future, and, indeed, is already proving, a valuable feeder to our system.

"The prospect that lies before us appears to be entirely encouraging. The gross earnings of our system between July 1 and Oct. 7, are £107,000 in excess of the earnings of the corresponding period of last year. The harvests, both in the U.S. and in Canada, are more abundant than they have been at any previous period, and the consequence is, I think, that we may fairly expect in the immediate future a season of considerable prosperity. Looking still further ahead, and after allowing for the vicissitudes of trade and occasional disturbances of the weather, such as we experienced last year, not forgetting also the large expenditures which must always be attendant upon the maintenance and improvement of the road, I think we may be satisfied that there lies before the company in the future an era of assured prosperity. Day by day as the records of the rapid development of the Northwest Provinces of Canada are published, I feel more and more convinced of the sound judgment exercised by the shareholders when they determined to accept the policy of extending the operations of the company into that great fertile country. It is into the very heart of that favored land that the G.T.R., by means of its affiliated and dependent company, the G.T. Pacific, is penetrating under conditions of a most advantageous character. While itself promoting and accelerating the consummation prophesied in a recent speech by the Premier of Canada, the G.T.R. will be in the very foremost rank for securing for itself an ample participation in the rich traffic, both east-borne and west-borne, which will be derived from the cultivation of this vast area and the requirements of its constantly growing population.

"We anticipated, when I first brought this question to you, that the distance to be traversed by the entire line from New Brunswick to the Pacific would be 3,400 miles, and we believed at that time that the eastern portion of the line—that is, from Winnipeg to the Atlantic, which will be constructed by the Government—would be about 1,900 miles. The surveys that have since been made, and which are still in progress, lead to the conclusion that probably that distance will be somewhat less, and it is not expected, from the last advices I have had, that it will be greater than 1,800 miles. On the other hand, careful surveys made on the western portion of the line—that is, our portion—lead us to believe that the original estimate of 1,500 miles may be exceeded by some 250 miles. The computed distance from Winnipeg to Edmonton is 775 miles. From Edmonton west, the eastern slope, that is, the eastern section of the mountains running down into the prairie—561 miles, and the balance of the mountain section, 418 miles, making a total of 1,754 miles. That, of course, is irrespective of the Lake Superior branch, which runs down from the main line

to Lake Superior, 203 miles. We are chiefly concerned, of course, with the western division from Winnipeg to the Pacific, or, rather, from Lake Superior to the junction with the eastern division and from Winnipeg to the Pacific. That is our own road, that is the road we shall have to construct, and that is the portion of the entire Transcontinental line which will be in all probability abundantly more prolific than the eastern division. Our point of departure is Fort William, at the head of Lake Superior. There we have acquired important terminals. We have obtained, through the co-operation of the Government, 1,600 acres of valuable land; which has hitherto been used as an Indian reserve, adjacent to and abutting upon the lake. We acquire that land upon favorable terms, and you will be glad to hear that the town of Fort William has granted a bonus of $300,000 towards our expenses, and have also agreed to exempt the company from all municipal taxes for 15 years, and has given it certain other valuable and useful privileges. We have within the last few weeks entered into a contract with an important Canadian firm for the building of the road from Fort William up to the intersecting point of junction with the main line, about 250 miles east of Winnipeg, and work will be commenced immediately, and will be pushed forward over the 203 miles with the utmost rapidity. I have received assurances that the Government will also set to work between the point of intersection and Winnipeg, and that the two portions will be completed at about the same time, a matter of the utmost importance to the G.T.R., in order to establish communication between Winnipeg and the Lakes as soon as possible. Starting again from Winnipeg, we shall build as quickly as possible. Operations have been commenced about 55 miles west of Winnipeg at Portage la Prairie. We have concluded a satisfactory contract with another eminent firm of contractors of Winnipeg for the construction of 275 miles to Touchwood Hills. At Winnipeg, which is a point of the very first importance to the Grand Trunk Pacific, we are in negotiation for the securing of the necessary terminals. It is possible that we may be able to conclude an arrangement with some other important corporation, and have a union station; if not, we shall proceed independently. The thing will be settled in the course of a few weeks, and our officers will take care to see that the best possible arrangements are made. Winnipeg is the most important point for our company. It has become within an incredibly short space of time the third city as regards population in Canada. Passing on and crossing the Prairie, we shall. I hope in a very reasonable time, reach Edmonton, and I think we may predict for Edmonton almost as great a future as that which is certain to come to Winnipeg. I believe Winnipeg and Edmonton will be the two great cities of the west. Negotiations are in progress by our officers for obtaining the necessary terminals, but nothing has been settled. Passing over the mountain section, we arrive at the Pacific. I do not think it has been publicly announced yet that the site for the terminus of the line is the island of Kai-En, about 25 miles south of Port Simpson, which was spoken of originally as the possible terminus. Our officers have succeeded already in acquiring upon favorable terms Crown lands amounting to 10,000 acres at that port, and no doubt the time will come when it will rival in importance some of the most important ports of the Pacific. There is one matter I might mention, to show under what favorable conditions we shall make this road. In the days of the construction of the earlier American and Canadian railways, the policy was to push the road through from one point to another as quickly as possible without very much regard for the gradients, with the result that large sums had to be afterwards spent upon the betterment of the road. We have determined to adopt another policy, and to make the road as perfect as it possibly can be made from the very commencement. It has been determined that on the prairie section the maximum gradients shall be 4-10ths of 1%, and over the mountain section not exceeding 1%. The consequence will be that we shall not be perpetually coming to our shareholders and asking them to vote money to reduce the gradients. A contract has been entered into with the Canada Car Co., which has lately been established close to the G.T.R. near Montreal, for the supply of the car equipment of the new line. The contract is for 12,000 freight cars and 250 passenger cars, the delivery of which will begin next year, and will be spread over the five subsequent years; the total cost will be something like $10,000,000, or £2,000,000. Considering that only two-and-a-half years have elapsed since I brought this project before you, and that the legislation connected with it was completed only in July last, I think you will agree that a very considerable amount of work has been done in the period. No less than 9,300 miles have been surveyed. The whole of the financial arrangements have been concluded, and the whole of the money has been secured, for the building of the Lake Superior branch and the prairie section. Contracts have been let, and work is actually in progress, for the construction of the road. These are remarkable results to have been achieved in so short a period, and I think your gratitude is due especially to Mr. Hays and to his extremely able lieutenant, Mr. Morse."

A. W. Smithers seconded the motion and some discussion followed.

The President, replying to questions, said: "When the present board took office, G.T.R. ordinary shares were quoted at something like £4, and to-day they are not far from £25, and have even been higher; therefore, I do not think there is much to complain of on that score. I do not know what the future has in store for us, but I take a much more lively and hopeful view of the prospects likely to accrue to us from our connection with this new undertaking than some shareholders, and I believe if anything can lead to the earning of dividends on ordinary shares, it will be owing to our connection with that enterprise in the Northwest." Referring to the retirement of Lord Welby, Mr. Clutton-Brock, and Col. Firebrace from the directorate of the G.T. Pacific, the President said, "an arrangement has been made that all G.T.R. directors shall pass through the directorate of the G.T. Pacific, and shall come and go in rotation, so that every one of the members of the board shall be able to acquaint himself intimately with the affairs of the G.T. Pacific. That being so, Lord Welby, Mr. Clutton-Brock, and Col. Firebrace, who were the first nominees upon the Board, retired at the end of the first year, and three other directors succeeded them. The President and Vice-President—myself and Mr. Smithers—remain ex-officio members of the G.T. Pacific board. The selection of the harbor on the Pacific coast was made by our experts in connection with the Government, and as the result of the most careful exploration of every port, every harbor, every indentation along the coast, and I think you may rest quite satisfied that the place selected is extremely eligible."

The resolutions were unanimously adopted and a vote of thanks was accorded to the directors for their services.

An Order-in-Council has been passed under the terms of the Government Railways Act, approving of rules and regulations for the carriage of baggage on the Intercolonial, and the Prince Edward Island railways.

White Pass and Yukon Ry. Report.

The report of the directors for the year ended June 30, was presented at the annual meeting in London, Eng., recently. The company owns all capital stock of the several local companies, and the results of their operations for their financial year ended Dec. 31, 1904, are incorporated. The report showed that the profit and loss account, after providing for debenture stock and debenture interest and all charges, shows a net profit of £63,256 6s. 2d. After providing for sinking fund instalment and payment of dividends for 1904, there was carried forward from the balance of the profit and loss account at June 30, 1904, £33,040 5s. 3d. Adding to this the net profit for the past year, there is a balance at credit of profit and loss of £96,296 11s. 5d. Out of this £16,002 6s. 2d. was spent in the purchase of the full sinking fund instalment of £16,586 of stock due this year, and an interim dividend of 4s. a share, which absorbed £27,500, was paid on July 15. The directors recommended that a final dividend of 6s. per share, absorbing a further £41,250, be declared, payable Jan. 15, 1906, making 5% for the year, leaving to be carried forward the balance of £11,544 5s. 3d. The directors recorded with regret the death in Feb. last of their colleague, Jos. Price. It had not been thought necessary to fill the vacancy on the board thus caused. The directors who retired by rotation were Hon. S. Carr Glyn and E. Hanson, who, being eligible, offered themselves for re-election. The balance sheet is as follows:—

ASSETS.

Shares, mortgages and debentures at cost of the local railway and navigation companies	£2,374,011	10	10
Balance due from local companies.	95,260	18	8
Cash at bankers and on hand	1,396	1	6
Sinking fund investments and cash	49,320	13	4
Income tax recoverable estimated	3,000	0	0
	£2,522,989	4	4

LIABILITIES.

Share capital issued	£1,375,000	0	0
5% consolidated 1st mortgage bonds	746,702	0	0
6% mortgage debentures navigation bonds)	255,555	0	0
Sundry creditors	114	19	7
Sinking fund	49,320	13	4
Profit and loss account	96,296	11	5
	£2,522,989	4	4

S. H. Graves, President of the local companies, in his report said:—"On the rail division we carried 11,773 passengers and 33,225 tons of revenue freight. The average haul was 87.83 miles per passenger and 105.73 miles per ton of freight, and the average load per car was 10.76 tons. The chief improvements on the railway in 1904 were the building of a section house at Clifton, and a bonded warehouse 32 by 72 ft. on the Dawson wharf. A crane with a lifting capacity of 10 tons was installed on the wharf at Caribou; and an electric light plant, with capacity of 1,000 16-candle power lights, was installed at Skaguay shops, which furnishes light for the shops and station, also for the Broadway station and general offices. The roadbed, rolling stock, shop and other equipment, wharves and everything else connected with the railway, have been kept up in first-class condition and repair. In doing this work, gravel ballast to the extent of 57,826 cubic yards was distributed north of Caribou, and 6,775 new and 550 second-hand sleepers were laid in the main line. Notwithstanding the outlay on this work, the operating expenses of the rail division for 1904 show a decrease of $27,155.42. The rolling stock includes two new passenger coaches built at Skaguay shops and put into service in 1904.

"The company's fleet in 1904 carried 6,849 passengers and 26,066 tons of revenue freight. We operated 13 steamers and eight barges on the river and lakes, and held five steamers in

Street Car Advertising

What One Company Has Done to Place the Business on a Systematic Basis

(From La Patrie, Montreal)

SITTING in a street car and reading the array of handsomely designed advertising that constantly forces itself on the admiring attention of the hundreds of thousands of passengers who daily ride about the city, little does the average person imagine the amount of labor, the large organization, and the capital involved in securing, producing, and taking care of these announcements of the kings of commerce and captains of industry. Not alone the best in Canada, but the best in America are represented in the illustrated business histories that fill the advertising racks of our tramways.

How was all this accomplished? What wizard of the advertising world conceived and accomplished this achievement?

To answer that question a La Patrie representative called on the president of the Canadian Street Car Advertising Company and learned from him something of the history of street car advertising in Canada, for it has a history marked by many failures, the outcome of inexperience and the lack of ability so often displayed in the past to the despair and financial loss of the street car companies.

At one time nearly every street car company in Canada sold the space in its cars direct to the advertiser, but, as advertising had to be sought, it became necessary for the large companies to organize and maintain an advertising department. This mode of conducting the business soon proved to be unprofitable and unsuccessful, besides being the source of constant annoyance to officials, who had other important matters to look after and who were not, as one can readily understand, conversant with the advertising business, which is so foreign to their training and experience. In addition to the financial loss the cars often presented an uninviting appearance. In short, the companies soon realized that the advertising business was not in their line, and, taking advantage of the experience of the street railway companies in England and the United States, leased the privileges to advertising contractors.

While this method was undoubtedly the proper one, success depended largely upon the ability and experience of the contractors. For several years the leases went to various individuals, none of whom were experienced advertising men; and while a certain improvement over the company's own handling of it was noted, it was still far from what it should be.

It was not until Mr W. J. Carrique, one of the most able and aggressive advertising men in Canada, became interested in street car advertising, that the possibility of its being successfully conducted became apparent. His experience made it plain to him that the successful carrying on of the business required the investment of a large amount of capital for the maintenance of an organization competent to conduct the various departments of a modern advertising business.

His first step was the organization of the Canadian Street Car Advertising Company, Limited, of which he is the active president, with offices in Toronto, Montreal and New York, between which he divides his time.

Mr. Carrique is a good organizer, and has surrounded himself with an aggregation of experts at the head of the various departments.

From the first in this enterprise associated with him was Mr. D. M. Coughlin, the editor and founder of Events, whose brilliant political summaries appeared in that journal under the nom-de-plume of the Politician. He is vice-president of the company, and acts as assistant to the president.

Mr. W. Long, for many years with the Central Press Agency of Toronto, a gentleman of marked ability and long experience in the advertising field, is manager of the advertising department of the Toronto office.

Mr. John Elliott, who for a number of years was accountant for the Canadian Rubber Company, recently severed his connection with that company to become financial manager.

M. L. Corrigan, formerly a professor in the Belleville Business College, is secretary of the company.

The publicity department of the New York office is under the management of Mr. J. K. Fraser, a Canadian, whose writings have won him distinction in literary circles. One of the greatest advertising hits that has been made in the past ten years was the Spotless Town street car verses of which he was the author. The leading advertisers of New York recognize Mr. Fraser's genius for producing pithy, original and forceful advertising copy, and he is naturally an indispensable adjunct of the business.

In the art department is employed a staff of the most competent artists whose duties are to originate sketches suitable to the requirements of the various patrons of street car advertising.

The car service department is under the management of Mr. R. A. Johnson, a master of detail. His duties consist chiefly in keeping a record and a diagram of the interior of every street car in Canada. The Advertising Company's inspectors send their monthly reports of the number and location of the cards in every street car in Canada to him for classification and record.

The superintendent of inspectors, Mr. R. J. Caton, makes his headquarters in Toronto. His duties consist chiefly in the distribution of cards to the various cities in Canada, and in seeing that the cards are not only placed in the proper cars, but that there is always a harmony of colors in arrangement.

An advertiser making a contract for the entire system of cars controlled by the company sends his cards either to the Montreal or Toronto office, whence they are distributed to the various cities throughout the Dominion. In each city it is necessary to have a man to place the cards, who is known as a carder, and the company employs about forty men in this capacity.

The superintendent of the carding department is Mr. G. Henry McAdams, of Montreal, and his assistant is Mr. Fred Smith, also of Montreal.

In addition to the above is a staff of advertising solicitors preaching the gospel of street car publicity, and they are constantly in touch with the largest merchants and manufacturers in Canada and the United States. Their duties in visiting the manufacturing centres of Canada and the United States keeps them constantly on the move. They are among the best patrons of the sleeping car service, and have a speaking acquaintance with the porters on all the trunk lines.

From the above it will be readily seen that the Canadian Street Car Advertising Company is the largest and most expensive advertising organization in Canada.

The company's New York offices are on the fourteenth floor of the famous Flatiron building, where the American business of the company is conducted.

As an instance of the impracticability of conducting the business on one line, the history of street car advertising in Montreal might be cited. After the Montreal Street Railway Company was electrified, the first advertising contractor was Mr. A. R. McDonald, who ran the business for four years, and, although his lease had a number of years more to run, it was a losing game, and he succeeded in inducing Mr. W. S. Brown to release him of his contract; and the latter took over the business in 1899, conducting it under the style of the Dominion Railway Advertising Company. Mr. Brown is a member of the estate that owns the John Murphy building and other St. Catherine Street property, and he was able to command the capital necessary to carry on the business until the spring of 1904, when he concluded that he could not continue longer to contribute to the revenue of Montreal's popular traction company and looked about for a suitable person to relieve him of his contract. Mr. Brown states that his books showed a loss of $15,000 from 1899 to the spring of 1904, when the Ambrose Petry Company, of Detroit, took over the lease, and subsequently assigned it to Mr. Carrique, the lessee of nearly every other line in Canada, having realized the impossibility of running the street car advertising in one city without financial loss.

Mr. Carrique is to be congratulated on having made a success of something that has always been looked upon as a difficult and hazardous proposition, but like all successful men in large undertakings, he owes his success to his genius for organization and judgment in the selection and handling of his lieutenants.

reserve. The falling off in passenger traffic was almost entirely in south-bound business. This traffic is usually heavy towards the close of the season, but in 1904 a great many people went from Dawson to the new Tanana district instead of leaving the country for the winter, thus materially reducing our south-bound passenger traffic. Besides this, the discontinuance of the service between Dawson and Eagle, consequent upon the number of other steamers running between those ports on their way to and from Tanana, would account for a considerable portion of the decrease. The chief additions to the fleet during 1904 were the str. Casca and the barge Klondike. The former, purchased cheaply at the close of the season, is a fine boat with engines and boilers duplicates of those on our str. Selkirk. She has good passenger accommodations and being a popular boat on the river cut into our passenger earnings a good deal, hence it was thought best to acquire her when a favorable opportunity occurred. The barge Klondike was built at the Whitehorse shipyards in the spring of 1904 and has nearly twice the carrying capacity of those built in 1903. She has proved the most successful of our barge fleet. The steamers Sybil and Clifford Sifton not being good carriers on light draft of water, were dismantled during 1904 and converted into barges. The Sybil engines were put in the Bonanza King, which boat was short of power for towing large barges. With the Sybil engines she has proved the most economical boat in the fleet for moving cargo, while the hull of the Sybil has proved a good barge. The engines of the Clifford Sifton were put in the Gleaner, which boat was short of power for towing the barges now used in the Atlin traffic, Since being re-engined in this way the Gleaner can now make the trip with a barge in less time and with less fuel than formerly without a barge. Many of the fleet needing heavy repairs and re-equipment after the trying season of 1903, were forced to winter at a great distance from Whitehorse, so that the cost of repairs and fitting out and getting crews and supplies on board was greatly increased. Upwards of $32,000 of unusual expenses were incurred in this way. A largely increased tonnage was moved over the river division during the season in circumstances tending to increase the cost in consequence of low water. In spite of these drawbacks a net saving was effected in the operating expenses of the River division of $67,351.60 as compared with the previous year. The repairs and renewals required for keeping the fleet and property in first-class condition were duly made.

"The mail, passenger, parcel and freight winter stage line service, was carried on as usual between Whitehorse and Dawson by means of four-horse sleighs and four-horse coaches, which made 158 trips during the year 1904 (equivalent to 52,140 miles), carrying 30 tons of mail, 945 passengers, 10½ tons of parcel freight, including gold dust, and 280 tons of ordinary freight, of which, however, 153½ tons were copper ore from the mines near Whitehorse, involving only a short haul. The gross receipts for the mail service year ended June 30, 1904, were $203,748.39 and the operating expenses $152,656.55, leaving, after allowing for reserve and depreciation, a profit of $51,091.84 as against $35,290.45 for the previous year. The equipment on Dec. 31 last was 24 large four-horse sleighs, 3 light sleighs, 15 wheeled coaches and wagons, one break cart, 152 horses, with the necessary harness, etc., all in first-class condition."

The report concluded with some general observations as to the condition of business in the district at the end of 1904, and the prospects for 1905.

The rolling stock of the railway consists of 16 locomotives, 13 passenger coaches, one official car, one combination car, three baggage and express cars, 110 box cars (20 knocked down), 83 flat cars, 43 stock cars (15 knocked down), 12 coal cars, six cabooses, four refrigerators, two rotary snow plows, one each flanger, derrick car, steam shovel, and track pile driver. The fleet comprises 20 steamers, one, the Tasmanian, being sold during 1904; and eight barges.

The report of the auditors gives a good deal of detail information as to the earnings, etc., of the local companies, from which the following facts have been taken:—

EARNINGS.

	Rail.	River.	Total.
Passenger...	$182,194.02	$169,953.75	$342,147.77
Freight.....	763,938.90	522,955.57	1,286,894.47

Passenger rate meetings will be held at the King Edward Hotel, Toronto, as follows:—Niagara Frontier Summer Rate Committee, rate clerks, Jan. 17, at 10 a.m.; the committee Jan. 18 at 11 a.m. Great Lakes and St. Lawrence River Rate Committee Jan. 18 at 2 p.m. International Water Lines Passenger Association Jan. 19.

The Incorporated Construction Co., which was incorporated by the Dominion Parliament July 31, 1891, will apply next session for an act amending its charter by empowering it to construct railways and other works; and for other purposes. The provisional directors named in the act were J. F. Zebley, A. Gallagher, A. A. Kundson, C. D. Jones, J. T. Kirk, D. Purdy, J. Domville; the office was to be at St. John, N.B., or Montreal, or such other place as might be fixed by by-law; and the authorized capital was $1,000,000. The company was authorized to engage in the mining and manufacture of iron and steel and other metals; the building of ships and vessels of all kinds; the manufacture of railway rolling stock and supplies, and equipment for railways and vessels, and dealing in the same; to construct or acquire docks, and wharves, and to construct or acquire street railways or tramways and other franchises, etc.

Alberta Railway and Irrigation Company.

Following are extracts from the first annual report for the nine months ended June 30, presented at the annual meeting in London, Eng., recently:—

The amalgamation of The Alberta Ry. and Coal Co., The Canadian North-West Irrigation Co., The St. Mary's River Ry. Co., and The Lethbridge Land Co., Ltd., took effect Oct. 1, 1904. The accounts for the nine months ended June 30 show the following revenue:.

From colliery, railways, canals, profit on land sales, etc.....		$193,471.66
Deduct interest on 4% prior lien debenture stock.....	$37,428.00	
Deduct interim payment of 1½% on 5% debenture stock on Jan. 1, 1905.....	40,625.00	
Deduct interim payment of 1% on 5% debenture stock on July 1, 1905.....	32,500.00	
Deduct London expenses (exclusive of directors' fees)..	5,862.64	
Deduct final payment of 1½% on 5% debenture stock made Oct. 20, 1905, making 5% per annum for the nine months.....	48,750.00	
		165,165.64
Surplus, subject to a deduction for directors' fees.....		$28,306.02

The coal sales amounted to 170,682 tons. The gross earnings of the railways were $127,714.35. This business is very promising by reason of the rapid settlement of the country tributary to the company's railways.

During the nine months the land sales aggregated 13,190 acres and realized $164,138.94, the average price being about $12.50 per acre. These sales comprised 1,482 acres covered by the trust deed for debenture stockholders, and 11,708 acres, formerly the property of the Canadian North-West Irrigation Company, and free from the trust. Of the lands sold 12,497 acres were irrigable and 693 acres non-irrigable. The terms for payment are 1-10 cash and the balance in nine equal annual instalments; interest at 6% per annum being charged on the unpaid purchase money. The estimated net profit resulting from the above sales is $100,426.00, and of this $5,358.69, being the proper proportion of the actual cash received for lands free from the trust, is included in the present revenue account, the balance of $95,067.31 being placed to reserve to be dealt with as the outstanding instalments are received. In the case of the period under review the trustees for the debenture stockholders will become entitled to $9,962.23, part of the sum now placed to reserve, as and when the lands sold which are covered by the trust deed are paid for; and the balance of $85,105.08 for the lands free from the trust will be credited one-half to revenue account and one-half to a lands profit suspense account as and when received. The company owns 943,995 acres of land remaining unsold, of which about 170,000 are irrigable and 773,995 above canal level are non-irrigable and are termed "winter wheat lands." In addition the company owns many town lots in Lethbridge and Raymond. The selling price for irrigable land is from $12 an acre upwards, according to location, and for winter wheat lands from $5 an acre upwards. The receipts from water rentals for the nine months were $10,965.99. It is expected that the receipts under this heading will be considerably increased from year to year as the area under cultivation is extended.

The development of the district is shown by the following circumstances: The cultivated area tributary to the company's railways is now about 70,000 acres, or more than double the acreage of last year. It is estimated that this area has produced in the present season about 1,000,000 bush. of wheat as well as a large quantity of oats and barley. Irrigated lands have yielded large returns and the winter wheat crop has been very satis-

Montreal Toronto Winnipeg Vancouver

factory. It is expected that the Knight sugar beet factory will this year treat 35,000 tons of sugar beets, the product of which will be about 3,500 tons of refined sugar. The quality of these beets is unsurpassed in the U.S. or Canada in saccharine matter and purity. This establishment contributes a considerable volume of business to the company's railways and colliery, and is an enterprise which promises satisfactory results to its proprietors. The town of Lethbridge has made satisfactory growth the last year, and its population is now about 4,000.

The St. Mary's branch of the company's railway, 54 miles in length, has been widened to standard gauge. This will save expense in operating and avoid the transfer of through freight at Lethbridge. The cars of connecting railways will be used and a large outlay by the company in the purchase of standard gauge rolling stock will be rendered unnecessary. The company's narrow gauge rails are being sold at satisfactory prices to mining companies, but the rolling stock is difficult of sale, there being but few narrow gauge railways now in operation.

After providing for the expenses of change of gauge of the St. Mary's Branch, above referred to, and extension of the canal system, etc., which on Oct. 31, 1905, will, together, have absorbed about $355,000 of the cash resources of the company, there will remain sufficient working capital for the operating of the company's business. Capital expenditure up to Dec. 31, 1906, will not exceed $180,000. This expenditure will be applied to canals, standard gauge rolling stock and other necessary purposes. The company has upwards of $600,000 of land mortgages, which are easy of sale and available for any outlay that may be required. The canal system now embraces over 150 miles of main canals and laterals, and its extension is not contemplated beyond the requirements for lands for incoming settlers. During the nine months, prior lien debenture stock has been redeemed to the extent of $3,600 in exchange for land, the amount of this stock outstanding being $1,246,400. The trustees held on June 30, 1905, $2,130.96 to be applied to further redemption.

A. M. Nanton, of Osler, Hammond & Nanton, of Winnipeg, has been appointed Managing Director of the company, and from July 1, 1905, has been in full charge of its operations, thus giving the President more time for attention to important interests of the company calculated to bring to it increased business. The directors are much pleased at having been able to affect this arrangement, believing it to be in the best interests of the company. Mr. Nanton is a large holder of the company's securities.

In accordance with the Railway Act of Canada, the directors retire from office, and offer themselves for re-election, viz.:—E. T. Galt, Col. K. R. B. Wodehouse, A. M. Nanton, W. Burdett-Coutts, M.P.; E. S. Clouston, J. H. Dodgson, Jno. Galt, W. M. Ramsay and E Waterhouse. W. S. Ogle & Co., the auditors, retire, and offer themselves for re-appointment.

BALANCE SHEET, JUNE 30, 1905.

LIABILITIES.

To 4% prior lien debenture stock		$1,246,400.00
To 5% debenture stock		3,250,000.00
To common stock		3,250,000.00
To Dominion government		500,000.00
To sundry creditors		205,231.37
To land suspense accounts		95,067.31
To REVENUE ACCOUNT—		
Balance for the nine mths.	$150,181.02	
Less—Interim payment of 1¼% on 5% debenture stock	$40,625	
Further payment of 1% declared June 5, 1905	32,500	
	73,125.00	
		77,056.02
		$8,623,754.70

ASSETS.

PROPERTY ACCOUNT—		
Colliery, railways, lands, canals, etc., cost at Oct. 1, 1904	$7,380,743.98	
Add expenditure on canal extension, change of gauge, etc., during the 9 months	193,818.04	
	$7,574,562.02	
Less cost of land and narrow gauge equipment sold during the nine months	79,505.40	
		$7,495,056.62
Stores on hand		91,006.27
Amounts owing to the company—		
For land	$912,737.67	
Less agreements for sale of land sold with the company's guarantee	154,113.42

REVENUE ACCOUNT, NINE MONTHS ENDED JUNE 30, 1905.

By net revenue from colliery, railways, canals, land sales, etc	$193,324.56
By interest, transfer fees, etc	147.10
	$193,471.66
To London expenses (exclusive of directors' fees)	$ 5,862.64
To interest on prior lien debenture stock	37,428.00
To balance carried to balance sheet	150,181.02
	$193,471.66

The directors and officers for the current year are:—President, E. T. Galt, Montreal; Vice-President, Col. K. R. B. Wodehouse, London, Eng.; Managing Director, A. M Nanton, Winnipeg; other directors, E. S. Clouston, W. M. Ramsey, Montreal; J. Galt, Winnipeg; W. Burdett-Coutts, M.P.; J. H. Dodgson, E. Waterhouse, London, Eng.

The Board of Railway Commissioners has approved of passenger tariff on the following new lines of the Canadian Northern Ry.:—Wakopa section, on a basis of 3 cents a mile; Clanwilliam branch, west of Clanwilliam to Rossburn, Man., on a basis of 3 cents a mile; and on the main line west of Laughlan to North Battleford, Sask., on a basis of 3½ cents a mile.

From the Toronto Globe, Nov. 29, 1855:—"On Monday next the Great Western Railroad will be opened between Hamilton and this city, and Toronto will for the first time be placed in direct railway communication with the far west. The event is one of no ordinary importance, and ought to be celebrated by our citizens in a manner worthy the occasion. It would be difficult to overrate the advantage which will accrue to Toronto from having the rich commercial area compassed by the Great Western brought to the doors of our merchants, and it is right and politic to mark the event."

The Canadian Freight Association, western lines, which deals with freight inspection and car rental in the territory between Port Arthur, Ont., and Revelstoke, B.C., and south, has as members the C.P.R., Canadian Northern Ry., Qu'Appelle, Long Lake and Saskatchewan Ry,. Red Mountain Ry., Vancouver, Victoria and Eastern Ry. and Navigation Co., Nelson and Fort Sheppard Ry. Its organization is as follows:—President, G. H. Shaw, General Traffic Manager, Canadian Northern Ry; Vice-President, W. B. Lanigan, General Freight Agent, C.P.R. Central Division; Manager and Secretary-Treasurer, H. R. Patriarche; Freight Inspection Committee, Executive Committe, and Audit Board: G. H. Shaw, W. B. Lanigan; Car Rental Committee: J. A. McGregor, A. W. Wilcox, J. P. Driscoll, G. E. Graham, H. R. Patriarche, Chairman. Regular meetings are held at Winnipeg on the first Monday in Feb., May, Sept., and Nov.

Orders by the Railway Commissioners.

The following orders have been issued by the Board of Railway Commissioners:—

No. 745. Oct. 17.—Authorizing the junction of the tracks of the Canadian Northern and the Manitoba and Northwestern railway at Neepawa, Man.

No. 746. Nov. 11.—Approving detail plans for the bridge across the tracks of the Canada Atlantic Ry. by the James Bay Ry.

No. 747. Nov. 2.—Authorizing the laying under the tracks of the G.T.R. between lots 12 and 13, con. 8, Walpole tp., Haldimand county, Ont., of the pipes of the Dominion Natural Gas Co. on terms arranged.

No. 748. Nov. 8.—Authorizing the Toronto, Hamilton and Buffalo Ry. to put into operation the interlocking plant at the Garth St. crossing, Hamilton, Ont.

No. 749. Nov. 4.—Authorizing the Ontario Pipe Line Co. to carry its pipes under the G.T.R. at 10 points in Hamilton, Ont., on terms arranged.

No. 750. Sept. 21.—Authorizing the using of the crossings of the tracks of the British Columbia Electric Ry. by the Vancouver, Westminster and Yukon Ry. at Park Avenue, Vancouver.

No. 751. Nov. 7.—Authorizing the James Bay Ry. to lay its tracks across the Sutton branch of the G.T.R. at rail level in East Gwillimbury, York county, Ont., for the use of construction trains, construction materials and supplies.

No. 752. Nov. 7.—Authorizing the expropriation of certain lands in the township of Southwold, Elgin county, Ont., by the Lake Erie and Detroit River Ry.

No. 753. Nov. 11.—Authorizing the C.P.R. to operate a track crossing the public highway immediately west of Dalhousie Mills station, Telesphore, Que.

No. 754. Oct. 16.—Approving of change in location of the Canadian Northern Ry. station at St. Anns, Man., to a point two miles westward of its present location.

No. 755. Oct. 16.—In the matter of the application of the C.P.R. Co., under the Railway Act, 1903, sec 175, for authority to construct a branch line from its main line at Fort William to the east side of the Maine River. Upon hearing counsel for the company and what was alleged, and the withdrawal of the application, the Board ordered that the same be dismissed with costs against the company, which were fixed at $100, to be paid to the town of Fort William forthwith.

No. 756. Oct. 16.—Dismissing application of the C.P.R. to construct a branch line on the south side of the Kaministiqwia River, Fort William, Ont.

No. 757. Nov. 14.—Extending interim order of Nov. 3, disallowing tariffs C.R.C. no. A33 of the Red Mountain Ry.

No. 758. Nov. 15.—Authorizing the crossing at a grade of the tracks of the C.P.R. by the G.T.R. near Komoka, Ont.

No. 759. Aug. 29.—Authorizing the C.P.R. to cross the tracks of the G.T.R. at rail level near Utopia station, Ont.

No. 760. Aug. 29.—Authorizing the C.P.R. to cross the tracks of the G.T.R. near Coldwater, Ont.

No. 761. Aug. 29.—Authorizing the C.P.R. to cross the tracks of the G.T.R. Penetang branch.

No. 762. Nov. 15.—Authorizing the C.P.R. to construct a temporary over-crossing near Tottenham, Ont., where its line crosses the G.T.R.

No. 763. Nov. 15.—Re complaint of Dominion Millers' Association. See Dec. issue, pg. 591.

No. 764. Nov. 6.—Authorizing the C.P.R. to construct and operate a branch line for 15 years in the township of North Dumfries.

No. 765. Nov. 16.—Authorizing the protection of Main St., Winnipeg, where it is

WIRE ROPE

IN STOCK
ANY LENGTH

These ropes are furnished in any diameter and length required.

We carry in stock Standard Lengths.

FOR HOISTING—HAULAGE—GUYS
TRANSMISSION—MINES—COLLIERIES
ELEVATORS, ETC., ETC., ETC.

Special Ropes Manufactured to suit all requirements.

OUR GALVANIZED SEMAPHORE

Is made up from the best wire obtainable. We carry every size in stock and our price is extremely low.

No. 766. Re freight on beans. See Dec. issue, pg. 577.

No. 767. Nov. 18.—Ordering the G.T.R. and C.P.R. to file answer to the application of the town of Lindsay within four days.

No. 768. Oct. 17.—Authorizing the protection of Hastings St., Vancouver, by means of gates and a watchman where it is crossed by the C.P.R. and the B.C. Electric Ry.

No. 769. April 14.—Authorizing the Canadian Northern Ry. to use certain lands of the C.P.R. in the north ½ of sec. 30, tp. 6, range 4, west of the 1st meridian, Manitoba.

No. 770. Nov. 8.—Amending order dated Aug. 29, in re application of James Bay Ry. for an undercrossing of G.T.R. tracks.

No. 771. Nov. 21.—Order issued and then cancelled.

No. 772. Nov. 23.—Sanctioning plan of deviation of the G.T.R. in Collingwood, Ont.

No. 773. Nov. 23.—Authorizing the construction of a branch line by the G.T.R. in Montreal crossing Common St. to the Ross property.

No. 774. Nov. 22.—Authorizing the G.T.R. to construct a branch line in Berlin, Ont., to the premises of the Ontario Beet Sugar Co.

No. 775. Nov. 23.—Authorizing the C.P.R. to operate its trains over an additional crossing of the Northern Division of the G.T.R. at Toronto Jct., Ont.

No. 776. Nov. 22.—Authorizing the Light Commissioners of Berlin, Ont., to carry electric light wires over G.T.R. tracks there.

No. 777. Nov. 22.—Authorizing the Corporation of Galt, Ont., to lay sewer pipes under G.T.R. tracks.

No. 778. Nov. 23.—Authorizing the Provincial Natural Gas and Fuel Co., of Ontario, Ltd., to lay pipes under the G.T.R. on lot 21, 4th con., tp. of Humberstone, Co. Welland.

No. 779. Nov. 23.—Authorizing the city of St. Catharines to lay pipes under the G.T.R. in the city.

No. 780. Nov. 23.—Authorizing the G.T.R. to construct a branch line on Walnut St., Collingwood, Ont.

No. 781. Nov. 24.—Authorizing the G.T.R. to cross certain highways in Collingwood, Ont.

No. 782. Nov. 23.—Directing the G.T.R. to place flagmen for the protection of the public at its crossing of College St., Lennoxville, Que.

No. 783. Nov. 24.—Authorizing the C.P.R. to construct a branch line near Highland station to the property of the Canada Sugar Refining Co., Montreal, on a location differing from that mentioned in the order of July 20. The new route includes an undercrossing of the G.T.R., which is to be constructed under the supervision of the G.T.R. engineers.

No. 784. Nov. 14.—Authorizing the township of Cornwall to make certain improvements upon the river Aux Raisins, where it is crossed by the Ottawa and New York Ry.

No. 785. Nov. 27.—Authorizing the James Bay Ry. to construct a bridge across the 3rd concession road, Whitchurch tp., York county, Ont.

No. 786. Sept. 21.—Authorizing the protection of the north road in the municipalities of Burnaby and Coquitlam, B.C., where it is crossed by the Vancouver, Westminster and Yukon Ry.

No. 787. Nov. 27.—Authorizing the city council to lay water pipes under G.T.R. tracks in St. Catharines, Ont.

No. 788. Nov. 27.—Authorizing the Chatham, Wallaceburg and Lake Erie Ry. to open its line for public traffic from Dover St., Chatham, to Wallaceburg, Ont.

No. 789. Nov. 27.—Authorizing the city council to lay water pipes under G.T.R. tracks in St. Catharines, Ont.

No. 790. Nov. 28.—Ordering the G.T.R. and the C.P.R. as lessee of the Lindsay, Bobcaygeon and Pontypool Ry. to interchange traffic at Lindsay. See next column.

No. 791. Nov. 28.—Authorizing the Guelph and Goderich Ry. to construct an overhead crossing of the G.T.R. at Goderich Ont.

No. 792. Nov. 30.—Authorizing the Orford Mountain Ry. to open its line from Kingsbury to Windsor, Que., a distance of 10 miles, for public traffic.

No. 793. Nov. 30.—Amending order of Nov. 28, authorizing the interchange of traffic between the C.P.R. and the G.T.R. at Lindsay, Ont.

No. 794. Dec. 1.—Re water competition in B.C. See next item.

No. 795. Dec. 1.—Authorizing the Ontario Transmission Co., Ltd., to carry power wires over the tracks of the G.T.R., Michigan Central Rd., Canada Southern Ry., Wabash Rd., and Niagara, St. Catharines and Toronto Ry., in the tp. of Stamford, Ont.

No. 796. April 14.—Authorizing the C.P.R. to make certain changes in interlocking plant where the Canadian Northern Ry. tracks cross the C.P.R. tracks at West Fort William. Ont.

No. 797. Nov. 20.—Authorizing the C.P.R. to cross with two aditional tracks Elizabeth St., Toronto Jct., Ont.

No. 798. Dec. 2.—Authorizing the Guelph and Goderich Ry. to use and occupy certain lands of the G.T.R. in Goderich, Ont.

No. 799. Nov. 7.—Authorizing the protection of Greenwoods Ave., Toronto, by means of an electric bell.

No. 800. Dec. 2.—Authorizing the C.P.R. to open for public traffic the portion of its line known as the Wetaskiwin branch extension from Camrose to Daysland, Alberta.

No. 801. Dec. 2.—Amending and approving supplements to Freight Classification. See next item.

Railway Commissioners' Freight Orders.

Nov. 28, 1905.—In the matter of the application of the town of Lindsay, Ont., and the Flavelle Milling Co., for an Order, under secs. 214, 253, and other sections of the Railway Act, 1903, directing the G.T.R. Co., and the C.P.R. Co., as lessees of the Lindsay, Bobcaygeon and Pontypool Ry. Co., and the Lindsay, Bobcaygeon and Pontypool Ry. Co., to make all necessary arrangements and afford to all persons and companies all reasonable and proper facilities for the receiving, forwarding and delivering of traffic upon their several railways, and for the interchange of traffic between the said railways in the town of Lindsay, and for forwarding rolling stock from one of the said railways to the other in the said town and for the return thereof:—Upon hearing the evidence adduced and what was alleged by counsel for applicants and the several companies interested, and upon the report and recommendation of the Chief Traffic Officer of the Board—it is ordered:

1. That the said companies be directed forthwith to afford all persons and companies all reasonable and proper facilities for the receiving, forwarding, and delivering of traffic upon and from their several railways and for the interchange of traffic and the necessary rolling stock therefor between their respective railways in the said town of Lindsay, at and by means of interchange track and connections between the lines of the said companies in Lindsay, and in respect of traffic coming from and going to points in Lindsay. 2. That so far as relates to the switching rates to be charged on such traffic, the said application be adjourned for further evidence and consideration to a day to be hereafter appointed by the Board. 3. That pending such further evidence and consideration and until further order, the following provisions shall apply subject to any order of the Board for the increase or decrease of rates on traffic carried in the meantime, namely:—(a) To and from all tracks and sidings used for the purpose of loading and unloading cars owned or controlled by, or connecting with the lines of the G.T.R. on the east side of the river Scugog, $3 per carload of 40,000 lbs. or less; $4 per carload of over 40,000 lbs. but not over 60,000 lbs.; and $5 per carload of over 60,000 lbs., no extra charge to be made for switching the empty car in the opposite direction. (b) To and from all tracks and sidings used for the purpose of loading and unloading cars owned or controlled by or connecting with the lines of the G.T.R. on the west side of the river Scugog, excepting such sidings adjoining the G.T.R. freight sheds or shed, as may be necessary for the convenient transfer thereto and therefrom of freight ordinarily handled by the G.T.R. employes, $4 per carload of 40,000 lbs. or less; $5 per carload of over 40,000 lbs., but not over 60,000 lbs.; and $6 per carload of over 60,000 lbs.; no extra charge to be made for switching the empty car in the opposite direction. 4. That all other devices, such as free or assisted cartage, or cartage allowances, intended to equalize the facilities of the respective railways for the collection and delivery of freight at or near Lindsay, except such as may be published in the freight tariff of the companies, are prohibited. That joint rates charged for the whole traffic be as provided by order of the Board in case of interchange of traffic at London.

WATER COMPETITION IN BRITISH COLUMBIA.

No. 794. Dec. 1, 1905.—In the matter of the application of the C.P.R. Co., under sec. 262, sub-sec. 4; sec. 274, sub-sec. 4; and sec. 276 of the Railway Act, 1903, for permission to meet on the Pacific coast the competition of independent water carriers not subject to the Railway Act, 1903—it is ordered:

That the company be granted permission to make competitive tariffs for the carriage of freight traffic on any of the roads hereinafter described, namely:—Between any ports on the mainland of British Columbia, between any ports in Vancouver Island or between any port or ports in Vancouver Island and any port or ports on the mainland of B.C., where the transportation is entirely in or on vessels particularized in sec. 276 of the Railway Act, 1903; or between any port or ports in Vancouver Island, and any port or ports on the mainland of B.C., where the transportation is partly over the railway of the company in Vancouver Island, and partly in or on vessels, as aforesaid, the said traffic to include none other than local port to port freight, which might otherwise be handled by exclusively water carriers, not subject to the Railway Act, 1903, and not to include any freight in transit to or from any point or points where the carriage is partly over the company's railway on the mainland; and may act upon and put in operation the said tariffs immediately upon the issue thereof by the said company, before such tariffs have been filed with the Board. That such tariffs shall, forthwith, after the making thereof, be forwarded to and filed with the Board; but the said company shall be exempt from otherwise publishing any of said tariffs, unless otherwise directed by the Board.

SUPPLEMENTS TO FREIGHT CLASSIFICATION.

No. 801, Dec. 2, 1905.—In the matter of the application of the Canadian Freight Association, under sec. 255 of the Railway Act, 1903, for approval of proposed supplements, filed as supplements 5 and 6, to the Canadian Freight Classification no. 12, the said supplements to be consolidated into one, to be known as no. 5. The commodities which have been moved from a lower to a higher class having been published in the Canada Gazette, on Aug. 5 and 12, 1905 (see RAILWAY AND SHIPPING WORLD, Sept., 1905, pg. 419). Upon the report and recommendation of the Chief Traffic Officer, it is ordered that

the changes embodied in the proposed supplements as consolidated are hereby legalized and sanctioned until such time as the Board shall revise, alter, or amend them, subject to the following modifications and exceptions, viz.:—

Supplement 5, page 2, item: "Mixed cars, furniture, wire mattresses and spring beds, o.r., released, minimum 14,000 lbs. per car, 4th class."

Supplement 5, page 4, item: "Amend 'machinery, all kinds, as per above,' to read —erase words (c. l. minimum 20,000 lbs.)" It is ordered that these two items be withdrawn from the said supplement 5, and be held over for further consideration.

Supplement 5, page 3, item: "Iron and steel:—Anchors, anvils and heavy forgings: erase 'Heavy Forgings,' 3-5, and add 'Heavy Forgings, same as Castings.'" Item: Erase "Forgings, heavy, in the rough, 4-5," and add "Forgings, heavy, same as castings."

It is ordered that these two items be amended so as to substitute for the present classification, and for that proposed as aforesaid, the following, namely:—

Forgings, 100 lbs., or over, each, l.c.l. 4 c.l. 5.

Forgings, under 100 lbs. each, same as castings under 100 lbs. each.

The Car Shortage Question.

The Chief Railway Commissioner, A. C. Killam, K.C., gave the following judgment under date of Nov. 27, 1905:—A. A. Wright has addressed to the Board two letters complaining of insufficiency of railway facilities for forwarding grain from ports on Georgian Bay and Lake Huron, and of discrimination in favor of Depot Harbor as against other ports in the allotment of cars for the carriage of grain; and that the C.P.R. Co., at Owen Sound, and the G.T.R. Co., at Midland, Collingwood and Meaford, "virtually refused," except at their own discretion, to receive from lake vessels export grain brought down from Fort William, unless to be forwarded from Georgian Bay elevators after the close of navigation at the port of Montreal. On account of complaints from several parties of shortage of cars and facilities for moving traffic, and of discrimination against their particular interests, the Board directed the Traffic Officer to enquire into the subject, and has had several interim reports from him. It also held a hearing relating particularly to a complaint of the Dominion Millers' Association, alleging unjust discrimination against the traffic in grain from lake ports for various flour mills in Ontario and in favor of traffic in grain for export from Canada. In the latter case it was found by a majority of the Board that the G.T.R. Co. had been discriminating in favor of traffic in grain from these ports for export via Montreal and Portland, and against shipments to millers; and the Board made an order directing that a certain method of distribution of cars be observed at the ports of Meaford, Midland, Collingwood and Point Edward, in cases in which the supply of cars should be insufficient to carry all the traffic offered. The representatives of the Dominion Millers' Association pressed for a further order with regard to the distribution of cars to these various ports, but the Board considered that it was not yet in a position to judge satisfactorily upon the effect of such an order on all interests that would likely be affected, and that it would be unwise for it to interfere in that way at present.

It is very evident that there is a general shortage of railway cars and equipment on the railways, both in Canada and in the U.S., at present. Such is usually the case at this time of year, but it appears to be accentuated this year on account of the bountiful crops in the West and the general activity of business. How far the railway companies are in fault in not providing for the present situation, we are not now in a position fully to judge. It would not, in our opinion, be proper for us to make any order for immediate provision in this respect, as it would be impossible for the railway companies to obey it. The best, we think, that can be done is to inquire into the whole situation and to endeavor to find a remedy for the future. The question of the proper and fair distribution and allotment of railway cars and equipment, in case of shortage, is a very difficult one. The Board is not authorized to undertake the direction of the distribution and allotment of railway cars and equipment. It would be impossible for the Board to perform this office properly. Railway companies have in their employ officers skilled in this work, having before them daily reports from all points on the systems of their respective companies. They have a knowledge of the nature of the business done at different points and the respective requirements in this respect which this Board could not hope to acquire. Even with such officials, the work must be a very difficult one. The function of the Board in this respect is to see that specific provisions of the Railway Act are carried out. The only provisions of the Railway Act specifically relating to the allotment and distribution of railway cars, are those contained in sec. 253, which forbid railway companies to distribute or allot freight cars so as to discriminate unjustly against any locality or industry, or against any traffic which may originate on their respective railways destined to points on other railways in Canada with which they connect. The same section also contains provisions which might properly be considered as indirectly governing the relative supplying of cars for different purposes; such, for example, as the prohibition against giving undue or unreasonable preference or advantage to particular persons or particular descriptions of traffic, and against making differences in treatment in the receipt, etc., of goods in favor of or against particular persons or particular descriptions of traffic, or subjecting such to undue or unreasonable prejudice or disadvantage. Even in these clauses, it should be noted, the prohibition is not generally against preference or discrimination, but against "undue or unreasonable preference" and "unjust discrimination."

In the carriage of grain brought by vessels to ports on Georgian Bay and Lake Huron and thence by rail, the usual course is to unload the grain from vessels into elevators and transfer it thence to railway cars. As the reports of the Traffic Officer show, the G.T.R. Co. does not own elevators at Midland, Meaford or Point Edward, and while it does own the elevator at Collingwood, it has leased it to private parties, so that none of these elevators are controlled by the railway company. The only method by which that company can refuse to receive from lake vessels export grain brought down from Fort William to any of these ports is by failing to supply sufficient cars for its reception from the elevators, or by refusing to allow the loading of grain into cars which are on hand. The latter alternative can at once be rejected; but it may be assumed that the railway companies mentioned have not supplied sufficient cars to take away grain as fast as it could be brought by ship to these different ports and transferred to cars. It appears that, during Sept and Oct. of this year, much larger quantities of grain were received at and taken by rail from Depot Harbor over the line of the Canada Atlantic Ry. than were so received and taken last year. It also appears that, in 1903, there were shipped from vessel through the elevators to railway cars at Point Edward, Sarnia, Midland, Meaford, and Collingwood combined, 3,750,574 bush. of grain; in 1904, 2,730,329, and in 1905, 2,395,669; that, as regards Midland, to which Mr. Wright's comparison principally relates, the shipments were in 1903, 2,206,558; in 1904, 796,710, and in 1905, 959,723; and that there were unloaded at that port during these months in 1904, seven vessels whose cargoes aggregated 949,394 bush., and in 1905, 13 vessels whose cargoes aggregated 1,536,931 bush.

Until recently, Depot Harbor was a port on an independent line of railway—the Canada Atlantic—with which the G.T.R. Co. had nothing to do. That line was absorbed into the system of the G.T.R. Co. on Oct. 1, 1905. It was taken over as a running concern, with its various contracts and arrangements (for the fulfilment of which it is reasonable to presume that some preparation had been made), and with three large steamships engaged in the business of carrying goods by lake between Depot Harbor and ports in the U.S. These ships were registered in the U.S. and could not be used for carrying traffic between Canadian ports. The G.T.R. Co., during Oct., continued the operation of these vessels and received their cargoes at Depot Harbor for transportation to Coteau and other points. Our Traffic Officer reports that, in doing this, the railway company and the managers of the elevators did not discriminate, but took other vessels in regular turn with these. Both the Canada Atlantic and the G. T. Railway Companies were authorized by Parliament to make connections with transportation companies in the U.S., and to carry through Canada traffic originating in the U.S. The G.T.R. Co. claims that Parliament sought to encourage this traffic. Whether it did or not, it is certainly desirable that some of it should be diverted over Canadian railways and to Canadian ports, provided this can be done without such injury to Canadian interests as would more than compensate for the benefits to be derived therefrom. During the hearing of the complaint of the Dominion Millers' Association, it was stated on behalf of the G.T.R. Co. that none of the cars or equipment of the other portions of the company's system had been diverted to the Canada Atlantic route since its acquisition, and that, on the other hand, none of the cars or equipment of the Canada Atlantic line had been diverted to traffic of the other portions of the G.T.R. system. Apparently some freight cars of the G.T.R. are being used on the Canada Atlantic line, but whether the number is in excess of that which, in the ordinary course of business, would run over that line, the Board has not yet been able fully to determine. On the other hand, the Board knows that a large number of cars from U.S. railways are being used on the Canada Atlantic line. Whether these are in excess of or less than those usually found thereon, the Board is not at present informed. Our Traffic Officer is engaged on an inquiry respecting these matters. In the meantime the Board is not in a position to determine whether there has been discrimination by the G.T.R. Co. in favor of Depot Harbor and against Midland, or other ports, in the supply of cars. Certainly the Board cannot undertake to do as Mr. Wright asks—make a peremptory order requiring the G.T.R. Co. to move Canadian grain to the extent of at least 150,000 bush. a day through Midland. In order to do this, the railway company would be obliged to take cars used for other traffic, or upon other portions of its system, and thus probably occasion great loss and injury to other parties and other interests.

The Byrnes Construction Co. has been incorporated under the Ontario Companies' Act, with a capital of $40,000 and offices at Hamilton, Ont., to carry on a general contracting business. The provisional directors are:—J. W. Nesbitt, J. G. Gauld, J. Dickson, N. Slater, Hamilton, Ont.

Gas Pipe Lines Under Railways.

A number of orders have recently been passed by the Board of Railway Commissioners authorizing the pipe line companies, formed for the purpose of distributing natural gas, to carry their lines under the tracks of railway companies. The following order made by the Board of Railway Commissioners Nov. 4, respecting the carrying of the lines of the Ontario Pipe Line Co. under the G.T.R. tracks at 10 points in the city of Hamilton, is of interest as showing the conditions upon which such orders are granted:—

That the applicants are authorized, at their own expense, to lay the said gas pipes or mains under the tracks of the G.T.R. on the lines between the points indicated, and in the manner shown on the respective plans, filed under reference no. 17,813, and thereafter to maintain, renew or repair the same as may be necessary, subject to the observance and performance by the applicants, terms and conditions following, viz.:—(1). Each of the mains shall be of the diameter shown on the plan applicable to the crossing at which pipe is to be laid, and shall be encased within a larger pipe, open at both ends, and properly ventilated, and of sufficient size and strength to properly encase and protect the same. The pipes shall, for the whole distance between the points, be of cast iron or of such other material as may from time to time be directed by the Board, and shall be laid at the depth below rail level shown on the respective plans, and the joints of each of the pipes shall be at all times so securely attached together and properly caulked as to prevent, so far as possible, any escape of gas. (2). All work in connection with the laying, maintenance, renewal or repair of the pipes, and their continued supervision, shall be performed by the applicants, but no work shall at any time be done in such a manner as to obstruct, delay or in any way interfere with the operation of any of the trains or traffic of the G.T.R. (3). The applicants shall maintain the said pipes in good order and condition so that at no time shall any damage be caused to the property of the G.T.R., or any of the tracks be obstructed, or the usefulness or safety of the same for railway purposes be impaired, or the full use and enjoyment thereof, as heretofore by the G.T.R., in any respect interfered with. (4). Before any work of laying, renewing or repairing any of the pipes is begun, the applicants shall give to the Superintendent of the G.T.R. at Allandale, where the pipes are laid under any of the tracks of the Northern Division, and to the Superintendent of the G.T.R. at Toronto, where the pipes are laid under any of the tracks of the Middle Division, 48 hours' notice in writing so as to enable the G.T.R. to appoint an inspector to see that the work is performed in such a manner as shall, in all respects, comply with the directions of this order, and the applicants shall pay the wages of such inspector, which, however, shall not exceed $3 per day. (5). The applicants shall assume and be responsible for all risk of accident, loss, injury or damage of every nature whatever, which may happen or be in any way caused during or by reason of the laying, maintenance, renewal, or repair of the said pipes, or either of them, or the use thereof, or by any failure on the part of the applicants, their servants or agents, to at all times observe and perform fully and in all respects the terms and conditions of this order, and from and against all claims, costs, charges, suits, actions or proceedings arising out of or by reason of any such accident, the applicants shall fully indemnify, defend and save harmless the G.T.R. (6). Should the G.T.R., at any time hereafter, place any tracks at any of said points above mentioned outside the said points marked upon the plans on file, the applicants shall at once lay, or cause to be laid, and thereafter maintain under such tracks, and for a space of 10 ft. beyond the outermost rail, pipes of a similar character and material to those herein authorized to be laid between the points, and all the provisions of this order shall apply to the laying, maintenance, renewal or repair, of such pipes, fully and in all respects. (7). Should any dispute arise between the applicants and the G.T.R. as to the terms and conditions of this order, or as to the manner in which the said pipe or pipes encasing the same are being laid, maintained, renewed or repaired, the same shall be referred to the Chief Engineer of the Board, whose decision shall be final and binding on all parties.

The Canadian Locomotive Co.'s Strike.

It was recently announced that the strike of machinists at the Canadian Locomotive Co.'s works at Kingston, Ont., was at an end. As far as the company is concerned the strike has practically been a thing of the past for the last two years and a half; the shops have been running full with entire satisfaction to the company, and the best of feeling has prevailed between the company and its employes.

The company has always stood for the "open shop," and in accordance with that principle, its doors have been opened to all competent men, regardless of the fact as to whether they belonged, or did not belong, to a trades union. In the carrying out of this principle the shops were open to the members of the International Association of Machinists at any time since the strike began, but that organization saw fit to continue this paper strike and in its journal the plant was named as a "struck" shop; consequently, members in good standing in that organization were not allowed to take work with the company. Evidently, better counsel has prevailed with the executive of the association, and as a result the strike has been declared off. In consideration for this the company was asked to make certain concessions; that is to say, to agree to employ a certain number of the members of the association, or to give preference to its members until such time as those who belonged to Kingston and desired re-employment in the shops had been placed, but the company realized that to extend this preference to these men necessarily would mean discriminating against other men for the time being at least, and would not be in accord with the principle for which the company stood when the strike was proclaimed; therefore the management declined to make any concessions and simply agreed to continue carrying out its policy of non-discrimination; in other words, it continues running an "open shop" open alike to the members of the International Association and to all others.

This strike originally was not fought on any question of wages, or hours, or anything of that kind. The machinists' union made certain demands upon the company, including increase of pay, a 54 hour week, the limitation of apprentices, the abolition of piece work, and other things of that kind. On all these the company declared itself ready and willing to negotiate, or, if negotiations failed, to refer the questions at issue to arbitration. But, included in the demands were two which the company peremptorily refused to consider. These were: 1st. That in engaging machinists the company should give preference to members of the International Association of Machinists; in other words, that the company should discriminate and close its shops to the members of the Amalgamated Society of Engineers (the English Union) and to non-union machinists. 2nd. That no handy man shall be advanced to the position of a machinist no matter how long he had been employed on the class of work, nor how competent he may have become; that is to say, he should not be employed on any vise, lathe, planer, shaper, milling machine, slotting machine or boring mill. The union further demanded that a man named Graham should be taken off a wheel job then recently given him, and that that job should be given to a machinist.

On the company's refusal to grant these two demands the men went on strike, and, therefore, they were really the only questions at issue. The union has now abandoned both these demands, as the shops remain open to every man, regardless of his affiliations or non-affiliations. The company has not discharged the man whose dismissal the union demanded, and has not agreed to refuse promotion to men, who, although not having served an apprenticeship as a machinist, have proved by experience, competency and industry, to be worthy of promotion. When it was rumored in the shops that the strike had been called off, some of the employes became very nervous lest the company had, tacitly, agreed to dispense with their services in order to make room for the return of some of the striking machinists, and the company found it necessary to post in the shop the following notice:—

"The International Association of Machinists, through its Second Vice-President Mr. Champion, has called off the strike which was proclaimed in this shop on April 30, 1902. It occurs to us that, learning this, some of our employes, who had entered these shops while the strike was in progress, and who had taken the places of the striking machinists, might feel alarmed lest we had agreed—in consideration of the strike being called off—to dismiss them to make way for the strikers. To remove any such impression, we desire to state the strike was not called off at our request or suggestion; we have made no concessions whatever, and no man, whose conduct and services are satisfactory, will be dismissed to make room for others, whether they belong to the International Association of Machinists or not. Below we give a copy of a document to which we have Mr. Champion's signature, from which it will be seen that we stand to-day just where we did the day the strike was proclaimed, viz., for absolute non-discrimination against any man, whether he belongs to an organization or not. (Signed) Canadian Locomotive Co., Limited, C. Bermingham, Managing Director.

"Mr. Champion, Second Vice-President International Association of Machinists, visited Kingston on Nov. 21, and had a conference with Mr. Bermingham, Managing Director of the Canadian Locomotive Co., and as a result the Kingston strike is called off, and the firm agrees to apply its policy of absolute non-discrimination to the members of the International Association of Machinists, as well as to all others."

The winter transcontinental train service on the C.P.R. provides for the running of an express train daily each way between Montreal and Vancouver, and a daily train each way from Montreal as far west as Calgary.

In order to improve arrangements in connection with the transportation of freight over the G.T.R. lines and connections, it has been arranged to pass all customs entries for freight carried into the U.S. at St. Albans, Vt., and to accomplish this purpose the U.S. Treasury Department has authorized the closing of Swanton, Vt., as a port of entry. Swanton was the point at which the freight carried over the Canada Atlantic Ry. was passed into the U.S., reaching that point from Aldburg Jct., over the track of the Central Vermont Ry—a G.T.R. controlled line. Swanton, we are advised, is the terminus of the G.T.R. Ottawa Division, and not St. Albans, Vt., as recent press reports stated.

January Birthdays.

Many happy returns of the day to—

G. Bazzard, ex-Freight and Passenger Agent, Delaware, Lackawanna and Western Rd., Toronto, now of Hamilton, Ont., born at Westhide Court, Herefordshire, Eng., Jan. 3, 1838.

A. H. Bears, Master of Bridges and Buildings, C.P.R., Winnipeg, Man., born at Charlottetown, P.E.I., Jan. 6, 1857.

R. H. Bell, Travelling Freight and Passenger Agent, Canadian Northern Ry., Montreal, born at Toronto, Jan. 13, 1865.

G. M. Bosworth, 4th Vice-President C.P.R. Montreal, born at Ogdensburg, N.Y., Jan. 27, 1858.

G. McL. Brown, General Passenger Agent C.P.R. Atlantic Steamship Line, Montreal, born at Hamilton, Ont., Jan. 29, 1856.

P. W. Brown, Purchasing Agent, Duluth, South Shore and Atlantic Ry., and Mineral Range Ry., Marquette, Mich., born at Uxbridge, Worcester Co., Mass., Jan. 18, 1845.

E. L. Chudleigh, Chief Train Dispatcher C.P.R., Cranbrook, B.C., born at Clinton, Ont., Jan. 3, 1873.

W. A. Cowan, Resident Engineer, C.P.R., Toronto, born at Galt, Ont., Jan. 22, 1877.

N. S. Dunlop, Tax Commissioner C.P.R., Montreal, born near Almonte, Ont., Jan. 17, 1861.

Sir Sanford Fleming, K.C.M.G., Director C.P.R., born at Kirkcaldy, Scotland, Jan. 7, 1827.

T. A. Foque, Mechanical Superintendent Minneapolis, St. Paul and Sault Ste. Marie Ry., Minneapolis, Minn., born at Boston, Mass., Jan. 14, 1866.

H. V. Harris, ex-General Manager Midland Ry. of Nova Scotia, Truro, N.S., born at Devonport, Devonshire, Eng., Jan. 16, 1857.

G. F. Hichborn, Agent Great Eastern Fast Freight Line, New York City, born at Boston, Mass., Jan. 31, 1875.

W. J. Hunter, Commercial Agent, G.T.R., Winnipeg, born in Toronto, Jan. 10, 1864.

A. Lichteinhein, Galena Signal Oil Co., New York, born there Jan. 15, 1855.

A. J. McGee, General Accountant Temiskaming and Northern Ontario Ry., Toronto, born at Lachine, Que., Jan. 24, 1876.

W. Phillips, General Eastern Agent Canadian Northern Ry., Toronto, born at Toronto, Jan. 31, 1870.

J. Pullen, Assistant Freight Traffic Manager, G.T.R., Montreal, born at Shepton Mallet, Somersetshire, Eng., Jan. 23, 1863.

S. J. Sharp, Western Passenger Agent C.P.R. Atlantic Steamship Lines, Toronto, born at London, Ont., Jan. 21, 1860.

J. R. Steele, Freight Claims Auditor C.P.R., Montreal, born at St. Johns, Newfoundland, Jan. 14, 1856.

W. A. Trueman, Director, Secretary and Treasurer Albert Southern Ry., Albert, N.B., born at Wallace, N.S., Jan. 29, 1849.

S. G. Wagstaff, Commercial Agent, G.T.R., Toledo, Ohio, born at Hamilton, Ont., Jan. 6, 1866.

F. J. Watson, Division Freight Agent G.T.R., Montreal, born at Toronto, Jan. 12, 1866.

G. H. Webster, C.E., President British Columbia Contract Co., Vancouver, B.C., born at Creemore, Ont., Jan. 31, 1857.

T. H. White, Chief Engineer of Location and Construction, James Bay Ry., and Great Northern Ry. of Canada, Toronto, born at St. Thomas, Ont., Jan. 27, 1848.

The New York Court of Appeals has decided that if a passenger cannot find a seat in a car for which he has bought a ticket he has a right to go into a drawing-room car and take a seat until one is provided for him in the ordinary passenger car, and also that if seats are not to be had because they are occupied by parcels he is not bound to ask the owners to remove them.

Railway Equipment Notes.

The C.P.R. has placed an order for building 10 freight locomotives at its Angus shops, Montreal.

The Canadian Locomotive Co:, has delivered five of the 15 Mogul locomotives it is building for the G.T.R.

The Central Vermont Ry has ordered from the American Locomotive Co.'s Schenectady works, four 10-wheel loocmotives.

The Dominion Atlantic Ry. is reported to be arranging to have one of its locomotives, recently damaged in a collision, repaired at the I.C.R. shops, Moncton, N.B.

The Springfield Ry., which is a short line owned by the Davison Lumber Co., Bridgewater, N.S., has purchased a snowplow from Rhodes, Curry & Co., Amherst, N.S.

The Intercolonial Ry. received between Nov. 15 and Dec. 15, one first-class passenger car and 63 box cars, 60,000 lbs. capacity, from Rhodes, Curry & Co., Amherst, N.S.

The G.T.R. has ordered from the American Locomotive Co.'s Schenectady works, 10 consolidation and eight 10-wheel locomotives for its lines in the U.S. west of Detroit and St. Clair rivers.

Eight G.T.R. locomotives were badly damaged by a fire at the roundhouse, Bathurst St., Toronto, Nov. 27. Four were sent for repairs to the Toronto shops, and two each to Stratford and Montreal.

The C.P.R. between Nov. 15 and Dec. 13, received the following rolling stock from its Angus shops, Montreal:—6 locomotives, 5 first-class cars, 3 baggage and express cars, 267 box cars and 165 flat cars.

The Interstate Commerce Commission's order that all rolling stock used in interstate commerce must be fitted with air brakes by Aug., 1906, affects the C.P.R., the G.T.R., and other Canadian lines whose cars run into the U.S.

The Intercolonial Ry. placed the following orders for rolling stock during month ended Dec. 15:—25 refrigerator cars, 60,000 lbs. capacity; two flangers, with Rhodes, Curry & Co., Amherst, N.S.; and 10 wing elevator snow plows.

The Locomotive and Machine Co. of Montreal has completed the six 2½-yard steam shovels ordered by the C.P.R., but delivery will not be made until the spring. Work is proceeding on the four 3½-yard steam shovels for the C.P.R.

The Quebec Central Ry. will probably place orders for the following rolling stock early in the year: 6 refrigerator cars, 14 stock cars, and six passenger coaches. It will receive during the current month two mogul locomotives from the Canadian Locomotive Co., Kingston, Ont.

The G.T.R. has ordered from the Locomotive and Machine Co. of Montreal, 40 consolidation freight locomotives, delivery to begin May 1. This is in addition to the 15 consolidation and ten 10-wheel locomotives ordered in Oct., particulars of which were given in our last issue.

The C.P.R. has under construction at its Angus, Montreal, shops, an electric motor which will be utilized on some of the company's lines in Quebec. This is an experiment only, and no decision has been reached in the way of specifically adopting electricity as a motive power.

The Intercolonial Ry. has placed the following orders for rolling stock:—100 box cars, 80,000 lbs. capacity; 100 box cars, 60,000 lbs. capacity, and 130 dump cars, with Rhodes, Curry & Co., Amherst, N.S.; 75 box cars, 60,000 lbs. capacity, with the Crossen Car Manufacturing Co., Cobourg, Ont.; and 25 box cars, 60,000 lbs. capacity, also in Canada.

Following are the general dimensions of the six locomotives for which the G.T.R. recently placed an order with the Canada Foundry Co., Toronto:—cylinders, 22½ and 35 in. diameter by 32 in. stroke; driving wheels, 63 in. centres; boiler 68⅜ in. diameter; firebox, 96⅛ in. long by 75¼ in. wide; tubes 353 of 2 in. diameter and 15 ft. long; wheel base, rigid, 17 ft.; driving, 17 ft.; engine 25½ ft.; total, 56 ft. 2½ in. Weight in working order, tender, 143,300 lbs.; on drivers, 170,000; on engine truck 26,000 lbs.; total weight of engine, 200,000 lbs.

Following are general dimensions of the 20 10-wheel freight locomotives for which an order has been placed by Mackenzie, Mann & Co. with the Canada Foundry Co., Toronto, for use on its different lines:—

WEIGHT.—On drivers, 130,000 lbs.; on engine truck, 30,000 lbs.; of engine, 160,000; of tender, 120,000 lbs.; total, engine and tender, 280,000.

CYLINDERS.—Diameter, 19 in.; stroke of piston, 36 ins.

BOILER.—Diameter, 62 in.; working pressure, 200 lbs.; grate area, 31 ft. 7 in.

TUBES.—Number, 24; diameter, 2 in.; 11 B.W.G.

DRIVING WHEELS.—Diameter, 57 in.; wheel base of drivers, 14 ft.

TENDER.—Water capacity, 5,000 imperial gals.; coal, 10 tons. Fitted with Simplex truck bolsters.

Following are general dimensions of the four switching locomotives for which an order has been placed by Mackenzie, Mann & Co. with the Canada Foundry Co., Toronto:

CYLINDERS.—Diameter, 19 in.; stroke of piston, 24 in.

WHEELS.—Drivers, 50 in. diameter; driving wheel base, 11 ft. 6 in.; total wheel base, 11 ft. 6 in.

WEIGHT.—In working order, on drivers, about 130,000 lbs.; total, 130,000 lbs.

BOILER.—Diameter, 64 in.; working pressure, 180 lbs.

TUBES.—Number, 271; diameter, 2 in.; length, 10 ft. 6 in.

FIREBOX.—Length, 96 in.; width, 34⅜ in.

SIZE.—Width, 10 ft.; length, 57 ft.; total wheel base of engine and tender not to exceed 41 ft.; height above rail, 14 ft. 7 in.; width, 9 ft. 6 in., tender filling hole.

TENDER.—Capacity, 3,200 imperial gals. water, and 6 tons soft coal.

Following are general dimensions of the eight 10-wheel passenger and freight locomotives, for which an order was recently placed with the Canadian Locomotive Co., Kingston, for Mackenzie, Mann & Co.'s railway system:—

WEIGHT IN WORKING ORDER.—On drivers, 107,000 lbs.; total, 135,000 lbs.

WHEEL BASE OF ENGINE.—Rigid, 13½ ft.; total 23 ft. 8 in.; total engine and tender, 60 ft. 4½ in.

DRIVING WHEELS.—Diameter, 63 in.; centres, cast iron; driving journals, 8½ by 10 in.

CYLINDERS.—Diameter, 18 in.; by 24 in. stroke.

BOILER.—Type, radial stayed, wagon top; working pressure, 200 lbs.; number of tubes, 236; diameter of tubes, 2 in.; length of tubes, 11 ft.

BRAKES—Westinghouse.

TENDER.—Weight, loaded, 122,000 lbs.; capacity, 5,000 imperial gallons; style of tank, U shaped, style of truck, four wheeled; diameter of wheels, 33 in.; kind of wheel, double plate chilled; diameter and length of journal, 5½ by 10 in.; Simplex brake beam.

The 60 locomotives for which the C.P.R. had placed orders as mentioned in our last issue—35 with the Locomotive and Machine Co. of Montreal, 15 with the Canadian Locomotive Co., Kingston, Ont., and 10 with its Angus, Montreal, shops, will be all of the same class, D. 10-0 for passenger and freight service, delivery to commence in Dec., 1905, and to be completed during Jan. and Feb., 1906. Following are general dimensions:—

WEIGHT.—On drivers, 142,000 lbs.; total 190,000.

CYLINDERS.—Diameter, 21 ins.; stroke of piston, 28 in.

WHEELS.—Diameter of drivers, 63 in.; tyres, truck wheel, cast steel; tender wheel, wrought iron disk; wheel centres, cast steel.

BOILER.—Type, extended wagon top with radial stayed fire-box; working pressure, 200 lbs.; heating surface, 2,413 sq. ft.

TUBES.—Number 240 and 22; outside diameter, 2 in. and 5 in.; length, 14 ft. 2 in.

FIREBOX.—Length, 102 in.; width, 70 in; grate area, 50 sq. ft.

TENDER.—Capacity, 5,000 imperial gals. water, and 10 tons coal.

SPECIAL FITTINGS.—C.P.R. standard steel axles, brake shoes and springs; Westinghouse air brake Simplex brake beams.

Allan Line Steamers.—D. O. Wood has been appointed General Freight Agent for Ontario. Office, Toronto.

G. E. Bunting continues in the service as Travelling Freight Agent. Headquarters, Toronto.

Canada Atlantic Transit Co.—J. Pullen, Assistant Freight Traffic Manager, G.T.R., has issued a circular announcing the following appointments for the Canada Atlantic Transit Co.—H. M. Baker, agent, National Dispatch Line, New York, has also been appointed agent, C.A.T. Co.; vice H. S. Heydon, resigned. Office, 82 Wall St. C. J. Pierce, heretofore New England Agent, National Despatch Line, has also been appointed agent C.A.T. Co. at Boston, in charge of New England territory, vice J. Ritchie, resigned. Office, Board of Trade Building. T. C. Burgess, agent at Minneapolis, Minn., vice H. A. Walmsley, transferred. Office, 521 Guaranty Loan Bldg. Mr. Burgess is the commercial agent of the G.T.R. at Minneapolis.

Canadian Northern Ry.—With the extension of the main line to Edmonton there has been a reorganization of the operating staff, particularly in the fourth district, and a General Superintendent has been appointed.

W. A. Brown, heretofore Superintendent District at Port Arthur, Ont., has been appointed General Superintendent, with office at Winnipeg, Man.

J. R. Cameron, heretofore Superintendent at Battleford, Sask., has been appointed Superintendent District 1, succeeding W. A. Brown, appointed General Superintendent. Office, Port Arthur.

F. T. Peebles, heretofore train dispatcher Districts 3 and 4, Dauphin, Man., has been appointed Train Dispatcher District 1, Port Arthur, succeeding T. Henderson.

The mileage of District 1 remains as heretofore, 505.6 miles.

No changes have been made in the officials of District 2, but the mileage has been increased from 438.6 to 493.2 miles, in addition to the Winnipeg terminals. The district now comprises the following lines: Carman Jct. to Belmont, 117.5 miles; Winnipeg to Emerson, 66.6 miles; Morris to Somerset, 62.2 miles; Belmont to Virden, 90.9 miles; Emerson to Ridgeville, 10.1 miles; Oak Point Jct. to Oak Point, 54.0 miles; Greenway to Adelpha, 51.9; Hartney Jct. to Brandon, 40.0 miles.

There has been no change made in the officials of District 3, at Dauphin, Man., nor in the mileage, which remains at 763.7 as heretofore. The train dispatchers at Dauphin heretofore did the dispatching for the line from Gilbert Plains Jct. westerly, as well as for District 3, but will in future do the dispatching for District 3 only, a new office having been opened for District 4.

The main line from Gilbert Plains Jct., Man., to Humbolt, Sask., 244.3 miles, was heretofore District 4, and was in charge of an Acting Superintendent at Kamsack, Sask., while the train dispatching was done by the staff of District 3 at Dauphin. District 4 has now been extended from Humbolt to Edmonton, and headquarters of the district have been moved from Kamsack to Battleford. J. Abbot, heretofore Acting Superintendent at Kamsack, has been appointed Acting Superintendent of the extended division.

J. R. Cameron, who previously had been Superintendent at Kamsack, moved forward to Battleford on the completion of construction, and had charge of the work of placing a train service in operation on the new line.

A dispatching office for the district has been opened at Battleford, J. Rochon being appointed Chief Dispatcher, with T. M. Ryan and W. Kirkpatrick as train dispatchers.

W. J. Pace, in charge of the operations of the Edmonton, Yukon and Pacific Ry. at Edmonton, Alta., has also been appointed Assistant Superintendent District No. 4, C. N. Ry. Office, Edmonton, Alta.

The mileage of the district has been increased from 244.3 to 644.2 miles, and includes the line from Gilbert Plains Jct., Man., to Edmonton

Canadian Pacific Ry.—W. A. Cooper has been appointed Superintendent of Sleeping, Dining and Parlor Cars, succeeding G. McL. Brown, promoted. Office, Montreal.

H. H. Vaughan, heretofore Superintendent of Motive Power, has been appointed Assistant to the Vice-President. His duties will consist of the general charge over all motive power, electrical and mechanical matters on Eastern Lines. Office, Windsor St. Station, Montreal.

J. B. Elliott has been appointed General Master Mechanic, Eastern Lines. Office, Angus shops, Montreal.

N. S. Dunlop, Tax Commissioner, has also been appointed claims adjuster for Eastern Lines. Office, Montreal.

W. R. Maxwell has been placed in charge of the work in connection with the reservations on the company's Atlantic and Pacific steamers for through passengers, and detail work in connection with Chinese passengers, in the General Passenger Office, Montreal, heretofore in charge of W. G. Annable, appointed General Baggage Agent.

A. F. Smith, heretofore Chief Train Dispatcher District 1, Ontario Division, Toronto, has been appointed Train and Station Inspector, Eastern Lines. Headquarters, Montreal.

H. E. Kelly, heretofore Night Chief Train Dispatcher, Ontario Division, Toronto, has been appointed Chief Train Dispatcher there, succeeding A. L. Smith, promoted.

W. A. Killingsworth, heretofore Dispatcher District 1, Ontario Division, Toronto, has been appointed Night Chief Dispatcher there, for Ontario Division, succeeding H. E. Kelly, promoted.

—. Pennefather has been appointed acting locomotive foreman, temporarily, at Macleod, Alta., pending the appointment of a successor to M. S. Wheatley, appointed general foreman, Esquimalt and Nanaimo Ry.

J. R. McNabb has been appointed Trainmaster, District 2, Western Division, succeeding D. McLean. Office, Cranbrook, B.C.

J. G. Norquay has been appointed road foreman of locomotives, District 2, Western Division.

M. S. Wheatley, heretofore general locomotive foreman C.P.R., at Macleod, Alta., has been appointed general foreman, E. and N. Ry., succeeding T. F. Haggart, resigned. Headquarters, Wellington, B.C.

Chicago and Northwestern Ry.—We are advised that the appointment of W. L. Wyand as Canadian Excursion Agent, with headquarters at Winnipeg, is for a limited period only.

Grand Trunk Ry.—E. S. M. Lovelace, who has been in the employ of the company for some years, and has latterly been engaged on various parts of the line in connection with new work, has been appointed Assistant Engineer at Hamilton, Ont., succeeding W. P. Chapman, who has entered the James Bay Ry. service.

A dispatching office has been established at Palmerston, Ont., for the northern portions of the Middle Division Lines. A. Webster, M. D. Thomson and C. G. Rutledge have been appo nted dispatcher.

C. H. Hambly, heretofore freight agent at Trenton, has been appointed freight agent at Kingston, Ont., succeeding W. Thomson, promoted.

W. Thomson, heretofore Freight Agent at Kingston, Ont., has been appointed to the same position at Ottawa, vice R. K. Claire.

The following agents have been appointed: Lennoxville, Que., E. J. Astell; Emsdale, Ont., C. L. Bowles; Inglewood, Ont., J. W. Masters (Relvg.); St. George, Ont., C. R. Anderson; Belgrave, Ont., D. F. McGregor; Outside Ticket Agents: Brockville, Ont., John H. Fulford; Niagara Falls, N.Y., W. J. Hamilton.

R. G. Butler, General Agent G.T.R., Milwaukee, Wis., has also been appointed Manager of the G.T. Milwaukee Car Ferry Co., with charge of operation.

Lake Erie and Detroit River Ry.—J. Harmon, Receiver, of the Pere Marquella Rd., has been appointed Receiver, L. E. and D. R. Ry. by the Exchequer Court, Ottawa.

Mackenzie, Mann & Co.'s Eastern Lines.—H. K. Wicksteed, formerly Chief Engineer James Bay Ry., is now Chief Locating Engineer for M., M. & Co.'s Eastern Lines.

New York Central Rd.—C. F. Daly's appointment as Passenger Traffic Manager of lines east of Buffalo, announced in our last issue, includes the Boston and Albany Rd., West Shore Rd., St. Lawrence and Adirondack Ry., New York and Ottawa Ry. and Rutland Rd.

W. J. Lynch's appointment as Passenger Traffic Manager of lines west of Buffalo, includes the following lines:—Lake Shore and Michigan Southern, Cleveland, Cincinnati, Chicago and St. Louis, Michigan Central, Lake Erie and Western, Indiana, Illinois and Iowa, Indiana Harbor, Lake Erie, Alliance and Wheeling, Dunkirk, Allegheny Valley and Pittsburg.

The General Advertising Department, which has been established under the management of G. H. Daniels, will embrace all the lines above mentioned as coming under the respective jurisdictions of Messrs. Daly and Lynch.

Pere Marquette Rd.—G. W. Perkins, of J. P. Morgan & Co., has been elected Chairman of the Board.

J. Harmon has been appointed Receiver of the P.M. Rd., and also of the Cincinnati, Hamilton and Dayton Rd.

Quebec Central Ry.—As foreshadowed in our last issue, F. Grundy, who has been General Manager for 17 years and Vice-President for three years, has resigned the position of General Manager and has been succeeded by J. H. Walsh, who has been General Freight and Passenger Agent for 24 years.

E. O. Grundy, who has been Assistant to the General Freight and Passenger Agent for 14 years, has been appointed General Freight and Passenger Agent

Robert Reford Co., Ltd.—A. Reford who was appointed Western Agent when D. O. Wood resigned to enter the Allan Line service, has returned to Montreal, and has been succeeded by E. T. Boland, heretofore Western Freight Agent, Dominion Line Steamships, Portland service. Office, Union Station, Toronto.

Wabash Rd.—F. H. Tristram, Assistant General Passenger Agent, has been transferred to Chicago, Ill., vice F. A. Palmer, resigned.

R. F. Kelley has been appointed Assistant General Passenger Agent, with headquarters at Pittsburg, Pa., vice F. H. Tristram, promoted.

R. N. Collyer has been appointed General Agent at Buffalo, N.Y., in charge of the operating, freight and passenger departments, in freight and passenger territories heretofore under the jurisdiction of J. J. Mossman and R. F. Kelley, promoted. Freight and passenger representatives in this territory will report direct to Mr. Collyer.

J. J. Mossman has been appointed Division Freight Agent at Detroit, Mich., vice R. N. Collyer, promoted.

In connection with the merging of the Buffalo and Detroit divisions, we are advised

WILLIAMS & WILSON

Sole Selling Agents for Leading Manufacturers of Machinery for

Total.....	£3,372,937	£3,189,659	£183,278	....

The G.T. Pacific Ry. has received some 7,000 replies to its offer of $250 in prizes for a name for the Pacific terminus of the projected line.

An unconfirmed press report states that the G.T.R. is negotiating with the Ontario Government with a view of building an hotel in the Algonquin National Park.

C. E. Benjamin, heretofore travelling passenger agent at St. Louis, Mo., has been appointed General Agent Passenger Department of the C.P.R.'s Atlantic Steamship service. Office, 232 South Clarke St., Chicago.

The New Brunswick and Prince Edward Island Ry. has put in force an increased rate for freight and passenger traffic. The passenger rate between Sackville and Cape Tormentine, N.B., has been increased 15 cents, and intermediate points in proportion.

The Great Northern Construction Co., which is being wound up under an order of the Quebec courts, was organized in New Jersey, some years ago, for the purpose of constructing a portion of what is now the Great Northern Railway of Canada. Col. J. K. McNaught is President of the company, and was a Vice-President of the G.N. Ry., until it passed under the control of Mackenzie, Mann & Co. J. Hyde of Montreal is the liquidator. A statement as to assets and liabilities is being prepared.

The Canadian Northern Ry. has placed a tri-weekly passenger train service in operation on its main line between Winnipeg, Man., and Edmonton, Alta., via Gilbert Plains Jct., 825 miles. The train leaves Winnipeg at 8 a.m. Mondays, Wednesdays and Fridays, reaching Edmonton at 19.30 (7.30 p.m.) Tuesdays, Thursdays and Saturdays. The eastbound train leaves Edmonton 24.01 (12.01 a.m.) Mondays, Wednesdays and Fridays, reaching Winnipeg 13.30 (1.30) p.m. Tuesdays, Thursdays and Saturdays. The company has also extended its train service from Leary's on the Carman section to Belmont, 54.4 miles; and from Hartney to Virden on the Hartney section, 43.00 miles, these trains being over recently completed branch lines, and portions of older lines, the sections and the train runs having been rearranged to suit the requirements of the territory through which the lines pass.

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The Canadian Westinghouse Co. has issued circular 1,119 describing the motor generators, and circular 1127 describing control apparatus and trolleys for single phase railway systems manufactured at its works, Hamilton, Ont.

The B. Greening Wire Co., Hamilton, Ont., has issued its calendar for 1906, in the same style as in previous years, the plain figures for the days of the months being very convenient for office use. The back contains a number of useful tables for reference.

The Vulcan Iron Works Co., Toledo, Ohio, expects the largest year's business in its history. Improved machines and high speed tools have been installed, practically doubling the capacity of the works. The general arrangement of the shops has been changed so as to meet any demand which may arise and the equipment is now capable of turning out almost one steam shovel a day.

The American Locomotive Co. has issued a 36 pg. pamphlet describing the Cole 4-cylinder balanced compound locomotive. The reasons for recommending this form of construction of locomotives to meet American conditions are first outlined, and the locomotives of this type applied to the New York Central, the Erie and the Pennsylvania railroads are illustrated from photographs, and the leading dimensions of each design given by means of tables. To illustrate the chief details of construction, the New York Central locomotive no. 3,000, which was among the locomotives tested at the Louisiana Purchase Exposition, is selected for description. Line engravings show elevations and sections of the locomotive as a whole, the construction of the frames, cylinders, crank-axles and valves. A brief statement of the performances of this locomotive on the Pennsylvania Rd. testing plant at St. Louis is presented, followed by six different arrangements showing the application of four-cylinder balanced compounding to different types of freight and passenger locomotives, each of these types being illustrated by an outlined diagram. The pamphlet also includes an arrangement of cylinders served by a single valve, the cylinders being in the same transverse plane. It concludes with comments from the technical press concerning this type of locomotive.

Canadian Northern Ry.—The company's construction staff has been devoting practically all its attention to the completion of the line into Edmonton, Alta. While the track has been laid, and a train service put in operation, there yet remains a good deal of finishing up to be done, and some of the permanent bridge work to be completed. Other work done has included the completion of several branch lines in Manitoba, notably the line from Hartney to Virden, and the new short line between Winnipeg and Brandon.

In connection with the construction plans for 1906, R. J. Mackenzie, spent some considerable time during Dec. at Erwood, Sask., arranging for the starting of work on the line to Hudson Bay. Contracts are reported let for ties for delivery in the spring. The surveys have been gone on with during the summer and fall, and it is expected that everything will be arranged in order to start construction in the spring.

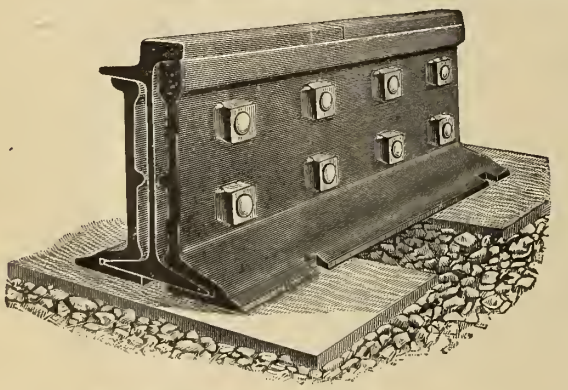
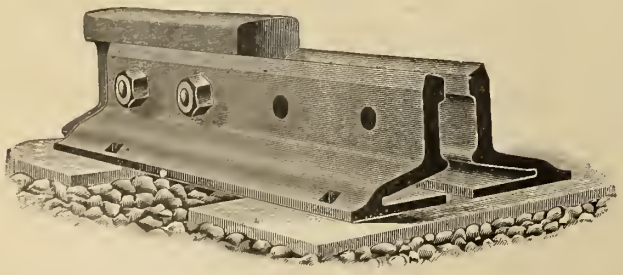
Railroad Essentials.





The day has passed when men of finance are willing to place their money into bad material in railroad construction only to be compelled to replace it by renewals or reconstruction after very little use. Many of the best and most successful steam and electric railroads use the rail joints of the Continuous patent type for standard track work, insulated joints, step joints, and electric bonding joints for the reason that experience has proven it to be the best appliance of its kind ever put upon the market, as evidenced by the fact that it is used in all parts of the world on over 20,000 miles of track.

BUFFALO, N.Y.

C.P.R. Betterments, Construction, Etc.

Electrifying Branch Lines.—It is said that the management is considering the question of changing the motive power of some of its lines to electricity, and that a start will be made with some of the branch lines in the Province of Quebec.

Ottawa.—Representatives of the C.P.R. waited on the Government at Ottawa, Dec. 19, for the purpose of obtaining sanction to construct a double track from its existing lines into the Central Station, Ottawa. The C.P.R. obtains its entrance into the Central Station under an agreement with the Canada Atlantic Ry., which the G.T.R. since taking over the C.A.R. has notified that it desires to terminate. The C.P.R. has applied for a separate right-of-way, but the G.T.R. objects on the ground that the Dominion Government has already granted to the Canada Atlantic Ry. all the available right-of-way into the Central Station. The agreement for this, it is stated, provides for the use by other companies of the tracks on equitable terms. The matter is under consideration by the Government.

Georgian Bay and Seaboard Ry.—Plans have been filed with the Department of Railways, by the C.P.R., for the construction of a railway from Georgian Bay, between Port Severn and Penetanguishene to Maberley on the Toronto-Montreal line. The authority to construct the line was obtained last session of the Dominion Parliament by an act with this title.

Campbellford, Lake Ontario and Western Ry.—Application will be made next session of the Dominion Parliament for an Act granting an extension of time for the construction of this projected railway from near Blairton, on the C.P.R., to near Leaside Jct., also on the C.P.R. Toronto-Montreal line.

South Ontario Pacific Ry.—Application will be made next session of the Dominion Parliament for an Act extending the time for the construction of the projected railway and bridge. The line authorized is from Woodstock to Niagara River, Ont., with power to construct a bridge across the river.

Fort William-Winnipeg Second Track Work.—Following are the sub-contractors engaged on this work: Kenora section—F. Patterson, station 540 to station 665; Welch and Amabea, station 840 to station 890; G. Johnson & Co., station 890 to station 925; C. E. Larson, station, 1,120 to station 1,132; J. M. Kullander, station 1,620 to station 1,744; J. E. Bostrom, station 1,744 to station 1,835. Ignace section—Freeborg and and Stone, station 45 to station 175; Jas. Morrill, station 750 to station 850; Videen and Parsons, station 2,190 to station 2,405; Sharpe and Hoaglund, station 3,300 to station 3,482.

Stonewall to Lake Manitoba.—Application will be made next session of the Dominion Parliament for an extension of time for the construction of the projected line from Stonewall or Teulon, to the east shore of Lake Manitoba.

Great Northwest Central Ry.—Application will be made next session of the Dominion Parliament for an act extending the time for the construction of the 200 miles westerly from the present terminus at Miniota, Man., authorized by chap. 124 of the statutes of 1903.

Lethbridge Station.—The station under construction at Lethbridge, Alta., will be a well-arranged and commodious two-storey building. The main floor only will be completed at present, the upper one being left undivided. The foundations will be two ft. thick, and a cellar will be constructed under the general waiting-room, its dimensions being 28 ft. by 23 ft. 2 in., by 6½ ft. high. The building will be of stone and brick, and roofed with cedar shingles. The building will be 112 by 32 ft., with bay windows on either side. On the ground floor there will be C.P.R. ticket office, 18 by 14 ft.; Alberta Ry. and Irrigation Co.'s ticket office, 15 by 18 ft., with conductors' room; operators' room, 15½ by 10 ft.; ladies' waiting room, 21½ by 19½ ft., with lavatory, 10 by 10 ft.; general waiting-room, 25½ ft. by 30 ft., including lavatory, 10 by 10 ft.; express room, and baggage room, each 18 by 30 ft. The contractors are Smith, Bond and Wilson, Lethbridge, and the cost of the building is estimated at $20,000. The new station is expected to be occupied by Feb. 15.

British Columbia Southern Ry.—Application will be made next session of the Dominion Parliament for an extension of time for the construction of the line between Fort Steele and Golden, B.C., and the branch lines therefrom.

Columbia and Kootenay Ry. and Navigation Co.—Application will be made next session of the Dominion Parliament for an act extending the time within which the lines and branches authorized may be constructed.

Nakusp and Slocan Ry.—The Dominion Parliament will be asked next session to pass an act extending the time for the completion of the lines authorized.

Kootenay and Arrowhead Ry.—The passing of an act granting an extension of time for the construction of the lines authorized will be asked for next session of the Dominion Parliament.

New Westminster to Vancouver.—An extension of time will be asked next session of the Dominion Parliament for the construction of the line authorized from New Westminster to Vancouver, B.C.

Vancouver and Lulu Island Ry.—The Dominion Parliament will be asked next session to pass an act extending the time for the construction of the lines and branches authorized. There has been constructed under the act a line from Vancouver to Steveston, which is now being operated as an electric line by the British Columbia Electric Ry. under a lease.

The Michigan Central Rd. has reduced its passenger rates between Detroit and Toledo, in order to meet the competition of the electric railway between those points. The M.C.R. issues a two-trip ticket for $1.50, which can be used by one person for a return trip, or by two persons for a single trip. The former rate was $1.30 single fare.

The question of the consolidation and revision of the railway acts in force has been under consideration by the Ontario Government, and with a view of ascertaining the opinions of interested parties, a conference was arranged. This was held at Toronto, Dec. 5 to 8, inclusive, Hon. J. S. Hendrie, Minister without portfolio, presiding. The conference was attended by representatives of the C.P.R., Michigan Central Rd., Algoma Central and Hudson Bay Ry., James Bay Ry., Toronto Ry., Toronto and York Radial Ry., Hamilton, Grimsby and Beamsville Electric Ry., Cataract Light, Power and Traction Co., Hamilton; a number of other companies, and representatives of the cities of Toronto and Hamilton, as well as of municipalities through, out the Province. A large number of questions were discussed, including the appointment of a commission to deal with electric railway questions. The information gathered at the conference will be given full consideration by the members present, and will be fully discussed by the Government prior to any legislation being introduced.

MAINLY ABOUT PEOPLE.

C. E. Esplin, civil engineer, formerly of Ottawa, died at Winnipeg, Man., Dec. 5.

G. E. Fauquier, railway contractor, was married at Ottawa, Dec. 6, to Miss J. M. Gilmour.

W. Mackenzie, President Canadian Northern Ry., returned to Toronto Dec. 12 from England.

T. B. Burk, who was engaged in railway contracting in Canada in the early '70's, died at Montreal, Dec. 13.

W. D. Reid, Vice-President Reid-Newfoundland Co., and family, are spending the winter at the Windsor Hotel, Montreal.

F. Grundy, Vice-President Quebec Central Ry., has been re-elected a director of the Eastern Townships Bank, Sherbrooke, Que.

Norman Neilson, eldest son of M. Neilson, Consulting Engineer Montreal St. Ry., died in Montreal Dec. 16, aged 16, of appendicitis.

E. T. Galt, President Alberta Ry. and Irrigation Co., is in London, Eng., and is not expected to return to Canada until the spring.

W. H. Smith, Manager Canada Atlantic Transit Co., has removed his office from Ottawa to the Board of Trade Building, Montreal.

J. Niblock, C.P.R. Superintendent, Calgary, Alta., has a fruit orchard in the Okanagan Valley, B.C., which he was visiting recently.

J. W. Hopkins, architect, who died in Montreal, Dec. 11, aged 81, was father of F. H. Hopkins, of F. H. Hopkins & Co., Montreal.

H. Emmerson, jr., son of the Minister of Railways and Canals, will, it is announced, be married to Miss M. P. Price, of Parrsboro, N.S., in the near future.

E. A. Evans, General Manager Quebec Ry., Light and Power Co., who had his left thumb badly bitten by a dog some weeks ago, has thoroughly recovered from the effects.

S. N. Parent, Chairman Transcontinental Ry. Commission, has resigned his position as President Quebec Bridge Co., but the directors decline to take any action in regard thereto.

G. Ham, of the C.P.R. headquarter staff, was entertained at dinner at the Canada Club, Montreal, Dec. 13, on his return to duty after a lengthened absence through ill health.

W. F. Egg, formerly C.P.R. City Passenger Agent at Montreal, has considerably improved in health and is now employed in the company's general passenger department in Montreal.

Lord Strathcona was delayed by illness from sailing from England, Dec. 16. He had recovered sufficiently to leave by a later steamer, and was expected to reach Montreal, Dec. 31.

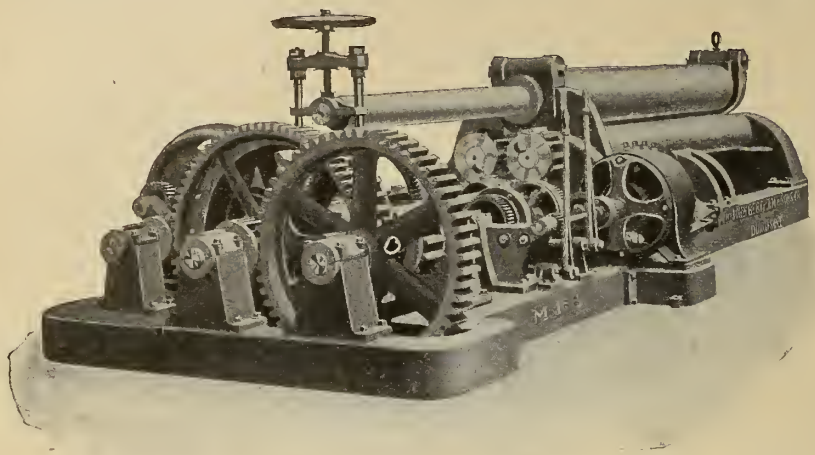
G. B. Mitchell, an assistant engineer in the C.P.R. service at Montreal, has been appointed Superintendent of Buildings, New York, New Haven and Hartford Rd., New Haven, Conn.

D. J. O'Connor, who recently resigned his position as chief Dispatcher, G.T.R., Stratford, Ont., has taken up his residence in Toronto, in connection with a fraternal assurance organization.

J. H. Walsh, General Manager Quebec Central Ry., has returned to Sherbrooke, Que., from London, Eng., where he had been conferring with the directors in regard to the duties of his new office.

J. P. Pim, Ottawa, who arrived at Kenora, Ont., to take charge of a survey party on the Eastern Division, G.T. Pacific Ry., Dec. 8,

BERTRAM PLATE-BENDING ROLLS



MOTOR DRIVEN

These machines are built in four sizes for plates from 12 feet wide, 1¼ inches thick, to 16 feet wide and 1 inch thick. The rolls are arranged in pyramid form and driven by a motor with reversing mechanism. The top roll is raised and lowered by an independent motor. The rolls and hoisting mechanism are steel throughout, and the machine has strength and power to bend plate full width between the housings to a complete circle in from one to three passes.

FULL PARTICULARS AND PHOTOGRAPHS OF BERTRAM'S LINE OF MACHINE TOOLS MAY BE HAD FROM

was found dead in his bedroom at the hotel on the following morning.

J. M. Herbert, formerly in the G.T.R. service, has been elected First Vice-President Colorado and Southern Rd., with office in New York. He had previously been General Manager at Denver, Colo.

T. H. White, who has been appointed Chief Engineer of the James Bay and the Great Northern Railways, and Mrs. White, have removed from Bridgewater, N.S., to Toronto, where they are staying at the Queen's Hotel.

A. Piers, Manager C.P.R. Atlantic steamers, and Mrs. Piers, returned to Montreal early in Dec. from Great Britain, where they had been in connection with the launching of the company's new steamer Empress of Britain.

W. H. Breithaupt, C.E., Berlin, Ont., read a paper on "The Grand River, Ontario Peninsula, effect of Deforestation and Swamp Drainage," at the meeting of the General Section Canadian Society of Civil Engineers at Montreal, Dec. 14.

W. Thompson, G.T.R. Freight Agent, Kingston, Ont., was presented with an address and a purse of $200 in gold by the citizens · a gold-headed cane and an umbrella by the transportation officials, on leaving to take a similar position at Ottawa.

J. D. Hunter, for 20 years General Freight Agent for Ontario, Allan Line, Toronto, died there Dec. 9, aged 57. For a number of years he was connected with the freight department of the Toronto, Grey and Bruce Ry., and subsequently with the G.T.R.

Lieut.-Col. Gourdeau, Deputy Minister of Marine, has been given the cross of the Legion of Honor by the French Government, in recognition of his services as Canadian Commissioner to the Paris Exhibition, and his services to French sailors wrecked off Sable Island.

C. E. Slayton, formerly Master Mechanic of the Sydney and Louisburg Ry., and of the Algoma Central Ry., who was recently appointed Master Mechanic of the Deepwater Ry., has also been given charge of train and transportation service thereon. His office is at Page, Fayette County, W. Va.

E. F. Tremayne, Registrar of the C.P.R., London, Eng., was born there July 7, 1862, and received his education at the Grammar School, Brentwood, Essex. After a few years' experience in the city he entered the C.P.R. service, Feb. 9, 1884, and was continuously in the Transfer office until appointed Registrar, July, 1905.

The Muskoka Lakes Summer Resort Keepers' Association, is raising a fund to erect a public memorial at Port Carling, Ont., or other convenient point to the late A. P. Cockburn, who was a pioneer of navigation on the Muskoka Lakes, and for many years associated with the Muskoka Lakes Navigation and Hotel Co., and its predecessors. H. Prowse, of Beaumaris, Ont., is treasurer of the fund.

W. J. Spicer, who died at Detroit, Mich., Dec, 10, and whose body was buried at Montreal, Dec. 14, was for many years connected with the G.T.R. in Canada and the U.S. He came to Canada in 1853, and was freight agent at Hamilton for the old Great Western Ry., becoming Superintendent on the G.T.R. in 1861, and in 1884 he was appointed General Manager of the G.T.R. lines west of Detroit and the St. Clair River. He retired in 1895, and has since acted for the G.T.R. as a director of its subsidiary companies in the U.S.

There is no truth in the press reports that Hon. A. G. Blair, ex-Chairman of the Board of Railway Commissioners, has been appointed as one of the permanent counsel of the C.P.R. He has commenced the practice of law in Ottawa and will devote himself almost entirely to counsel work. It is understood that he will receive briefs for the C.P.R. in some of its important cases, and that he has a retaining fee from that company. It is probable that he will be engaged in a very considerable number of cases for the company, as there is certain to be very important work before the railway commission during the next few years.

L. J. Seargeant, director of the G.T.R., who died in London, Eng., Nov. 28, aged 80, was from 1874 to 1896 associated with the operation of the company's lines, and prior to that was connected with various lines in South Wales and the south-west of England which were amalgamated with the Great Western Ry. of England. He was appointed Traffic Manager of the G.T.R.—the first appointment of the kind on the continent—soon after coming to Canada, and Vice-President Chicago and Grand Trunk Ry. In 1890 was appointed General Manager in succession to Sir Joseph Hickson, and became President Chicago and Grand Trunk Ry. On the reorganization of the board in 1896 under Sir Charles Rivers-Wilson, Mr. Seargeant retired and was appointed a director.

H. H. Vaughan, who has been appointed assistant to the Vice-President C.P.R., is a native of England and was educated at King's College, London, Eng., and served an apprenticeship with Naysmith, Wilson & Co., Particroft, Manchester, Eng., going to the U.S. in 1891. He worked for various companies as machinist, draughtsman and assistant engineer of tests and mechanical engineer, including the Great Northern Ry., the Philadelphia and Reading Rd., and the Queen and Crescent Route, and after a period of service with a supply house, was appointed Assistant Superintendent of Motive Power, Lake Shore and Michigan Southern Rd., Mar., 1902, remaining there until Feb., 1904, when he was appointed Superintendent Motive Power, C.P.R., which position he held until his present appointment.

President W. S. Stout of the Dominion Express Co. has issued the following circular: "Samuel T. Stewart, who died at Vancouver, B.C., on Dec. 22, after a short illness, was born on a farm near Huntsville, Logan County, Ohio, August 13, 1846, and entered the express business in 1867, filling various positions of trust with the U.S. and American Express companies up to 1884, when he resigned to accept the agency, and established the first office for this company in Montreal. On Dec. 1 of the same year he was appointed Assistant-Superintendent, and in June 1889, Superintendent of the Eastern Division. On Sept. 1, 1903, he was appointed Superintendent of the Pacific Division, with headquarters at Vancouver, B.C. Combining a thorough knowledge of the express business with energy, patience, invariable courtesy, a genial disposition and readiness to assist others, he enjoyed the fullest confidence of his employers and the esteem of his employes. Happy, generous, kindly and affectionate in his home and family relations, his death will be sincerely mourned by all."

C. W. Spencer, Manager Mackenzie, Mann & Co.'s Eastern Lines, was presented with a silver salver, Dec. 8, by the principal officials of the C.P.R., on leaving that company's service. The presentation was made by the President, Sir Thos. G. Shaughnessy, who said: "It is always difficult for a man to sever his connection with his intimate associates, and it must have been particularly hard for you, Mr. Spencer, having been with the company in its infancy when it was struggling against great odds, but since you have chosen a new sphere, your fellow officers in presenting this gift and the good wishes it implies, extend to you the hope that the ability and energy you displayed while with the C.P.R. will be further exemplified in your new office. During your connection with the C.P.R. you won the confidence and goodwill of wide and varying interests, and I know of no one in the company's service who is held in greater respect by all, from the highest to the lowest." A bouquet of roses was sent to Mrs. Spencer. The employes of the Hull Electric Co., of which Mr. Spencer was Vice-President, gave him a gold locket on his leaving.

J. B. Morford, Assistant General Manager Michigan Central Rd., whose death at St. Thomas, Ont., Nov. 27, was mentioned in our last issue, was born at Warwick, Orange County, N.Y., July, 1840. He entered railway service as water boy on the New York and Erie Rd., now the Erie Rd., since which he has been consecutively: May, 1852, to Oct., 1853, despatch messenger between New York and Dunkirk, N.Y.; Oct., 1853, to Nov., 1857, passenger and freight brakeman, eastern division, same road; Nov., 1857, to Sept., 1866, passenger conductor, same road; Sept., 1866, to Jan., 1871, Chief Train Dispatcher, Morris and Essex Rd., now a part of the Delaware, Lackawanna and Western Rd.; Jan., 1871, to Jan., 1873, successively, general agent at 30th Street station, New York, and stationmaster, Grand Central station, New York Central and Hudson's River Rd.; Jan., 1873, to Feb., 1875, General Superintendent, Long Island Rd.; Feb., 1875, to Jan., 1882, successively Superintendent Sandy Hook Steamboat Co., and Superintendent lighterage and ferries, Central Rd., of New Jersey; Jan., 1882, to April, 1883, Superintendent of Construction, Sabine and East Texas Ry.; April, 1883, to Dec., 1883, Superintendent Eastern and Toledo division, Michigan Central Rd.; Dec., 1883, to Feb., 1904, Superintendent and General Superintendent Canadian division same road; being appointed Assistant General Manager, 1904.

Quebec Northern Ry.—The Quebec Legislature will be asked next session to pass an act incorporating a company with this title to construct a broad or narrow gauge railway from the Woodchuck rapids of the Bell River, near Obaska Lake, thence northerly to Mettagami Lake, in the district of Abitibi, Que., and to operate the same by steam, electricity or other motive power. Lachance and Ahern, Quebec, are solicitors for the promoters.

Merchants in Dawson, Yukon, are taking steps to have an investigation made into freight rates charged on the White Pass and Yukon Route. It is alleged that the rate to Dawson via the W.P. and Y.R. is $75 and $80 a ton, while U.S. merchants in Alaska get their freight at $35 and $40 a ton over a 2,000 mile sea voyage, and a 1,000 mile trip up stream.

The Terminal Warehouse and Cartage Co. has been incorporated under the Dominion Companies' Act, with a capital of $1,250,000 and offices at Montreal, to carry on a general warehousing and cartage business in Canada. The company has power to enter into contracts with railway, steamship and other companies. The provisional directors are: W. L. Bond, H. M. Marter, C. L. Buchanan, E. C. Chamberland, E. B. Forrest, Montreal.

NOTICE.—The Esquimalt and Nanaimo Railway Company will apply to the Parliament of Canada at its next session, for an Act extending the time for commencing and completing an extension of its main line to Comox, and to construct branches, and giving to the company general power to construct branch lines, and for other purposes.

W. F. SALSBURY,
Secretary.

Railway Finance, Meetings, etc.

Canadian Northern Ry.—Sperling & Co., London, Eng., recently offered for subscription £1,240,000 4% perpetual consolidated debenture stock of the C.N.R., bearing interest at 4%. The price of issue was 99%, payable £4% on application, £10% on allotment, £40% Jan. 5 and £44% Feb. 5. This stock is perpetual and irredeemable, and ranks in all respects with the 4% perpetual consolidated debenture stock now officially quoted on the London Stock Exchange. The prospectus states that the trust deed provides that the total amount of debenture stock shall not exceed £2,000 per mile of line for the time being open and operated, and an amount not exceeding the cost price of securities of independent corporations from time to time deposited with the trustees, but the company cannot issue any debenture stock against such securities without the consent of the trustees. The debenture stock is secured by a general charge upon the undertaking, property and assets (other than land and money subsidies) of the company, subject to the £1,180,600 of bonds primarily charged on the Ontario Division of the railway (287 miles), and to charges created, or to be created, not exceeding $10,000 per mile of line, other than the above-mentioned 287 miles of line in Ontario, or $15,000 per mile if guaranteed by the Parliament of the Dominion, or any of the Provinces, and is a specific first mortgage upon certain securities deposited with the trustees. The proceeds of the present issue are required for the general purposes of the company, and more particularly in connection with the equipment and maintenance of the extensions recently made and now in course of construction. It is officially stated in Toronto that the issue was entirely successful.

Chateauguay and Northern Ry.—An additional number of suits have been entered against the company for damages for alleged breach of agreement. The plaintiffs allege that at the time of the expropriation of their lands it was expressly set out that an electric road only was to be operated. Since the construction of the electric railway by the Montreal Terminal Ry., the C and N. Ry. has been constructed on a portion of the land acquired.

Cincinnati, Hamilton and Dayton Rd.—On Dec. 4, Judson Harmon was appointed receiver of the C., H. and D. Rd., and of the Pere Marquette Rd., on the petition of W. B. Horn, of New York. The petition alleges that while the C., H. and D. Rd. was solvent prior to July 7, 1904, it has since assumed such obligations as to cripple it, particularly the purchase of the Pere Marquette stock for $12,000,000, the agreement between the C., H. and D. and Pere Marquette and the Toledo Ry. and Terminal Co., which involved large obligations for terminals in Toledo, and an agreement to carry $3,500,000 bonds issued by the P.M. Rd. to cover that company's purchase of the Chicago, Cincinnati and Louisville Rd. It is further asserted that the cash assets of the C., H. and D., and P.M. Rds. on Dec. 2, 1905, wereless than $100,000, although the interest on the P.M. bonds mentioned above is due on Jan. 1, 1906.

The C., H. and D. Rd. was a consolidation formed in 1895, of the Cincinnati, Hamilton and Dayton Rd., the Cincinnati, Dayton and Ironton Rd., and the Cincinnati, Dayton and Chicago Rd.; and the Pere Marquette Rd., was organized in 1899 for the purpose of consolidating the Flint and Pere Marquette Rd., the Detroit, Grand Rapids and Western Rd., and the Chicago and West Michigan Rd. Other lines were subsequently acquired by the P.M., including the Lake Erie and Detroit River Ry., with its leased line the London and Port Stanley Ry., in Canada, and by an agreement rights were secured over the Michigan Central Rd.'s Canada Southern Ry., giving an entrance to Buffalo, N.Y. In July, 1904, the C., H. and D. acquired control of the P.M. Rd., through the purchase of 11/16 of its common stock, and in Mar., 1905, obtained a lease of the line for 999 years, assuming all its obligations, and to pay as rental 4% dividends on its $12,000,000 preferred stock, and 5% on its $16,000,000 of common stock. The total mileage owned is 3,099 miles, and 3,668 miles are operated. In Sept., 1905, the directors of the Erie Rd., authorized the purchase of the C., H. and D. Ry., and a majority of the stock was acquired by J. P. Morgan & Co., through H. B. Hollins & Co., at a price stated to have run up to $160 a share. The purchase money was provided by $12,000,000 of Erie bonds, which were afterwards released, on the Erie shareholders expressing dissatisfaction with the bargain, and J. P. Morgan & Co. assumed the purchase, G. W. Perkins, one of the partners, being appointed President of the C., H. and D., and the P.M., respectively.

The Canadian Exchequer Court has appointed Judson Harmon as receiver for the lines operated in Canada, upon the petition of W. B. Horn.

There have been many reports as to what will be the outcome of the receivership, so far as the Canadian lines are concerned, the most persistent being that the agreement with the Michigan Central Rd. will be broken, and the Lake Erie and Detroit River Ry. allowed to revert to its former owners—the Walkers. Another report states that the Canadian lines will be sold to the C.P.R.

Columbia and Red Mountain Ry.—Following are the officers and directors for the current year:—President, H. A. Kennedy; Vice-President, M. J. Gordon; Secretary, W. H. Fortier; other directors: L. W. Hill, R. C. Morgan; Treasurer, E. Sawyer.

Grand Trunk Ry.—The Hon. N. C. Rothschild has been elected a director to succeed the late L. J. Seargeant.

Intercolonial Ry.—A statement has been published at Ottawa to the effect that the earnings of the I.C.R. for the first four months of the current financial year were $2,638,508, and the expenditure $2,697,509.

Qu'Appelle, Long Lake and Saskatchewan Ry.—Net earnings for Oct., $37,492.84, against net earnings of $5,191.98 for Oct., 1904.

Quebec Central Ry.—Application will be made next session of the Quebec Legislature for an act giving power among other things, to issue bonds or other securities upon a branch line to be constructed, such bonds to take precedence over previous securities of the company, so far as the branch line is concerned; and to empower the directors to deal as they think proper with the shares of the capital stock of the company, declared to belong to it by a judgment of the Quebec Superior Courts of Mar. 14, 1903.

Quebec Southern Ry.—It has been officially announced that the bid of Senator Beique, accepted for the purchase of the railways operated as the Q.S. Ry. by the Exchequer Court, was for the Delaware and Hudson Rd. The G.T.R., and another bidder object to the sale being ratified on the ground that the other bids put in would secure a larger return to the creditors than the one accepted.

Temiscouata Ry.—The report submitted at the annual meeting showed earnings of $145,321.31, and operating expenses, $130,377.61, leaving net income of $14,943.70. Following are officers and directors for the current year: President, F. Grundy; Vice-President, J. H. Walsh; other directors: W. Cook, K.C.; A. H. Cook, K.C.; A. Laurie, W. N. Campbell; Secretary and General Manager, D. B. Lindsay; Superintendent and Engineer, G. G. Grundy.

Toronto, Hamilton and Buffalo Ry.—Earnings for Nov., $63,102.70, against $58,221.65 for Nov., 1904.

G.T.R. Betterments, Construction, Etc.

Track Elevation at Montreal.—An intimation has been given to the Board of Railway Commissioners to the effect that the company's officers have under consideration the provision of a new station and the carrying out of extensive improvements at Montreal. It is stated that the improvements include the building of a new passenger station opposite the Bonaventure Station, on the north side of St. James St., the conversion of the present station into a freight depot, and the elevation of the tracks from the new station almost to Lachine. The estimated cost of the works is placed at $6,000,000. The plans have not been completed.

Turcot Yards, Etc.—The new roundhouse at Turcot, Que., has been completed and work on the laying out of the yard there is in progress.

Toronto Improvements.—The Level Crossings Committee of the Toronto City Council has expressed a general approval of the company's plans for the abolishing of level crossings on the line. The plans submitted provide for the depression of the tracks from Bathurst St. to Sunnyside, and the construction of a viaduct from Sunnyside to the Humber. The estimated cost of this work is $1,050,000. There has also been discussed a project for the elevation of the tracks in the east end of the city, and the bringing of all trains on a viaduct along the lake shore from Scarboro bluffs. The one work will be the complement of the other, and a statement was made at the meeting with the committee that the plans only awaited the approval of the directors and the providing of the money to carry them out.

Mimico Yards.—The work of laying out the new yards at Mimico, Ont., on the Toronto-Hamilton line has been practically completed, so far as the present plans go. There are, however, some further work to be done, for which plans have not been finally approved. The 30-stall roundhouse described in our Aug., 1905, issue, has been completed, but it is not yet being used. There are two tracks in the yard, one for eastbound and the other for westbound freight. In each yard there are four receiving tracks and eight sorting or distributing tracks. The work of laying out the yard is being done by the company under the charge of F. L. Somerville, Resident Engineer, Toronto, and his staff. (Aug., 1905, pg. 363).

Hamilton.—A new 22-stall roundhouse has been built at Stuart St. Station, Hamilton, Ont.

Sarnia Tunnel.—In reference to press reports that a contract has been awarded for electric locomotives, power houses, etc., for the operation of trains through this tunnel by electricity we were advised, Dec. 18, that there had been no change in the situation, and that the matter was still under consideration.

Battle Creek Shops.—We have been advised that it is not possible to state when work will be started on the new shops at Battle Creek, Mich., as the plans and specifications are still under consideration.

Application will be made next session of the Dominion Parliament for an act incorporating a company with the title of the Grand Trunk Pacific Telegraph Co., for the purpose of constructing, acquiring or leasing any overhead, underground, wireless or cable lines, telegraph or telephone from and to any places in Canada or elsewhere; to make connection with any telegraph or telephone lines, including cables, and any system of wireless telegraphy now or hereafter in use in Canada, or lease its lines or any part. The company will also ask for various powers which are usually given to telegraph and telephone companies. The notice is signed by W. H. Biggar, K.C., solicitor for the G.T.R.

Work of the Railway Commission.

After hearing a number of cases at Ottawa, a noticeable one being the application of the Bell Telephone Co. for approval of standard specifications and conditions under which it should be allowed to carry wires and cables across the tracks of railway companies, the Railway Commissioners started on a tour of Western Ontario, Dec. 4. Sittings were held at Stratford on Dec. 4 and 5, when a number of cases connected with the Guelph and Goderich Ry., the G.T.R. branch lines and the electric railways at Guelph, Berlin and Waterloo, were dealt with. The Commissioners sat next at Sarnia, Dec. 6, when in addition to some crossing cases, evidence was taken in regard to the new regulations for shipping lumber, and the car shortage at the elevator. Chatham was the next point visited, the Commissioners remaining there over Dec. 7, and hearing evidence in regard to the crossings of the Chatham, Wallaceburg and Lake Erie Ry., over the G.T.R. in Chatham, and the Pere Marquette Rd., near Wallaceburg. Some drainage matters were also considered and a hearing was given to a deputation in regard to rates on beans, about which orders have recently been issued. At Windsor, on Dec. 8, questions of alleged discrimination in rates were brought forward by Windsor and Walkerville shippers, who stated that shippers in Detroit and the U.S. were favored. The Commissioners returned east, Dec. 8, visiting Paris on the way to look into some matters requiring attention there, and held sessions in Toronto, Dec. 11 and 12, when consideration was given to recommendations of the Canadain Manufacturers' Association regarding freight rates. On Dec. 14 the Commissioners opened a session at Montreal when several complaints of the Canadian Manufacturers' Association respecting Canadian Freight Classification no. 12, were heard.

Orders by the Railway Commissioners.

The following orders have been issued by the Board of Railway Commissioners in addition to those enumerated on page 11.

No. 802. Nov. 20.—Authorizing the Guelph and Goderich Ry. to construct an overhead crossing of the G.T.R. in Goderich, Ont.

No. 803. Dec 13.—Authorizing F. I. Whitney, Passenger Traffic Manager, Vancouver, Victoria and Eastern Ry. and Navigation Co., to prepare and issue tariffs of tolls to be charged under the Railway Act, 1903, sec. 251.

No. 804 and 805. Dec. 13.—Authorizing the Ontario Pipe Line Co. to carry its pipes under the tracks of the Toronto, Hamilton and Buffalo Ry. on Wellington St., and Sherman Ave., Hamilton, respectively.

No. 806. Dec. 12.—Authorizing the South Malahide Telephone Co. to carry its wires over the tracks of the Michigan Central Rd., at Aylmer, Ont.

No. 807. Dec. 11.—Authorizing the South Malahide Telephone Co. to carry its telephone lines across the Michigan Central Rd., near Aylmer, Ont.

No. 808. Nov. 8.—Authorizing the Waterloo, Ont., Town Council to extend John St. across the G.T.R.

No. 809. Nov. 24.—Granting permission to the C.P.R. to construct two additional tracks across Jane St., Toronto Jct., Ont.

No. 810. and 811. Dec. 13—Authorizing the James Bay Ry. location through North Orillia tp., and Matchedash tp., Simcoe county, Ont.

No. 812. Nov. 14.—Authorizing the Brandon, Saskatchewan and Hudson's Bay Ry. to cross the tracks of the Canadian Northern Ry. in sec. 31, tp. 1, range 18, w.p.m., municipality of Turtle Mountain, Man.

Nov. 813. Dec. 13—Amending the order of Dec. 1, 1903, authorizing the Ontario Power Co. of Niagara Falls to carry its power wires over the G.T.R. tracks.

No. 814. Dec. 13.—Authorizing the C.P.R. to construct a branch line to the West Canadian Collieries, sec. 20, tp. 7, range 3, w.p.m.

No. 815. Dec. 13.—Authorizing the C.P.R. to construct a branch line to St. Croix Soap Works, St. Stephen, N.B.

No. 816. Dec. 13.—Granting permission to the Dominion Natural Gas Co., to carry its mains under the G.T.R. at six points in Brantford tp., Brant county, Ont., on conditions named.

No. 817.—Granting permission to the Provincial Natural Gas and Fuel Co. to carry its mains under the G.T.R. at five points in Humberstone tp., Welland county, Ont., on terms and conditions named.

No. 818. Dec. 13.—Authorizing the Morrissey, Fernie and Michel Ry. to operate its interlocking plant where it crosses the C.P.R. in Rossland, B.C.

No. 819. Dec. 16.—Authorizing the C.P.R. Co. to connect with the Red Mountain Ry. at Rossland, B.C.

No. 820. Dec. 13.—Authorizing the C.P.R. to construct a branch line in Rossland, B.C., to connect with the Red Mountain Ry.

No. 821. Dec. 15.—Directing that the cost of constructing and maintaining the connection authorized by order 820 be borne by the C.P.R.

No. 822. Dec. 13.—Authorizing Dr. R. E. Darling and J. S. Todd, Goodwood, Ont., to carry four telephone wires across the G.T.R. at five points in Uxbridge and Whitchurch tps., Ontario and York counties, Ont., on conditions named.

No. 823. Dec. 13.—Approving, under section 235, of certain forms of the Kingston and Pembroke Ry.

No. 824. Dec. 15.—Authorizing the St. Catharines, Ont., City Council to carry a sewer-pipe under the G.T.R. 1,300 ft. east of Vine St., on conditions named.

No. 825. Dec. 11.—Authorizing the Hamilton Radial Ry. to cross the tracks of the Toronto, Hamilton and Buffalo Ry. in Barton tp., Wentworth county, Ont.

No. 826. Dec. 18.—Authorizing the Ontario Power Co., of Niagara Falls to cross with its power wires the Niagara Falls Park and River Ry. on lot 1, Stamford tp., Lincoln county, Ont.

No. 827. Dec. 19.—Approving plans for bridges over the Welland Canal at Port Colborne, and over the Welland Canal feeder at Stormness, Ont., for the G.T.R.

No. 828. Dec. 19.—Approving plans for substructure of a bridge over the Muskoka River, Ont., for the C.P.R.

No. 829. Dec. 19.—Sanctioning the construction of a bridge across the outlet of the Muskoka River, Ont., for the C.P.R.

No. 830. Dec. 19.—Authorizing the G.T.R. to construct a branch line to the premises of R. J. Graham, Belleville, Ont.

No. 831. Dec. 19.—Granting permission to the Lincoln Electric Light and Power Co., to carry electric power wires across the G.T.R. at Westchester Ave., St. Catharines, Ont., upon conditions named.

No. 832. Dec. 20.—Authorizing the Brandon, Saskatchewan and Hudson's Bay Ry., to construct its line across certain highways in the municipality of Turtle Mountain, Man.

No. 833. Dec. 20.—Sanctioning the location plans of the Toronto and Niagara Power Co. through Pelham tp., Welland county, and Gainsborough and Caistor tps., Lincoln county, Ont.

The Niagara Navigation Co.'s new steamer is expected to be launched at Toronto about the end of Jan. She will be named the Cayuga.

We have been officially advised that there is no truth whatever in the press reports that the C.P.R. is building another steamship for its trans-Pacific trade.

Grand Trunk Pacific Railway.

The engineers in charge of sections of construction on the Prairie East Division, from Portage la Prairie, Man., to the Touchwood Hills, include in addition to those mentioned in a previous issue, the following:—Under H. B. Roe, Assistant Engineer: F. E. Healy, Crandall; P. H. Lazenby, Birtle; W. Harrison, Tantallon; J. S. King, Esterhazy; A. J. Gayfer, Grayson. T. A. McLean, Kilally; G. S. Macpherson, Lipton, were on section three, and their work for the season has been completed. No further contracts have been let for construction, but it is said that a section of the line between Touchwood Hills and Edmonton will be placed under contract during the next few weeks, and it is expected that the line between Portage la Prairie and Edmonton will be finished by the fall of 1907.

President C. M. Hays is reported as stating that no choice of a western terminus had been officially made, that land had been secured in three different locations, but that an official announcement would not be made until all the surveys for the line had been completed.

A semi-official announcement at Ottawa says it is expected that contracts for parts of the transcontinental line eastward from Winnipeg and westward from Quebec will be let in January. The surveys, which are nearly completed, have shown that the maximum grade eastward between Winnipeg and Quebec will not exceed 4-10 of 1%. Westward between the same points 6-10 of 1% will be the maximum. The line will pass to the north of Lake Abitibi, which is better timbered and adapted for settlement than the region to the south. The surveys in New Brunswick to test the merits of the rival river and central routes are reported to have been suspended owing to transportation difficulties. They will be resumed as soon as the snow is settled, and it is expected a decision will be reached and possibly contracts for construction let before spring.

Elgin and Havelock Ry.—Following are the officers and directors for the current year: President, R. E. Harris; other directors: B. F. Pearson, C. H. Cahan; Secretary-Treasurer, H. B. Stairs, all of Halifax, N.S.; General Manager, P. S. Archibald, Moncton, N.B.; Superintendent, A. H. Robinson, Petitcodiac, N.B.

Canadian Ticket Agents' Association.—Secretary de la Hooke has issued his annual circular to the members, inviting payment of the annual fee, and urging that a special effort be made to increase the membership to 300 to commemorate the 20th year of the Association's existence. The executive committee will meet at an early date to decide on the place and time for the next annual convention. Invitations have been received from Mobile, Milwaukee, and Denver, and each member is asked to intimate to the Secretary which place he favors, for the guidance of the committee. Detroit will probably be the place of assembling, whichever place may be selected for the convention. President Bunton has also issued a circular to the members, emphasizing the suggestion that the membership list be increased, suggesting that the ladies of the party attend the annual dinners in future, and that the constitution be changed so that assistant general passenger agents, district passenger agents and travelling passenger agents may be eligible for membership.

The Canadian Society of Civil Engineers will hold its annual meeting in Toronto during the fourth week in Jan.

C. E. Lambert, General Passenger Agent West Shore Rd., who has been seriously ill for some time, left New York a few days before Christmas on General Manager Smith's private car, for Florida.

"PARIETTE" READY ROOFING

Particular attention is called to the fact that our Roofing does not contain the usual materials employed in ready roofings, such as "coal tar," "Trinidad asphalt," "asphaltic oils," all of which the test of time has proven to be very unsatisfactory. Our coating is not "hidden" between felts or other things, as is the case with other ready roofings, so that the value of it can be READILY SEEN and determined.

This coating will not run under 230° F.

FOR FREIGHT SHEDS
FREIGHT CARS
STATIONS
SHOPS
ETC.

AMERICAN ASPHALTUM & RUBBER CO., CHICAGO

SOME POINTS OF SUPERIORITY

Absolutely Waterproof
Acid, Alkali and Steam Proof
Very Elastic and Pliable
Will Not Crack
Unaffected by Extremes of Temperature

These materials have been successfully used for over eight years. Will not dry out or disintegrate; can be laid by any ordinary workman; never requires painting or coating; repairs never necessary; the lap cement will not dry out. "PARIETTE" READY ROOFING is put up in rolls about 41 feet long, 32 inches wide, containing 108 square feet, including 2 inches for laps. One square weighs about 47 lbs. without nails and caps. We furnish necessary nails, caps and lap-cement for roof without extra charge.

Late Miscellaneous Items.

L. R. Johnson, Assistant Superintendent of Motive Power, C.P.R. Eastern Lines, Montreal, will for the future have charge of the Angus Locomotive shops, the design and construction of motive power as well as the specification and inspection of all material for the Motive Power Department.

The Turret Bell Co. has been incorporated under the Dominion Companies' Act, with a capital of $200,000 and offices in Toronto, to build or otherwise acquire steam and other vessels, to carry on a general navigation business, to own and construct docks, and to carry on any other business that may be conveniently carried on in connection therewith. The provisional directors are G. G. Ruel, R. P. Ormsby, G. F. Macdonnell, F. C. Annesley, L. W. Mitchell, all connected with Mackenzie, Mann & Co.'s offices, Toronto.

Hon. R. Prefontaine, Minister of Marine, died suddenly in Paris, France, on the evening of Dec. 25, of angina pectoris. He left Montreal at the end of Nov. to visit England and France on departmental business. One of the objects of his visit to France was to discuss the establishment of a steamship line between Canada and Marseilles. The body will be brought to Montreal for burial, the British Government having assigned the battleship Dominion to carry it across the Atlantic. Prior to becoming Minister of Marine in 1903, Mr. Prefontaine had been Mayor of Montreal.

The appointment of C. E. Benjamin as General Agent Passenger Department C.P.R. Atlantic Service, at Chicago, is owing to the fact that with the addition of the Empress of Britain and the Empress of Ireland to the fleet, which will be made shortly, it was deemed necessary to have an official in the Chicago district to devote his undivided attention to Atlantic steamship business. A. C. Shaw being relieved of the steamship department can now devote his whole attention to railway business. His district is very large and populous and requires strenuous work in looking after it.

The Quebec Transport Co. has a capital of $100,000, divided into 1,000 shares of $100 each. The company has entered into an agreement with the Quebec Harbor Commissioners to operate a fortnightly service of ocean steamers making Quebec their terminal point in Canada. It has been granted special privileges, including free harbor dues on the steamers, and berthing facilities in the Louise Basin. As the Louise Basin is a tidal dock steamers can enter or leave at any state of the tide, night or day, and in it the largest steamers coming to the St. Lawrence can load full cargoes to a draft of 30 ft. at any time during the season of navigation.

E. S. M. Lovelace, who has been appointed Assistant Engineer G.T.R., Hamilton, Ont., was born at Montreal, April 3, 1866, and completed his education at McGill University, graduating 1888, with honors and the British Association's gold medal in the advanced course of civil engineering. He entered railway service in 1886, serving that year as leveller on the Great Northern Ry. surveys, during 1887 as transitman, Montreal and Lake Maskinonge Ry.; 1888 to 1892, assistant on second track construction G.T.R. between Montreal and Toronto; 1892 to 1901, on survey for a proposed electric railway between St. Louis, Mo., and Chicago, Ill., in charge of architectural iron work for a Montreal firm and as consulting engineer; 1901 to 1904, assistant engineer in charge of surveys and construction second track work on G.T.R., between Newtonville and Oshawa, Ont.; 1904 to Dec. 1, 1905, assistant engineer in charge of construction second track work, Hamilton to Lynden, Ont.; and between Hyde Park and Kingscourt Jct., Ont., G.T.R. In his new position he has charge of new construction on lines west and north of Toronto.

Brandon Transfer Ry.—Members of the Brandon, Man., Board of Trade, propose applying next session of the Dominion Parliament for an Act to incorporate a company to construct a transfer railway to operate in the city between the different railways.

Yonge Street Bridge, Toronto.—Judgment has been given in the action brought by the C.P.R. and the G.T.R for a declaration to vary the order of the Railway Committee of the Privy Council (since superseded by the Board of Railway Commissioners) and the Order-in-Council subsequently directing them to defray the cost of a bridge over the railway tracks at the foot of Yonge St., Toronto. The court has decided that the bridge must be built at the joint cost of the two companies as directed by the original order, but that the Order-in-Council altering the date when the bridge was to be built was improperly made, neither of the interested parties having applied for it. A new order must be obtained, and on the city obtaining this, Judge Anglin states that the action will be dismissed. No order has, in the meantime, been made as to costs.

ELECTRIC RAILWAYS.

Canadian Street Railway Association.

The quarterly meeting was held at St. Catharines, Ont., Dec. 14, those present being W. H. Moore, Manager Toronto and York Radial Ry., and Assistant to President Toronto Ry.; E. A. Evans, General Manager Quebec Ry., Light and Power Co.; Allan Royce, Vice-President, G. C. Royce, Manager Toronto Suburban Ry.; E. F. Seixas, General Manager, C. E. A. Goldman, Secretary, D. J. McIntosh, Accountant, Niagara, St. Catharines and Toronto Ry.; J. A. Hutchinson, Superintendent Ottawa Electric Ry.; C. K. Green, Traction Manager Hamilton Cataract Power, Light and Traction Co.; E. W. Rathbun, President Oshawa Ry.; A. D. Grantham, Purchasing Agent Toronto Ry.; J. C. Rothery, Superintendent Niagara Falls Division, International Ry.; Harold Robinson, Vice-President, H. H. Hopper, Accountant, St. John (N.B.) Ry.; S. Ritter Ickes, Treasurer, Grand Valley Ry.; P. Dubee, Secretary, W. H. Chapman, Superintendent of Construction, G. Boyer, Assistant Superintendent of Construction, Montreal St. Ry.; C. B. King, General Manager London Electric Ry.; J. Milne, Superintendent British Columbia Electric Ry.; and Acton Burrows, Publisher of THE RAILWAY AND MARINE WORLD, the official organ of the Association.

The chair was taken by the Vice-President, W. H. Moore, who expressed regret at the absence of President W. G. Ross. This was the first meeting Mr. Ross had failed to attend and he would have been present but for pressing and important business requiring his attendance elsewhere. He also expressed regret that since the last meeting C. E. A. Carr, formerly Manager of the London Electric Street Ry., had removed from Canada to take the management of an important street railway and electric enterprise in Helena, Montana. Mr. Carr was an enthusiastic member of the Association and his counsel would be missed by the executive committee of which he was a member. He also referred to the session recently held by a committee of the Ontario Legislature to receive suggestions from the electric railway companies and municipalities as to legislation required. He thought it but fair that the Ontario Government should be accorded praise for the opportunity afforded the companies to express their views.

The executive committee reported that the result of the mail vote taken from the members was in favor of May and December as the dates of the semi-annual meetings, which are to be held in future instead of quarterly meetings.

The Oshawa Ry. Co. was elected a member of the Association.

The proceedings before the committee of the Ontario Legislature, referred to in the Vice-President's opening remarks, were discussed at considerable length.

At the afternoon session E. A. Evans took the chair. J. C. Rothery promised to prepare a paper on the development of electric energy by water power and to have it in the Secretary's hands at an early date.

BEST SYSTEM OF COLLECTING FARES.

In the unavoidable absence of D. McDonald, M.I.E.E., Manager, Montreal St. Ry., the following paper, written by him, was read by P. Dubee, Secretary of the Company:—

The collection of fares is a very important and interesting subject, and too much cannot be said or written about it. If the same amount of deep thinking that is being given constantly to the less important technical questions that interest us all, should be devoted to the consideration of our modes of collecting, the results would, I am sure, prove marvellously profitable to most companies. After more than a half-century's experience in operating street cars, it must be admitted that our so-called systems of collecting are perhaps the most defective part of our organization. If the losses incurred yearly by the missing and purloining of fares could be computed with any degree of accuracy, the revelation would prove astounding to us all. This large and extensive "x" which managers agree to call 5, 10, or 15%, amounts in most cases to a larger sum than most street railways pay in dividends, and the comparison presents itself still more strikingly when we consider that this dead loss, or whatever part of it we can succeed in saving, is not only an increase of earnings but a clear net benefit. It is hardly necessary to go into the detailed enumeration of the different methods in which our "little grains of sand" are being gathered. These inherent defects are so patent and publicly known that any of our patrons, so disposed, can relate to us precise information about them, without, however being able to suggest any effective remedy for the evil. Therefore to save time I will limit myself to a short mention of the different systems that you all know so well, just to help us to face this difficult question in the proper manner.

1st. The register; on this continent the register seems to have proved the most acceptable to American companies who, however, are far from being satisfied with its elastic guarantee. It is too often beaten, and tampered with to enable us to recommend it as anything like an ideal system, and the missing of fares, especially in crowded cars, is not diminished by its operation, although it must be said that outside of rush hours its automatic figuring does assist the conductor to a certain extent to keep tab on new arrivals. Owing to the increase in the use of tickets in the U.S., the register is daily becoming less satisfactory on account of the difficulty of recording different priced fares. The register is, however, accepted and tolerated for want of a better method.

2nd. The portable fare box, carried by conductors is generally adopted on our side of the line, and the best argument in its favor is perhaps that the fare receipts by the use of this box are prevented to a great extent from straying into the pocket of a third party, and go direct from the patrons hand to the company's office, which is a considerable advantage. Another point in favor of the box is that the fare must be deposited in the box by the passenger, and if this is not done the patron is immediately made aware of the fact that the conductor has failed in his duty. As

THE PINTSCH LIGHT AWARDED THE GRAND PRIZE
ST. LOUIS, 1904

In the United States 170 railroads have equipped over 25,500 cars with Pintsch Light. In the World more than 135,000 cars, 6,000 locomotives and 1,800 buoys are using Pintsch Light, the test of experience having proven it the most economical, safe and reliable system for car lighting. Pintsch Gas Buoys adopted as standard by the United States Lighthouse Board. Highest awards taken at World's Expositions at Moscow, Vienna, St. Petersburg, London, Berlin, Paris, Chicago, Atlanta, Buffalo, and now St. Louis.

SAFETY HEATING SYSTEMS RECEIVED THE HIGHEST AWARD

Practical service for the past 18 years has demonstrated the reliability, efficiency and adaptability of the Safety Systems of Direct Steam and Hot Water Heating which are being applied in large quantities to railroad equipment. Straightport couplers. Automatic Steam Traps. 140 Railroads are using these devices, applied on 16,000 cars. Standard on Pullman cars.

The Safety Car Heating and Lighting Co.

160 Broadway, NEW YORK

CHICAGO PHILADELPHIA ST. LOUIS SAN FRANCISCO

A FACT WORTH REMEMBERING

The Burlington carries more tourist car passengers to California week in, week out, the year round, than any other line offering service via Denver and the Scenic Rockies.

We could not do this if we did not give the most satisfactory service to be had anywhere.

Berths may be reserved and additional information secured by addressing

Burlington Route

W. A. LALOR
Asst. Gen. Pass. Agent, St. Louis.

J. FRANCIS
Gen. Pass. Agent, Chicago.

P. S. EUSTIS, Passenger Traffic Manager

to the preventing of missing fares, it cannot be said that the box system is any more effective in this respect than the register

3rd. Receipt system; the European system for giving a receipt for every fare and having inspectors to control the issue of the receipt is another mode of collecting which has only met with partial success, for many reasons. The fact that the inspector can only check a small portion of the receipts issued renders it very undesirable, and the complete checking of all receipts, which would require a very large number of inspectors, would only lead to a greater difficulty, probably a mutual understanding between inspectors and conductors, which would prove equally disastrous. The re-issuing of receipts already used and the difficulty of preventing this abuse is another great defect in this system. The writer has had consideratble experience in the general working of the receipt system on a large number of European roads, and is of the opinion that this mode of collecting is fairly adaptable to long surburban or interurban runs, but in city service it is very much disliked by passengers who protest against being disturbed or annoyed on short trips to produce their receipts for inspection. Again the missing of fares is not safeguarded by the use of this system, and the failures to collect in rush traffic are just as numerous as with our American systems.

4th. The system of giving prizes to be drawn for by the holders of receipt coupons is claimed to be an improvement on the receipt system, but even if this lottery business could be legally practised in our country, it would only partially protect against the losses above mentioned.

These three or four different ways of collecting are the most in vogue universally, and we are forced to admit that they are one and all essentially deficient. Each and every one of them impose an impossible task on the conductor, who by these methods cannot be strictly held to the integral collection of all his fares. Twenty-five people enter a car and pay their fare, 25 more are taken on in the next few blocks, and after they have been well mingled and mixed up with those who have already paid, the poor conductor is expected to go and pick them out without missing any —a very difficult task which must perforce be only partly accomplished. The above fact have forced us to the conclusion that our modes of collecting up to recently are unbusiness like and impractical, and that to improve them we must furnish our conductors with some systematic means of following his collection of fares, and prevent that doubtful and groping sentiment that places him at the mercy of forgetful or ill-disposed passengers.

The only ideal system of collecting in vogue to-day is the positive system, as it is worked on subways and elevated railways where passengers have to pay before entering the car on which they desire to travel. We are all thoroughly convinced that the application of this system to our surface operation, if it were practicable, would be a source of great benefit, and we would immediately cease to tribulate on this subject. Unfortunately it is not possible to adopt this method integrally on surface cars, but we are pursuaded that the best means of improving our fare collection is to adopt the elevated system as much as possible.

With this idea in view, we are at present experimenting with a new make of car in Montreal, that permits of the application of a very positive mode of collecting, the nearest approach to the exemplary system above mentioned. These new cars, known as the "Pay as you enter cars" have been in operation for several months and are giving good results. Our comparative statements show that earnings on this style of car are much higher than on other cars where collecting is done in the old way. The new car has, in place of a 5 ft. platform one of 7 ft., and instead of an ordinary door placed in the centre of the rear end there are two doors, the brass railings leading up from the steps dividing the platform into two aisles. The door to the left is to be utilized entirely by persons entering the car, and the other solely by those desiring to leave. This is arranged and made arbitrary by the fact that while one of these doors opens inward only, the other opens only outward. When the pasenger steps on the platform, which is amply large for 30 adults, he is met by the conductor who request a fare before he enters; in other words, the platform is the pay office on the car. The passenger then passes on through the entrance door into the car, from which he may make his exit at any time, either by the front entrance or by the rear door designed for the purpose. The conductor, having no fares to collect from passengers in the car, can remain at his post on the platform, giving such attention as is necessary to the passengers getting on or off the car. The conductor is also provided with a receptacle into which the fare box fits, so that he may when necessary have both hands free, and at the same time not miss fares. As these cars are all provided with electric buttons as well as the usual signal cord, the passenger can easily and at all times make his desires known without having the conductor at his elbow. Another improvement in the new design is the exit from the front platform. This portion of the car being more spacious than usual, not only gives the motorman ample room, but divides him from the rear portion of his platform by a brass railing At the motorman's foot is a catch, which, when released by pressure, throws open the door automatically; thus making it unnecessary for the man in charge of the motors to even raise his hand or turn his head. In view of the fact that serious accidents on street cars happen at the back platform when the conductor is busy collecting fares inside the car, and unable to properly gauge stops and starts, the new design is considered most important. The saving of time is also a great advantage, as passengers begin to enter immediately the car stops, without having to wait for passengers getting off. The moment intending passengers are all safely landed on the platform the car is started, and in a few seconds after this, fares are all collected before reaching the next stop. A large number is painted on the front dash of car, so as to indicate to intending passengers, who can see it blocks away, that a new style of car is coming or "Get your fare ready, please," and it is pleasing to note how quickly they do prepare, and how quickly ten, fifteen or twenty passengers can be collected and served with transfers with this system.

We are of the opinion that to improve our mode of collecting fares and save our losses, a radical departure must be made from the old method, and we must by the adoption of a positive business-like system, such as prevails in all other lines of transportation and regular business, get the best cinch possible on our well-earned receipts, for even if we do say it ourselves, "we deliver the goods every time," and where can you get better value for your money?

In the discussion which followed the reading of the paper it was stated that during the first month one of the new cars described by Mr. McDonald was in operation, the receipts from it showed an increase of 15% over the old style of car.

The question box was then taken up. One member asked:—"Is it possible to do away with the use of salt on the rails in winter?" Two members had sent in answers in the negative, and the members present unanimously endorsed this.

"What is the best, most practicable and surest way of handling passengers so that a fare may be collected from every one of them?' This was answered by the Managing Director of the Montreal St. Ry.:—"Collect the fares as the passengers enter into the car from the platform." The General Manager of the Quebec Ry., Light and Power Co., answered:—"The method adopted by the Montreal St. Ry. is the best at present known."

A question as to the merits of a certain make of underfeed stoker elicited considerable discussion and divergence of opinion. All agreed that it diminished the smoke nuisance, but some questioned if a saving of fuel was effected.

The use of T rails was discussed, the concensus of opinion being that they are superior to the girder rail.

J. C. Rothery was elected a member of the executive committee, to succeed C. E. A. Carr.

It was decided to hold the next meeting at Quebec.

In the evening the members attending the meeting were entertained at dinner at the Imperial Hotel, Niagara Falls, N.Y., by the Niagara, St. Catharines and Toronto Ry., a special car to take them to Niagara Falls and back being provided by the company. Messrs. Seixas and Goldman did the honors for the company and proved excellent hosts.

On Dec. 15, the members went from St. Catharines in a special car on the N., St. C. and T. Ry. to Niagara Falls, Ont., where the morning was spent inspecting the various power plants in course of construction, under the guidance of J. C. Rothery. After luncheon the party crossed to the U.S. side, went over the Niagara Falls Power Co.'s plant, and thence by special car on the International Ry. to Buffalo.

Projects, Construction and Betterments.

Hamilton Radial Ry.—The Wentworth County Council has granted permission to operate cars on the Bartonville extension for nine months. The extension into Oakville, Ont., has been completed, and progress is being made with the grading to the eastern boundary of the town, to meet the Mimico division of the Toronto and York Radial Ry.

Kingston, Portsmouth and Cataraqui Ry.—The erection of the power plant by the newly organized company has been completed, and the cars have been operated by it for over a month.

Levis County Electric Ry.—The construction of a branch to connect the line with the summit of the elevator has been completed. Owing to some differences with the town council the company announced that it would discontinue running cars after Dec. 23. (July, pg. 315).

London Street Ry.—At a recent meeting of directors it was arranged to appropriate a considerable sum for improvements to the line, etc. Subsequently it was reported that the control of the company has been obtained by local interests, and that as soon as the reorganization has been completed, the line will be practically reconstructed. (Oct., pg. 487).

Niagara, St. Catharines and Toronto Ry.—The work on the extension of about a mile from Falls View, to the right-of-way of the Toronto and Niagara Power Co., near Montrose, Ont., has been practically completed. The company did the work itself. The company is also filling in the trestle work at several points between Merritton and St. Catharines. It proposes to ask for tenders for filling in the remaining trestle-work, and to commence the work in the spring. (Nov., pg. 531).

Ontario Electric Ry.—A. B. Turner, Secretary, has addressed a letter to the Toronto City Council, asking for permission to enter the city near Kingston road, and to run west on Queen st. to Leslie st., to Eastern ave., to Trinity st., to Front st., and to St. Law-

THE TORONTO PRESSED STEEL CO.

rence market. The company would take a lease for 16 years, the balance of the term of franchise of the Toronto Ry., the city to have the option of taking the line over at that date, or on Sept. 1 of any year thereafter. The company offers to pay mileage and percentage on the same basis as the Toronto Ry. The matter is under discussion with representatives of the company.

Port Maitland to Beamsville, Ont.—Application will be made next session of the Ontario Legislature for an act incorporating a company to construct an electric railway from Port Maitland through the townships of Dunn, Moulton, Canboro, Wainfleet, Gainsborough and Clinton, and the town of Dunnville to Beamsville, Ont., with a branch line through the townships of Gainsborough, Clinton and Pelham to Fenwick, with incidental powers. J. C. Eccles, Dunnville, Ont., is solicitor for the promoters.

Quebec and Saguenay River Ry.—An engineering party headed by J. F. Guay recently started from Quebec to survey an inland line from Quebec to the Saguenay River. The original surveys were along the river front and around the face of Cap. Tourment, involving some very heavy rock cutting. The interior route, if adopted, would serve the villages more directly than a line along the shore, but it would involve some heavy gradients and necessitate the construction of branch lines to Bari St. Paul and Murray Bay. (Aug., pg. 371).

Rondeau, Ridgetown and Wallaeeburg Electric Ry.—Application will be made next session of the Ontario Legislature for an act incorporating a company with this title for the purpose of constructing an electric railway in the county of Kent. H. D. Smith, Chatham, is solicitor for the applicants.

St. John Ry., N.B.—The new 1,200 h.p. engine installed in the company's power house has been started. The engine was supplied by the Canadian General Electric Co. (Nov., pg. 543).

St. John, N.B.—W. Bruckhoff and A. H. Hannington, of St. John, N.B., are promoting an electric railway to run from Adelaide Avenue, which is midway between the foot of King St. and the foot of Main St., St. John, N.B., 3½ miles to Millidgeville, which is also within the city limits, and fronts on the Kennebecasis River. It is said that they will apply to the New Brunswick Legislature for a charter, and that they will ask for running rights over the St. John Ry. tracks to the foot of King St., in the centre of the city.

Southwestern Traetion Co.—The abutments and piers for the bridge over the Thames at London have been completed, and it was expected to have the superstructure in place during Dec. It will be a single span 178 feet in length, and will provide for a footpath alongside the tracks. Work is being pushed on the extension to Port Stanley, Ont. A. E. Welsh, manager, states that the line between London and St. Thomas will be completed by Jan. 1, and to Port Stanley during the summer. The directors in London, Eng., have authorized the making of surveys for a line from London to Hamilton, and F. G. Rumbald, President, states that the service will be taken in hand at once. (Oct., pg. 487).

Summerside, P.E.I.—Local press reports state that surveys have been made for an electric railway to serve St. Elenors, Traveller's Rest, New Annan, Kensington and other points, from Summerside, as a centre.

Sydney and Glace Bay Ry.—It has been decided to move the car barns, plant, and operating headquarters to Glace Bay, from Sydney, N.S.

Toronto.—The City Engineer has recommended the Council to construct a swing bridge across the Western gap, for the purpose of giving a street car connection with the Island. In the event of the Dominion Government vetoing a swing bridge, he recommends a double aerial bridge, similar to that at Duluth, Minn. The cost would be from $200,000 to $225,000.

Toronto Suburban Ry.—It is reported that surveys will be made from the present terminus at Lambton, along Dundas St., to Brampton, Ont. Local reports, however, state that a survey will be made for a line to run north of Dundas St. to Brampton, about midway between the C.P.R. and the G.T.R. lines, and starting either from near the present terminus at Lambton, or the more northerly terminal at Weston. This suggested line would serve directly a number of points which are now at some considerable distance from the railways.

Toronto Ry.—The City Council and the company are not agreed as to the lines to be extended in the city, the main point of dispute being as to the area within which the City Engineer may order the construction of additional lines. The company contends that the agreement only covers the area contained within the city limits at the time it was entered into, but the city contends that the agreement is so worded that it includes areas added subsequently. The case will go through to the Privy Council in London, Eng., before it is finished. The extension of the Avenue Road line northerly to the Upper Canada College is one for which the city is pressing, and a suggestion has been made that the parties agree to the construction without prejudice, so that the line may be completed during the year.

Toronto Radial Ry. Proposals.—The Mayor of Toronto has submitted another plan to the Board of Control to provide an entrance for the radial railways. He proposes that the Metropolitan Ry. tracks be removed from Yonge St. at Mount Pleasant Cemetery and diverted west by St. Clair Ave., to the city limits, and that the present city line extended up Yonge St. to the cemetery, the St. Lawrence Market to be the terminal of two lines. The northwest route to start at the head of Christie St., and reach the market as follows:—Christie St. to Bloor St., a short turn to Clinton St., to Mansfield Ave., to Claremont St., to Queen, to Niagara, to Bathurst, to Front, to the market. The eastern route to start at the Kingston Road on Queen St., to Eastern Ave., to Trinity St., to Front St., to the market. The tracks of the new lines to be standard gauge, 4 ft. 8½ in., the same as the tracks of the present radial lines, and where the route of the city line is encountered a third rail is to be laid, as its gauge is 4 ft. 10½ in. wide. The draft agreement provides that the lines shall come into the city's possession at the expiration of the franchise of the Toronto Ry. Co., in 1921, terms of the present agreement to govern the construction of the new lines and the same amount of mileage, $800 for single and $1,600 for double track, to be paid annually, in addition to the percentage on traffic, excepting on freight, which is not to be taxed for the city's benefit for a term of years. The proposals are under discussion. See Ontario Electric Ry.

Toronto and York Radial Ry.—The company has completed an arrangement for the collection and delivery of parcel freight from and to its various lines.

Work on the extension of the Metropolitan Division from Newmarket to Jackson's Point on Lake Simcoe is being proceeded with, and it is expected that it will be opened for traffic early in the summer. The power plant is to be increased from 1,500 to 3,000 h.p., in preparation for the opening of the extension. Arrangements are being made for a survey to be carried on during the winter for an extension from Jackson's Point to Beaverton.

The extension of the Mimico Division from Long Branch has been completed to Port Credit, Ont., and a car service has been placed in operation.

Windsor, Essex and Lake Shore Rapid Ry.—Dr. Jas. Brien, ex-M.P. for Essex, is quoted as saying:—"The grading of the roadbed will be finished between Kingsville and Windsor, Ont., next week, and this will be followed by the laying of tracks at once. The water-power of Niagara Falls will be used when Detroit and Buffalo are connected. The distance is 229 miles. The route will be from Windsor to Essex, Kingsville, Leamington, Wheatley, Tilbury, Chatham, London, and thence to Buffalo. Detroit capital is largely interested in the company." A mortgage to the National Trust Co. of the property and franchises of the company, to secure an issue of bonds for a sum not exceeding $20,000 a mile of the company's projected line, has been filed with the Provincial Secretary, Toronto. (Nov., pg. 543.)

Electric Ry. Finance, Meetings, Etc.

Brantford St. Ry.—A change has taken place in the ownership of this line and also of the Grand Valley Ry., an electric line running from Brantford to Paris and Galt, and the Woodstock, Thames Valley and Ingersoll Ry., another electric line running between Woodstock and Ingersoll. The two last mentioned lines were built under the management of Dr. S. Ritter Ickes, and the Brantford line was acquired by the same interests. The control of the three lines has now been secured by A J. Pattison, of Toronto, who has been interested with him for some time. Associated with him are Jno. Firstbrook and W. S. Dinnick, of Toronto. Mr. Pattison has been elected President of the Brantford St. Ry., and the Grand Valley Ry., and a new president will be elected for the Woodstock, Thames Valley and Ingersoll Ry. Pending the appointment of a manager, Mr. Pattison is in direct charge of the three lines, Dr. Ickes having retired with the intention, it is said, of going to California.

The Brantford St. Ry. Co. was incorporated in 1879, but little was done until 1887, when the company was reorganized and the line built and equipped. Subsequently it passed into the possession of the Canadian General Electric Co., and in July, 1902, was sold to the Von Echa Co., of Woodstock, Ont., who obtained a franchise from the city for 50 years. It has since been operated in connection with the Grand Valley Ry.

British Columbia Eleetrie Ry.—Gross earnings for Oct., $106,705 against $80,842 for Oct., 1904. Working expenses, $56 215; renewal funds, $8,500; approximate income from investments, $10,467; net income $52,-457, against $45,353 working expenses; $6.695 renewal funds; $2,750 approximate income from investments and $28,794 net income for Oct., 1904. Aggregate gross earnings for four months ended Oct. 31, $393,936; net income $184,298 against $292,449 gross and $111,022 net for same period, 1904.

An issue of £185,000 of 5% cumulative perpetual preference shares of £1 each at a premium of £1 10s., has been made in London, Eng.

Grand Valley Ry.—Following are the officers and directors for the current year:—President, J. G. Wallace, Woodstock, Ont.; Vice-President, A. J. Pattison, Toronto; Treasurer, S. R. Ickes, Brantford, Ont.; other directors: H. H. Powell, J. R. Stratton, J. Firstbrook, Toronto. Secretary, W. J. Ickes, Brantford.

Halifax Electric Tramway.—Railway earnings for Nov., $11,414.38 against $11,085.40 for Nov., 1904.

Avoid Infringements by Ordering Direct

London Street Ry.—Reports have been current in London, Ont., that the street railway system has been acquired by local financial interests, from the Everett-Moore interests of Cleveland, Ohio. P. W. D. Broderick and W. M. Spencer, two of the London directors, state that they do not know anything about the matter, except that the Everett Moore interests were ready to sell at any time. T. H. Smallman, Vice-President, has been out of the city a good deal of late, and it is said that it has been in connection with a proposed transfer of the control.

Montreal Street Ry.—Passenger earnings for Nov., $228,601.06; total earnings, $232,635.23 against total earnings of $204,554.76 for Oct., 1904. Operating expenses, $153,627.63; fixed charges, $22,074.15; surplus, $56,933.45 against $133,848.97 operating expenses; $18,870.58 fixed charges and $51,835.21 surplus for Nov., 1904. Net earnings for two months ended Nov. 30, $187,115.05; surplus, $143,978.26 against $171,345.14 net earnings and $133,527.24 surplus for same period, 1904.

The privy Council in London, Eng., has decided that the city is not entitled to a percentage of the company's earnings on the lines outside the city limits, but only to a percentage on the receipts taken within the limits of the city proper.

Recent reports in Montreal financial circles stated that an arrangement had been made by which the company was to be re-organized with a capital of $12,000,000. The present capital is $7,000,000, and the company controls the Montreal Park and Island Ry. The additional capital would provide for the complete absorption of the M. P. and I. Ry., discharge the company's indebtedness to the bank, and provide for the $1,000,000 which the directors decided to set aside for the provision of additional rolling stock and extensions. We have been advised that nothing will be done, and that no definite plans can be made until the Quebec Legislature has passed upon the legislation to be asked for next session. This is for an act authorizing the company to increase its capital stock, and to issue stock in payment or part payment of other companies; to authorize the borrowing of money; to increase the denomination of its shares from $50 to $100; to authorize it to dispose of stocks and bonds held by it and to divide the proceeds among its shareholders; to authorize it to guarantee the capital and interest or dividends of other companies; increase its powers in various respects, and to repeal and amend the acts relating to the company as may be necessary to give effect to the powers asked for.

Niagara, St. Catharines and Toronto Ry.—Gross earnings 11 months ended Nov. 30, $229,971.84 against $209,705.55 for same period, 1904. Net surplus over and above all operating expenses and interest for 11 months ended Nov. 30, $41,367.54 against $32,917.07 for same period, 1904.

The St. John, N.B., Ry. Co. has bought the plant and franchises of the Carleton Electric Light and Power Co., which supplied light and power for St. John West, N.B. It was recently stated that application would be made to the New Brunswick Legislature for power to construct an electric railway in the district. The company's plant was, however, acquired by a local syndicate and has since been absorbed by the St. John Ry.

St. Thomas Street Ry.—A report as to the earnings of the street railway for 10 months ended Oct. 30, presented to the St. Thomas Ont., City Council, showed the ticket sales and cash fares were $14,949.12 against $12,478.70 for same period of 1904. The number of passengers carried in the same period was 431,549 against 336,724.

Toronto Ry.—Car earnings for Nov., $220,803.78 against $198,150.35 for Nov., 1904.

Electric Railway Notes.

The Toronto Ry. has placed an order for 2,000 tons of 96 lb. steel girder rails with a U.S. firm.

The Guelph Radial Ry. Co. carried 525,592 passengers in the year ended Sept. 30, 1905, an increase of 119,943 over the previous year.

The International Ry. of Buffalo, N.Y., has placed an order for 100 cars for use on its several lines in Canada and the U.S.

The Montreal Street Ry. Co. has made arrangements by which the public can purchase tickets at a number of stores on St. Catherine St.

F. W. Glover, local manager of the B.C. Electric Ry., returned to New Westminster, B.C., at the beginning of Dec. from a six weeks' trip to eastern points.

Jas. Milne, of Toronto, has been appointed General Superintendent British Columbia Electric Ry., with headquarters at Vancouver, B.C., and will enter on his duties early in Feb.

P. Simard, the employe of the Montreal Street Ry., whose duty it was to throw the bags containing used tickets into the furnace at the power house daily, has been arrested for stealing some of the tickets. O. Ferron, a grocer, has also been arrested on a charge of receiving the stolen tickets and disposing of the same to the public. Both pleaded not guilty and are under remand.

M. P. Baker, heretofore Superintendent Calais Street Ry., Calais, Me., has been appointed Divisional Superintendent International Ry. Co., at Niagara Falls, N.Y., succeeding J. C. Rothery, resigned. He will have charge of the operation of the company's lines in Niagara Falls, N.Y., and Niagara Falls, Ont. The Calais St. Ry. owns and operates the electric railways in Calais, Me., and St. Stephen's, N.B.

J. C. Rothery, heretofore Superintendent International Ry. at Niagara Falls, N.Y., has been appointed General Manager East Liverpool Traction and Light Co., East Liverpool, Ohio. This company is a combination of the East Liverpool Ry. Co., the Ceramic City Light Co., Wellsville Electric Light Co., Eastern Ohio Ry. Co., Glasgow Ry. Co., and the Island Run Coal Co., recently controlled by the United Power Co., the East Liverpool and Rock Springs Ry. Co., and a suspension bridge over the Ohio River, connecting East Liverpool, Ohio, and Chester, West Va.

The question of what is the best pattern of fender for use on electric railway cars has been under discussion in Canada for some time, but opinions are still divided as to which is best. The Ontario Government has adopted four styles, any one of which may be adopted. The Toronto Ry. has been experimenting with a number of fenders, but has not yet adopted a standard, although it was recently reported to the Board of Control that a specific pattern had been adopted. A petition has been signed in Vancouver asking the B.C. Electric Ry. to adopt a different pattern of fender to that now in use. W. G. Ross, Managing Director Montreal Street Ry., recently said in an interview on the question, "The opinion of the company with regard to fenders is that there would be fewer accidents if there were no fenders projecting from the front of the cars."

The effect of a recent decision by Judge Anglin in regard to the Toronto Ry. Co., is that the city authorities have the right to determine what new lines shall be established, whether on streets within the city at the time of the street railway agreement, or on streets within territory since added to the area of the city; that the City Engineer has authority to fix time tables and routes; that, if the Engineer so determines, the company must require cars starting before midnight to finish their respective routes, even though this may cause them to run after midnight; that the Engineer has authority, subject to the approval of the city council, to determine at what time the use of open cars shall be discontinued in fall and resumed in spring, and when cars shall be heated; and that the city has other remedies than the enfranchisement of another company when the company fails to establish new lines and operate them. The decision is being appealed from by the company.

Grain Elevator Notes.

The Intercolonial Ry. elevator at Halifax, N.S., has been put in order, and began receiving wheat for export early in Dec.

The Department of Railways and Canals will shortly call for tenders for the superstructure of the proposed 2,000,000 bush. elevator at Port Colborne, Ont.

The Empire Elevator Co. proposes to build an elevator, larger than the one it recently completed at Fort William, Ont., at some point between there and Winnipeg.

The Alberta Pacific Elevator Co. has erected 15 elevators of 30,000 bush. each, in different parts of Alberta, since July last, and is arranging to open up a trade with the Orient, through Vancouver.

The elevator at Vancouver for the Hall Elevator Co., Winnipeg, Man., and Lumsden, Alta., is expected to be completed early this month. The elevator will handle the surplus wheat crop of Alberta, which is estimated at 1,000,000 bush.

Work is reported to be progressing satisfactorily on the new 1,000,000 bush. elevator on the G.T.R. at Tiffin, near Midland, Ont. The elevator is of steel and the equipment will include complete outfit of power transmission machinery, marine leg, boat scrapers, [illegible] weyers and trippers, car couplers, etc.

The Calgary Milling Co., Calgary, Alta., has taken out a permit for the erection of a grain storage warehouse at Vancouver, B.C. It is stated that this is preparatory to the construction of an elevator for export trade. J. K. Ker, an officer of the company, is on a trip to Japan with a view of opening up the trade.

The C.P.R. has issued a statement showing that between Sept. 1 and Dec. 12, 1905, it carried 14,342,028 bush. of wheat into Fort William, Ont., and there were shipped from the elevators there between same dates 14,609,990 bush. On Dec. 12 there were about 400,000 bush. of wheat in the C.P.R. elevators at Fort William.

The Department of Trade and Commerce reported that to Nov. 25, the Canadian Northern Ry. had passed through its elevator at Port Arthur, 6,070,002 bush. of grain; the C.P.R., to Nov. 27, had handled at its Fort William elevators, 17,511,041 bush.; and the Empire Elevator Co. had handled 6,000,000 bush. at its Fort William elevator up to Nov. 30.

The Goderich, Ont., town council has submitted a by-law to the taxpayers, guaranteeing the bonds for building a second elevator to the extent of $25,000, taking a first mortgage with insurance protection. It is proposed to build the second elevator alongside the present one. The new elevator will be of similar size to the present one, viz.: 500,000 bush. capacity, and will be owned and operated by the Goderich Elevator and Transit Co.

MARINE DEPARTMENT.

The C.P.R. Atlantic Steamers.

The Empress of Ireland, the second of the two new trans-Atlantic steamers being constructed for the C.P.R. Atlantic lines, was expected to be launched from the yards of the Fairfield Shipbuilding Co., Glasgow, Scotland, by the end of 1905. She is in every respect a duplicate of the Empress of Britain, launched from the same yards Nov. 11. Their general dimensions are: length, 569 ft.; breadth, 65.2 ft.; depth to upper deck, 40 ft.; their register tonnage is 14,500 tons. They are built to Lloyd's three deck and shelter deck 100 A1 class, with forecastle and long bridge. A cellular double bottom is fitted the full length of the ship, and the hulls are divided into separate compartments by nine watertight bulkheads, so as to obtain every security. These bulkheads extend to the level of the upper deck, and are built in accordance with the recommendations of the Bulkhead Committee, so that with any two compartments filled with water the ship would still remain afloat. The hulls are of steel with bottom and top sides hydraulic riveted, and are provided with bilge keels to reduce rolling to a minimum. On the boat deck at the fore end there is a spacious deckhouse for the captain and officers, with chart and wheelhouse. In front of the wheelhouse, for the full width, is a space reserved for the navigation of the ship, and aft of the wheelhouse is a firemen's promenade, with a shelter, communicating directly with the boiler room. Accommodation has been provided for 310 first, 470 second, and 500 third-class passengers, on and above the main deck, and for 270 third class on the lower deck forward. The remainder of the lower deck, with the whole of the orloop deck and hold is for cargo, and two of the lower deck holds will be insulated for carrying frozen meat. The accommodation for the first-class passengers is provided on the lower and upper promenade and the shelter decks, and includes dining saloon to accommodate 250 persons, children's dining room, smoking room with verandahs, music room, together with staterooms, of which some are en suite with private bathrooms. The second-class accommodation is on the shelter deck abaft the first class, and comprises dining saloon the full width of the ship, social hall, and smoking room all adjoining, children's nursery on the deck below, and staterooms. The third-class passengers are placed on the upper and main decks, and are provided with a dining room the full width of the ship, ladies' room and smoking room, with ample promenade and berthing accommodation. The decorations all through are of the highest class. In the first class fine cabinet woods, silks and tapestries are used; in the second class mahogany, and in the third class Canadian maple. The sanitary and ventilating appliances are of the most modern type. For handling the cargo there are 12 winches, and two additional winches are provided for the boats. A complete refrigerating and icemaking plant has been installed, as well as an electric lighting and other plant. The propelling machinery consists of two sets of quadruple expansion balanced engines, and the propellers are four-bladed. Steam will be supplied from nine boilers placed in two watertight compartments, with a large coal bunker between. There are six double ended and three single ended boilers, heated by 60 furnaces; forced draught, and a pressure of 220 lbs. to the square inch are provided for. The engines are calculated to aggregate 18,000 h.p. The steamers are also fitted with the receiving system for the submarine bell signalling system, the Dominion Government having installed several stations at dangerous points in the Gulf of St. Lawrence and the Maritime Provinces. An illustration of the Empress of Britain was given in our Dec. issue.

The Tidal and Current Survey branch of the Department of Marine has issued tide tables for Quebec, Father Point, Halifax and St. John, N.B., for 1906, with tidal differences for the Gulf and River St. Lawrence, Nova Scotia and the Bay of Fundy, and information on currents.

Atlantic and Pacific Ocean Marine.

The Allan Line is having plans prepared for two turbine steamers somewhat larger than the two it now has.

The training cruise of the Dominion Government cruiser Canada for 1905 cost between $25,000 and $30,000.

Capt. Pitts, of the Allan Line str. Laurentian, Lieut. R.N.R., has been promoted to the rank of Commander R.N.R.

The Carmania, the first of the Cunard Lines' turbine steamships, reached New York on her first trip, Dec. 11. She made 19½ knots an hour on the builder's trial trip.

The stranded Allan liner Bavarian will be allowed to remain on the Wye rocks below Quebec during the winter in charge of a crew of four men. The salvage operations will be renewed in the spring.

The Australian House of Representatives has extended the mail contract to the Canadian-Australian Line until July 1 next. The subsidy is at the rate of £66,000 a year, of which Canada contributes £37,091; Australia, £26,563, and Fiji, £2,346.

The owners of the Nova Scotia sealing schooner, which was seized and the crew imprisoned at Montevideo, on a charge of fishing within the three mile limit, propose to bring an action for damages against the Government of that South American republic.

A press report states that the C.P.R. has had plans prepared, and that an order will shortly be placed with a Clyde shipbuilding yard, for the construction of a new steamer for its Pacific Ocean trade. The plans, it is stated, are for a steamer of practically similar size, speed and equipment to those on the Atlantic Ocean.

The icebreaking str. Montcalm returned to Quebec Dec. 7, after having piloted the C.P.R. trans-Atlantic liner into the Gulf of St. Lawrence. It is claimed that the result of the trip shows that navigation from Que-

Atlantic and Pacific Ocean Marine.

(Continued from page 41.)

bec to the ocean can be carried on for six weeks later in the season than heretofore with ordinary built steamers.

The Dominion Government has passed an Order-in-Council granting a contract to the Bucknall Steamship Line of London, Eng., for a service between Vancouver, B.C., and New Zealand. The contract calls for 12 sailings in the year each way, the vessels to have a speed of 10 knots an hour. The Canadian and the New Zealand Governments each provide a subsidy of $50,000 a year.

A press despatch from Glasgow, Scotland, states that negotiations are in progress, if they have not already been concluded, for the purchase by the C.P.R. of the Donaldson line of steamers, trading between Canada and Glasgow. The steamers are principally freighters, with a limited passenger accommodation. A new freight and passenger steamer for the line is under construction on the Clyde.

Following are the officers and directors of the Quebec Transport Co. for the current year: President, W. Power, M.P.; Vice-President, J. G. Scott; Managing Director, T. Harling; other directors: J. G. Ross, A. E. Doucet. At a meeting of shareholders held Dec. 1, the Managing Director was authorized to make the necessary arrangements for a regular service between Quebec and European ports for the season of 1906.

The Donaldson Line has placed an order on the Clyde for the construction of a 10,000 ton freight and passenger steamer for its service between Canada and Glasgow, Scotland. The new steamer will be propelled by twin screws, driven by quadruple expansion engines, and will be fitted with cold storage. She will be named the Cassandra, and is expected to be placed on the Montreal-Glasgow run early in the season of 1906.

The C.P.R. S.S. Monteagle is to be transferred from the company's Atlantic service to the Pacific coast, and will from May 2 run between Vancouver, B.C., and Hong Kong. The Monteagle is a twin screw steel steamer built in 1899, of 5,499 tons gross, and 3,492 tons register. Her dimensions are: length, 445 ft.; breadth, 52.2 ft.; depth of hold 20.7 ft. She has a speed of 13 knots an hour, and accommodation for a limited number of passengers.

A monument erected by the White Star Steamship Co., in memory of the loss of the str. Atlantic, April 1, 1873, was unveiled in the churchyard at Torrance, N.S., Dec. 8. There were over 900 persons on board the steamer when she struck on Prospect rocks, and of these 562 were drowned. Of the bodies recovered 277 were buried in Torrance churchyard. Capt. Brown, of the Allan Steamship Co.'s str. Bavarian, was a junior officer on the Atlantic at the time she struck, and swam ashore with a line, thereby enabling communication to be established with the shore.

The Minister of Marine, while in England recently, was asked by the shipping interests there to take steps to improve the pilot service on the St. Lawrence. An Ottawa despatch states that it was only by an act passed last session of Parliament that the Government obtained control of the pilotage, and it is claimed that no time is being lost in carrying out the policy of improvement. The department, it is stated, contemplates reducing the number of pilots, and requiring that before any new pilots are licensed, they shall have served an apprenticeship of seven years, and to have made 10 ocean voyages. It is also proposed that the pilots will be required to pass an examination as to physical fitness every year, and that they will be compulsorily retired at 65 years of age.

The season of navigation at Montreal opened May 2 and closed Nov. 30. Between those dates 833 ocean-going vessels, with a tonnage of 1,940,056 tons, entered and cleared. This was an increase of 37 in the number of vessels and of 83,359 in the tonnage over the season of 1904. Of the vessels, 786 were steamers, four barques and 43 schooners. Following are some statistics relating to the trans-Atlantic steamers for 1905:—

ALLAN LINE.—A weekly service between Montreal and Liverpool; and services to Glasgow, Scotland and Havre, France. There were carried 11,709 passengers eastward, and 42,253 westward, on the Montreal-Liverpool line; and about 10,000 passengers westward on the Montreal-Glasgow steamers.

C.P.R. ATLANTIC STEAMERS.—During the season three steamers were engaged in the Montreal-Liverpool service, making 18 round trips; five steamers on the Montreal-London and Antwerp service making 23 round trips; a service was also maintained between Montreal and Bristol.

DOMINION LINE.—Weekly service between Montreal and Liverpool. There were carried 4,753 passengers eastbound, and 20,064 westbound.

FURNESS, WITHY & CO.—This company manages the Manchester Liners, which made 21 voyages, the steamers employed having a net register tonnage of 56,141, between Montreal and Manchester, calling at Quebec, and as occasion required at Charlottetown and other ports. It also managed steamers of 10,918 net register tons, making four voyages to South Africa, and chartered steamers of 3,724 tons for two outside voyages.

MCLEAN, KENNEDY & CO.—The Head Line steamers, of which this firm is the manager in Montreal, made 22 trips between Montreal and Dublin and Belfast during the season, the steamers engaged having a net register tonnage of 45,766 tons. The firm also had the agency for tramp steamers of 23,621 net register tons, making 15 trips.

THE LEYLAND LINE maintained a service between Montreal and Antwerp.

THE ROBERT REFORD CO.—This company had the agency for three regular lines of freight steamers, and also represented steamers of 13,748 net register tons, making nine voyages. Of the four lines, the Donaldson steamers of 105,442 tons, made 34 voyages between Montreal and Glasgow; the Thompson steamers of 85,092 net register tons, made 42 voyages to London, Newcastle-on-Tyne, Leith and Dundee; the Lord Line, one steamer of 5,037 tons, made three voyages to Cardiff. The Lord Line, owing to the unprofitable state of the freight market, had to reduce the number of its sailings.

Maritime Provinces and Newfoundland.

Powell and Surin, of Clark's Harbor, N.S., have had built at Shelburne, a 43 ft. gasoline boat for their coasting trade.

The British Admiralty offered for sale by tender the mooring lighter, 250 tons capacity, formerly in use at the Halifax dockyard.

The Moncton, N.B., City Council has voted a subsidy of $500 to the Shepody Navigation Co., which operates the str. Wilfrid C. on the river.

The Dominion Atlantic Ry. has under consideration a proposal to construct a turbine steamer for its steamship routes on the Bay of Fundy.

R. V. Longworth has been appointed by the Department of Marine to look after the freight of the winter steamship service at Charlottetown P.E.I.

The schooner Lady of Avon Co. has been organized at St. John, N.B., with M. Elkins as ship's husband. Mr. Elkins is also manager of the Lord of Avon Co.

A proclamation has been issued declaring the port of Walton, N.S., to be one to which the act relating to harbor masters shall apply, and defining the limits of the port.

The Dominion Iron and Steel Co. has chartered the Swedish str. Drottning Sophia to carry iron ore from Wabana, Nfld., to Sydney, N.S., for the season of 1906.

The St. John River steamer Clifton was burned at her moorings, Reed's Point, recently, and totally destroyed. The owners are looking for another steamer to place on the route at the opening of navigation.

The Dominion Government has appointed the following wharfingers at Government wharves:—N. P. McLean, Washabuck Center, N.S.; M. Faulkner, Noel, N.S.; J. Arnold, Chipman's Brook, N.S.; J. McIntosh, Neguac, N.B.

A line of steamers is being operated by the Royal Mail Steam Packet Co. between Jamaica and New York. This company was recently looking for a contract to operate its steamers between Jamaica and Maritime Province ports.

The Dominion Coal Co. is contemplating putting on another passenger steamer to run between Montreal, Que., and St. John's, Nfld., calling at intermediate ports in Quebec, New Brunswick, Prince Edward Island and Nova Scotia.

The schooner Matilda, which was driven to sea from Bras d'Or Lake, N.S., Nov. 29, was towed into Louisburg, Dec. 8. She was drifting about helplessly and the crew suffering greatly from exposure and shortage of water and provisions.

The old str. New Brunswick, built in 1860, and for many years running between Boston, Mass., and St. John, N.B., was wrecked at Nahant, Mass., during the summer. The hull has recently been sold to junk dealers at Boston, who propose to burn it in order to recover the metal.

Representatives of the companies running freight and passenger steamers on the St. John River met at St. John, N.B., recently to discuss a project for amalgamation. There is a general feeling that something should be done in that direction, but it is considered doubtful whether anything can be arranged.

The Nova Scotian str. Lunenburg, running between Pictou, N.S., and the Magdalen Islands, Que., was wrecked at Amherst Harbor, on one of the islands, Dec. 4. The principal owner of the steamer, R. J. Leslie, M.L.A., Halifax, was on board, and, with ten of the crew, was drowned. Six of the crew were saved.

The Tidal and Current Survey branch of the Department of Marine has issued tide tables for Charlottetown, P.E.I., Pictou and St. Paul Island, N.S., for 1906, with tidal differences for Northumberland Strait, the southwestern side of the Gulf of St. Lawrence, the north coast of Prince Edward Island and Cabot Strait.

The Kennebecasis Steamship Co. has been incorporated under the New Brunswick Companies' Act, with a capital of $20,000 and offices at Hampton, N.B., to carry on a general navigation business within the province. The provisional directors are:—A. T. Mabee, S. H. Flewelling, R. G. Flewelling, A. W. Hicks, of Hampton; and A. B. Moore, of Westfield, N.B.

The wrecking str. Stella Maris, which was purchased in England for a Nova Scotian syndicate, has been stationed at St. John's, Nfld., for the winter. The steamer was the

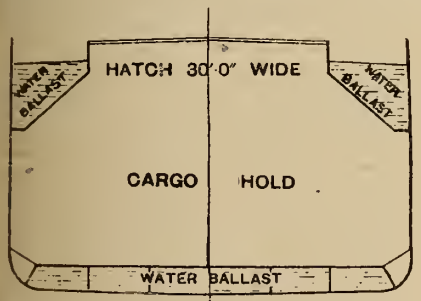
British gunboat Starling, which was sold owing to the reorganization of the navy last year. The company has also purchased the Bounce, another gunboat, for use as a tug, and will bring her out in the spring.

The Dominion steamers Minto and Stanley were equipped with the Marconi Wireless telegraph apparatus for the winter season of navigation, 1904-05, and aided in bringing about a considerable diminution of the expense to the Government in maintaining the service. Owing to the fact, however, that there was no shore station with which these boats could communicate, the best results were not obtained, and this will be remedied for the current season by the erection of a station and mast at Cape Bear, P.E.I.

There are under construction at the yards of Sir Raylton Dixon & Co., Middlesborough-on-Tees, Eng., two steamers for Atkisselskabet Borgestad, Christiana, Norway, and Fearnley & Eger, of the same place, both of which have been chartered by the Dominion Coal Co. for its trade between Sydney, N.S., and Montreal. The steamers are to be of the same dimensions and type as the Christian Knudsen, which was put on the run early in 1905. Capt. Nilsen has arrived at Middlesborough from Sydney to superintend the construction for the D.C. Co. The steamers are constructed on the cantilever frame system with top side water ballast tanks, a perfect self-trimmer, with holds absolutely clear of beams, stanchions or web frames. This enables grabs to work with the greatest facility in discharging cargo. The cellular double bottom has a capacity for 1,320 tons of water ballast, and there is a capacity for 700 tons in the topside tanks, a total of 2,020 tons, sufficient to keep the propeller fully immersed when in water ballast only. This



SECTION DOMINION COAL CO.'S NEW STEAMERS.

cantilever transverse frame construction enables the space contained in the top side water ballast tanks to be excluded from tonnage measurements, with the result that the net tonnage of vessels of the Christian Knudsen type gives a proportion of about three tons dead weight carried for each ton of net register. The dimensions of the two new steamers are practically the same as those for the Christian Knudsen, which follow:—length, 360 ft.; breadth, 51 ft.; depth, 28 ft., 10 in. moulded. The engines are placed in the stern, where also are the quarters for the sailors and firemen; the saloon, captain's room, etc., are amidships, and the stores forward. On the deck there are one mast for signalling, and 10 derrick posts, fitted with 18 derricks, which work through hatchways 30 ft. wide. She carries a dead weight cargo of 6,845 tons on 22.7 ft. draught, and can be loaded in about three hours from the lifts at Sydney, and discharged by grabs in about six hours. The Christian Knudsen has a capacity of 316,380 bush. of grain. She is fitted with triple expansion engine, cylinders, 23½, 39 and 66 in. diameter by 48 in. stroke, to which steam is supplied at 180 lbs. pressure, from two single-ended boilers, 15 ft. by 11 ft. 6 in., having an indicated horse power of 2,000 for a speed of 10½ knots an hour at sea. The coal bunkers have a capacity of 590 tons. A capacity plan and section are given on this page.

CAPACITY PLAN OF TWO STEAMERS UNDER CONSTRUCTION TO RUN IN THE DOMINION COAL CO.'S SERVICE.

Province of Quebec Shipping.

J. Blais has been appointed wharfinger at the Government wharf at Berthier, Que.

The C.P.R. is understood to be purchasing land to increase its wharfage facilities at Quebec.

On Dec. 8, the tug Belle towed a batteau down Quebec harbor, and through the floating ice to Indian Cove, Que.

The St. Lawrence Floating and Wrecking Co. has passed a by-law increasing the number of its directors from three to five.

The Montreal City Council proposes to ask the Quebec Legislature next session for authority to expend $50,000 to establish a free ferry to St. Helen's Island.

Tenders are under consideration by the Department of Railways and Canals, for the construction of a concrete wall around St. Gabriel basin no. 1, Lachine Canal.

The Montreal pilots elected the following officers and committee for the current year:—President, W. Gauthier; Secretary, N. Dussault; members of committee: C. Auger, W. Raymond, N. Arcand.

The str. St. Laurent, operated as a ferry steamer between Montreal and Berthier, and also on the St. Helen's Island service, sank at her moorings at Montreal. Dec. 3. The damage is estimated at $2,000.

An order-in-council has been passed approving of a by-law of the Montreal Harbor Commissioners authorizing the leasing to persons, firms, or corporations, for a period not exceeding 10 years, the wharf sheds now under construction.

The directors of the association of Licensed Pilots for and below Quebec for the current season are:—A. Larochelle, A. Pouliot, C. Raymond, J. Talbot, L. Thiberge, L. A. Mourin. The latter is a new member, replacing A. Raymond.

The Department of Marine has arranged for the opening of schools for instruction in seamanship and navigation at Montreal and Quebec the first week in Jan. Capt. Riley has been appointed lecturer at Montreal, and Mr. Seaton at Quebec.

The last coal steamer to leave Montreal was the Bergenhus, which reached Sydney, N.S., Dec. 8; and the last ocean-going steamer was the Lake Michigan, which was piloted down the river and gulf by the icebreaking str. Montcalm. She left Montreal Dec. 4.

During the season of navigation of 1905, there were 11,088 vessels having a tonnage of 2,781,191 tons entered and cleared from Montreal, against 10,027 vessels of 2,348,496 tons in 1904. The number of vessels using the Lachine Canal during the season was: Canadian steamers, 1,050; Canadian barges, 1,477; U.S. vessels, 135, against 799 steamers, 1,334 barges and 151 U.S. vessels in the season of 1904. During the season, 367 vessels carrying 1,388,219 tons of coal from Maritime Province ports, came up the St. Lawrence, of which 336, representing 1,257,208 tons, were landed at Montreal. These figures refer to the coasting trade only, and exclude the oversea trade.

Ontario and the Great Lakes.

During 1905 there were 464 lockages at lock no. 1, Lakefield, Ont., against 216 in 1904.

W. I. Wagg has been appointed wharfinger at the Government wharf at Providence, Bay, Ont.

H. Calderwood, formerly of Collingwood, Ont., has been appointed Bureau Veritas surveyor at Toronto.

The str. Monkshaven has been wrecked near Pie Island, Lake Superior, and is expected to become a total loss.

P. K. Wilson proposes to construct a marine railway at Meaford, Ont., and has applied to the town council for a free site.

The lighthouse at False Ducks Island, 22 miles above Kingston, Ont., was burned Nov. 28. The lighthouse will be rebuilt at once.

A Peterborough, Ont., deputation has asked the Department of Railways and Canals to construct a dock along the Trent Canal there.

The U.S. str. Sylvia sailed from Fort William, Ont., for Buffalo, N.Y., Dec. 4, with a cargo of 326,000 bush. of grain, the record for the port.

The U.S. marshal at Detroit, Mich., has seized the Canadian str. Abani, under repair there, to satisfy a claim for wages by the engineer and pilot.

J. Perkes, Parry Harbor, Ont., has placed an order for a 130 ft. steamer at Meaford, Ont., and orders for three tugs have been placed at the same yard.

The Department of Marine has arranged to open a school for teaching navigation at Kingston, Ont., with Capt. Donnelly as lecturer. The school opens the first week in Jan.

L. Malton, Morrisburg, Ont., has purchased the str. Valeria, from Capt. Dix, Kingston,

C.P.R. LANDS

THE CANADIAN PACIFIC RAILWAY COMPANY have 12,000,000 acres of choice farming lands for sale in Manitoba, Assiniboia, Saskatchewan and Alberta. Manitoba lands and Assiniboia lands east of third meridian, $4.00 to $10.00 per acre according to quality and location. Lands in South-Western Assiniboia and Southern Alberta, $3.50 to $8.00 per acre. Ranching lands generally $3.50 to $4.00 per acre Northern Alberta and Saskatchewan lands generally $6.00 to $8.00 per acre. Maps showing the lands in detail will be sent free on application.

TERMS OF PAYMENT.

An actual settler may purchase not more than 640 acres, on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal with interest in nine equal instalments annually thereafter as shewn in the following table:—

160 Acres at	$3.50	per acre,	cash payment	$83.90,	first year's interest	$28.58	and nine instalments of	$70.00			
" "	4.00	"	"	95.85,	" "	"	32.64	"	"	80.00	
" "	4.50	"	"	107.85,	" "	"	36.73	"	"	90.00	
" "	5.00	"	"	119.85,	" "	"	40.81	"	"	100.00	
" "	5.50	"	"	131.80,	" "	"	44.89	"	"	110.00	
" "	6.00	"	"	143.80,	" "	"	48.98	"	"	120.00	

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of 6 per cent. per annum.

DISCOUNT FOR CASH.

If land is paid for in full at time of purchase, a reduction from price will be allowed equal to ten per cent. on five-sixths of the purchase money.

Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN,
Land Commissioner C.P.R. Co., Winnipeg.

CANADA NORTH-WEST LAND CO.

This Company has 750,000 acres of selected lands in Manitoba and Assiniboia which offer excellent opportunities to settlers and investors who desire to secure good lands in well-settled districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

DEPARTMENT OF AGRICULTURE AND IMMIGRATION

MANITOBA with its network of railways, giving markets near at hand for all farm products, offers unrivalled opportunities for investment.

PROVINCIAL GOVERNMENT LANDS can still be purchased at from $3 to $6 per acre.

IMPROVED FARMS in all districts of the province can be purchased at from $10 to $40 per acre. These prices are advancing every year.

A FEW POINTERS

On arrival at Winnipeg the wisest policy for any new settler to adopt is to remain in Winnipeg for a few days and learn for himself all about the lands offered for sale and to homestead.

There are districts that have been settled for many years in which land can be purchased. Some of this may be unbroken prairie which still possesses all the richness and productive powers of our virgin prairies. Other lands, cultivated and having comfortable farm buildings, are ready for immediate possession.

There are Provincial Government lands, Dominion Government homesteads, and railway lands to be secured.

The price of land varies from $3 to $40 per acre.

Location with respect to railways, towns, timber and water determines the price of land.

For information regarding homesteads, apply at the Dominion Land Office.

For purchase of Provincial lands apply at the Provincial Land Office in the Parliament Buildings.

For C.P.R. or C.N.R. lands apply at the land offices of said railway companies.

For lands owned by private individuals apply to the various real estate agents in the city.

For situations as farm laborers apply to:

This is the Locomotive that works best under test. Judges at the Louisiana Purchase Exposition awarded it the **GOLD MEDAL** because it is the best in its class.

THE LIMA LOCOMOTIVE & MACHINE CO.

114 W. Second Street, - LIMA, OHIO, U.S.A.

Ont. The steamer will be placed in the ferry service between Morrisburg, Ont., and Waddington, N.Y.

It is reported that 70 vessels have been lost and 149 vessels wrecked, during the three big storms on the Great Lakes this season. The value of vessels and cargoes is estimated at nearly $7,000,000.

The St. Lawrence and Chicago Navigation Co.'s str. W. D. Mathews went ashore in Mud Lake, near Sault Ste. Marie, Ont., Dec. 4, and part of her cargo had to be removed before she was got off.

A fleet of ice-breaking car ferries to operate between Port Arthur and Batchawana Bay, Ont., is projected as a connection between the Canadian Northern Ry. and Mackenzie, Mann & Co.'s eastern lines.

J. S. Stevenson, Pittsburg, Pa., has placed orders at Kingston, Ont., for a 65 ft. steamer fitted with triple expansion engine, and a 32 ft. gasoline motor, 18 h.p., for Muskoka Lake. Both are to be delivered in June.

J. A. Goodearle, heretofore Assistant Manager Thousand Island and St. Lawrence River Steamboat Co., has been appointed Manager, Turbine Steamship Co., Hamilton, succeeding H. W. Wilson, resigned.

During Nov. the tonnage passing through the canals at Sault Ste. Marie was 5,006,443 tons, bringing the total for the season to Nov. 30, to 43,000,172 tons, an increase of about 12,000,000 tons over 1904 to the same date.

The Toronto ferries stopped running Dec. 15, and navigation generally on the Upper and Lower Lakes, as well as the St. Lawrence River, closed about the same time. The last steamers from Fort William and Port Arthur cleared Dec. 14.

The County of Welland has been held liable for damages for the sinking of the tug Michael Davitt in the Welland Canal in 1904. The tug struck on some piles which had been cut off 4 ft. under the water, by order of the Warden of the county.

The Minister of Railways and Canals has appointed H. Holgate, C.E., Montreal, to make an investigation into the construction of the Peterborough lift lock, where a leak has developed, and to look into the construction of the lift lock now under construction at Kirkfield, Ont.

The director of the Meteorological Observatory, Toronto, reports that of the recent storms over the lake regions, one in Oct. and four in Nov. were specifically forecasted several hours before their arrival, and the necessary warnings sent out. One storm forecasted did not materialize.

The question of the provision of lifeboats and other life-saving appliances at points on the north shore of Lake Ontario, is being brought to the attention of the Department of Marine. This matter was brought specially to notice by the wreck of the schooner Oliver Mowat, near Oshawa, Nov. 28.

The master of the U.S. str. Greyhound during the summer was fined for selling liquor on board while in Canadian waters. An appeal was taken and Chief Justice Meredith decided, Dec. 8, that the Province of Ontario had jurisdiction not only within the three mile limit, but also to the International boundary through the centre of the lakes.

The Lake Erie Navigation Co., a Dominion incorporation, the Ontario license of which has been revoked, was incorporated July 5, 1899, and its offices were at Walkerville, Ont. It was operated in connection with the Lake Erie and Detroit River Ry., and has not been doing business since the railway was sold to the Pere Marquette Rd.

The Montreal Transportation Co. has placed an order for the construction on Georgian Bay of an all steel tow barge, provided with double bottom for water ballast. She will be of full Welland Canal size, and is expected to carry 78,000 bush. on a 14 ft. draft. The contract calls for completion about June 15. The new barge, it is stated, will be 206 ft. long over all, 41 ft. beam, and 19 ft. deep.

The Rochester and Ogdensburg Navigation Co. has been incorporated in the State of New York to carry on a general navigation business on Lake Ontario and the St. Lawrence River. The capital is $50,000, and the provisional directors are:—E. A. Newell, D. R. Armstrong, J. Larock, J. R. Brandy, G. H. Phillips, D. T. Latham, S. Cunningham, J. C. Tulloch, G. Anderson, Ogdensburg, N.Y.

The Opemican River Improvement Co., which was recently incorporated under the Ontario Companies' Act, proposes to improve the navigation of the Opemican and McDougall Rivers, tributaries of the Ottawa River. The promoters are interested in the Hawkesbury Lumber Co. and the W. C. Edwards Co. (Ltd.), and $17,000 has already been expended upon the improvement works.

A large railway ferry is under construction at Cleveland, Ohio, for a run between Port Burwell, Ont., and either Conneaut or Ashtabula, Ohio. The ferry will have accommodation for 28 cars, and will be of specially heavy construction to enable navigation to be kept up during the winter. The C.P.R and the Ellsworth Coal Co. are interested in the ferry, as well as a railway on the U.S. side of the lake.

The Globe Furniture Co., Toronto, has been authorized to increase its capital stock to $100,000, and has been given power to construct tramways, telegraph and telephone lines on properties owned and controlled by it, and to own or charter steam and other vessels, as well as to construct wharves, etc., in connection with its operations. The company operates under an Ontario provincial charter.

R. O. and A. B. Mackay, Hamilton, Ont., are interested in a project to operate a new line of steamers between that port and Montreal. A. B. Mackay proposes to take a trip to England early in the year, to negotiate for the purchase of suitable steamers. Two steamers having accommodation for about 300 passengers, a capacity for 900 tons of cargo, and a speed of 16 miles an hour, now in London, Eng., are under consideration.

The survey parties which were in the field during 1905, in connection with the northern and southern outlets of the Trent Valley Canal, have completed their work. Three routes have been surveyed at either end. The terminal points on Lake Ontario are at Port Hope, Cobourg and Trenton, and the routes from Lake Simcoe to Georgian Bay are via the Severn River, the North River and by Coldwater. Plans and estimates will be made during the winter, and a decision will be reached early in the year as to the routes to be adopted.

The Hamilton Steamboat Co. closed its season Dec. 9, when the Macassa made her last run from Toronto to Hamilton. The report of the directors presented at the annual meeting of shareholders held Dec. 13, showed that freight business had been very good during the year, and over 225,000 passengers had been carried. A dividend of 10 % was declared and the directors re-elected. The company has under consideration a proposal to construct a new steamer with accommodation for 2,000 passengers. M. Leggatt was elected President; G. T. Tuckett, Vice-President, and Miss A. Abraham, Secretary.

The Midland Navigation Co. has placed an order for the construction on the Georgian Bay of a new steel steamer for its Upper Lake trade. We were advised Dec. 14, that the details of the plans had not been finally settled. A press report states that the new steamer will have the following general dimensions:—length, 466 ft. keel, 486 ft. over all; breadth, 55 ft.; depth, 31 ft., carrying capacity, 320,000 bush. She will be fitted with triple expansion engines 23, 38½, and 83 in. cylinders, by 42 in. stroke; steam being supplied by two Scotch marine boilers, 15½ ft. diameter by 12 ft. long, at a pressure of 180 lbs. The new steamer is to be ready in Oct.

Under the provisions of the Act relating to the Department of Railways and Canals, an order-in-council has been passed, adding to the rules and regulations respecting canals, the following provision relating to the wintering of vessels in the canals:—"The privilege of wintering vessels in the Dominion canals shall be enjoyed only by a special permit, to be granted in each case, if deemed advisable, and, if granted, the vessel shall be at the sole risk of its owner, and His Majesty shall not be responsible for any damage that may occur to any such vessel while so wintered, whether such damage happen from or arise out of the lowering of the water in, or the unwatering or filling of the canal, with or without notice to the owner or person in charge of such vessel, or any negligence on the part of any person or any officer, servant or agent of His Majesty or from any other cause whatsoever."

The Ontario Car Ferry Co. has been incorporated under the Dominion Companies' Act, with a capital of $500,000 and offices at Montreal, to own and operate steam and sailing vessels, barges and all other kinds of lighters, floats, etc., to carry by means thereof, loaded railways cars, general freight and passengers, etc., between such ports on Lake Ontario, whether in Canada or the U.S. as may be expedient. The company is also given power to acquire terminal facilities and to enter into agreements with railway companies in Canada and the U.S., for the interchange of traffic, as well as to carry on any other business incidental thereto as may be considered expedient. The company is authorized to issue bonds, debentures and other securities, and may have one or more offices in the United States, and keep duplicate sets of books there. The provisional directors are: C. M. Hays, E. H. Fitzhugh, J. W. Loud, Montreal; A. G. Yates, W. T. Noonan, R. W. Davis, Rochester, N.Y. The provisional directors are either connected with the G.T.R., or the Buffalo, Rochester and Pittsburg Ry., and it is stated that the proposed ferry will be operated between Port Hope, Ont., and Rochester, N.Y. The ferry proposed to be put on the route will have a capacity of 25 cars, and will make one round trip a day.

Manitoba, Alberta, Saskatchewan, Etc.

During the season of navigation of 1905, steamers on the Yukon River carried 20,385 tons of freight to Yukon points, and 5,000 tons to Alaskan points.

Major Moodie recently stated that with Hudson Bay and Hudson Strait properly charted, and lighthouses and beacons along the route, and good wharves at Fort Churchill, there is nothing to prevent successful navigation for four months in the year.

A suggestion has been made that the Department of Public Works should construct booms at mouths of the streams tributary to the Yukon River, with a view of keeping ice out of the main stream, and so enabling navigation to be carried on for a longer period yearly.

One of the steamers caught in the ice on Lake Winnipeg was the Rocket, which was frozen in at the mouth of the Little Saskatchewan River. The Dominion Inspector of Fisheries was on board, engaged in the task

of collecting spawn. When it was evident that it was impossible to get the steamer out, the boats, etc., were laid up, the fish and spawn collected returned to the water, and the party set out overland for home, a distance of about 150 miles, on Nov. 16. In five days they reached Oak Point, from which point news of their safety was telegraphed.

B.C. and Pacific Coast Shipping.

The Vancouver sealing schooner Fawn, several months overdue, has been given up as lost, with a crew of six white men and 26 Indians.

F. Trapp's steam launch was sunk on the Pitt River, through getting under the government wharf as the tide was rising, recently, and subsequently the tug Lily ran on a sandbar near the same place and was sunk.

The Vancouver Shipmasters' Association has recommended the improvement of the aids to navigation at a number of points, and the provision of additional lights on the B.C. coast. The total number of points affected is 55.

The Dominion Government has completed arrangements for a steamer to call at Graham Island, B.C., every two months, the first trip to be made early in the spring. At present a steamer makes an annual call at the island with mail and provisions.

The Tidal and Current Survey branch of the Department of Marine has issued tide tables for Victoria, B.C., Sand heads, Strait of Georgia and Sitka, Alaska, for 1906, with tidal differences for Esquimalt, Vancouver, New Westminster, Nanaimo, Baynes Sound, Barkley Sound, Alert Bay and Port Simpson; and the current in First Narrows of Burrard Inlet, Seymour Narrows and Sergius Narrows.

There are under construction at Esquimalt, B.C., the following steamers:—new wooden screw steamer for the C.P.R.; a new quarantine steamer for service at William Head, and another steamer for the Dominion Government. The C.P.R. str. Princess May is being overhauled, and will be remodelled internally, while her engines will be refitted and new boilers installed. The str. Danube has been repaired and refitted at the same place, for service as a wrecking steamer at Esquimalt.

Stranding of the S.S. Bavarian.

Following is the judgment delivered in this case by Chief Justice Routhier, of the Admiralty Court of Quebec, and also signed by Commander O. G. V. Spain, R.N., Wreck Commissioner, and Lieut. H. L. L. Pennell, R.N., who sat with Judge Routhier as assessors:

"The Bavarian, commanded by Capt. Brown, left Montreal on the morning of Nov. 3 with a full list of passengers and cargo of freight, bound for Liverpool. She took on board in Montreal a Montreal-Quebec pilot, and continued her voyage to Quebec in a safe and satisfactory manner. On leaving Quebec, Pilot Paul Lachance was taken on board and proceeded down the river in charge of the navigation of the vessel. The Bavarian left Quebec at 7.30 p.m., Nov. 3, the night being moderately clear, with occasional snow flurries. The lights on the Island of Orleans and Madame Island reef gas buoy were fully visible, and Bellechasse light was passed in due course, being quite distinct. The electric lights at Grosse Isle were plainly visible on the port bow and a gas buoy was visible at a distance of about five miles, and nearly right ahead, which gas buoy undoubtedly must have been the St. Thomas shoal gas buoy. At the time of sighting the St. Thomas gas buoy, another gas buoy should have been in sight, broad on the port bow, and in close proximity to the electric lights on Grosse Isle. This gas buoy is known as the Quarantine Gas Buoy, and on looking at the official list of lights as issued by the Marine Department it is placed in this position to enable ships coming up the river to anchor at quarantine. However, by all the evidence adduced, pilots have been in the habit of using the Quarantine Gas Buoy as a leading buoy going down the river. On the occasion in question, the light on this gas buoy had been extinguished for some days and the pilot of the Bavarian, not having been notified that this light was not in position, took for granted that the first gas buoy that he did see, was this particular one, and on this occasion he surmised that he was on the north side of the channel instead of being considerably to the southward, and, therefore, altered his course to bring the St. Thomas gas buoy on his port bow instead of on his starboard. No doubt, in the opinion of the Court, at this period Pilot Lachance, being doubtful about his position, must have taken into his consideration the bearing of the electric lights on Grosse Isle. He stopped the ship and ordered the lead cast. Before this order could be carried out he apparently considered that his ship was on the right course, as he countermanded his instructions about the lead, and ordered the ship at half speed ahead. By the evidence of the captain and the first officer, Crane Island light at this time just ahead came into sight, and it is impossible for the Court to understand how Pilot Lachance should have still been under the impression that the gas buoy on St. Thomas shoal, which was bearing a little on his port bow, could be the Quarantine Gas Buoy, which, by the course he was steering, should have been between himself and the electric lights at Grosse Isle nearly abeam on the port side. Very shortly after this Pilot Lachance, having become fully aware of the mistake he had made, put his helm hard to starboard, and stopped the ship, but not in time to prevent her stranding on the Wye Rock.

"In the opinion of the Court the cause of the stranding of the Bavarian was on account of Pilot Lachance not paying sufficient attention to his compass courses after passing Bellechasse light, and putting implicit reliance on the Quarantine Gas Buoy, although the gas buoy which he did pick up was on his starboard bow instead of his port. This fact, in conjunction with the knowledge he must have had, if he had taken into consideration that the Quarantine Gas Buoy should have been between himself and the electric lights at Gosse Isle, which were plainly visible, should have warned him of his mistake in time to have avoided the catastrophe. The Court considers that the practice of pilots in altering their course on gas buoys which are liable, for various reasons, to be out or out of position, is a very reprehensible one; more especially as in this present instance when the first buoy he expected to see was picked up on the starboard bow instead of the port. The Court is also of the opinion that the Secretary of the Corporation of Pilots in Quebec, and also the pilots at Father Point, should be informed on every occasion by the Department of Marine and Fisheries in Quebec when aids to navigation are reported out of position, or on any changes being made. And although by the evidence of the Agent of the Department in Quebec, the gas buoy at quarantine was not considered by him an aid to navigation in the way of a leading buoy, Pilot Lachance evidently considered it a leading buoy, and when the Department received information that the buoy was out, the pilots' office should have been notified immediately. The Court also considers that the evidence as given by some of the pilots during the investigation was unsatisfactory, more especially in regard to the statements

Richard Southam Manager

made that it was impossible to distinguish the difference between lights at a distance of 1½ and 4½ miles, and also by acknowledging that they considered it safe and prudent navigation to navigate their vessels simply on the uncertain position of one buoy. The Court also considers that if Pilot Paquet had not intruded on the upper bridge of the Bavarian the judgment of Pilot Lachance, which, up to the present unfortunate disaster had been above reproach, would have been unbiased. The Court considers that the captain and officers of the Bavarian are not in any way to blame for the disaster, but that Pilot Lachance, through careless navigation, is responsible, and the Court therefore, after taking his excellent character and previous good record into consideration, suspends his license as a pilot till July, 1907."

Notices to Mariners.

The Department of Marine has issued the following:—

No. 108. Nov. 9.—Nova Scotia—242. South coast, Lunenburg whistling buoy replaced by gas and whistling buoy. Prince Edward Island—243. Charlottetown, pile beacons replaced by buoys, railway bridge constructed.

No. 109. Nov. 10.—Nova Scotia—244. Bay of Fundy, Lurcher shoal, lightship replaced at her station. 245. South Coast, approach to Halifax, outer automatic whistling buoy replaced by gas and whistling buoy.

No. 110. Nov. 10.—British Columbia—246. Straits of Georgia, Sandheads of Fraser River, bell buoy established. 247. Strait of Georgia, sandheads of Georgia, sandheads lightship at entrance to Fraser River, erratum.

No. 111. Nov. 17.—British Columbia—248. West coast of Vancouver Island, Barkley Sound, hydrographical notes. 249. South coast Vancouver Island, Strait of Juan de Fuca, Clo-oose, position of village, telephone communication.

No. 112. Nov. 20.—Ontario—250. Lake Huron, Goderich, new breakwater damaged, caution.

No. 113. Nov. 25.—Nova Scotia—251. Bay of Fundy, basin of Minas, Noel Bay, light on Noel wharf. 252. South coast, approach to Ecumsecum inlet, buoys established.

No. 114. Nov. 27.—Ontario.—253. Lake Huron, north channel, Aird Island, Little Detroit, wreck removed. 254. Lake Superior, Caribou Island, character of light unchanged.

No. 115. Nov. 27.—Nova Scotia—255. Cape Breton Island, Gulf of Canso, McMillan point, lighthouse established. New Brunswick.—256. East coast, Miramichi Bay, Hay Island, new front range tower.

No. 116. Nov. 29.—Nova Scotia—257. Bay of Fundy, Chignecto channel, Shulie, lighthouse established.

No. 117. Nov. 29.—Ontario—258. Lake Ontario, west end, Burlington bay, new front range lighthouse. 259. Lake Erie, Port Dover, new front range lighthouse. 260. Lake Erie, Rondeau harbor, new front range lighthouse.

Longshoremen at St. John, N.B.

On the arrival of the Allan Line SS. Parisian at St. John, N.B., on Nov. 20th, the longshoremen who were awaiting her arrival refused to work unless paid at the rate of 35c. an hour, last season's rate being 30c. an hour day and night, and 40c. for grain work. H. and A. Allan did not see their way to accede to the men's demand, and at the time no other men being available to work, the discharging was done by the crew. On the arrival of H. A. Allan, President of the Shipping Federation of Canada, from Montreal, he was interviewed by the union leaders and gave them plainly to understand that his and the other firms had fully made up their minds to grant no increase, and if the men did not come in on the old terms he would bring men from Montreal to load and discharge their vessels, and possibly take their ships to other ports for the winter. As the men were determined to hold out, the Montreal Federation despatched 40 laborers from Montreal who started work on the Parisian the next day. The following day 20 others and 30 for the Donaldson Line arrived. A number of these were induced by the strikers to leave their work, but the majority remained, and the Parisian having finished her loading sailed on time, on Nov. 26.

On Nov. 26 five more gangs were taken down for the C.P.R.'s SS. Montezuma and the Head Line Str. Bengore Head. The Allan Line Sicilian arrived on Nov. 27 from Halifax, where she discharged her through freight, and the imported men were at once started on her. In all, 260 men were imported into St. John, and on Nov. 28 a meeting of the strikers was held, at which several speakers pointed out the loss that would result to the city and themselves if they continued the strike, and urged the men to return to work on the old terms. Others at the meeting urged the men to hold out with the result that no decision was arrived at. On the morning of Nov. 28, some union men returned to work at the old terms. By mid-day nearly all the vacancies were filled with local men, and the strike had practically collapsed, the men accepting the same terms as last year, that is, 30c. an hour day and night, and 40c. for grain trimming.

Had the shipping people conceded a 35c. rate it would have made the wages at St. John, with one exception, the highest of any port in North America, that exception being Quebec, where 37½c. is paid, and where the union has practically driven trade away from the port. In New York, where living is much higher, 30c. is the rate paid ship laborers. In Hoboken, the Hamburg-American and other German Lines pay their laborers 25c. At Halifax the rate is 20c. At Newport News and Baltimore the rate is 20c. So when all things are taken into consideration, the shipping people are to be congratulated in bringing this question to such a successful issue, and much credit is due to the Montreal shipping men and their splendid organization, which practically controlled the situation, and shows the people of other shipping ports that as well as dealing with the different work that usually falls to such bodies as the Chamber of Commerce in England, the organization is complete, and able to counteract any evil effect from union excesses.

International Waterways Commission.

The U.S. section of the International Waterways Commission has presented a progress report to the Secretary of War at Washington. The section refers to the number of questions that have been raised, and asks for further instructions from Congress. Among the questions referred to are the following:—

The uses of the waters in the Niagara River for power purposes and the regulations necessary to ensure an equitable division of the waters between Canada and the U.S. and the protection of Niagara Falls as a scenic spectacle.

The alleged differences in the marine regulations of the two countries with respect to signal lights and the advisability of adopting uniform signals for both countries.

The advisability of building controlling works at the outlet of Lake Erie, including

NOS. 346 and 348 BROADWAY, N.Y. CITY, U.S.A.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices.

the effect upon the levels of the lakes and upon their shores, and upon the River St. Lawrence.

The diversion southward of certain waters in the State of Minnesota that now flow north into the Rainy River and the Lake of the Woods.

The effect of the Chicago drainage canal upon the levels of Lakes Michigan, Huron, Erie, and Ontario, and upon the River St. Lawrence.

Delimiting the International boundary on the International waterways and delineating the same on modern charts.

The suppression or abatement of illegal fishing on the Great Lakes.

The location and construction of common channels.

According to the report some of these questions clearly come under the jurisdiction of the Commission as constituted, while some do not, and there is room for doubt with respect to others. The Canadian members of the Commission are ready and anxious to consider all these questions and to extend the jurisdiction of the Commission to all International waters between the Atlantic and Pacific Oceans. It is, the report states, desirable that the wishes of Congress in this matter be more clearly defined. Since it completed its organization in Sept. last, the Commission has made progress in the collection, of data upon some of these questions, particularly those relating to the use of water at Niagara Falls, and to the regulation of the level of Lake Erie by works near its outlet. The Commission on Oct. 28, adopted the following resolution: "Resolved, that this Commission recommends to the Governments of the U.S. and Canada, that such steps as they may regard as necessary be taken to prevent any corporate rights or franchises being granted or renewed by either Federal, State or Provincial authorities for the use of the waters of the Niagara River for power or other purposes until this Commission is able to collect the information necessary to enable it to report fully upon the 'conditions and uses' of those waters to the respective Governments of the U.S. and Canada."

The most pressing questions, according to the report, relate to the use of water at Sault Ste. Marie, where the traffic through the canals constructed at the rapids is said to be larger this year than ever before, it being estimated at upwards of 40,000,000 tons for the year.

The Canadian section of the Commission will report to Parliament on its meeting. Meanwhile it has obtained a report from Abbe La Flamme, Que., upon the retrocession of Niagara Falls. He says that the retrocession will not affect the Canadian side, the Canadian fall is 10 ft. lower than the American fall, and the water bears towards Canada. When the power companies on the Canadian side are in full operation and abstracting 48,000 cubic feet of water a second, the water level of the river will almost reach the bottom of the river at the New York side. The further multiplication of power companies above the falls will bring about the disappearance of the U.S. falls, and will materially affect the Horseshoe Falls. The extent and character of the retrocession constantly varied and no absolute data were obtainable.

The Dominion Government proposes to ask the Ontario Government to unite with it in taking action to preserve the falls.

Official announcement was made Dec. 2, of the appointment of G. C. Gibbons, London, Ont., as chairman of the Canadian section of the International Waterways Commission, in succession to J. P. Mabee, K.C., appointed a Judge of the Supreme Court of Ontario. The appointment of T. Cote, Ottawa, as Secretary of the Canadian section of the Commission, was also gazetted, the appointment to date from Feb. 20, 1905.

Among the Express Companies.

The Canadian Ex. Co. has closed its offices at Murray Bay, Que., and Flat Lands, N.B.

J. MacMillan, heretofore in the Dominion Ex. Co.'s audit office, Toronto, has been appointed cashier Canadian Northern Ex. Co., Winnipeg, Man.

The Western Ex. Co. has placed its service on the new line of the Minneapolis, St. Paul and Sault Ste. Marie Ry. between Thief River Falls and Kenmare, N.D.

A. M. Patterson has been appointed Acting Route Agent, Canadian Ex. Co., at St. John, N.B., succeeding LeB. Coleman, appointed agent at Halifax, N.S.

The Canadian Northern Ex. Co.'s uptown office at Edmonton, Alta., will be located on Jasper Ave., where the company proposes to erect a large building.

The joint summer service of the Canadian Ex. Co. and the Canadian Northern Ex. Co., on he steamers of the Northern Navigation Co., on Lake Superior, has been suspended until the spring.

The Dominion Ex. Co. has notified its agents that shipments for points on the Canadian Northern Ex. Co. west of Warman Jct., Sask., should be way-billed to Warman Jct. for transfer.

The Canadian Ex. Co. carried about 5,000 deer from the Muskoka district of Ontario during the recent shooting season. The Dominion Ex. Co. did not carry so many deer as the Canadian Ex. Co., but carried more moose.

The Dominion Ex. Co. has opened offices at Alix, Bittern Lake, Camrose, Chigwell, Gwynne, Tees, Alta.; Lake View, Seebosis, Skinner, Me.; and has changed names of its offices as follows: Bristol Station, Que., to Maryland, and at Togo, Sask., to Komura.

The Dominion Ex. Co. has opened agencies for the payment of its money orders at Annapolis, Berwick, Bridgewater, Canning, Chester, Digby, Hantsport, Kentville, Liverpool, Lunenburg, Mahone Bay, Weymouth, Windsor, Wolfville and Yarmouth, N.S.

The Canadian Northern Ex. Co. has extended its service over the Rossburn section of the Canadian Northern Ry., reaching the following points: Springhill, Orrville, Fotherby, Clanwilliam, Erickson, Sandy Lake, Elphinstone, Glenforsa, Menzie, Oakburn, Vista, and Rossburn, Man.

The Canadian Northern Ex. Co. will shortly extend its service on the new line to be opened by the Canadian Northern Ry. between Winnipeg and Brandon, Man., serving the following points: McArthur, Edwin, Rossendale, Lavenham, Ladysmith, Pratt, Arizona, Pleasant Point, Onah, Shilo, Leon, Man.

The Dominion Ex. Co.'s agents at common points with the Canadian Ex. Co., are authorized to accept shipments destined to Amherstburg, Ont., an exclusive office of the American Ex. Co., and way-bill through to destination at one graduate on the rates quoted in list of through rates furnished by the Tariff Department, and route via Windsor, Ont.

The Canadian Northern Ex. Co. appointed agents at the following points on the Canadian Northern Ry. lines over which it operates: Banning, Ont.; Homewood, Greenway, Lowe Farm, Oak Point, Rounthwaite, Rossendale, Rossburn, St. Laurent, Underhill, Wakopa, Mattawin, Wadena, Watson, Warman, Man.; Tisdale, Lloydminster, North Battleford, Radisson, Vermilion, Humbolt, Paynton, Langham, Warman, Vonda, Sask.; Edmonton, Fort Saskatchewan, Vegreville, Alta.

NOTICE.—The Columbia and Kootenay Railway and Navigation Company will apply to the Parliament of Canada, at its next session, for an Act extending the time within which it may construct and complete the railways and branches mentioned in chapter 41 of the Dominion Statutes of 1897, and for other purposes.

H. C. OSWALD,
Secretary.

Dated 30th November, 1905.

NOTICE.—The Great North-west Central Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time within which it may construct the two hundred miles of its railway mentioned in chapter 124 of the Dominion Statutes of 1903, and for other purposes.

GEO. A. WALKER.
Secretary.

Dated 30th November, 1905.

NOTICE.—The Kootenay and Arrowhead Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time within which it may construct the railway and branches which it was by its Act of Incorporation authorized to construct, and for other purposes.

H. C. OSWALD,
Secretary.

Dated 30th November, 1905.

NOTICE.—The South Ontario Pacific Railway Company will apply to the Parliament of Canada, at its next session, for an Act extending the time within which the company may construct and complete the railways and bridge which it has been authorized to construct, and for other purposes.

CHARLES DRINKWATER,
Secretary.

Dated 30th November, 1905.

D. F. HOLMAN RAILWAY TRACKLAYER CO.

1749 Railway Exchange, CHICAGO.

The Canadian Northern Ex. Co. has extended its operations over the main line of the Canadian Northern Ry., which has reached Edmonton, Alta. West of Humbolt, Sask., the points reached by the company's service are: Carmel, Bruno, Dana, Howell, Vonda, Aberdeen, Warman, Dalmeny, Langham, Elbow, Radisson, Fielding, Maymont, Ruddell, Denholm, Brada, North Battleford, Battleford Jct., Highgate, Delmas, Bresaylor, Paynton, Birling, Maidstone, Waseca, Lashburn, Marshall, Aberfeldy,. Lloydminster, Blackfoot, Kitscoty, Islay, Borradante, Sask.; Vermilion, Claysmore, Manville, Minburn, Innisfree, Ranfurly, Lavoy, Vegreville, Raith, Mundare, Chipman, Lamont, Bruderheim, Scotford, Fort Saskatchewan, Oliver and Edmonton, Sask.

Telegraph and Cable Matters.

The C.P.R. Telegraph Department is arranging for the opening of an up-town office in Lethbridge, Alta.

The Great Northwestern Telegraph Co. has announced a reduction in its rates from Ontario and Quebec points, to a number of offices in Newfoundland, from $1.10 to 90c.

G. W. Lloyd, who has been appointed District Superintendent Western Union Telegraph Co. at Atlanta, Ga., is a native of London, Ont., and began his telegraph career in that city.

Residents of the district are asking for the construction of a branch telegraph line from North Sydney to Escasoni, N.S., in connection with the Government line round Cape Breton Island.

W. Barber, one of the directors of the Anglo-American Telegraph Co., is one of the principal promoters of a project to construct a motorway from London to Brighton, Eng., about 50 miles.

The Marconi Wireless Telegraph Station at Cape Bear, P.E.I., for use in connection with the winter steamship service, was expected to be completed and in operation by the end of Dec.

The cable connecting Anticosti Island with the mainland at Gaspe broke early in Dec. The question of putting up a Marconi Wireless station on the island is being considered by the Dominion Government.

The C.P.R. Telegraph Department has appealed against its local office at London, Ont., being assessed for income under the new Ontario Assessment Act, claiming that it is part of the railway system and not assessable.

The Western Union Telegraph Co. has acquired the stock of the Maine Telegraph Co., which was established in 1850. The line extends from Bangor to Calais, Vanceboro, Rockland, Bath, Augusta, Lewiston, Portland, Me., and Boston, Mass.

The Canadian Northern Telegraph Co. has opened offices at Fork River, Goodlands, Harding, Hilton, Lorette, Mafeking, Marchand, Oak Point, Ogilvie, Purvis, Rossburn, St. Laurent, Sanford, Stockton, Underhill, Wakopa, Man.; Humbolt, Invermay, Maymont, Melford, North Battleford, Paynton, Raddison, Sask.; Vegreville, Vermilion, Vonda, Wadena, Alta.

The C.P.R. Telegraph Department has opened offices at Glacier Hotel, Maryville, Poplar, Ryan, St. Eugene, B.C.; Balcarres, Belleplaine, Bienfait, Camrose, Cupar, Earl Grey, Filmore, Forget, Francis, Grand Coulee, Heward, Kroneau, Leavings, Lemberg, Portland, Redvers, Staveley, Stoughton, Strassburg, Theodore, Walsh, Sask.; Bothwell, Osaquin, Westfort, Ont.; Bouchette, Point Claire, Que.

Hon. A. M. Mackay, General Superintendent Anglo-American Telegraph Co. in Newfoundland, died at St. Johns, Nfld., Nov. 20. He was appointed Superintendent of the New York, Newfoundland and London Telegraph Co. at the time it was establishing its land lines in Newfoundland, prior to the laying of the first Trans-Atlantic cable, and remained with the company and its successor, the Anglo-American Telegraph Co., in Newfoundland, until his death.

It is intended that the telegraph line of the G.T. Pacific Ry. shall be constructed simultaneously with the railway, but we were advised Dec. 4, that just how many miles and between what points would be constructed immediately, had not been fully determined. The letting of the recent contract for 30,000 telegraph poles was preliminary to securing the number necessary to erect the live on the Lake Superior branch and on the section west of Winnipeg after the ties and steel have been laid.

The New Brunswick Electric Telegraph Co.'s stockholders met at Rothesay, N.B., Dec. 4, for the purpose of ratifying a lease of its lines to the Western Union Telegraph Co. The company owns the main telegraph line from the International boundary at St. Stephens to Sackville, which has been operated for many years by the W. U. T. Co. This lease, which was for a rental at the rate of 10% on the company's stock, expires in Feb. The new lease provides for a payment equal to 6% on the capital stock of the local company.

The Canada Atlantic Ry. telegraph system which was recently taken over with the railway by the G.T.R., extends from Depot Harbor, Georgian Bay, to Aldburgh Jct., Vt., with three branches, one from Golden Lake to Pembroke; one from South Indian to Rockland, and a third from Glen Robertson to Hawkesbury, Ont. Under the C.A.R. charter power was given to construct a line off the main line for a connection for a distance of about six miles. The telegraph line is being operated by the G.T.R. through its Ottawa Division.

The G.N.W. Telegraph Co. recently completed the stringing of a number of new heavy copper wires at various points between Windsor, Ont., and Halifax, N.S., and St. John, N.B. The company has been providing direct service between the larger commercial centres, and some of the nearby points in the U.S., through its connection with the Western Union Telegraph Co. Direct circuits are now operated between Toronto, Winnipeg, Ottawa, Montreal, Detroit, Chicago, Buffalo and New York, as well as a number of smaller cities in Ontario and Quebec, and the principal cities in the Maritime Provinces.

General Telephone Matters.

The Bell Telephone Co. is carrying out extensive improvements to its lines and of its exchange at North Bay, Ont.

The reorganization and extension of the telephone system of Nelson, B.C., was expected to be completed at the end of Dec., 1905.

The G.T.R. is operating through its Ottawa Division (the old Canada Atlantic Ry.) a telephone line from Ottawa to Depot Harbor, Ont.

The Bell Telephone Co. has purchased a lot on Dalhousie St., Brantford, Ont., 51 ft. frontage, on which it is proposed to erect a new exchange.

The British Columbia Telephone Co. has notified the North Vancouver town council that it will not be able to complete the installation of the telephone system there until June 1.

The B.C. Telephone Co. is preparing to erect a building on Seymour St., Vancouver, and to instal therein a new central energy switchboard. The cost of the improvement is estimated at about $100,000.

A PERSONAL APPEAL

THE HOSPITAL FOR SICK CHILDREN

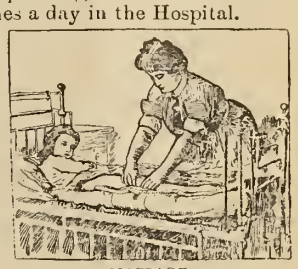
The Hospital for Sick Children, College street, Toronto, appeals to fathers and mothers of Ontario for funds to maintain the thousand sick children that it nurses within its walls every year.

The Hospital is not a local institution—but Provincial. The sick child from any place in Ontario who can't afford to pay has the same privileges as the child living in Toronto and is treated free.

NURSE READING A STORY.

The Hospital had last year in its beds and cots 891 patients—316 of these were from 217 places outside of Toronto. The cost is 1.14 cents per patient per day, and there were 133 sick little ones a day in the Hospital.

Since its foundation the Hospital has treated 11,262 children. About 3,000 of these were unable to pay and were treated free.

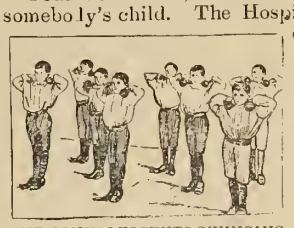


MASSAGE.

Your money can put golden hinges on the door of the Hospital's mercy.

Everybody's dollar may be the Friend in Need to Somebody's child.

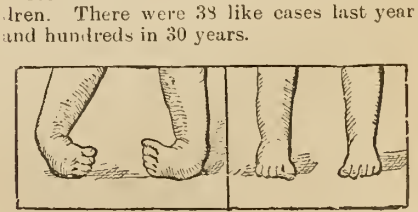
Your dollar may be a door of hope to somebody's child. The Hospital pays out dividends of health and happiness to suffering childhood on every dollar that is paid by friends of little children.



THE CONVALESCENTS SWINGING DUMB BELLS.

If you know of any child in your neighborhood who is sick or crippled or has club feet send the parent's name to the Hospital.

See what can be done for club-foot children. There were 38 like cases last year and hundreds in 30 years.



BEFORE AFTER

Please send contributions to J. Ross Robertson, Chairman, or to Douglas Davidson, Sec.-Treas., of the Hospital for Sick Children, College Street, Toronto.

The Canadian Machine Telephone Co. is proceeding with the installation of its telephone system in Peterborough, Ont. A local paper states that the new instrument works satisfactorily, and the installation, so far as it has gone, is giving good service.

The Bell Telephone Co. has extended its lines in the Gatineau valley, Que., and has opened offices at North Wakefield, Wakefield, Kirk's Ferry, Cascades and Chelsea. It is intended to open offices early in the spring at Old Chelsea, Kingsmere and Cantley, also on the extension.

The Central Telephone Co. has completed a line through Sheffield, Maugerville, Barker's Point and Lower St. Marys, and proposes to continue it into Fredericton, N.B. An office will be opened in Fredericton, and it is proposed to make connection there with Union Telephone Co.'s lines.

The Bell Telephone Co. has been fined $10 by the Recorder at Montreal, for neglecting to take out a license for its slot telephones or public pay stations. The company claimed that these did not come within the provisions of the city by-law requiring licenses to be taken out for automatic or slot machines.

We have been advised that while no definite action has been taken by the Manitoba Government as regards the construction and organization of a provincial telephone system, such a system will probably be constructed under the public works department. This, however, is subject to any decision that may be arrived at later, after further discussion.

The Bell Telephone Co. has constructed a party line from Lindsay to Linden Valley post office, Ont., 8 miles; and will extend its line from Argyle to Eldon Station, Ont., five miles. The Woodville, Ont., toll office in the same vicinity is to be converted into an exchange office, and some other improvements are contemplated on the lines in the Lindsay district.

The Brantford, Ont., City Council has under consideration offers from the Canadian Machine Telephone Co., and the Ontario Telephone Co., to equip a telephone system in the city. The telephone committee, which has been looking into the matter, recommends the adoption of the proposal of the first mentioned. The agreement suggested provides for a 21 years' franchise at $25 for business and $15 for private instruments, with provisions for the city to acquire the lines at a valuation under certain conditions.

The franchise and plant of the Cumberland Telephone Co. were sold at auction by the liquidator, at Amherst, N.S., Nov. 29. The purchaser was Dr. C. W. Hewson, the price being $14,000. It is stated that Dr. Hewson was acting on behalf of a local syndicate, and that a new company will be organized. The company was organized about three years ago with a capital of $50,000, all subscribed by Cumberland people, of which 20% was paid up. It had over 70 miles of line, extending from Amherst to Oxford, Amherst to North Port, thence to Pugwash, and Amherst to Tignish and Amherst Shore, and some 350 telephones in use at a charge of $12 a year each. The property sold included a quantity of wire, a number of insulators, and all the tools used in construction work. After the company had expended $19,000, while only $10,000 of capital was available, it had to go into liquidation.

The Minister of Marine, in an interview in London, Eng., is reported to have expressed himself as well satisfied with the results of his negotiations with the British Admiralty as to the taking over of the dockyards at Halifax, N.S., and Esquimalt, B.C., and the establishment of a Canadian naval militia.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments, Etc.

Alberni and Cowichan Ry.—See British Columbia.

Asheroft, Barkerville and Fort George Ry.—Application will be made next session of the Dominion Parliament for an act incorporating a company with this title to construct a railway from Kamloops or Ashcroft, or some point between them, thence by the most feasible route to Barkerville and Fort George, B.C., with all the necessary incidental powers. Eberts and Taylor, Victoria, B.C., are solicitors for the applicants.

Atlantic Grindstone, Coal and Ry. Co.—This company has recently acquired some colleries in Cumberland county, N.S., and has its headquarters at Lower Cove, N.S. In connection with the development of the property some railway construction will be done, but we are advised that any railway projected will be only a short one—about a mile or so—or a branch from the mines to the quarries. The President is H. J. Heustis, of Providence, R.I., who with A. C. Casey, recently visited the properties from the Providence office.

Atlantic, Quebec and Western Ry.—Application will be made next session of the Quebec Legislature for an extension of time, for a further period of two years, for the completion of the authorized lines, and for other purposes. The Company will also apply next session of the Dominion Parliament for an act extending the time within which it may complete its projected railways. (Dec., 1905, pg. 561).

The Boundary, Kamloops and Cariboo Central Ry. will apply next session of the Dominion Parliament for an act granting an extension of time for the construction of its railway, and for other purposes.

British Columbia.—Application will be made at the current session of the B.C. Legislature for an act incorporating a company with power to purchase, construct and operate the undertakings of the Vancouver and Coast Kootenay Ry., the Alberni and Cowichan Ry., the Kamloops and Atlin Ry., and the Midway and Vernon Ry.; to acquire and operate any other railways; to subscribe for the capital stock of any railways, and to promote any railway company or companies. Robertson & Robertson, Victoria, B.C., are solicitors for the promoters.

The Vancouver and Coast Kootenay Ry. came into existence under the terms of the Coast Kootenay Railway Aid Act, passed by the B.C. Legislature, 1902. This act authorized the Lieut.-Governor-in-Council to enter into an agreement with the V. and C.K. Ry., or any other company, to construct a railway from Vancouver to Midway, B.C., about 330 miles, in consideration of the payment of $4,500 a mile in cash or debentures at 3% redeemable in 50 years. Under this act a contract was made with L., H. and N. McLean to construct the line and a charter was given them under the title of the V. and

WILLIAM T. JENNINGS, M. Inst. C.E.; M. Can. Soc. C.E.

C. K. Ry. In 1903 the Dominion Parliament passed an act recognizing the company, and the line authorized to be constructed as being for the general advantage of Canada, and definitely setting forth the line to be constructed, as from Vancouver south-easterly to New Westminster, across the Fraser River, and easterly to Midway; with a branch from south of the Fraser River to the mouth of the same; a branch from the main line near Hope to Nicola Lake; a branch from near Vancouver across Burrard Inlet to North Vancouver, thence to the mouth of Capitano River. In 1905 the Dominion Parliament granted an extension of time for the construction of these lines, and at the current session of the B.C. Legislature it is proposed to ask for an act extending the time for the commencement and completion of the line, and granting power to construct an additional branch to Kamloops. (Feb., 1905, pg. 51).

The Alberni and Cowichan Ry. was incorporated under an act passed by the B.C. Legislature in 1904, with J. T. Braden, J. Thompson, E. M. Giles, L. Thompson, and E. C. B. Bayshawe, of Victoria, as provisional directors, to construct a railway from Mill Bay or Cowichan Bay on the east coast of Vancouver Island, along Cowichan River to the lake of the same name, and to Barclay Sound, near Sarita River, with a branch along Coleman Creek and the south shore of Alberni Creek to Alberni, thence by Alert Bay to Fort Rupert; and to Quatsino Sound.

The Kamloops and Atlin Ry. was incorporated bythe B. C. Legislature in 1901—the provisional directors being: H. P. Bell, D. H. Macdowell, T. Lubbe—with power to construct a railway to consist of three sections, viz., from Ashcroft to the summit between the forks of Bonaparte River and Bridge Creek; sec. 2, from the terminal point of sec. 1 for 140 miles; and sec. 3, from the terminal point of sec. 2 to the confluence of the Quesnel and Fraser rivers. Power was also given to construct branch lines particularly to Antler or Williams Creek in the Bakerville District.

The Midway and Vernon Ry. was incorporated by the B.C. Legislature in 1901—the provisional directors being J. H. Senkler, E. Bloomfield and A. P. Judge, of Vancouver—to construct a railway from Midway to Rock Creek, thence north-easterly to the west fork of Kettle River, thence following the west fork and the Okanagan Mission Valley to Vernon. In 1902, an act was passed transferring the company's office from Greenwood to Vancouver, and authorizing a grant of $4,500 a mile in aid of construction of the line, which was not to exceed 152 miles in length. In 1903 an act was passed by the Dominion Parliament recognizing the B.C. charter and declaring the line to be for the general advantage of Canada. The charter has passed out of the hands of the original incorporators and construction has been started at Midway. (Dec., 1905, pg. 567.)

A report has been current in B.C. for some time that a U.S. railway company was negotiating for a number of charters in the Province with a view of combining them, and on gaining an outlet at the coast put on a steamship service on the Pacific in opposition to the C.P.R., and the Great Northern Ry. The company is said to be

Galena-Signal Oil Company,

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated Galena COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

Guarantee cost per thousand miles, for from one to five years, when conditions warrant it.

Please write home office for further particulars.

CHARLES MILLER,

PRESIDENT.

the Chicago, Milwaukee and St. Paul Rd.; which has recently let a contract for a line to Seattle, Wash.

Canadian Eastern Ry.—The Quebec Legislature will be asked at the current session to incorporate a company with this title to construct a railway from Montreal easterly to the limit of the Province on the Labrador coast. Geoffrion, Geoffrion & Cusson, Montreal, are solicitors for the promoters.

Cape Breton Coal, Iron and Ry. Co.—Plans have been deposited with the Department of Public Works, Ottawa, and with the Registrar of Deeds for Cape Breton county, N.S., for the construction by the company of a bridge over the Mira River, and the approval of the Government is being asked.

The Central Ry. is the title of a company originally projected as the Ottawa River Ry. with power to construct a line from Montreal to Ottawa. It was proposed to operate the line, for which surveys were made, by electricity. Charters were subsequently obtained from the Dominion Parliament as well as from the Quebec and Ontario Legislatures, covering a line from Montreal to Ottawa, on the north side of the river; a crossing of the Ottawa River at Hawkesbury, and a line thence to Midland and St. Thomas, Ont. Senator Domville of Rothesay, N.B., is President of the company, and it is stated that United States capital is behind the project. The company has deposited $25,000 with the Receiver-General, in accordance with the provisions of sec. 13 of the Dominion charter, 1903. This deposit will be repaid to the company as progress is made on the line between Montreal and Grenville, Que., but is liable to be forfeited if construction is not proceeded with. J. M. Shanley is Chief Engineer, and it is stated that construction will be commenced early in the year.

Central Ontario Ry.—The Dominion Parliament will be asked next session to pass an act extending the time within which the extensions authorized may be commenced and completed, and for other purposes.

Edmonton and Fort Vermillion Ry.—The Dominion Parliament will be asked next session to pass an act incorporating a company with this title to construct a railway from Edmonton, Alta., northerly to Lesser Slave Lake, thence to the valleys of the Wabiskaw and Loon rivers, and along these valleys to the Peace River, and along that river valley to Fort Vermillion. Pringle & Guthrie, Ottawa, are solicitors acting for the applicants.

Esquimalt and Nanaimo Ry.—Application will be made next session of the Dominion Parliament for an act granting an extension of time for the construction of the main line between the present terminus and Comox, and the branch lines authorized, to give general power to construct branches, and for other purposes.

Hudson Bay and North-West Ry.—The Dominion Parliament will be asked next session for an act authorizing the H.B. and N.-W. Ry. Co. to amalgamate with the Manitoba and Keewatin Ry. The M. and K. Ry. will also apply for an act authorizing its amalgamation with the H.B. and N.-W. Ry. Both companies also ask for an extension of the time within which the authorized lines may be commenced and completed. No construction work has yet been undertaken by either company. Chrysler, Bethune and Larmouth, Ottawa, are solicitors for the applicants.

International Ry. Co. of New Brunswick.—This is a company incorporated under the New Brunswick Companies' Act to construct certain railways in New Brunswick. The line which is under construction was formerly described as the Restigouche and Western Ry. The starting point is at Campbellton, on the Intercolonial Ry., at the head of navigation of the Baie des Chaleurs, thence proceeding across the province to the St. John River at St. Leonard's, opposite Van Buren, Me. The line has been completed for 24 miles from Campbellton to four miles southwest of the Upsalquitch River, track being laid on the last four miles during 1905. The track is being laid with 67 lb. steel, and the bridges are of concrete with steel superstructures. Further construction will be gone on with during this year on a 30 mile section, which will carry the line to the table lands. At St. Leonard's connection will be made with the C.P.R., and by means of a bridge across the St. John River, with the Bangor and Aroostook Rd. at Van Buren, Me. T. A. Malcolm, Campbellton, is the chief owner of the line; J. M. Shanley, Montreal, is Chief Engineer; J. W. Brackman, Campbellton, is Manager of Construction, and J. A. Ritchie, resident engineer. (Mar., 1905, pg. 93.)

Kamloops to Fort George, B.C.—The Dominion Parliament will be asked next session to pass an act incorporating a company to construct a railway from Kamloops or Ashcroft to Barkerville and Fort George, B.C. Eberts & Taylor, Victoria, are solicitors for the applicants.

Kamloops and Atlin Ry.—See British Columbia.

Kamloops and Yellowhead Pass Ry.—Application will be made next session of the Dominion Parliament for an act incorporating a company with this title for the purpose of constructing a railway from Kamloops, northerly, following the valleys of the North Thompson and Canoe Rivers, and McLennan's Creek to Tête Jaune Cache, B. C. Power is also asked to run steamboats and ferries in connection with the railway, and to make connection with the C.P.R., or any railway that may be constructed from the south at Kamloops, and also with any railway coming westward through Yellowhead Pass. The company will also apply for power to generate electricity and to distribute power within the Province of British Columbia. Tupper & Griffin, Vancouver, are solicitors for the promoters.

Kingston and Pembroke Ry.—Application will be made next session of the Dominion Parliament for an act granting an extension of time within which it may construct the branch line of railway authorized from Sharbot Lake to Carleton Place, Ont.

Klondike Mines Ry.—This 3 ft. gauge railway is under construction from Dawson to Stewart River, Yukon Territory, 84 miles. About eight miles of grading has been completed from Dawson, and 4½ miles of track were laid in 1905. A bridge about 300 ft. long over the Klondike River and another one of two 75 ft. spans over a slough at Klondike City have been built. About two mines of the line have been ballasted, and also the spur line of about three-quarters of a mile to Klondike city. As originally planned the line was to start from Klondike city, and a short piece of track was laid. Subsequently the starting point was fixed at Dawson, and work done last year was from that point. During the current year it is expected complete the line to Grand Forks, about 12 miles from Dawson, and from Grand Forks to Sulphur Springs, 17 miles, and it is expected that the line will be completed to Stewart River in 1907. The contractors are O'Brien & Mackenzie, of Dawson. H. B. Smith is Chief Engineer for the Grand Forks and Stewart River Corporation (Ltd.), which is financing the construction, and F. W. O'Brien is in charge of construction. The Grand Forks and Stewart River Corporation is an English company with offices at Billiter Building, Billiter St., London, Eng. The directors in London are John Latta, of Lawther & Latta, shipowners, and John Carlisle of the Red Star Line; while the Canadian directors are H. B. McGivern, J. A. Seybold and L. N. Bates, of Ottawa. (Sept., 1905, pg. 407, and May, 1905, pg. 185).

Mackenzie River, Fort Simpson, Liard Post and Yukon Ry.—Application will be made next session of the Dominion Parliament for an act incorporating a company with this title for the purpose of constructing a railway from Fort Simpson, at the junction of the Liard and Mackenzie rivers in the Northwest Territories, south-westerly to Liard Post, thence northerly along the Liard River to where the 61st parallel crosses the river; thence northwesterly along and between the Campbell Mountains and the Findlayson River, and Findlayson Lake to Pelly Banks Post on Pelly River; along the Pelly River to Earn River, and thence northwesterly to Dawson, Yukon. Power will also be asked to develop and distribute electric power, operate steamers and ferries, and effect a junction with any railway to be constructed from the south to Liard Post. C. D. Mason, Victoria, B.C., is solicitor for the applicants.

Manitoba and Keewatin Ry.—See Hudson Bay and North-West Ry.

Maritime Coal and Ry. Co.—We are informed that this company at present is operating a line about two miles long from Maccan station on the I.C.R., to Chignecto mines. There is some talk of the line being extended, but nothing definite has been announced in regard to it. (Oct., 1905, pg. 459.)

Matane and Gaspe Ry.—Application will be made next session of the Quebec Legislature for an act granting an extension of time for the construction of the already authorized line, and power to construct a line from the junction with the Intercolonial Ry. to a junction with the line of the G.T. Pacific Ry. in the county of Temiscouata, Que. The company will also ask for power to operate the line by steam, electricity, or any other motive power, to run lines of steamers, to operate telegraph and telephone lines, and for other purposes.

Midland Ry. of Manitoba.—A party is reported to be in the field making a survey for a line from Carman, Man., to Gretna and Walhalla, N.D., where it is proposed to make connection with the Great Northern Ry., U.S. The company proposes to apply next session of the Manitoba Legislature for an act amending its act of incorporation in several particulars. Application will be made at the current session of the Manitoba Legislature for an act amending the act of incorporation, and authorizing the construction of an additional line from Carman, on the proposed line between Emerson and Portage la Prairie, southerly to the International boundary between range 4 and range 1 west of the 1st principal meridian. Power is also asked to construct telephone and telegraph lines, and for other purposes. (Dec., 1905, pg. 567).

Midway and Vernon Ry.—See British Columbia.

Nicola, Kamloops and Similkameen Coal and Ry. Co.—The shareholders at the special general meeting held at Montreal, recently, passed resolutions authorizing the lease of the railway and charter rights to the C.P.R., and the issue of bonds to pay for construction. (Dec., 1905, pg. 567.)

North-Eastern Ry.—The Quebec Legislature will be asked next session to pass an act incorporating a company with this title to construct a railway from Ville Marie on the east shore of Lake Temiskaming, easterly, passing the southern bays of Lake des Quinze, Victoria and Kakebonga, in Pontiac County, to Quebec, with power to construct branch lines from Lake Temiskaming northerly to a junction with the Eastern Division G.T. Pacific Ry., north-easterly to Lake Abitibi,

from near Kakebonga Lake to Maniwaki, and from near the crossing of the Gatineau River to Nominingue, Que., with incidental powers.

North Lanark Ry.—In connection with the surveys recently made for the construction of a line from Ottawa in the direction of Blythfield tp., Ont., a report has been current that the charter of the North Lanark Ry. Co., which was incorporated by the Ontario Legislature, had been acquired by the New York Central Ry. We are advised that there is no foundation for this report, and that the N.Y.C. Ry. is not in any way interested in the surveys. The North Lanark Ry. Co. obtained an act from the Ontario Legislature in 1903, extending the time for the completion of the lines authorized, varying the location, and giving power to amalgamate with the Canada Atlantic Ry. or the Ottawa and New York Ry.

Port Angeles and Olympia Ry.—A company with this title has been organized at Seattle, Wash., the trustees being L. Turner, J. Firth, W. D. Hopkins, A. A. Arthur, New York; M. J. Corrigan, Port Angeles, Wash. The capital stock is $4,000,000. It is proposed to operate a ferry from Port Angeles, Wash., to Esquimalt, B.C., and to construct a railway from Esquimalt to Victoria. A. A. Arthur is also interested in the Midway and Vernon Ry., and it is stated that the same interests are also interested in the Spokane International Ry.

Port Elgin Spur Line Ry.—The Ontario Legislature will be asked next session for an act incorporating a company with this title to construct a railway from the G.T.R. station at Port Elgin, Ont., westerly to the harbor dock, and to a mill yard near. Power is also asked to construct telegraph and telephone lines in connection with the railway, and to enter into an agreement with the G.T.R for the operation of the railway, etc. J. C. Dalrymple, Port Elgin, Ont., is solicitor for the applicants.

Quebec Central Ry.—Application will be made at next session of the Quebec Legislature for an act authorizing the diversion and rebuilding of the present line from Beauce station to Beauceville, on the line known as the Chaudiere extension; to construct a line from Beauceville to River Fannie, 9 miles, and following the River Fannie to Langeville, and the St. John River watershed to Cabana station on the Temiscouata Ry., with power to make connection with that line. The branch line to be constructed to be known as the Quebec Central Chaudiere extension.

Quebec Midland Ry.—Application will be made next session of the Dominion Parliament for an act incorporating a company with this title to construct a railway not less than 3 ft. 6 in. gauge, from the Interprovincial boundary at the north end of Lake Abitibi, easterly and northerly to the western shore of Lake Mattagami, Que. Tourigny and Bureau, Three Rivers, Que., are solicitors for the promoters.

Rainy River Bridge.—Application will be made next session of the Dominion Parliament for an act incorporating a company with power to construct a railway and general traffic bridge across the Rainy River at Pither's Point, near Fort Frances, Ont., and spurs or branch lines of railway to connect the bridge with adjacent lines of railway, and and all other necessary powers. Included in these other powers is authority to unite with a company in the U.S. for the building of such a bridge, or any part thereof, The notice is signed by Z. A. Lash, Toronto, who is Chief Solicitor for the Canadian Northern Ry., and other Mackenzie, Mann & Co. undertakings.

Regina and Saskatchewan Ry.—Application will be made next session of the Saskatchewan Legislature for an act incorporating a company with this title with power to purchase or lease the Qu'Appelle, Long Lake and Saskatchewan Rd. and Steamboat Co.'s railway from Regina to Prince Albert, and to operate the same; also with authority to extend the line from Regina south-westerly to the Willow Bunch and Wood Mountain districts; from Regina southerly and south-easterly to the International boundary; from Prince Albert northerly to the northern boundary of the province; also the following branch lines:—from Craven to Big Quill Lake; from Craik to the northern end of Lost Mountains Lake; from Davidson westerly and north-westerly to the South Saskatchewan River, thence to the western boundary of the province; from Saskatoon to the western boundary; and from Rosthern to the western boundary. N. McKenzie, Regina, Sask., is solicitor for the applicants.

Schomberg and Aurora Ry.—Application will be made next session of the Dominion Parliament for an act authorizing the company to construct a branch to Nottawasaga Bay, and another to Bowmanville, Ont. An extension of time for the construction of the already authorized lines is also asked.

St. Casimer to St. Raymond.—Notice has been given that the Quebec Legislature will be asked next session to pass an act incorporating a company to construct a railway from St. Casimer or St. Mare, Portneuf county, Que., north-easterly generally via the Ste. Anne River valley to Gosford tp., passing the villages of Ste. Christine and St. Raymond. White & Buchanan, Montreal, are solicitors for the applicants.

St. Maurice Valley Ry.—Sub-contracts have been let on six miles of this line from Three Rivers to Shawenegan Falls, Que., 22 miles, the the general contractors, Ross & McRae, doing the rest of the work themselves. G. Leprohon has mileage 19 and 20; — Malone, mileage 18 and 19; and Woods & McRae, mileage 14 and 15 The first 12 miles is mostly scraper work, and the rest is heavy clay. The general contractors will also do all the timber and concrete work, the latter replacing masonry altogether. The timber work is confined to the second section and will run to about 750,000 ft. The work was somewhat late in starting, and though the contractors were held back by the weather, considerable progress has been made. (Dec., 1905, pg. 567).

Vancouver and Coast Kootenay Ry.—See British Columbia.

Vancouver and North-Western Ry.—Application will be made next session of the Dominion Parliament for an act incorporating a company with this title to construct a railway from Vancouver eastward to the Pitt River, thence to the Lillooet River, the Slave River, thence northerly to the Harrison River, Fort George on the Fraser River, and the 60th degree of latitude. Power is also asked to develop electricity and to distribute the same. D. G. Macdonald, Vancouver, B.C., is solicitor for the applicants.

Vancouver, Westminster and Yukon Ry.—Application will be made next session of the Dominion Parliament for an act authorizing the construction of the following branch lines:—from between Anderson and Green Lake, passing Lillooet Lake, Lillooet River, and Harrison Lake, south-easterly to the International boundary; from the projected main line between Lillooet and Quesnelle easterly through the basin of Quesnelle Lake to the Tete Jaune Cache; from the projected main line between the Cottonwood and Willow rivers south-easterly to Barkerville; from near Willow River easterly to the Fraser River, Tete Jaune Cache, through the Yellowhead Pass, and thence by the most convenient route to Edmonton, Alta. Power is also asked to increase the capital of the company from $12,000,000 to $25,000,000, and the bonding powers from $35,000 to $40,000 a mile. (Dec., 1905, pg. 569).

Western Ontario Pacific Ry.—Application will be made next session of the Dominion Parliament for an act authorizing the company to construct a branch line from near London, Ont., northerly through the counties of Middlesex, Oxford, Perth, to Lake Huron in either Huron or Bruce county.

White Horse and Alsek Ry.—The Dominion Parliament will be asked next session for an act extending the time within which this company's proposed railway may be commenced and completed.

White Pass and Yukon Ry.—The preliminary surveys recently made in the Windy Arm district were both made from the north and south end, with the object of ascertaining what it would cost to construct a line through should business warrant it. We have been officially advised that at present there is nothing to warrant constructing a line, but what may be done in the future is problematical. (Dec., 1905, pg. 569.)

February Birthdays.

Many happy returns of the day to—

B. H. Bennett, General Agent Chicago and North-Western Ry. Toronto, born at Cobourg, Ont., Feb. 6, 1858.

F. C. Bond, Resident Engineer G.T.R., Montreal, born there Feb. 21, 1877.

E. E. Cain, Trainmaster Pere Marquette Rd., Detroit, Mich., born at Dublin, Ind., Feb. 14, 1867.

F. W. Churchill, C.P.R. Ticket Agent, Collingwood, Ont., born in London, Eng., Feb. 6, 1853.

H. J. Colvin, District Passenger Agent C.P.R. Boston, Mass., born at Macedon, N.Y., Feb. 26, 1856.

H. R. Charlton, Advertising Agent G.T.R. Montreal, born at St. John's, Que., Feb. 9, 1866.

F. W. Cooper, Resident Engineer C.P.R., London, Ont., born there Feb. 16, 1880.

R. Crawford, Northwest Agent Northern Navigation Co. Winnipeg, Man., born at Kingston, Ont., Feb. 21, 1870.

F. P. Dwyer, Eastern Passenger Agent G.T.R., New York, born at Chicago, Ill., Feb. 20, 1853.

E. A. Evans, General Manager and Chief Engineer Quebec Ry., Light and Power Co., Quebec, born at Kensington, London, Eng., Feb. 26, 1855.

E. H. Fitzhugh, Third Vice-President G.T.R. and Vice-President Central Vermont Ry., Montreal, born in Montgomery County, Mo., Feb. 1, 1853.

C. W. Gardner, Auditor Minneapolis, St. Paul and Sault Ste. Marie Ry., Minneapolis, Minn., born at Rushville, N.Y., Feb. 17, 1861.

L. O. Genest, General Storekeeper, C.P.R. Western Lines, Winnipeg, Man., born at St. Henri, Levis County, Que., Feb. 16, 1856.

W. Jackson, C.P.R. ticket agent Clinton, Ont., born there Feb. 4, 1860.

R. S. Logan, Assistant to 2nd Vice-President and General Manager G.T.R., Montreal, born at St. Louis, Mo., Feb. 13, 1864.

D. MacPherson, Assistant Chief Engineer Transcontinental Ry. Commission, Ottawa, born at Bath, Ont., Feb. 2, 1858.

C. S. Maharg, Trainmaster District 1, C.P.R. Central Division, Kenora, Ont., born in Dufferin County, Ont., Feb., 1867.

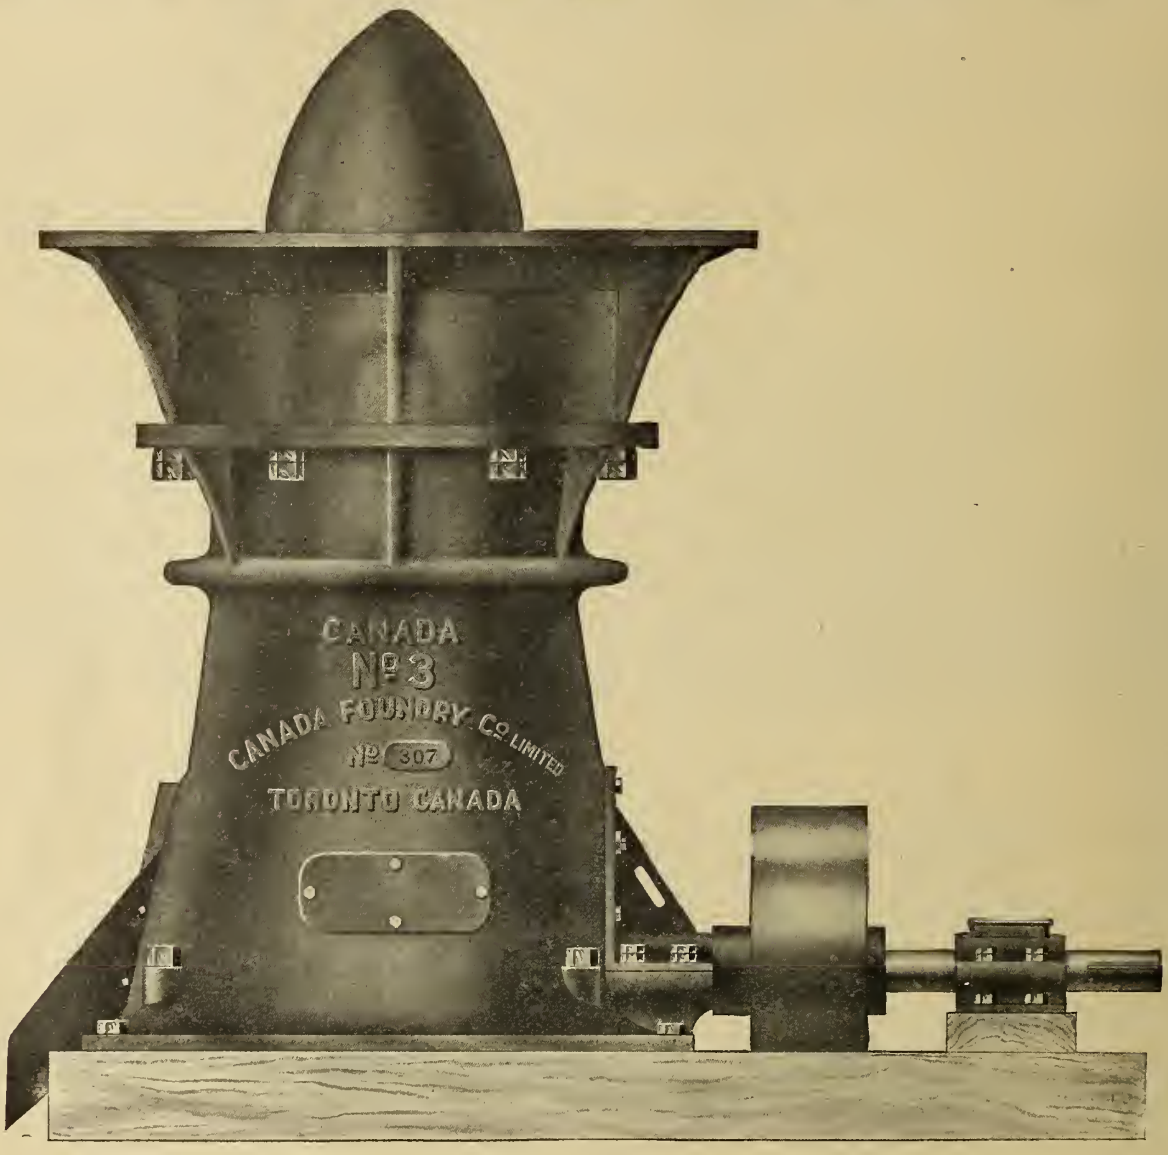
T. McNabb, Master Mechanic Alberta Ry. and Irrigation Co. at Lethbridge, Alta., born in Scotland, Feb. 16, 1849.

C. W. Milestone, ex-Superintendent C.P.R. at Moose Jaw, Assa., born at Medina, Ohio, Feb. 24, 1857.

C. Percy, Auditor G.T.R., Montreal, born in Kent, Eng., Feb. 12, 1845.

R. D. Pinneo, Assistant General Freight and Passenger Agent, White Pass and Yukon Route, Skagway, Alaska, born at Princeton, Ia., Feb. 9, 1873.

ROCK CRUSHERS



This is a Gyratory Rock Crusher of new design containing special features which will recommend themselves to all users. Send for Bulletin No. 31.

CANADA FOUNDRY COMPANY LIMITED

Head Office: TORONTO

District Offices: MONTREAL HALIFAX OTTAWA WINNIPEG VANCOUVER ROSSLAND

A. H. Robinson, Superintendent Elgin and Havelock Ry., at Petitcodiac, N.B., born at Elgin, N.B., Feb. 2, 1862.

A. E. Rosevear, Freight Claim Agent G.T.R. at Montreal, born Feb. 20, 1863.

H. H. Schaefer, District Freight Agent Intercolonial Ry., St. John, N.B., born at Cologne, Germany, Feb. 10, 1848.

J. G. Scott, General Manager Quebec and Lake St. John Ry., Quebec, born there Feb. 13, 1847.

G. Spencer, Superintendent C.P.R. Toronto, born in London, Eng., Feb. 21, 1865.

Hugh Sutherland, Executive Agent Canadian Northern Ry., Winnipeg, Man., born at New London, P.E.I., Feb. 22, 1845.

J. W. Troup, Superintendent C.P.R. Pacific Coast Steamships, Vancouver, born Feb. 5, 1855.

Sir Wm. C. VanHorne, K.C.M.G., Chairman C.P.R. and President Cuba Co., Montreal, born in Will County, Ill., Feb., 1843.

H. W. Walker, General Auditor G.T.R., Montreal, born at Brantford, Ont., Feb. 12, 1839.

Canadian Northern Ry. Earnings, etc.

Gross earnings, working expenses, net profits, increases or decreases over 1904-05, from July 1, 1905:

	Earnings.	Expenses.	Net Earnings.	Increase or Decrease.
July	$395,100	$ 252,600	$ 142,500	$ 51,400+
Aug.	357,900	246,200	111,700	12,200+
Sept.	378,500	268,300	110,200	14,000+
Oct.	557,100	298,900	258,200	113,600+
Nov.	566,800	341,700	225,100	68,700+
	$2,255,400	$1,407,700	$847,700	$259,900+

Approximate earnings for Dec., $437,800, against $384,600 for Dec., 1904.

C.P.R. Earnings, Expenses, etc.

Gross earnings, working expenses, net profits, increases or decreases over 1903-04, from July 1, 1904:—

	Earnings.	Expenses.	Net Profits.	Increase or Decrease.
July	$4,629,174.95	$2,991,397.29	$1,449,652.14	$188,125.52+
Aug.	4 796,733.98	3,005,088.07	1,791,645.91	263,715.48+
Sept.	4,872,575.38	3,086,565.35	1,776,010.05	507,202.49+
Oct.	5,722,767.30	3,448,696.12	2,274,071.18	707,957.27+

Eastern Canadian Passenger Association.—Following are the officers and committees for the current year:—Chairman, F. F. Backus, Toronto, Hamilton and Buffalo Ry., Hamilton, Ont. Executive Committee—C. E. E. Ussher, C.P.R.; G. T. Bell, G.T.R.; T. Henry, Richelieu and Ontario Navigation Co. Rules Committee—C. E. E. Ussher, G. T. Bell, T. Henry; F. E. Barbour, New York Central and Hudson River Rd.; E. O. Grundy, Quebec Central Ry.; J. F. Chapman, Bay of Quinte Ry.; C. H. Nicholson, Northern Navigation Co.; J. M. Lyons, Intercolonial Ry.; G. Collins, Central Ontario Ry.

The Executive Board of the Canadian Car Service Bureau has elected G. Collins, Receiver and Manager Central Ontario Ry., Trenton, Ont., as chairman, vice the late J. B. Morford.

The Canadian Northern Ry. purposes opening a city ticket, express and telegraph office in Edmonton, Alta. A new building is being prepared for the company on Jasper Ave., which it is expected to occupy early in Feb. H. Sullivan has been appointed agent there.

The Ontario Legislature will be asked next session for an act confirming agreements between the town of Port Arthur, and the Canadian Northern Coal and Ore Dock Co., and the Atikokan Iron Co., with respect to the construction of a coal and ore dock, blast furnace, and other works there.

The Lake Superior Corporation, the parent corporation of the various manufacturing and transportation companies at Sault Ste. Marie, Ont., and of several on the Michigan side of the river, has been licensed in Ontario under the act respecting extra-provincial companies. The Corporation is empowered to do anything the various companies have been authorized to do, and to employ in its operations a capital of $5,000,000. C. D. Warren, Toronto, the President, is named the corporation's attorney.

Transportation Commissioners' Report

The report of the Transportation Commission presented by R. Reford, of Montreal, and J. H. Ashdown, of Winnipeg, has been presented to the Dominion Minister of Public Works. The original members of the Commission were Jno. Bertram, of Toronto, who died; R. Reford, who succeeded him as Chairman, and H Fry, of Quebec, who resigned some time ago. J. H. Ashdown was appointed subsequently. The report recommends the nationalization of the ports Fort William, Port Arthur, and Mission River on Thunder Bay; Depot Harbor, Midland, Port Colborne, Kingston, Montreal, Quebec, St. John, Halifax, Sydney, Vancouver, Victoria, and the Pacific termini of the G.T. Pacific Ry., and the Canadian Northern Ry., and making them free from all charges, except for dry docks and elevators.

Important improvements are suggested in Toronto and Montreal harbors. The improvments in the case of Toronto depend upon ceasing to empty sewage into the bay and the contemplated diversion of the outflow of the Don into Ashbridge's Bay.

The report deals with the whole question of transportation from the inception of wheat shipments to the transhipment at the seaboard. First of all, the commissioners deal with the conditions under which the grain shipments originate, and point out that if proper facilities exist for the carriage of grain from Manitoba, Saskatchewan, and Alberta, the same facilities will be available for return freights. In ordinary seasons there is practically no grain from the Canadian west which is not carried to Fort William and Port Arthur, the only existing outlets for export grain. Statistics are given to show the remarkable growth in storage accommodation by elevators and warehouses. The most striking figures are as follows:—

Year.	Number.	Capacity.
1900	533	18,879,000 bushels
1901	653	29,000,000 "
1902	832	33,356,000 "
1903	982	41,000,000 "
1904	1,026	47,000,000 "

The storage capacity of interior points, 24,456,000; at Fort William 18,462,000; net increase in storage capacity since 1900, 28,000,000 bush. There are some 400 shipping points. There were in 1901, 29 farmers' elevators, with a capacity of 870,000 bush. On Jan. 1 last, the number had grown to 45, with a capacity of 1,320,000 bush. The commissioners commend the legislation passed by the Government for the provision of storage accommodation. They apparently have little to recommend in the way of added convenience, except that they suggest giving the warehouse commissioner power to compel railway companies to place agents temporarily at points where none exist and which may become shipping centres for the time being.

The competition to Canadian routes offered by Buffalo received considerable notice. Reference is made to improved rail facilities between Buffalo and U.S. seaports, and figures are given showing the reduction in freights between Duluth and Buffalo embodied in the following comparative statement:—

	1887.	1904.
Wheat per bushel	$ 18	$ 07
Flour, per barrel	29	13
Manufactured iron, ton	2 35	2 00
Pig iron, ton	2 35	1 50
Iron ore, ton	1 75	63
Lumber	4 00	2 55
Coal	90	40

Taking up the questiou of harbors, the commissioners favor dealing with Fort William, Port Arthur and Mission River as one harbor. It is also urged that before the shores of the Kaministikwia River are fully occupied a slip of sufficient width on the south side of the river should be reserved by the Government, which would obviate buying

Three Cars in one { Side Dump Construction. Centre Dump Hopper for Coal or Ballast. Side Dump Gondola for General Service.

back at considerable cost for future improvement land which has passed out of the national control. The widening of Mission River so as to create a turning basin for vessels is advocated, and the immediate extension of Port Arthur breakwater. The commissioners suggest the provision of an ice-breaker for use in spring and fall so as to lengthen the period of navigation. Where railways connect with the Government docks, Government control of railway tracks on the docks is suggested in such cases as are deemed desirable.

Recommendation is made that the Intercolonial Ry. be extended to Depot Harbor, either by acquiring running rights over the Canada Atlantic Ry. or otherwise. The commission think there should be elevators at Midland and Depot Harbor, with a storage capacity of at least 1,000,000 bush. These should be provided by the railways entering those ports, or, failing that, erected by the Government and tolls charged for their use. With respect to the Welland Canal route, an eastern breakwater is proposed for the protection of Port Colborne. This work is already under way, also a large elevator. In view of the surveys being made by the Government in the Ottawa and Georgian Bay and Welland Canal routes, the commission do not feel disposed to offer any suggestions, but if from commercial or engineering reasons the former work is not adopted, then the Welland Canal should be enlarged and deepened to the standard of the Sault Ste. Marie canal.

The improvements suggested at Toronto are made conditional upon the city handing over to the Government lands on the waterfront of the harbor, including water lots and lands recently acquired in connection therewith, together with such piers and docks as are now owned by the corporation, and upon the basins between the piers being kept free from sewage. The suggested improvements are:—Entrance to the harbor east and west dredged to the depth of 16 ft., channel of 300 ft. to be dredged through the harbor, piers between the entrance to be extended in to 18 ft. of water, shoal at the eastern entrance to be removed, groynes to be built at the west end of the island, city piers to be extended, and the water at the piers to be dredged to a depth of 16 ft. The River Don to empty into Ashbridge's Bay instead of into the harbor. Before the above action is taken, the commissioners say, there must be full consideration of all the questions connected therewith, including cost, land required, and of the issues raised by reason of the Don diversion.

Montreal should be made a free port on lines laid down, and a branch of the G.T. Pacific Ry. should be extended so as to touch at the most convenient point.

The ports nationalized as suggested should be administered by a board of harbor commissioners to be connected with the department.

Orders by the Railway Commissioners.

The following orders have been issued by the Board of Railway Commissioners:—

834. Dec. 20.—Authorizing the C.P.R. to construct a subway in lieu of a level crossing at Rachel St., Winnipeg.

835. Dec. 22.—Sanctioning deviation from the previously located line of the C.P.R. between mileage 98 and 101, on the Toronto-Sudbury branch now under construction.

836. Dec. 22.—Authorizing the G.T.R. to leave out the filling and packing mentioned in sec. 230 of the Railway Act from Dec. to April, inclusive, in each year.

837. Oct. 14.—See following article.

838. Dec. 22.—See following article.

839. Dec. 22.—Authorizing the C.P.R. to construct and operate a siding across two public highways, west of Myrtle station, in Whitby township, ontario County, Ont.

840. Jan. 2.—Approving overhead highway crossing, mileage 64.5, Guelph & Goderich Ry.

841. Jan. 5.—Authorizing the Village council of Hensall, Ont., to carry a drain under the G.T.R. tracks.

842. Jan. 5.—Authorizing the C.P.R. to construct spur line to Canadian Oil Co.'s premises at Toronto.

843. Jan. 5.—Approving plans of additions and alterations to bridges on the Fort William and Ignace sections of the C.P.R.

844. Jan. 5.—Authorizing the South Malahide Telephone Co. to carry its wires across the G.T.R. tracks at a point east of the public road east of the G.T. station at Aylmer, Ont.

845. Jan. 4.—Sanctioning plans for a deviation from the previously located line of the Atlantic, Quebec and Western Ry. from Paspebiac easterly to end of tenth mile.

845a. Jan. 5.—Approving plans for the substructure of a bridge over the Muskoka River at Bala, Ont., for the C.P.R.

847. Jan. 5.—Authorizing the C.P.R. to construct a branch line at Toronto Jct. to the Toronto Furnace and Crematory Co.'s premises.

848. Nov. 14.—Authorizing the crossing by the Brandon, Saskatchewan and Hudson Bay Ry. of the C.P.R. tracks at Boissevain, Man.

849. Nov. 14.—Authorizing the crossing by the Brandon, Saskatchewan and Hudson Bay Ry. of the Canadian Northern Ry. at Minto, Man.

850. Jan. 8.—Amending order permitting the Hamilton Radial Electric Ry. to cross the Toronto, Hamilton and Buffalo Ry. tracks.

851. Jan. 9.—Authorizing the Bell Telephone Co. to carry its wires over the G.T.R. tracks just north of freight house, Point Edward, Ont.

852 to 857 inclusive. Jan. 9.—Approving plans for the location of the Niagara-Welland Power Co.'s electric railway, in Ingersoll, Chinguacousy, Toronto Gore, Etobicoke, York, Barton, West Flamboro, East Flamboro, South Dumfries townships and the town of Ayr, Ont.

858. Jan. 9.—Authorizing the G.T.R. to construct a branch line to the South River Lumber Co.'s premises at South River, crossing Main St., Broadway, Mary St., Dublin St., and Ottawa Ave., in the township of Machar, Ont.

859. Jan. 9.—Approving change of location for the Toronto and Hamilton Ry. between mileage 34, at Burlington, and mileage 40.5 in the township of Saltfleet, Ont.

860. Jan. 9.—Authorizing the Niagara, St. Catharines and Toronto Ry. to replace bridge over the G.T.R. at Thorold, Ont.

861. Jan. 10.—Authorizing the Consumers Gas. Co. to lay a gas main under the G.T.R. tracks at Toronto.

862. Jan. 10.—Authorizing Palmerston Town Council to lay a sewer pipe under the G.T.R. tracks there.

863. Jan. 10.—Authorizing the Peterborough Light and Power Co. to lay a gas main under G.T.R. tracks at Peterborough, Ont.

864. Jan. 10.—Authorizing the St. John's, Que., City Council to carry a sewer under the G.T.R. tracks in St. John's.

865. Jan. 9.—Authorizing the Brantford, Ont., City Council to carry a sewer under the G.T.R. tracks.

866. Jan. 11.—Sanctioning location plans for the Toronto and Niagara Power Co.'s electric railway through Binbrook and Seneca townships, Ont.

867. Jan. 11.—Authorizing the Canadian Northern Ry. to construct and instal an interlocking plant at Carberry, Man., where it crosses the C.P.R. line.

868 to 870 inclusive. Jan. 11.—Sanctioning the location plans of the Niagara-Welland Power Co. through Waterloo, Wilmot, North and South Easthope, London, Westminster, Yarmouth, Burford, Brantford, South and North Dumfries, Ont.

871.—Sanctioning location of the West Selkirk branch of the C.P.R., mileage 26. to mileage 35.4, Winnipeg Beach to Gimli, Man.

872.—Approving plans for reinforcement of steel viaducts 1.8 and 0.9, North Toronto branch, Don viaduct, C.P.R.

873.—Approving plans for proposed piers and abutments of the crossing of the Severn River on the Toronto-Sudbury branch, C.P.R.

874. Jan. 12.—Authorizing J. Hamill to carry an electric light wire over the Shuswap and Okanagan Ry. tracks at Armstrong, B.C.

875. Jan. 13.—Authorizing the C.P.R. to construct an additional track across Louisa St., Tweed, Ont.

876. Dec. 8.—Ordering the G.T.R. to construct a suitable crossing of the Lesperance Road, Tecumseh, Ont., certain costs of the work to be borne by the township council, which is also to maintain the road, while the G.T.R. is to maintain the planking and cattle guards, at the cost of the township council.

877. Jan. 16.—Authorizing the Quebec Ry., Light and Power Co. to construct a branch line to the Robitaille distillery at Beauport, Que.

Railway Commissioners' Freight Orders.

837. Oct. 14, 1905. In the matter of the applications of E. Williams & Co., proprietors and operators of the stone quarry at Rockspur, on the Teulon Branch of the C.P.R., about 33 miles north of Winnipeg; and of the said E. Williams & Co., Patterson & Co., Irwin & Son, and the Winnipeg Supply Co., doing business at or near Stonewall station, on the said branch, as quarry men and dealers in rubble and crushed stone, complaining "that in respect of the tolls for the carriage of the products of the applicants' quarries to Winnipeg, the C.P.R. Co. charges other persons, firms, and corporations lower tolls for the same or similar services than it charges to the applicants under substantially similar circumstances and conditions, whereby an undue preference is given and an unjust discrimination is made against the applicants, for an Order, under sec. 251 to 254, inclusive, of the Railway Act, 1903, directing the C.P.R. Co. to restore the former rate of 2¾c. from the applicants quarries at Rockspur and Stonewall, or fixing some other rate as a uniform rate from all the quarries on the Teulon branch, or for such other relief as to the Board may seem proper." Upon hearing counsel for the applicants and the railway company, the evidence adduced and what was alleged; and upon the report of the Chief Traffic Officer of the Board—The Board orders that the C.P.R. tariff, published Aug. 26, 1905, increasing the rate on rubble and crushed stone from the applicants' quarries to 3¼c. per 100 lbs., be disallowed, and that the former rate of 2¾c. per 100 lbs. from Stonewall, Rockspur, and Gunton, to Winnipeg, be restored not later than Jan. 8, 1906.

THE BRITISH COLUMBIA DISTILLERY CASE.

In the matter of the application of the British Columbia Distillery Co. for a reduced rate of freight from any point on the Vancouver, Westminster, and Yukon Ry. Co.'s tracks, adjacent to the C.P.R. tracks on Front Street, New Westminster, for the purposes of the applicants' distillery at Sapperton, B.C. Upon hearing counsel for appli-

CONSTRUCTION DEPARTMENT

2530 First St. Washington, D. C., November 23rd, 1904

Cyclopean Iron Works,

Jersey City, N. J.

Gentlemen:

For the past year and a half, we have been constructing for the United States Government, the Filtration Plant at Washington, D C.--second largest in the world--requiring the placing of 111000 cubic yards of concrete.

Realizing that only through proper handling facilities could we hope to successfully and properly distribute this vast amount of concrete, we ordered several classes of concrete buckets from leading manufacturers. From you we obtained three buckets on trial, and found them so satisfactory that we placed an order for five additional Later on in the season, when we found our needs increasing, we again placed an order with you for six more buckets--at the same time suggesting some changes that would adapt them to our peculiar work. These last have arrived and are giving entire satisfaction.

Out of the sixty-two buckets which we have on this work, we have found that for all around good concrete work, your bucket has no superior. It is easily handled, requires practically no effort in dumping, and leaves no concrete clinging to the sides.

Yours very truly,

THE SAND FILTRATION CORPORATION OF AMERICA.

Jno. S. Macclennan.

cants, the Vancouver, Westminster, and Yukon Ry. Co., and the C.P.R. Co., the evidence adduced, and what was alleged; and upon the report of its Chief Traffic Officer—The Board orders that on grain and malt in carloads of not less than 30,000 lbs., received at New Westminster from outside points, over the C.P.R. rails, consigned to the applicants' distillery at Sapperton, the Vancouver, Westminster, and Yukon Ry. Co. do forthwith establish a freight rate of 2½c. per 100 lbs. from any point on its tracks on Front St., New Westminster, convenient for the purpose, to the applicants' siding at Sapperton, the cost of transhipment from the cars on the C.P.R. tracks to the cars on the V., W. & Y.R. tracks to be borne by the applicants; and that the said freight rate be published and filed with the Board, as required by sec. 262 and 274 of the Railway Act, 1903; this order to be and continue in force only until the V., W. & Y. R. tracks are joined with the C.P.R. tracks in New Westminster, and the Board shall have made an order dealing with the switching arrangements between the said two railway companies within the city of New Westminster, the said last mentioned order, when issued, to be substituted for and supersede this temporary order.

Passenger Meetings at Toronto.

Three important passenger meetings were held in Toronto on Jan. 17, 18 and 19. The rate clerks of the lines comprising the Niagara Frontier Summer Rate Committee met on Jan. 17 and arranged details as far as possible. The committee met on the morning of Jan. 18. In the absence of the Chairman, J. E. Bentley, G.P.A. Central Vermont Ry., Mr. Hanley, his chief clerk, called the meeting to order. A. H. Hanscom, G.P. & T.A. Eastern Steamship Co., Boston, Mass., was elected Chairman for the current year, and presided. G. C. Wells, A.G.P.A. Canadian Pacific Ry., Montreal, performed his duties as Secretary.

The following lines were represented: Algoma Central S.S. Line, Bay of Quinte Ry., Boston & Maine Rd., Buffalo, Rochester and Pittsburg Ry., Canadian Northern Ry., Canadian Pacific Ry., Central Rd. of New Jersey, Central Vermont Ry., Cleveland, Cincinnati, Chicago and St. Louis Ry., Cleveland & Buffalo Transit Co., Delaware and Hudson Rd., Delaware, Lackawanna and Western Rd., Deseronto Navigation Co., Detroit and Buffalo Steamboat Co., Detroit and Cleveland Navigation Co., Dominion Atlantic Ry., Eastern S.S. Co., Erie Rd., Goodrich Transportation Co., Grand Trunk Ry., Huntsville, Lake of Bays and Lake Simcoe Navigation Co., Intercolonial Ry., Lake Erie and Western Rd., Lake Ontario and Bay of Quinte Steamboat Co., Lake Shore and Michigan Southern Ry., Lehigh Valley Rd., Mackenzie, Mann & Co. Ry. System, Eastern Lines, Magnetawan River and Lakes Steamboat Co., Maine Central Rd., Manitou S.S. Co., Michigan Central Rd., Muskoka Lakes Navigation and Hotel Co., New England Navigation Co., New York Central Rd., New York, Chicago and St. Louis Rd., New York and Ottawa Rd., Niagara Gorge Rd., Northern Navigation Co. of Ontario, Northern S.S. Co., Ontario and Quebec Navigation Co., O'Connor Steamboat Co., Ottawa River Navigation Co., Parry Sound Yachting Fleet, Pennsylvania Rd., People's Line Steamers, Philadelphia and Reading Rd., Quebec and Lake St. John Ry., Quebec Central Ry., Queen and Crescent Route, Richelieu and Ontario Navigation Co., Rideau Lakes Navigation Co., Rutland Rd., Seaboard Air Line, St. Lawrence River Steamboat Co., Temiskaming and Northern Ontario Ry., Thousand Islands Steamboat Co., Thousand Islands Ry., Toronto, Hamilton and Buffalo Ry. Turbine S.S. Co., United States and Dominion Transportation Co., White Line Transportation Co., White Star Line.

The tourist rates for the season of 1906 as adopted by the meeting are substantially the same as last year, the principal changes being caused by the new lines of the C.P.R. and James Bay Ry., which will be running into Muskoka next summer and the further exploitation of the Temagami district of Northern Ontario.

The Great Lakes and St. Lawrence River Rate Committee met on Jan. 18 at 2 p.m. W. F. Herman, G.P.A. Cleveland and Buffalo Transit Co., was elected chairman, and Jas. Morrison, Chief Rate Clerk C.P.R., Montreal, performed his duties as Secretary.

The following lines were represented:—Algoma Central S.S. Line, Anchor Line, Canadian Pacific Ry., Cleveland and Buffalo Transit Co., Detroit and Buffalo Steamboat Co., Detroit and Cleveland Navigation Co. Goodrich Transportation Co., Grand Trunk Ry., Magnetawan River and Lakes Steamboat Co., Manitou S.S. Co., Michigan Transportation Co.. Muskoka Lakes Navigation and Hotel Co., Niagara Gorge Rd., Niagara Navigation Co., Northern Michigan Transportation Co., Northern Navigation Co. of Ontario, Northern Steamship Co., Ontario and Quebec Steamship Co., Ottawa River Navigation Co., Richelieu and Ontario Navigation Co., Rideau Lakes Navigation Co., St. Lawrence River Steamboat Co., United States and Dominion Transportation Co., White Star Line. The various rates, etc., were agreed on and ordered to be embodied in the official proceedings.

The International Water Lines Passenger Association met on Jan. 19. In the absence of President A. J. Markham, G.P.A. of the Anchor Line, through illness, the Vice-President, J. Berolzheim, G.P.A. Manitou S.S. Co. took the chair; M. R. Nelson performed his duties as Secretary.

The following lines were represented: Algoma Central Steamship Line, Anchor Line, Arnold Transit Co., Ashley-Dustin Steamers, Canadian Pacific Steamship Line, Champlain Transportation Co., Citizens Steamboat Co. (Hudson River), Crosby Transportation Co.. Deseronto Navigation Co., Detroit and Buffalo Steamboat Co., Detroit and Cleveland Navigation Co., Dunkley-Williams Co. (South Haven Line), Goodrich Transportation Co., Graham and Morton Transportation Co., Green Bay Transportation Co., Hackley Transportation Co., Hudson River Day Line, Lake Ontario and St. Lawrence River Day Line, Lake Ontario and Bay of Quinte Steamboat Co., Maine Steamship Co. (Portland Line), Manitou Steamship Co., Merchants Montreal Line, Michigan Transportation Co. (The So. Haven Line), Niagara Navigation Co., Northern Michigan Transportation Co., Northern Navigation Co., Northern Steamship Co., Ontario and Quebec Navigation Co., Ottawa River Navigation Co., Pere Marquette Line Steamers (M.S.T. Co.), People's Evening Line Steamers (Hudson River), Richelieu and Ontario Navigation Co., Rideau Lakes Navigation Co., St. Louis and Tennessee River Packet Co., Thousand Islands and St. Lawrence River Steamboat Companies, U.S. and Dominion Transportation Co., White Star Line.

A gavel, made from the hull of the str. Independence, the first steamer operated on Lake Superior, was presented to the Association to be the personal property of the retiring President, A. J. Markham.

The following subjects had been listed for discussion:

"Uniform rate of transfer at Buffalo, Cleveland and Detroit." This was laid on the table.

"Uniform system of settling for transfer between receiving and delivery lines." It was the sense of the meeting that the receiving line should pay all transfers of passengers and baggage, and that committees be located at Buffalo, Cleveland and Detroit to further this.

"Agreement between all lines interested, not to reserve state rooms by telephone." "Agreement that all messages making reservations for state rooms shall be prepaid, and messages sent collect." It was the sense of the meeting that these subjects be referred to the lines at the different ports for such action as could be obtained.

"Unjust inspection." "Taxation." As these are matters relating to the operating departments they were passed over.

"Responsibility of carriers against loss of freight or baggage." This question was brought before the meeting very fully in a communication from C. H. Nicholson, Traffic Manager Northern Navigation Co., and definite action was deferred to the next annual meeting, as it is expected that in the meantime the matter will be definitely acted on by interested rail lines.

"Limiting the combination routes shown in the tariff publication." It was decided to make no change in the construction of the sheet in this respect.

The election resulted as follows: President, J. Berolzheim, G.P.A. Manitou S.S.Co., Chicago; Vice-President, C.E.E. Ussher, G.P.A. C.P.R. Eastern Lines, Montreal; Executive Committee, one year, C. F. Beilman, Traffic Manager White Star Line, Detroit; two years, T. Henry, Traffic Manager, R. & O. Navigation Co., Montreal; F. B. Hibbard, G.P.A. Hudson River Day Line, is the other member of the executive, having been elected at last year's meeting in Buffalo. Auditing Committee, W. M. Lowrie, G.P.A. Northern Steamship Co., New York; B. W. Folger, Manager Niagara Navigation Co., Toronto; A. A. Schantz, G.S. & T.M. Detroit & Cleveland Navigation Co., Detroit, Mich.; Secretary, M. R. Nelson, Northern Steamship Co., 379 Broadway, New York City.

At each of the three meetings resolutions of sympathy were passed in connection with the deaths of C. F. Gildersleeve, President Lake Ontario and Bay of Quinte Steamboat Co., and A. P. Cockburn, Manager Muskoka Lakes Navigation and Hotel Co.

Acton Burrows, Manager of THE RAILWAY AND MARINE WORLD, attended the meetings of the Great Lakes and St. Lawrence River Rate Committee and the International Water Lines Passenger Association, by invitation.

On the evening of Jan. 17 the members attending the meetings were entertained at supper by the King Edward Hotel Co. An excellent musical programme was presented and short speeches were made by a number of transportation men.

The next annual meetings of the Niagara Frontier Summer Rate Committee, the Great Lakes and St. Lawrence River Rate Committee and the International Water Lines Passenger Association will be held at the Transportation Club, Buffalo, N.Y., Jan. 1907.

The International Ry. of New Brunswick is conducting a freight business on the first 20 miles of its line from Campbellton to the Upsalquitch River, N.B., and it is expected that a regular passenger and freight service will be put in operation May 1.

An Order-in-Council has been passed under sec. 40 of the Government Railways Act, to authorize and impose the collection of the maximum wharfage tariffs of the Intercolonial and Prince Edward Island Ry., in supercession of existing tariffs at the following points: St. John, Moncton, Point du Chene, Dorchester, Newcastle, Chatham, Dalhousie, N.B.; Halifax, Pictou, Pugwash, Pictou Landing, Mulgrave, Point Tupper, North Sydney, N.S.; Charlottetown, Mount Stewart, Georgetown, Souris, Murray River, Summerside, Alberton, P.E.I.

Canadian Freight Association.

At the quarterly meeting in Montreal, Jan. 11, the following were elected active members: R. N. Collyer, G.A. Wabash Rd., Buffalo, N.Y.; E. O. Grundy, G.F.A. Quebec Central Ry., Sherbrooke, Que. The following resignations were accepted: J. J. Mossman, Wabash Rd.; J. H. Walsh, Quebec Central Ry.; W. E. Mullins, Central Vermont Ry.

The classification committee recommended a number of additions to and changes in the classification, which were adopted and will be submitted to the Board of Railway Commissioners for approval as supplement 6.

Carl Howe, A.G.F.A. Michigan Central Rd., Buffalo, N.Y., was elected a member of the advisory committee vice B. B. Mitchell, Freight Traffic Manager of the same road, who found he could not attend the meetings.

A select committee, composed of legal and traffic officers of a number of principal lines, was appointed to confer with the Board of Railway Commissioners respecting bills of lading and other traffic forms requiring approval by the Board.

The constitution, by-laws and rules of procedure of the various standing committees were very fully considered and amended in several important particulars, the principal change being the substitution of membership by lines instead of by individuals, and the consequent elimination of honorary membership. The section regarding membership is as follows: "The membership of the Association to consist of railway and inland steamship lines participating in the expenses of the Association and having at least one terminus in Canada. Their representation to consist of officers and territorial representatives having jurisdiction over rates and regulations governing freight traffic within the territory of the Association."

Canadian Central Ry.—Notice has been given that application would be made next session of the Saskatchewan Legislature for an act incorporating a company with this title to construct a railway from Regina south and south-westerly to the International boundary; also a railway from Wood Mountain to the western boundary of the Province; also a line from Regina north-westerly to the south branch of the Saskatchewan River, thence to the western boundary of the Province; also a line from Regina south and south-easterly to the International boundary.

The Dominion Bridge Co., Montreal, has been licensed to do business in Manitoba under the provisions of the Foreign Corporations' Act, and has appointed E. E. Sheppard of Winnipeg its attorney.

The Ottawa and New York Ry. has established a watch inspection system for trainmen on its line under Webb C. Ball Co., of Cleveland, Ohio, General Time Inspector of the New York Central lines.

The McArthur Construction Co. of Canada has been incorporated under the Dominion Companies' Act, with a capital of $6,000,000 and offices at Montreal, to carry on a general construction business. The provisional directors are: A., A. F. McArthur, Chicago, Ill.; J. McArthur, New York; W. J. Poupore, G. C. Foster, Montreal.

The Empire Construction Co. has been incorporated under the Dominion Companies' Act, with a capital of $1,000,000 and offices at Montreal, for the purpose of carrying on a general construction business. The provisional directors are: Vicomte L. C. de Buisseret, Baron C. Goffinet, Comte J. d'Oultremont, E. Fichfet, L. Goffin, L. Greiner, G. Macquet, A. Rouffert, E. Rouffert, L. C. de Buissert, of Belguim; J. B. Tudhope, Orillia, Ont.; H. W. Fleury, Aurora, Ont.; P. Galibert, T. Gauthier, Montreal.

Engineers' Club of Toronto.

The sixth annual meeting of the Engineers' Club of Toronto, was held Jan. 11, when a committee was appointed to revise the constitution. The following were elected officers for the current year: President, F. L. Sommerville, Resident Engineer G.T.R., Toronto; First Vice-President, C. B. Smith, Chairman Temiskaming and Northern Ontario Ry. Commission; Second Vice-President, J. C. Sing; directors: J. S. Fielding, C. N. Canniff, R. G. Black; Treasurer, W. J. Bowers; Secretary, W. Chipman; Auditors, A. J. Van Nostrand, C. H. Heys. The number of members Jan. 1 was reported to be 117 resident and 28 non-resident.

R. F. Tate, Resident Engineer Mackenzie, Mann & Co., Toronto, the retiring President, delivered an address in which he reviewed the work of the club for the year, and referred to a number of the engineering events of the year. The great development in steam railway lines in Canada, he said, is of paramount interest. In 1905 the construction of our third transcontinental railway was commenced. This line, the Grand Trunk Pacific Ry., including the Government section, forming the National Transcontinental Ry., has given employment to a small army of Canadian engineers, principally on survey work during the year. In the progress of railway building during the year, however, the second transcontinental railway, the Canadian Northern Ry., together with the other lines forming the Mackenzie and Mann system—take first rank. The Canadian Northern Ry. on Nov. 21, 1905, reached Edmonton, Alta., 1,265 miles from Port Arthur, Ont. About 525 miles of new grade had been built and 600 miles of new track laid during the year. The C.P.R. has well maintained its progress in new grade and new track laid, besides extensive betterments which are constantly being carried out. In referring to betterments being made, as engineers they must all admire the G.T.R. for evidencing its appreciation of the value of low graduation in the bold and extensive work of this character it has already accomplished, as well as upon the completion of the second track of the line between Montreal and Sarnia tunnel, via Hamilton and Brantford—a distance of 510 miles on Canadian soil. The next railway of importance in the review of the year is the Temiskaming and Northern Ontario, which is being constructed by the Ontario Government, through a Commission of which the Club's First Vice-President is the Chairman. The line starting at North Bay, Ont., is now railed for 155 miles, with grading constructed for 60 miles beyond track end, with surveys projected 60 miles beyond this, and exploring parties through to James Bay.

In electrical power development there are the great companies at Niagara Falls, on the Canadian side, which are at present in a position to deliver over 60,000 electrical h.p., and will ultimately deliver 400,000 h.p. of 24 hour power. One of these—the Toronto and Niagara Power Co —has its power line on its own right of way 80 ft. wide, constructed on steel towers, and about completed to Toronto, and when an electric railway is laid and put in operation it will be one of the most capable and powerful electric traction roads in existence. Reference was also made to the power development of the Hamilton Cataract Power Light and Traction Co., now delivering 9,000 h.p. of 24 hour power, and capable of producing altogether 40,000 h.p.; to the development at the Kakabeka Falls near Fort William, Ont., and the power plants in Quebec province; to the production of steel rails at Sault Ste. Marie, Ont., and Sydney, N.S.; and to the manufacture of the highest class of bridge work called for by the Canadian railway specifications, at the works of the Canadian Bridge Co., Walkerville, Ont ; the Hamilton Bridge Works, Hamilton, Ont.; the Canada Foundry, Toronto, and the Dominion Bridge Works, Montreal. The Canada Foundry Co. recently turned out its first locomotive for the C.P.R., and followed it with a number for the Canadian Northern Ry. The C.P.R., the G.T.R., and a number of industrial concerns engaged in the construction of locomotives and railway rolling stock of all kinds, had more business offering to them than they could handle.

Canadians had demonstrated their ability as ship-builders, resulting in the development of a number of plants Not a great deal of progress was made during the year in connection with the various deep water canal projects—either the deepening of existing canals or channels, or in the new proposals—except in the way of surveys. The rapidly increasing demands for water carriage will force these various projects forward, and the same spirit of Canadian enterprise, which is in evidence everywhere, may be relied upon to carry them out as circumstances demand. There were many enterprises in progress in British Columbia, the Klondike, and other parts of Canada, including the Hudson Bay railway project, and the James Bay Ry., each of which were worthy of a special paper, to which reference might have been made, but time prevented. Reference was made in conclusion to the death of the first President, K. Tully, Engineer to the Toronto Harbor Commissioners, and the third President, Major H. A. Gray. Dominion Engineer in Toronto.

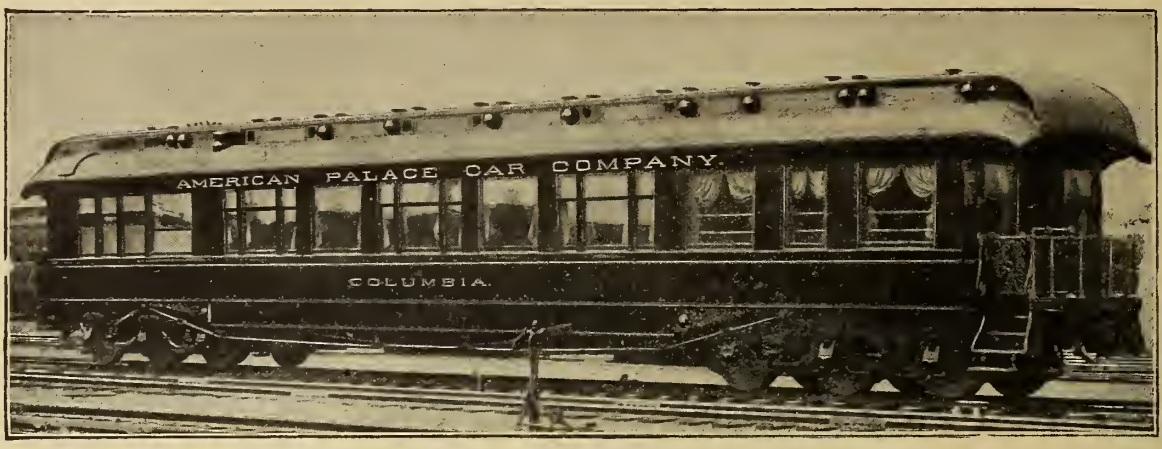
F. L. Sommerville, in his inaugural address, dealt with the future prospects of the profession. He pointed out a number of the lines upon which they might expect to find scope for their energies, particularly referring to the future that lay before the development of water powers for the generation of electric energy for transmission to distant parts for industrial purposes, and for electric traction purposes.

Checking Baggage to Residences, etc.

The C.P.R. and the G.T.R. have arranged to put into operation a new arrangement regarding the special delivery checking of baggage, which, although an innovation in Canada, has been in effect on some of the principal lines in the U.S. for some time, where it is working successfully in the interests both of the transportation lines and the public. The object from the railway standpoint is to avoid congestion at the larger stations and to effect quicker delivery of baggage, particularly in large centres. Under the present system baggage arriving at Toronto station and checked to Toronto only has to be trucked to baggage-room, recorded, sorted and piled in different piles in baggage-room waiting to be claimed; in the majority of cases this is done by the Canadian Transfer Co., whose agents have exchanged checks with owners on trains. After arrival of the train a representative of the Transfer Co. presents duplicate taken up on train to man in charge of the inward room who looks up baggage and makes delivery upon presentation of duplicate checks. The Transfer Co. then takes possession of the baggage, taking same to its room, where it is labelled and sorted before being forwarded on wagons to different parts of the city. This, it can readily be seen, takes up considerable time. Under the proposed system the baggage will be checked direct to residence or hotel of owner, a space on the check being provided for the entering in of the name and address of owner. Upon arrival at Toronto this baggage will be immediately separated from baggage checked to Toronto proper and delivered direct to the Transfer Co.,

VENTILATION—SANITATION—COMFORT—SAFETY

THE AMERICAN PALACE CAR COMPANY



The Private Car "Columbia" now in Commission Demonstrating the Advantages of the New System of Combined Sleeping, Parlor and Dining Car owned by the Company. Protected by Patents in the United States, Canada and Foreign Countries.

GENERAL U.S. OFFICES: No. 27 WILLIAM STREET, NEW YORK CITY

REGISTRARS: THE TRUST COMPANY OF AMERICA, NEW YORK CITY

GENERAL CANADIAN OFFICES: CONFEDERATION LIFE BLDG., TORONTO, ONT.

THE advantages of the combined parlor and sleeping car built under the system and patents owned and controlled exclusively by The American Palace Car Company, in addition to its easy riding, easy hauling and greater safety for the passenger in case of accident, are that (the beds and bedding being stored in steel dust-proof berth pockets underneath the floor, perfectly ventilated with pure outside air) the car during the day is a commodious parlor with chairs movable at will permitting the greatest sociability of the occupants, and at night a perfect sleeping car—the berths or beds being raised into place ready for occupancy by a simple mechanism, in from two to three minutes, and lowered in the morning in practically the same space of time; the chairs used during the day and any excess baggage of the passengers being stored in the berth pockets underneath which hold the beds and bedding during the day.

which can then make immediate delivery. This system avoids the unnecessary delay previously outlined, and which has been occasioned in the past. It will be no additional expense to passengers as the rates for special delivery are the same as they would pay for the transfer from the station to residence after arrival at the city, and will obviate the necessity of passengers hunting up someone to make delivery of baggage at destination. The check received at station from which they start will carry baggage direct to the residence or hotel, and will avoid the necessity of exchanging checks with transfer representatives on train, and as before stated, will insure more prompt delivery of baggage at destination. While this will entail more work and expense upon the railway companies performing the service, they will be amply repaid by the better service and better satisfaction to the travelling public who, it is expected, when they become acquainted with the system, will generally avail themselves of it. At the Grand Central station, New York City, during the tourist season as many as 300 and 400 pieces of baggage per day are checked through for special delivery. It is intended at present to adopt this system only at Montreal, Toronto and Hamilton, points at which there is the largest congestion of baggage, but undoubtedly in the near future as it becomes better established it will be extended to some other large cities in Canada. This is being adopted jointly by the C.P.R. and G.T.R. in connection with the Canadian Transfer Co., which operates in the above cities.

Railway Equipment Notes.

The International Ry. of New Brunswick has two locomotives and 25 flat cars in operation.

The Cumberland Ry and Coal Co. has ordered 100 coal cars from Rhodes, Curry & Co., Amherst, N.S.

The Intercolonial Ry. has received two parlor and observation cars, which have been named Dufferin and Grey.

The Great Northern Ry., U.S., has put on a complete new equipment of passenger cars for its trains between Seattle, Wash., and Vancouver, B.C.

The Temiskaming and Northern Ontario Ry. has ordered a 75-ton wrecking crane, a 25-ton pull ballast unloader, and a ballast plough from F. H. Hopkins & Co., Montreal.

The Central Vermont Ry. has ordered from the American Locomotive Co. four 10-wheel passenger locomotives, and 10 Richmond compound consolidation freight locomotives.

The Alberta Ry. and Irrigation Co. has sold a locomotive, a passenger coach and 12 freight cars of its abandoned narrow gauge equipment to a mining company in Washington state.

The Klondike Mines Ry.'s equipment consists of two locomotives bought from the White Pass and Yukon Rd., 15 box cars, 15 flat cars and two passenger cars. It is not intended to buy any new equipment this year.

The Locomotive and Machine Co. of Montreal, delivered during Jan. three 10-wheel locomotives per week to the C.P.R., and has completed the delivery of six 2½-yd. Atlantic type steam shovels to the same company.

The Department of Railways is considering the question of adopting a gasoline motor car or cars on certain sections of the Prince Edward Island Ry., but we were informed Jan. 25, that no decision had been reached in the matter.

The G.T.R. during the last three months of 1905 added the following rolling stock: six Richmond compound mogul locomotives from the Canadian Locomotive Co., Kingston, Ont.; 114 box cars, 60,000 lbs. capacity, from the Canada Car Co., Montreal; four baggage cars from its Montreal shops, and seven cabooses from its Port Huron, Mich., shops.

The G.T.R. has placed orders for new locomotives as follows:—10 ten-wheel passenger engines, 55 Richmond compound consolidation engines from the Locomotive and Machine Co. of Montreal; 10 ten-wheel passenger engines from the American Locomotive Co., New York; and six Richmond compound consolidation engines from the Canada Foundry Co., Toronto.

The special equipment of the box, flat, stock and refrigerator cars, ordered from Rhodes, Curry & Co., Amherst, N.S., and the Crossen Car Manufacturing Co., Cobourg, Ont., the numbers of which were given in our Dec. issue, include Simplex bolsters, Susemihl roller side bearings, Simplex brake beams, Canadian Bronze Co.'s journal bearings, Westinghouse air brakes, and American Asphaltum and Rubber Co.'s pioneer plastic roofing.

We are advised in connection with the press reports that the Michigan Central Rd. was discontinuing the building of locomotives at its Canadian shops, St. Thomas, Ont.; that for the last two years it has only built switching engines there. At present the company has all the switching engines it requires in Canada, and locomotive building, therefore, has been discontinued at St. Thomas until more of this class of power is required in Canada.

The Alberta Ry. and Irrigation Co. has purchased a private car which has been named Lethbridge. The car was built at the C.P.R. shops, Montreal, and is fitted and decorated in the same manner as the latest sleeping cars of the C.P.R. Its dimensions are 62 ft. long over all, and 9 ft. 8 in. wide, with observation platforms at each end, 3 ft. 4 in. deep. The car is divided from front to rear as follows:—dining-room 11 ft. 6. in.; baggage-room 3 ft.; kitchen 7 ft. 10 in.; porters' room 4 ft. 6 in.; bathroom 10 ft.; bathroom and general toilet room; open seats, arranged to make into berths when required, and office desk; observation room.

Orders have been placed for the following passenger equipment for the Mackenzie, Mann & Co. railway lines, most of which is included in the particulars given in our Dec. issue:—10 day coaches and three baggage cars with Rhodes, Curry & Co., Amherst, N.S.; 10 day coaches and five mail and express cars with the Crossen Car Manufacturing Co., Cobourg, Ont.; and 8 day coaches, three sleeping cars and two dining cars in the U.S. The specifications for all these cars include Susemihl roller side bearings; Safety Car Heating and Lighting Co.'s steam heat attachments in conjunction with Baker heaters; Westinghouse air brakes with train signal.

Following are fuller specifications of the 20 ten-wheeled simple locomotives ordered for Mackenzie, Mann & Co.'s lines from the Canada Foundry Co., Toronto, than were given in our January issue:—

WEIGHT.—On drivers, 130,000 lbs.; total 160,000 lbs.
CYLINDERS.—Diameter, 19 in.; stroke of piston, 26 in.
WHEELS.—Diameter of drivers, 57 in.; centres, east steel, 50 in. diameter.
BOILER.—Type, extended wagon top; working steam pressure, 200 lbs.
TUBES.—Number, 240; outside diameter, 2 in.; length, 14 ft.
FIREBOX.—Length, 9 ft. 1⅛ in.; width, 3 ft. 6 in.; grate area, 31 ft. 8 in.
TENDER.—Tank capacity, 5,000 imperial gallons; 11 tons coal.
SPECIAL EQUIPMENT.—Westinghouse air brake, Simplex brake beams, Canadian Bronze Co.'s journal bearings.

Deliveries to be made at the rate of one per week commencing in May.

Following are dimensions of the 4 six-wheel switching locomotives ordered for Mackenzie, Mann & Co.'s railways, for April delivery, from the Canada Foundry Co., Toronto:—

WEIGHT.—All on drivers, 130,000 lbs.
CYLINDERS.—Diameter, 19 in.; stroke of piston, 24 in.
WHEELS.—Diameter of drivers, 50 in.; wheel centres, cast steel, 44 in. diameter.
BOILER.—Type, straight top; working steam pressure, 180 lbs.
TUBES.—Number, 2,701; outside diameter, 2 in.; length, 10 ft. 6 in.
FIREBOX.—Length, 96 in.; width, 34⅜ in.
TENDER.—Capacity, 3,200 imperial gallons; six tons of coal.
SPECIAL EQUIPMENT.—Westinghouse air brake; Simplex brake beams, Canadian Bronze Co.'s journal bearings.

The principal dimensions of the 10 ten-wheel simple locomotives ordered from the Canadian Locomotive Co., Kingston, Ont., for the Mackenzie, Mann & Co.'s lines, for delivery in July and August, follow:—

WEIGHT.—On drivers, 107,000 lbs.; total, 135,000 lbs.
CYLINDERS.—Diameter, 18 in.; stroke of piston, 24 in.
WHEELS.—Diameter of driving wheel, 63 in.; wheel centres, cast iron, 56 in. diameter.
BOILER.—Type, radial stayed wagon top; working steam pressure, 200 lbs.
TUBES.—Number, 236; outside diameter, 2 in.; length 13 ft.
FIREBOX.—Length, 102 in.; width, 41 in.
TENDER.—Capacity, 5,000 imperial gallons; 10 tons coal.
SPECIAL EQUIPMENT.—Westinghouse air brake, Simplex brake beams, Canadian Bronze Co.'s journal bearings.

Following are general dimensions of the 10 ten-wheel simple locomotives ordered for Mackenzie, Mann & Co.'s lines from the Locomotive and Machine Co. of Montreal, which were referred to in our Dec. issue as having been ordered:—

WEIGHT.—On drivers, 105,785 lbs.; total, 135,345 lbs.
CYLINDERS.—Diameter, 18 in.; stroke of piston, 24 in.
WHEELS.—Diameter of driving wheel, 62 in.; centres, cast steel, 56 in. diameter.
BOILER.—Type, radial stayed wagon top; working steam pressure, 200 lbs.
TUBES.—Number, 248; outside diameter, 2 in.; length, 13 ft. 2 15-16 in.
FIREBOX.—Length, 103 in.; width, 42 in.;
TENDER.—Tank capacity, 5,000 imperial gallons; 10 tons coal.
SPECIAL EQUIPMENT.—Westinghouse air brakes, Simplex brake beams, Canadian Bronze Co.'s journal bearings.

Delivery is to be made in April.

Prince Edward Island Tunnel.—Rev. Father Burke, who has been prominent in the agitation favoring the construction of a tunnel between Prince Edward Island and the mainland, on his return to P.E.I., from Ottawa, Jan. 19, stated that E. D. Lafleur, one of the engineers of the Department of Public Works, had been examining all the plans and data in the possession of the Department in connection with the matter, and was preparing a report for presentation to Parliament. It was anticipated that the report would be favorable to the project.—(Oct., 1905, pg. 461).

The Canadian Society of Engineers proposes to ask the New Brunswick Legislature next session to pass an act to fix the status of civil engineers, and to regulate the practice of engineering in the province.

A large number of petitions have been presented to the Manitoba Legislature from rural municipalities, towns and villages as well as from the city of Winnipeg, asking for the passage of such legislation as will secure to the Government and the municipalities the control of telephones.

The Manitoba Legislature will be asked at its current session for an act incorporating the Winnipeg-Portage Auto. Road Co., with power to construct and operate a toll road for the exclusive use of automobiles and motor cars between Winnipeg and Portage La Prairie. Potts & Hubbard, Winnipeg, are solicitors for the applicants.

Railway Subsidies Paid in 1904-05.

The following subsidies were paid by the Dominion Government during the financial year ended June 30, 1905:—

Atlantic and North-Western Ry.....	$ 186,600.00
Atlantic and Lake Superior Ry.....	42,336.86
Algoma Central and Hudson's Bay Ry.	341,440.00
Bruce Mines and Algoma Ry.....	25,120.00
Beersville Coal and Ry.....	20,736.00
C.P.R.—Pheasant Hills branch.....	56,576.00
Halifax and South-Western Ry.....	291,842.00
Kootenay and Arrowhead Ry.....	4,176.15
Lindsay, Bobcaygeon & Pontypool Ry.	185,173.06
Middleton and Victoria Beach Ry...	47,789.00
Orford Mountain Ry.....	38,250.00
South Shore Ry.—Canadian Bridge Co.	3,456.46
St. Mary's River Ry.....	32,134.00
	$1,275,629.53

During the year the Dominion guaranteed the bonds of the following companies:—

QUEBEC BRIDGE AND RY. CO.—The guarantee is for the principal $6,678,200, and for the interest thereon at the rate of 3% per annum for 50 years.

CANADIAN NORTHERN RY.—The guarantee is for the principal and interest thereon at the rate of 3% per annum, of £1,923,287 for 50 years.

GRAND TRUNK PACIFIC RY.—The guarantee is for a sum equal to 75% of the cost of construction of the Western Division of the National Transcontinental Ry., but not exceeding $13,000 a mile in respect of the prairie section of the line.

Railway Finance, Meetings, etc.

Canada Atlantic Ry.—The gross receipts and results of operation of the C.A. Ry. are being included in the returns of the G.T.R. from Jan. 1. Following is a statement of the monthly earnings and working expenses for the half year ended June, 1905:

	Receipts	Expenses	Net Earnings
Jan.....	£24,227	£22,427	£ 1,800
Feb.....	21,487	20,458	1,029
Mar.....	27,903	20,335	7,568
April	28,784	18,237	10,547
May.....	36,290	23,289	13,001
June.....	38,270	24,483	13,787
	£176,961	£129,229	£47,732

Carillon and Grenville Ry.—Following are the officers for the current year:—President, H. Wallis; Vice-President, H. W. Shepherd, Managing Director and Treasurer, R. W. Shepherd.

Grand Trunk Ry.—The assessment of the G.T.R. property in Toronto has been increased by $438,877 over the figure for 1905.

Great Northern Ry. of Canada.—Following are officers and directors for the current year: President, D. B. Hanna, Toronto; Vice-Presidents, F. Nicholls, Toronto; H. H. Melville, Montreal; General Manager, C. W. Spencer, Montreal; other directors: Z. A. Lash, K.C.; W. H. Moore, F. C. Annesley, A. J. Mitchell, Hon. Jules Tessier, V. Choutevert, T. McDougall, and the Mayor of Quebec. The directors are the same as for the previous year with the exception that F. Nicholls and C. W. Spencer have been substituted for Col. McNaught and E. E. Ling. A. J. Gorrie is General Superintendent, and G. Tombs General Freight and Passenger Agent.

Guelph Junction Ry.—The profits for the year on this line were reported to the Guelph Ont., City Council, Jan. 15, to have been about $16,000. The council appointed the following committee to manage the railway: the Mayor, L. Goldie, J. W. Lyon, M. S. Cray, members of the city council; C. L. Dunbar, A. B. Stewart.

Intercolonial Ry.—There was charged to capital on account of the I.C.R. during the financial year ended June 30, 1905, $4,755,577.86.

Revenue for year ended June 30, 1905:—Passenger traffic, $2,105,066.75; freight traffic, $4,373,178.55; mails and sundries, $305,277.53; total, $6,783,522.83 against $6,339,032.27 for same period 1903-04. Working expenses—locomotive power, $3,116,653.49; car expenses, $2,040,133.13; maintenance of way and works, $1,722,616.65; station expenses, $937,816.11; general expenses, $535,541.85; car mileage, $16,065.52; rental of leased lines, $140,000; total, $8,508,826.75 against $7,239,982.04 for same period, 1903-04.

Lake Champlain and St. Lawrence Junction Ry.—This line is operated by the C.P.R. as lessee of the Montreal and Atlantic Ry., which in turn leased it from the owners, the principal of which is the Boston and Maine Rd. Co. The company does not do any business, but the charter is kept alive. T. N. Turner, St. Johnsbury, Vt., is President; and J. O'Halloran, Cowansville, Que., is Secretary-Treasurer.

London and Port Stanley Ry.—The financial report presented at the annual meeting in London, Ont., Jan. 15, showed the receipts to be $18,174.16, made up of $10,000 rental from Lake Erie and Detroit River Ry; interest as rental, $2,596.60; percentage on earnings part of 1903, $889.84; ditto on 1904 earnings, $4,687.72. The total receipts were handed over to the city, which practically owns the line, the only other shareholder of any consequence being the G.T.R., which holds 3,000 shares. Following are the officers and directors for the current year: President, Mayor Judd; Vice-President, Alderman Gillean; other directors: Aldermen Matthews, Wyatt, Cooper, Booth, Greenlees, Garratt, A. White, ex-Alderman Stevely; Secretary, the City Clerk.

Prince Edward Island Ry.—During the financial year ended June 30, 1905, there was charged to capital account $591,412.65.

Revenue for year ended June 30, 1905:—Passenger traffic, $102,505.55; freight traffic, $94,724.70; mails and sundries, $20,100.36; total $217,330.61 against $234,390.03 for same period 1903-04. Working expenses—locomotive power, $109,541.81; car expenses, $56,696.00; maintenance of way and works, $134,379.86; station expenses, $51,881.94; general expenses, $16,206.19; total $368,705.80 against $335,695.44 for same period 1903-04. The figures show a deficit of $151,375.19 against a deficit of $101,305.41 for 1903-04.

Qu'Appelle, Long Lake and Saskatchewan Rd.—Net earnings for Nov., $44,304.50 against $15,251.17 for Nov., 1904.

Application will be made next session of the Dominion Parliament for an act amending the acts relating to the company by altering and enlarging its powers as to borrowing and to the issue of paid up stock, and authorizing the company to sell or lease its railway and undertaking.

Application will be made next session of the Saskatchewan Legislature for an act to incorporate a company for the purpose of acquiring the Qu'A., L. L. and S. Ry. and Navigation Co., and extending its railway. The Qu'A., L.L. and S. Ry. is owned by Osler and Hammond, of Toronto, the estate of the late G. R. Pugsley, of New Brunswick, and the estate of the late Senator MacInnes, of Hamilton, Ont., and is being operated by the C.P.R. for the owners on satisfactory terms. The present owners have given an option to residents of Regina, Sask., and it is understood that they are seeking the charter. Local reports state that the interest behind the application is the Great Northern Ry., U.S.

Quebec Central Ry.—Gross earnings for Nov., $61,832.16; net earnings, $20,702.68 against $55,331.74 gross and $14,427.32 net for Nov., 1904. Net earnings for 11 months ended Nov. 30, $254,488.89 against $236,640.30 for same period, 1904.

Quebec and Lake St. John Ry.—Application will be made at the current session of the Quebec Legislature for an act authorizing the company to subscribe for stock in the Quebec Transport Co., or some other steamship company trading to the port of Quebec; to guarantee the payment of the capital and interest of a sum to be borrowed by the Lake Joseph Hotel Co., and to declare and if necessary, vary the quorum of the bondholders empowered to authorize the issue of £150,000 balance of the prior lien bonds authorized by chaps. 71 and 72, 4th Edward VII, and for other purposes.

Quebec Southern Ry. and South Shore Ry.—Official notice has been given that all claims against these railway companies, whose property has been sold under an order of the Court of Exchequer, have to be filed with the Registrar of the Court or with G. E. Dessaulles, the Receiver, 26 St. Sacrament St., Montreal, before Mar. 1.

Temiscouata Ry.—Gross earnings for Nov., $10,032.49.

Toronto, Hamilton and Buffalo Ry.—Estimated earnings for Dec. $68,298.63 against $56,411.04 for Dec., 1904.

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The Canadian Fairbanks Co., Montreal, has sent out its calendar for 1906, a feature of which is illustrations of the various special lines manufactured.

The B. Greening Wire Co., Hamilton, Ont., has issued a booklet illustrating the wire bondings for concrete construction, and wire lathing which it manufacturers.

The American Locomotive Co., New York, has issued a booklet dealing with the Walscharet valve gear, which the company is largely using at its several works.

The Hiram L. Piper Co., Montreal, has sent out a calendar, the principal feature of which is a well-executed lithographic reproduction of Moran's seapiece "Solitude."

The Gartshore-Thompson Pipe Foundry Co., Hamilton, Ont., has issued as a calendar for 1906, a reproduction of one of the Dutch scenes painted by W. C. Harston.

F. H. Hopkins & Co. have largely increased their office accommodation in the Imperial Bank Building, Montreal, where they now occupy the eastern half of the upper floor.

The calendar for 1906 issued by F. H. Hopkins & Co., Montreal, contains on each page illustrations of the special lines of railway contractors' and other plant which they handle.

The Canadian General Electric Co. has issued section five of its supply catalogue, giving prices, etc., of its incandescent supplies, and a circular showing prices of miscellaneous material.

W. H. C. Mussen & Co., Railway Contractors, Mining and Municipal Supplies, Montreal, have issued a wall calendar for 1906. The figures are plain and large, easily discernible at a considerable distance.

It is reported that there are over 1,500 Shay geared locomotives in successful operation in all parts of the globe. They are manufactured by the Lima Locomotive and Machine Co., Lima, Ohio, whose plant occupies over 14 acres of land.

work on the G.T.R., has been transferred to the Rock Island Rd, with headquarters at Chicago. He is succeeded on the G.T.R. system by J. Linahen, heretofore road foreman, G.T.R. Northern Division, who will have his headquarters at Montreal.

H.M.S. Dominion, which conveyed the body of the late Hon. R. Prefontaine from Cherbourg to Halifax, is one of the eight battleships of the King Edward VII class, which are the most powerful warships afloat. She is fitted with two triple expansion engines, which develop at full power 18,000 h.p., the steam for which is furnished by Babcock and Wilcox water tube boilers.

Jerry M. Hayes, formerly with the New Haven Car Register Co., and recently with the Frank Ridlon Co., has associated himself with the Sterling-Meaker Co. He is well known to the street railway officers of New England, New York and Pennsylvania. The travelling force of the Sterling-Meaker Co. now consists of G. E. Willis, F. D. Willis, J. M. Yount, formerly Master Mechanic of the North Jersey Street Ry. Co., and J. M. Hayes.

B. M. Jones & Co., Incorporated, have taken over the business of B. M. Jones & Co., Boston and New York. Associated in the management are: B. M. Jones, President; J. A. Warren, of Chicago, Vice-President and General Manager; R. L. Thomas, of New York, Second Vice-President; and W. J. Klein, of Boston, Secretary and Treasurer, all of whom have long been associated with the business. The incorporated company will act as sole representatives in the U.S., Canada and Mexico, of Samuel Osborn & Co., Clyde Steel and Iron Works, Sheffield, Eng., manufacturers of Mushet Steels, including Mushet Special, Mushet High Speed and Titanic Steels, also Mushet High Speed Steel Twist Drills and Cutter Blanks, Clyde Tool Steel and other high grade Tool Steels. They will also act as sole representatives in the U.S., Canada, and Mexico, of Taylor Bros. & Co., Ltd., Clarence Iron Works, Leeds, Eng., manufacturers of Taylor best Yorkshire Iron, for staybolts, axles, piston rods, crank pins, etc.

Following are the officers of the Lake Ontario Navigation Co. for the current year: President, F. Hutchinson; Vice-President, W. Douglas, K.C.; Managing Director, J. Hazlett; Secretary, F. H. Baker. At the annual meeting, held in Toronto, Jan. 20, the reports presented showed that a satisfactory business had been done during the last season of navigation.

The Canadian Starch Co. has been incorporated under the Dominion Companies' Act with a capital of $2,500,000, and offices at Cardinal, Ont., to manufacture starch, glucose, etc., and in connection therewith acquire and operate grain elevators and warehouses, steam and other vessels, docks, wharves, etc. The provisional directors are: G. F. Benson, W. Strachan, C. R. Hosmer, Montreal; J. J. Warren, Toronto; J. Ruddy, Brantford, Ont.

St. Clair Tunnel Electrification.

The single-phase electric locomotive adopted by the St. Clair Tunnel Co. for the operation of the St. Clair tunnel, which connects the Middle and Western divisions of the G.T.R., will weigh approximately 62 tons, and will develop a draw-bar pull of 25,000 lbs. on a 2 per cent. grade at a speed of 10 miles an hour. It is of the rigid frame type with driving axle boxes held in the same frame that contains the draft gear. It will be mounted on three pairs of driving wheels, which will sustain the entire weight, distributed by equalizer bars similar to those used in steam locomotive practice, will have an outside frame supported on semi-elliptical springs, and will be equipped with Westinghouse friction draft gear, MCB automatic couplings, air sanding apparatus, and bumper steps, front and back. The cab will be of sheet steel mounted on a framework of iron which supports both walls and roof. The principal dimensions will be approximately as follows: Length over end sills, 27 ft. 9 in.; rigid wheel base, 12 ft.; width over all, 9½ ft.; height from top of rail to top of cab, 12½ ft.; diameter of driving wheels, 62 in.

The operating apparatus will be arranged along the sides of the cab, leaving a free passage-way 3½ ft. wide the entire length. The cab will be lighted and heated by electricity, arrangement being made to screen the instrument lights while the locomotive is running. Westinghouse combination automatic and straight air and American driver brakes will be used. The air supply will be provided by a two-cylinder motor-driven air compressor having, with a 5 in. stroke and speed of 190 r.p.m., a capacity of 45 cub. ft. of air per minute. Air reservoirs, signal outfits, whistle, bell with pneumatic ringers, automatic pump governor, tools, instruments, gauges, headlights, push poles and other details complete the auxiliary equipment.

A motor will be geared to each axle, giving each unit an aggregate rated capacity of 750 h.p. They will be of the Westinghouse single-phase alternating-current, series wound, compensating type, and of the same general character as the motors selected by the New York, New Haven and Hartford Rd. for the operation of its line between New Haven and New York. Each motor will weigh complete approximately 14,500 lbs., the armature weighing approximately 5,600 lbs. The motor frame will consist of a steel cylinder cast in one piece and enclosed at the end by brackets of the same material, which carry the bearings and oil reservoirs. The suspension noses and safety lugs will form a part of the main casting. Seats for the axle bearings will be cast solid with the frame. All bearings will be of phosphor-bronze lined with babbitt and divided into two parts. They will be of exceptionally large dimensions, will be arranged for oil waste lubrication, and will be provided with large openings on the low pressure side, giving a thorough lubrication to the entire bearing surface. Oil will be fed into the reservoirs through openings separate from the waste pockets and will therefore reach the waste from below and be thoroughly filtered before entering the bearing. The motors will be swung between the locomotive frame and the driving axles by a flexible nose suspension from two hangers supported by a truck transom, and passing through heavy lugs with helical springs above and below the lug. The motors will be held to the axle by means of caps split at an angle of 35 deg. with the perpendicular, so that the greater part of the weight will be borne by solid projections from the motor frame, which will extend over the axle, rather than by the cap bolts. Large openings above and below will provide access to the commutator and brush holders.

Within the cylinder of the motor frame there will be built up a core of soft steel

To the Trade

At the end of January we are issuing a 12 sheet 22 x 15 in. Calendar for the ensuing 12 months.

It's somewhat different to anything hitherto published or distributed by a Rubber Company in the Dominion.

We've planned it for practical men. It's got big date figures—large enough to read without glasses, and shows banking and other holidays scheduled in the Dominion.

Primarily it's a Rubber production. And a good one.

On every sheet are illustrations of our many and varied products in Rubber.

And the "date" feature is so prominent and practical that you'll keep it to the last sheet—the twelfth month—and feel that you're not doing us a special favor—'cause it's something that *you* want. It's a Calendar with "mutual" features.

We've issued many thousands of these Calendars, all done up in cartons ready for mailing. All our Sales Branches have large supplies. A postal to our Branch Offices will bring a Calendar (or several of them) to your desk.

WRITE TO-DAY

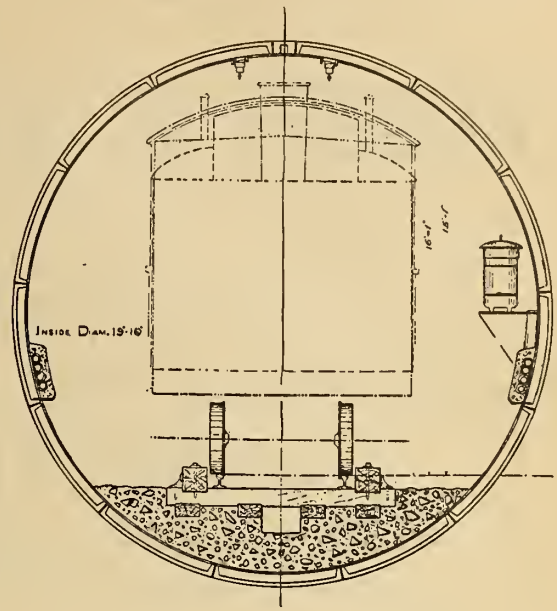
D. LORNE McGIBBON, General Manager

punchings, forming a complete laminated field. The punchings will be dovetailed into the frame and clamped between end rings of cast steel. The field coils will be wound with copper strap insulated between turns and about the coils by mica, and finished by taping and dipping, and will be impregnated in the best grade of varnishes, providing a sealed coil which can withstand the most severe internal heat and be practically indestructible under the usual conditions of heavy railway service. In addition to the main coils the field will carry a neutralizing winding consisting of copper bars placed in slots in the pole faces and joined at the ends by connectors of copper strap, so as to form one continuous winding, which will be connected in series with the main field winding and with the armature circuit. The magnetizing effect of this auxiliary winding will be directly opposite to and neutralizes that of the armature winding, thus eliminating the effect of armature re-action and improving commutation and power factor. The main coils will be easily removable without disturbing the auxiliary winding. The armature cores will be formed of slotted soft steel punchings built up upon a spider and keyed in place. The spider will be forced upon the shaft with heavy pressure and secured by a steel key. Coils of copper strap will be embedded in the slots and joined to form a closed multi-circuit winding which will be cross-connected, like the multi-circuit winding of a direct-current generator. The basis of the insulation will be mica. A preventive winding will be connected between the commutator and the main coils, introducing a preventive action which will be effective only when the coil is passing under the brush.

During operation a forced circulation of air supplied by motor-driven blowers will enter at the rear, distribute itself thoroughly throughout the motor and escape through the perforated cover over the commutator. This system of forced ventilation of both motors and auxiliary apparatus forms one of the most interesting innovations in electric railway construction. It secures a maximum output from a given weight of material, and a high ratio of continuous output to the one-hour motor rating common in railway practice. It also provides effective ventilation while the locomotive is not in operation as the blower may be driven while the locomotive is standing at the station or at the end of the line. Motors ventilated in this manner are enclosed and are thereby protected form internal damage by dirt and water and from mechanical injury. These motors are wound for 240 volts and 25 cycles per second, and have a nominal rating of 250 h.p. each, on the basis of usual electric railway practice.

The essential elements of the control equipment will include the collecting devices, the auto-transformers, the unit switches, the preventive coils, the reverser and master controllers. A multi-unit system of control will be provided with pneumatically operated switches and circuit breakers, low voltage control circuit, and other characteristics standard in Westinghouse practice. Any unit will be controllable from either end, and two or more units may be coupled together and operated from a single cab and by a single crew. The tractive effort which can be readily applied to a single train will therefore be limited only by the number of units available, and the hauling power will be limited only by the mechanical strength of the coupling between locomotive and cars. A control circuit will be carried from one unit to the next by means of connecting sockets and jumpers in the usual manner. Speed control of the driving motors will be secured by variation of the voltage at the motors obtained by means of taps taken from the winding of the auto-transformer, which will receive current from the trolley at 3,000 volts and reduce it to 240 volts or lower, according to the tap employed. These taps will be connected to unit switches from which current will be led through the preventive coils to the motors. Four unit switches will serve to reverse the field of each motor.

The unit switches will be of standard Westinghouse design and will, in effect, be pneumatically operated circuit breakers of great power and reliability. The mechanism will be such that a rolling and sliding contact will be obtained when the switch closes and opens. The arc will be broken at the taps, leaving the contact surfaces smooth and unscarred. Each unit will have a magnetic blow-out coil with laminated core. The switch cylinders will be controlled by magnetically operated valves, current for which will be obtained from a 50-volt tap from the auto-transformer. The sequence of operation will be governed by the master controller in conjunction with a system of inter-locks which will prevent short circuit of the steps between taps from the auto-transformer or improper operation of the controlling mechanism. At any running point four controlling switches will be closed. Through the preventive coils approximately the same amount of current will be drawn from each of these switches and the leads to which they are connected. To change to a higher voltage on the motors, the master controller is moved to the next notch, opening the last switch of the group that is closed and closing the switch next higher, with the result that the motor voltage is shifted up one step. By this arrangement the voltage at the motor will be completely under control of the locomotive driver and may be varied up and down at will without opening more than one-quarter of the load current. Small switches in the circuits to the magnets of the reversing switches will enable any motor or combination of motors to be cut out without disturbing the others. Every one of the 17 controlling connections will provide an efficient running point. This number will be ample to prevent any slipping of the driving wheels due to increase of current from one notch to another. Whether empty or heavily loaded, operated in single or multiple units, torque and draw-bar pull may be gradually applied and the locomotive started without jar.



SECTION OF ST. CLAIR TUNNEL.

Each locomotive unit will be equipped with a pneumatically operated pantagraph trolley to collect current from the overhead lines outside the tunnel and throughout the yards. The proportions of the pantagraph will be such that, when extended, it will make contact with the trolley wire 22 ft. above the rail, and, when closed down, the contact shoe will not extend more than 18 in. above the roof of the locomotive. The pantagraph will have a broad base and will be constructed of light and stiff material. A no. 0000 grooved overhead trolley wire will be suspended from a single Œ inch, high strength, double galvanized, steel strand, messenger cable by hangers of varying length in such a manner that the trolley wire will be approximately horizontal. The messenger cable will be swung from structural iron bridges located throughout the yards, and of suitable length to span the proper number of tracks. There will also be a small section of track equipped with a trolley line swung by catenary suspension from bracket arms supported on lattice-work poles.

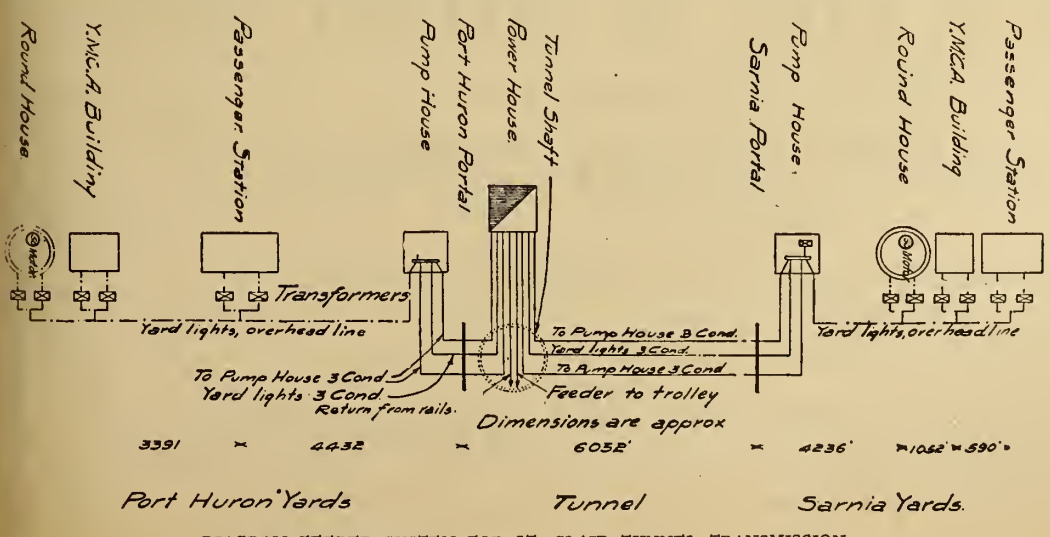


DIAGRAM FEEDER SYSTEM FOR ST. CLAIR TUNNEL TRANSMISSION.

THE
ROBERT MITCHELL CO.
MONTREAL LIMITED
MANUFACTURERS OF
RAILWAY AND STREET CAR FITTINGS

For the operation of the electric locomotives a complete power plant will be installed by the St. Clair Tunnel Co., including two 1,250 kw., 3,300 volts, 3-phase, 25 cycle, 1,500 r.p.m., rotating field, Westinghouse steam turbine units with the necessary complement of switchboards, exciters, lightning protective apparatus, etc. This station will also supply current to light the buildings, yards and tunnel, to operate motor-driven centrifugal and triplex pumps which drain the tunnel and approaches and operate the sewage system, to run motors in the round-houses and for other purposes.

The new equipment will handle that portion of the G.T.R. which connects the divisions terminating at Sarnia, Ont., and Port Huron, Mich., on opposite sides of the St. Clair river. The tunnel proper is 6,032 ft. long, and the line to be electrically operated measures 19,348 ft. from terminal to terminal. A pair of the new units will be capable of hauling a 1,000 ton train through the tunnel without division. Mechanical consideration limit the advisable weight of train in the tunnel to these figures. Heavier

232 ST. JAMES STREET, MONTREAL.

trains can be divided or sent through together with locomotives in front and behind. The service requires that each unit shall take a train of 500 tons through the tunnel block from summit to summit in 15 minutes, under the following conditions: It will be coupled to the train on a level track 1,200 ft. from the summit, and must accelerate it up to a speed of 12 miles an hour in two minutes, at the end of which time it will have reached the summit of the gradient leading down into the tunnel. It will then run down a gradient of 2 per cent. to the level track in the tunnel at a speed not exceeding 25 miles an hour, continue on the practically level stretch under the river, and then draw the train up a 2 per cent gradient at the rate of 10 miles an hour to the level track beyond the tunnel approach on the other side. It must then gradually accelerate the train until a speed of 18 miles an hour is reached. Each unit must be capable of exerting a tractive effort of 25,000 lbs. for a period of 5 minutes in addition to the energy required to accelerate the train at the starting point and to run with it into the terminal yard, from which point it must immediately run back to a position 1,200 ft. from the summit, couple to another train and be ready to start through the tunnel in the opposite direction. It must, therefore, make a run of the character described every 30 minutes.

Six of these locomotives are to be furnished by the Westinghouse Co. It is expected that the electric equipment will greatly relieve the traffic congestion now existing, and due in a large measure to the necessity of dividing trains at the terminal points, and to greatly simplify the operation of the road. Its opening will mark the progress of electrical methods in the railway field under conditions which seem peculiarly fitted to demonstrate its practical advantages in heavy service. That the single-phase system has been adopted for so important an undertaking makes evident the recognition accorded the alternating current by railway engineers, and indicates that its claims have been verified by the service already rendered.

The work of installation will be conducted under the supervision of B. J. Arnold, of Chicago, Consulting Engineer for the Tunnel Company, by whom the plans and specifications were prepared. The contract for the entire equipment was placed through the Canadian Westinghouse Co., Limited, of Hamilton, Ont. A large part of the apparatus will be constructed in its Hamilton works, and various Westinghouse interests will co-operate to complete the work.

The cuts illustrating this article are reproduced from the Railway and Engineering Review.

The Canadian Dredge and Construction Co. has been incorporated under the Ontario Companies' Act, with a capital of $150,000, and offices at Midland, Ont., to construct, repair, sell, lease, or otherwise dispose of dredges, derricks, vessels, lighters, tugs and barges; to construct wharves, docks, dry docks, bridges, piers and other public works. The provisional directors are: Jas. Playfair, D. L. White, D. S. Pratt, P. Potvin, Midland; W. J. Sheppard, Waubashene, Ont.

The question of lumber rates from the Ottawa Valley to New York has recently been under the supervision of the Canadian Freight Association. The rate from Ottawa to New York by rail to Albany, N.Y., thence by barge to New York, has been $3 per 1,000 ft. It was proposed to substitute for this a rate of 10½ cents per 100 lbs. It is said that this proposal has been abandoned and the rate will continue to be per 1,000 ft. For the present, at least, the old rate remains in effect, and a sub-committee has been appointed to consider the whole question.

MAINLY ABOUT PEOPLE.

Geo. Hall, chief clerk to the General Superintendent C.P.R., North Bay, Ont., died there Jan. 18.

Thos. Foote, chief accountant I.C.R. up to 1882, died at Baltimore, Md., recently of paralysis.

Mrs. Osler, wife of E. F. Osler, of the Canadian Locomotive Co., Kingston, Ont., died there Jan. 27.

Sir Wm. and Lady Van Horne were at Rideau Hall, Ottawa, Jan. 6, guests of the Governor-General.

The Standing Committee on Railways of the Manitoba Legislature has elected Mr. Ruddall as its chairman.

Mrs. Long, wife of R. W. Long, G.T.R. Division Freight Agent, Stratford, Ont., died at Buffalo, N.Y., Jan. 3.

R. Marpole, General Superintendent C.P.R., Vancouver, B.C., and Mrs. Marpole, are spending some time at Honolulu.

A. Davey, of Dawson, Yukon Territory, solicitor for the White Pass and Yukon Ry., died in Ottawa recently, aged 30.

H. R. Emmerson, son of the Minister of Railways and Canals, was married at Parrsboro', N.S., Dec. 28, to Miss B. Price.

Lieut.-Col. W. P. Anderson, Chief Engineer, Department of Marine, has been elected Chairman Ottawa Public School Board.

G. M. Kinghorn, who had been Secretary Montreal Transportation Co. since its formation, died at Montreal, Jan. 25, aged 81.

W. Gormaly, who retired from the Superintendency of Toronto Union Station, Feb. 1, is seriously ill and confined to his house.

C. H. Hines, electrical engineer C.P.R. during the construction of the Angus shops, at Montreal, died in South America recently.

T. C. Burpee, engineer of Maintenance of Way I.C.R., Moncton, N.B., was presented with a china cabinet by his office staff, Dec. 25.

A. R. Trites, railway contractor, Salisbury, N.B., has purchased the residence of the late Oliver Jones, Moncton, N.B., at a cost of $13,000.

H. H. Adams, Superintendent Michigan Central Rd., St. Thomas, Ont., was married at Detroit, Mich., recently, to Miss J. G. Kingsberry.

J. E. Quick, General Baggage Agent G.T.R., sent his friends a unique New Year's card, an imitation of a baggage check, loaded with good wishes.

The proposed presentation to Lord Strathcona by Canadians in London, Eng., will take the form of a portrait of himself painted by J. C. Forbes.

J. G. Scott, General Manager Quebec and Lake St. John Ry., Quebec, has been elected a Vice-President of the Lake St. John Colonization Society.

E. N. Bender, General Purchasing Agent C.P.R., returned to his office in Montreal, Jan. 26, much improved in health, after a trip to the south.

W. C. Hunter, Manager New Brunswick Coal and Ry. Co., Norton, N.B., was presented with a gold watch by the employes for the New Year.

Mrs. E. Reynolds, who died at Quebec, Jan. 9, aged 82, was mother of E. Reynolds, Superintendent Quebec section Eastern Division, C.P.R.

Lady Shaughnessy, wife of the President of the C.P.R., and Miss Shaughnessy, will leave Montreal early in February for Sicily and other Mediterranean points.

Denis Murphy, one of the Commissioners for the Temiskaming and Northern Ontario Ry., has been re-elected President of the Ottawa Board of Trade.

H. Carry, C.E., now of Vancouver, B.C., and his bride, formerly Mrs. Jas. Reid, are spending some months on the European continent visiting Italy and Egypt.

H. Disher, train despatcher Toronto, Hamilton and Buffalo Ry., Hamilton, Ont., got his foot crushed between an incoming train and the platform recently.

E. F. Fauquier, railway contractor, Ottawa, was married there, Dec. 27, to Miss E. W. White, daughter of the Comptroller North-West Mounted Police.

W. B. Russel, formerly Chief Engineer Temiskaming and Northern Ontario Ry., is a provisional director of the Intensified Light and Super-Soda Co., Toronto.

Senator Domville, C. N. Armstrong, of Montreal, and A. N. Shepler, of New York, left for England early in Jan., in the interest of the Central Ry. of Canada.

D'Arcy Tate, Montreal, Assistant Solicitor G.T. Pacific Ry., Montreal, has been appointed a commissioner for taking affidavits in Quebec, for use in Ontario.

J. E. McMullen, who has been appointed to take charge of the C.P.R. legal department at Vancouver, B.C., was married at Toronto recently to Miss N. G. Temple.

W. E. Dowle, heretofore Division Freight Agent, Delaware, Lackawanna and Western Rd., at Buffalo, N.Y., has been appointed Assistant General Freight Agent.

A reference to Archer Baker in our Nov. issue described him by his old title of European Traffic Manager, C.P.R., instead of his present one of European Manager.

C. Wurtele has resigned his position as General Eastern Canadian Agent Great Northern Ry. (U.S.) to take the management of Cawthra Mulock's estate at Toronto.

Miss Jessie Harper, daughter of W. H. Harper, C.P.R. ticket agent Chatham, Ont., was married Jan. 16, to F. B. Lyle, Manager Royal Bank of Canada, New Westminster, B.C.

H. G. McMicken, European Traffic Agent, Great Northern Ry., U.S.A., sent from London to his Canadian friends an original Christmas and New Year's card with accompanying verses:

D. D. Mann, Vice-President Canadian Northern Ry., Toronto, has purchased the Glenburne Lodge and other adjoining property on the Medway River, near Liverpool, N.S.

E. Parker was presented with a gold watch, chain and locket by the employes of the G.T.R., Point St. Charles, Que., on giving up his position as locomotive foreman there recently.

The Quebec City Council, Jan. 9, accepted the resignation of S. N. Parent, Chairman National Transcontinental Ry. Commission, as Mayor of the city, which office he has filled for some years.

A. M. Nanton, of Osler, Hammond and Nanton, Winnipeg, and Managing Director of the Alberta Ry. and Irrigation Co., has gone to England with Mrs. Nanton, expecting to return early in April.

W. Fraser, formerly chief clerk G.T.R. Roadmaster's office, Ottawa, was presented with a purse of gold by the employes of the division on leaving recently to take up his residence in Goderich, Ont.

J. Strathern, civil engineer and land surveyor, who entered the G.T.R. service in the latter capacity in 1868, and subsequently was for many years baggage master at Island Pond, Vt., died there Dec. 28.

The engagement has been announced of H. Osler, Winnipeg, son of E. B. Osler, M.P., director C.P.R., and Miss K. Harty, only

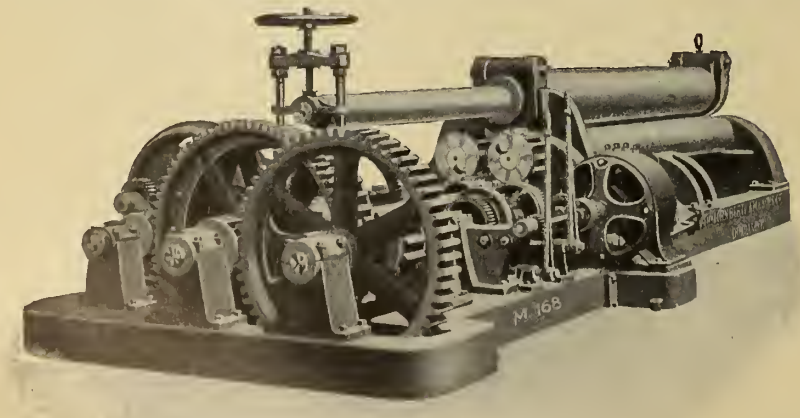
BERTRAM PLATE-BENDING ROLLS



MOTOR DRIVEN

These machines are built in four sizes for plates from 12 feet wide, 1¼ inches thick, to 16 feet wide and 1 inch thick. The rolls are arranged in pyramid form and driven by a motor with reversing mechanism. The top roll is raised and lowered by an independent motor. The rolls and hoisting mechanism are steel throughout, and the machine has strength and power to bend plate full width between the housings to a complete circle in from one to three passes.

FULL PARTICULARS AND PHOTOGRAPHS OF BERTRAM'S LINE OF MACHINE TOOLS MAY BE HAD FROM

The John Bertram & Sons Co., Limited, Dundas, Ontario, Can.

daughter of W. Harty, President Canadian Locomotive Co., Kingston, Ont.

H. Foster Chaffee, Western Passenger Agent, Richelieu and Ontario Navigation Co., left Toronto Jan. 19 on a business trip to California and other Pacific Coast points, expecting to return early in Feb.

Lord Strathcona, High Commissioner for Canada in Great Britain, and Governor of the Hudson's Bay Co., has returned to London, Eng., after a short visit to Canada. This made his 150th trans-Atlantic voyage.

The rehearing of the Hopper-Dunsmuir will suit at Victoria, B.C., has resulted in a verdict upholding the will of the late Alex. Dunsmuir, put forward by Jas. Dunsmuir, ex-President Esquimalt and Nanaimo Ry.

Jas. G. MacDonald, railway contractor, died at his home, Cloverdale, near Moncton, N.B., recently, aged 64. During the last three or four years he was engaged in partnership with David Clark, on the Halifax and South-Western Ry.

J. H. Walsh, General Manager, Quebec Central Ry., has been presented with a gold-headed cane and an address by the Sherbrooke Council, Knights of Columbus, Sherbrooke, Que., on being elected Grand Knight for the fourth year in succession.

W. D. Matthews, director C.P.R., and President St. Lawrence and Chicago Steam Navigation Co., Toronto, will be absent for several months cruising in the Mediterranean, in company with Jas. Ross, Montreal, and party, on Mr. Ross' yacht Sheelah.

The Cleveland, Cincinnati, Chicago, and St. Louis Ry. office in Buffalo, N.Y., has been closed and C. S. Blackman, heretofore General Eastern Passenger Agent, has been appointed Travelling Passenger Agent Lake Shore and Michigan Southern Ry., with headquarters at Buffalo.

W. B. Dawson, D.Sc., who is in charge of the Tidal and Current Survey branch of the Department of Marine, contributed a paper on Tide Levels and Datum Planes on the Pacific Coast of Canada, at the annual meeting of the Canadian Society of Engineers, held in Toronto, Jan. 30.

McIntosh Bros., railway contractors, Milwaukee, Wis., the members of which firm are natives of Cornwall tp., Stormont county, Ont., have been awarded the contract to build 1,500 miles of railway for the Chicago, Milwaukee and St. Paul Ry., from Evarts, S.D., to Seattle, Wash.

C. W. Spencer, who recently resigned his offices as Vice-President and General Manager Kingston and Pembroke Ry., to become Manager Mackenzie, Mann & Co.'s Eastern Lines, was presented with a vase and cut glass punch bowl with silver ladle, by the officers and employes at Kingston, Ont., Jan. 25.

F. Shaw, a G.T.R. conductor on the Montreal-Brockville run, and at one time Chairman of the General Grievance Committee of the Order of Railway Conductors, and the Brotherhood of Railway Trainmen, died at Montreal, Jan. 24. During the construction of the St. Clair tunnel he was one of the superintendents of construction.

Mrs. Thos. Tait, wife of the Chairman of the Victorian, Australia, State Railway Commissioners, expects to leave Melbourne in April with her daughter and to spend some time with her parents, G. R. R. and Mrs. Cockburn, in Toronto, after which she will go to Europe. Mr. Tait may pay a visit to Canada towards the end of this year or early in 1907.

C. E. Benjamin, who has been appointed General Agent for the C.P.R. Atlantic steamships at Chicago, Ill., has been connected with the company's service for many years. He was in the office of J. F. Lee, when the latter represented the C.P.R. at Chicago, and latterly has been Travelling Passenger Agent at St. Louis, Mo. He is President for the current year of the Travelling Passenger Agents' Association of America.

Capt. P. M. Campbell, of the str. City of Windsor, Collingwood, Ont., has entered action against S. H. Lindsay, administrator of the estate of the late C. Cameron, of Collingwood; T. Long and J. M. Hopkins, executors of the late J. J. Long, and T. Long as the sole surviving partner of T. Long & Bro., for an account of monies received by any of them on plaintiff's behalf, and the investment thereof and for payment of monies to which he may be entitled.

J. A. Goodearle, who has been appointed General Manager, Turbine Steamship Co.,

THE LATE C. F. GILDERSLEEVE, OF KINGSTON.

Hamilton, Ont., was born Kingston, Ont., July 4, 1867, and entered transportation service 1883, his record being: 1883 to 1889, junior clerk, rising to acting cashier and accountant, G.T.R. Freight Department, Kingston; 1889 to Dec. 31, 1905, agent for Thousand Island and St. Lawrence Steamboat Co., and City Passenger and Ticket Agent, New York Central and Hudson River Rd., Kingston, Ont.

E. O. Grundy, who has been appointed General Freight and Passenger Agent, Quebec Central Ry., is a son of the Vice-President of the line, was born at Swansea, Glamorganshire, Wales, May 10, 1872, and entered railway service in 1887, his record being:—Mar., 1887 to 1891, clerk in office of Traffic Manager, Taff Vale Ry., Cardiff, Wales; 1891 to 1892, in General Manager's office, same railway; June, 1892, to Nov., 1895, in accounting department Quebec Central Ry., Sherbrooke, Que.; Nov., 1895, to Dec. 31, 1905, chief clerk to General Freight and Passenger Agent, same line.

T. R. Merritt, President Imperial Bank of Canada, died at his residence, St. Catharines, Ont., Jan. 11, aged 82. He was the fourth son of the late Hon. W. H. Merritt, builder of the Welland Canal, and in early life was engaged in the milling and shipping business, having a number of vessels trading on the Upper Lakes, as well as on Lake Ontario, to the Maritime Provinces and the West Indies. One of the lines of boats he operated was from St. Catharines to Brantford via the Welland Canal and Grand River. He was subsequently interested in the Welland Ry., and was General Manager from 1860 to 1884, prior to its becoming part of the G.T.R.

The funeral of Hon. R. Prefontaine, Minister of Marine, who died suddenly in Paris, France, Dec. 24, took place at Montreal. A funeral service was held in the Madeleine, Paris, the body being afterwards conveyed to Cherbourg, where the British battleship Dominion was in waiting to carry it to Canada. The Dominion sailed Jan. 12, and reached Halifax, N.S., Jan. 22. The coffin was conveyed ashore with naval and military honors, and placed in a special train, upon which members of the Government and a number of public and private mourners were taken to Montreal, where the funeral ceremonies were concluded, Jan. 25.

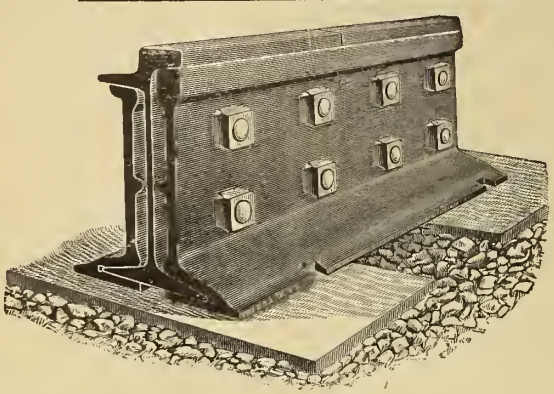
W. G. Annable, who has recently been appointed General Baggage Agent, C.P.R., was born at Ottawa, Mar. 3, 1875, and entered railway service 1891, since which his record has been:—1891 to Jan., 1901, starting as junior clerk and rising to chief clerk, C.P.R., city passenger office, Ottawa; Jan., 1901, to Nov., 1905, in General Passenger Department, Montreal, having charge of the steamship reservations on the Pacific for through passengers from Europe, as well as those on the continent, also on the Atlantic for through passengers from the Orient; also, the Chinese business in detail for the company, the recording of such passengers through Canada in bond to other countries.

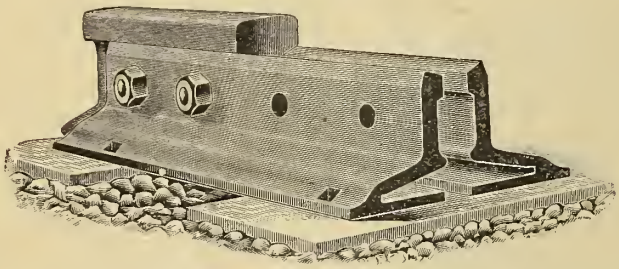
T. C. Burgess, commercial agent, G.T.R., at Minneapolis, Minn., who has recently been also appointed agent Canada Atlantic Transit Co., was born in New York city, Oct. 2, 1853, and entered transportation service 1871, his record being:—Dec., 1871, to Aug., 1872, clerk, G.T.R., Portland, Me.; Aug., 1872, to Oct., 1874, clerk, same road, Mechanics Falls, Me.; Oct., 1874, to June, 1882, clerk and agent, same road, Danville Jct., Me.; June, 1882, to April, 1883, agent Great Eastern Line, Portland, Me.; April, 1883, to May, 1892, agent Great Eastern Line, Minneapolis, Minn.; May, 1892, to date, commercial agent Chicago and Grand Trunk Ry., subsequently G.T.R. system, Minneapolis, Minn.

P. E. Thian, who has been appointed Chief Engineer Brandon, Saskatchewan and Hudson's Bay Ry., is a native of the U.S., born in 1862, and graduating from Georgetown University 1881, beginning his railroad service the same year on the Denver and Rio Grande Rd. From 1882 to 1886 he was engaged on C.P.R. construction work, returning in the latter year to the U.S., where he remained in railway service until 1894. After acting as City Engineer at Everett, Wash., until 1895, he went in for mining work, became associated with the U.S. Geological Service, returning to railway work in 1899 in the U.S. In 1901 he was engaged on location surveys for the Algoma Central and Hudson Bay Ry., and after some time in Mexico he joined the engineering staff of the Great Northern Ry. (U.S.), in 1904.

L. H. Wheaton, who has been appointed Chief Engineer Halifax and Southwestern Ry., Bridgewater, N.S., was born at Sackville,

Railroad Essentials.





The day has passed when men of finance are willing to place their money into bad material in railroad construction only to be compelled to replace it by renewals or reconstruction after very little use. Many of the best and most successful steam and electric railroads use the rail joints of the Continuous patent type for standard track work, insulated joints, step joints, and electric bonding joints for the reason that experience has proven it to be the best appliance of its kind ever put upon the market, as evidenced by the fact that it is used in all parts of the world on over 20,000 miles of track.

N.B., Oct. 5, 1868, and entered transportation service in 1885, his record being:—1885 to June, 1890, successively chainman, rodman, instrument man, resident engineer, and Division Engineer, on maintenance work, Intercolonial Ry., and on location and construction of branch lines for the I.C.R., as well as being on survey work for some private companies; June, 1890, to Nov., 1890, Chief Engineer in charge of construction Phillips and Rangeley Ry., a subsidiary of the Boston and Maine Rd.; Nov., 1890, Superintendent as well as Chief Engineer, remaining in charge of operation and maintenance until Aug., 1892; Nov., 1893, to June, 1897, Chief Engineer in charge of construction Coast Ry. of Nova Scotia, (now Yarmouth Division) Halifax and South-western Ry.; June, 1897, to June, 1901, General Superintendent and Chief Engineer, same railroad, in charge of operation, maintenance and new construction; Jan., 1901, to Aug., 1901, engaged in special engineering work for the Nova Scotia Government, reporting on proposed and existing railways; Aug., 1901, to Nov. 18, 1906, successively locating engineer, and Division Engineer of Construction, Halifax and South-western Ry.

C. F. Gildersleeve, formerly President of the Dominion Marine Association, and for a number of years General Manager Richelieu and Ontario Navigation Co., died at Kingston, Ont., Jan. 18, aged 73. He was a son of Henry Gildersleeve, who went to Kingston in 1816 to assist in building the Frontenac, the first steamboat launched on Lake Ontario. He was educated at Upper Canada College, and was called to the bar 1859. In 1864 on the death of an elder brother he left the legal profession to take the management of the steamboat business established by his father in 1817. In 1893 the Lake Ontario and Bay of Quinte Steamboat Co. was formed to take over the Gildersleeve steamers trading on the lake, and he was appointed first manager. In the following year he was appointed General Manager Richelieu and Ontario Navigation Co., and initiated a policy of development resulting in the construction of the large steamers Kingston, Toronto and Montreal. He retired from this position in 1904, returning to Kingston, where he devoted his time to the interests of the Lake Ontario and Bay of Quinte Steamboat Co., of which he was President, and he also became General Manager, succeeding his son, H. H. Gildersleeve, on the latter's appointment as General Manager Northern Navigation Co. of Ontario. He was the principal founder of and first President of the Dominion Marine Association, and was also active in the promotion of the Kingston and Pembroke Ry., and was for some years its President. In public affairs he served as alderman for Kingston for 22 years, and as Mayor in 1879; but was defeated in 1883 in a contest to represent the city in the Ontario Legislature. A resolution of sympathy with the family upon the death of Mr. Gildersleeve was passed by the Niagara Frontier Rate Committee, which was in session at Toronto, Jan. 18.

Wm. Tyndale Jennings, whose portrait appears on the first page of this issue, was born in Toronto, May 19, 1846. He was educated at the Model Grammar School and Upper Canada College, commencing his professional career in 1869 in the Department of Public Works in the then newly formed Province of Ontario. He entered railway service in 1870, and served for five years on reconnaissance surveys, location and construction, and as Resident Engineer, Great Western Ry., during which time he made a survey of the Detroit River from Lake St. Clair to below Sandwich to determine a site for a bridge. In 1875 he was appointed engineer in charge of surveys for the C.P.R. line in B.C., under Sir Sandford Fleming, locating the line through the canyons from Boston Bar to Harrison River, and a portion of the line along Kamloops Lake. In 1879 he was appointed District Engineer in charge of construction of Section B., C.P.R., between Lake of the Woods and Eagle River, Ont. On the completion of this work he was appointed Superintending Engineer in B.C., under C. Schrieber, Chief Engineer; he subsequently became Chief Engineer for the Onderdonk Construction Co., by which a large mileage of the C.P.R. in B.C. was constructed; and Consulting Engineer for the C.P.R. over the section from the coast to the summit of the Gold Ranges, about 350 miles. On the completion of these undertakings he was engineer C.P.R., successively at London and Toronto, and while in that position reconnoitred for and located a number of branch lines, of which the Ontario and Quebec Ry. extension from Woodstock to Detroit, and the Wingham branch, were completed, as well as the Toronto Harbor front improvement, the Esplanade and Don branch. He also made surveys for the Toronto and Sudbury branch. During 1890 and 1891 he was City Engineer of Toronto, during which years the King Street subway was constructed, and the specifications for the present contract with the Toronto Ry. were prepared. Previous to resigning the position of engineer he had declined the Council's offer to take over the managership of the street railway as a municipal concern. Since 1891 he has practised as a consulting engineer in Toronto, and in that capacity located and constructed the Niagara Falls Park and River Ry., from Chippewa to Queenston, Ont., including the first electro-hydraulic power plant constructed on the Canadian side of the Niagara River. He has also acted as Chief Engineer British Columbia Southern Ry., a section of which has been constructed by the C.P.R.; as engineer appointed by the Committee of Privileges and Elections of the House of Commons to look into and report on the letting of the contracts and other works about the Louise docks and basin, Quebec; the dry docks at Levis, Quebec and Esquimalt; in charge of surveys for Dominion Government to report upon the practicability of the construction of a railway to the Yukon Territory from the sea, via the Stikeen River and Telegraph Creek; and latterly he has been acting for the Toronto and Niagara Power Co., and the more or less closely associated enterprises the Toronto and Hamilton Ry., and the Niagara, St. Catharines and Toronto Ry. He was one of the originators of the Canadian Society of Civil Engineers, and has served five terms on the Council, four terms as Vice-President and was President in 1899. He is also a member of the Institute of Civil Engineers of Great Britain; of the American Society of Civil Engineers and of the Canadian Institute; and is Chairman of the Engineering Board of Examiners for Toronto University.

RAILWAY APPOINTMENTS.

Algoma Central and Hudson Bay Ry.—J. T. Terry, jr., has been appointed Secretary and Treasurer.

Canadian Pacific Ry.—C. Kyle, heretofore Master Mechanic, North Bay, Ont., has been appointed Master Mechanic Eastern Division, succeeding J. B. Elliott, promoted. Office, Montreal.

A. C. Harshaw, heretofore conductor running between Toronto and Detroit, has been appointed Trainmaster in charge of construction on the Toronto-Sudbury branch, now under construction.

G. T. Fulton, heretofore general foreman Carleton Junction shops, has been appointed Master Mechanic, Lake Superior Division, North Bay, succeeding C. Kyle, promoted.

D. C. Macdonald has been appointed Soliciting Freight Agent, Winnipeg, succeeding E. J. Travers, resigned.

R. E. Larmour, heretofore Freight Claims Agent, Central Division, Winnipeg, has been appointed city freight agent there, succeeding H. J. Sullivan, resigned to enter Canadian Northern Ry. service.

F. G. H. Bowker has been appointed Superintendent of the Company's Western hotels, with headquarters at Field, B.C. He will have charge of all the company's hotels west of Winnipeg.

J. E. McMullen, heretofore Assistant Solicitor, at Montreal, has been appointed to take charge of the company's law department, which has just been organized for the Province of British Columbia at Vancouver.

C. E. Benjamin, heretofore Travelling Passenger Agent at St. Louis, Mo., has been appointed General Agent Passenger Department, Atlantic service. Office, 232 South Clark Street, Chicago, Ill.

Central Vermont Ry.—Stewart Wright, at one time in the G.T.R. service as locomotive foreman, is reported to have been appointed Locomotive Foreman, C.V. Ry.

Grand Trunk Ry.—J. A. Cheer, General Roadmaster, having been granted an extended leave of absence, T. H. Horner has been appointed Acting General Roadmaster. Office, Allandale, Ont.

W. Quilter has been appointed Locomotive Foreman at Allandale, Ont., succeeding H. A. Amy, resigned.

Great Northern Ry. (U.S.A.)—Northern Steamship Co.—The offices of W. M. Lowrie, General Eastern Passenger Agent, G.N.R., and General Passenger Agent, N.S. Co., have been removed from Buffalo, N.Y., to 379 Broadway, New York City.

H. E. Watkins, Travelling Passenger Agent, Buffalo, N.Y., has been appointed General Eastern Canadian Agent, succeeding C. Wurtele, resigned.

Halifax and Southwestern Ry.—G. P. MacLaren has been appointed Division Engineer, succeeding L. H. Wheaton, who was recently appointed Chief Engineer.

Intercolonial Ry.—G. Skeffington, Inspector of the I.C.R. Police, has been dismissed.

Michigan Central Railroad.—J. H. Snyder has been appointed Assistant General Superintendent, succeeding H. A. Worcester, promoted. Office, Detroit, Mich.

Muskoka Lakes Navigation and Hotel Co.—W. F. Wasley, heretofore Acting Manager and Treasurer, has been appointed Manager.

Niagara, St. Catharines and Toronto Ry.—J. Paul, heretofore General Freight Agent, has been appointed General Freight and Passenger Agent. Office, St. Catharines, Ont.

H. Davis, heretofore General Passenger Agent, has been appointed Auditor, Freight and Passenger Accounts.

Pere Marquette Rd.—J. L. Cramer, heretofore Assistant Comptroller of the Erie Rd.; the Cincinnati, Hamilton and Dayton Rd., and the Pere Marquette Rd., has been appointed comptroller of the C., H. and D. Rd., and the P.M. Rd.

A. Patriarche, heretofore Freight Traffic Manager, has been appointed General Traffic Manager.

Quebec Central Ry.—The circular issued announcing the appointment of J. H. Walsh as General Manager, in succession to F. Grundy, Vice-President and General Manager, and the appointment of E. O. Grundy, assistant to the General Freight and Passenger Agent, to succeed J. H. Walsh as G.F. and P.A., is signed by F. Grundy, Vice-President.

Union Station, Toronto.—J. J. Beck, heretofore G.T.R. agent at Black Rock, N.Y., has been appointed Superintendent Union Station, Toronto, vice W. Gormaly, resigned owing to ill-health.

White Pass and Yukon Route.—J. H. Rogers, heretofore General Agent at Dawson, Yukon, is reported to have been appointed Traffic Manager at Vancouver, B.C.

GRAND TRUNK RAILWAY SYSTEM

THE PIONEER RAILWAY OF CANADA

The Only Double Track Railway in the Dominion

Total mileage of System, 4,637 miles. Double track, 1,019 miles. THE LONGEST DOUBLE TRACK RAILWAY IN THE WORLD UNDER ONE MANAGEMENT.

FINEST ROADBED. MODERN AND LUXURIOUS TRAINS. COURTEOUS EMPLOYES. BEAUTIFUL SCENERY.

4 EXPRESS TRAINS each way between MONTREAL and TORONTO, week days

2 FAST LIMITED TRAINS each way between MONTREAL and TORONTO, daily

Through Express Trains between BOSTON (via Boston and Maine Railroad), MONTREAL, TORONTO and CHICAGO; also between NEW YORK, TORONTO and CHICAGO, via Lehigh Valley Railroad, Grand Trunk and Niagara Falls.

Dining, Cafe-parlor and Library Cars on day trains. Pullman Vestibuled Sleeping Cars on night trains.

ELECTRIC RAILWAYS.

Projects, Construction and Betterments.

Bonnet Falls Power Co.—Application is being made by A. Wright and others at the current session of the Manitoba Legislature for an act to incorporate a company with this title to develop and utilize power on the Winnipeg River, and to build a railway from Winnipeg to Winnipeg River, and northerly and easterly therefrom, together with telegraph, telephone and transmission lines. Mulock and Robarts, Winnipeg, are solicitors for the applicants.

Dawson to International Boundary.—Application will be made next session of the Dominion Parliament for an act incorporating a company with the title of the Twelve Mile Power Co., for the purpose of developing electric power on the Twelve Mile River, and in connection therewith to construct an electric tramway on the west side of the Yukon River, opposite Dawson, to the International boundary.

Fredericton, N.B.—Jas. Mitchell, contractor, West Newton, N.B., has been interviewing the Mayor and members of the city council of Fredericton, N.B., with a view of constructing a street railway there, and from Fredericton to Marysville. The construction of this latter line would be contingent upon the Provincial Government constructing the proposed new highway bridge across the river to suit an electric railway.

Guelph Radial Ry.—We are advised that the recent press report that it was proposed to extend the line to Puslinch Lake at an early date, is one of a class of rumors that is constantly floating about. The company has a charter to construct the line to Puslinch Lake, and in 1905 the Ontario Legislature passed an act extending the time within which it may be constructed. There have been several estimates prepared for the line and its equipment, and the company has recently asked the city council for a grant of $100 to be used in checking over the estimates already received. It is only contemplated to engage the services of the company's Manager and the City Engineer to go over the route, measure up the exact distances, and to consider which of the routes estimated for is the best. The existing street railway is owned by the city, as also is the charter for the Puslinch Lake extension. The question of the construction of the extension has not been decided by the company, and until it has, the matter will not be placed before the ratepayers. The extension talked of is between 11 and 12 miles in length, and the construction and equipment is estimated at from $150,000 to $160,000. (June, 1905, pg. 261.)

Kingston, Gananoque and Perth Ry.—Application will be made next session of the Ontario Legislature for an act extending the time for the commencement and completion of the proposed electric railway between Kingston and Lanark, via Gananoque and Perth; changing the name of the company from the Kingston, Gananoque and Perth Electric Ry., to the K.G. and P. Ry., and inserting the name of J. Kenny as a provisional director in place of the late J. B. McArthur. It is also proposed to ask power to use either steam or electricity, or both, as motive power. The company was originally incorporated in 1895, to run an electric railway from Kingston to Gananoque, Ont., and from Kingston to Perth; in 1903, the name of the company was changed and power given to extend the line from Perth to Lanark, and the following were named as provisional directors:—J. M. Campbell, C. E. Britton, E. L. Atkinson, W. J. Gibson, J. C. Judd, J. B. McArthur and C. J. Sewell.

Kingston, Portsmouth and Cataraqui Electric Ry.—Application will be made next session of the Ontario Legislature for an act confirming an agreement made between the Kingston City Council and the company, dated July 5, 1905; and another dated July 25, 1905, between the Portsmouth Village Council; also to authorize the rearrangement of the bonded and other indebtedness of the company, and of the issues of capital stock.

Levis County Ry.—Application will be made at the current session of the Quebec Legislature, on behalf of J. Forman and others, Montreal, the purchasers at a sheriff's sale of this railway, for an act authorizing them to acquire, hold and operate the line and to extend it in the counties of Levis, Dorchester, Bellechasse, and Beauce. (Jan., pg. 35).

Montreal and Southern Counties Ry.—A meeting of shareholders has been called to be held in Montreal, Feb. 5, for the purpose of electing directors, confirming by-laws, examination, ratification and adoption of proceedings made by a meeting of shareholders of the company, May 26, and Dec. 27. The company has a charter to construct an electric railway from Montreal and along the south shore of the St. Lawrence River.

Niagara, St. Catharines and Toronto Ry.—Application will be made next session of the Dominion Parliament for an act authorizing the construction of the following extensions: from Thorold to Port Colborne, thence easterly to Fort Erie, and thence north-westerly to Niagara Falls; from Niagara Falls to Niagara on-the-Lake; from either Niagara Falls, Thorold, or Welland to Brantford; from St. Catharines to Niagara-on-the-Lake. It is also proposed to ask for power to amalgamate with any company having similar powers, to enter into agreements with power companies; to increase its capital stock, and for other purposes. (Jan., pg. 35).

Niagara-Welland Power Co.—The Railway Commission has approved of plans for the construction of an electric railway through a number of townships in York, Peel, Wentworth, Waterloo, Brant, Perth and Middlesex counties, Ont., upon the right-of-way of a power line. The project is to construct a power line from Niagara Falls to London, with branches to a number of cities and towns in the counties named. The company has been negotiating with the councils of a number of the townships through which the proposed line will pass. The offices of the company are at St. Catharines, Ont., J. MacCunn being Chief Engineer, and the executive committee includes J. B. Sheehan, Counsellor-at-law, New York, and H. Symons, Toronto.

Ottawa Electric Ry.—Plans have been deposited with the Minister of Public Works and the Registrar of Deeds for Carleton County, Ont., showing the site, etc., of an extension of the company's pier at Britannia-on-the-Bay, Ottawa River. The company will apply within one month from Jan. 20, for the Government's approval of the same.

Peterboro' Radial Ry.—Application will be made next session of the Ontario Legislature for an act extending the time for the authorized extensions of the line, and giving power to construct an additional extension from Cedar Lake to Stony Lake, Peterborough county, Ont. (Sept., 1905, pg. 427).

Port Arthur Electric Ry.—The town council has decided to make the necessary application to the Ontario Legislature for authority to construct a belt line through the residential portions of Port Arthur. The town owns the electric railway between Port Arthur and Fort William.

Port Credit, Brampton and Guelph Electric Ry.—Application will be made next session of the Ontario Legislature for the passing of an act to form a company with this title for the purpose of constructing an electric railway from Port Credit to Guelph, Ont., passing through Brampton, Huttonville, Georgetown, Acton, Norval and Glenwilliams, and branch lines. It is also proposed to ask for power to construct telegraph and telegraph lines. B. F. Justin is solicitor for the applicants.

South-Western Traction Co.—Trial trips are being made on the line from London to Lambeth, Ont., and it is expected to have the line running to Port Stanley by May 24. When this line has been completed it is proposed to begin work on a line from London to Ingersoll. (Jan., pg. 37.)

St. John, N.B.—We are advised that the project for another electric railway, in which W. Bruckhoff and A. H. Hannington were interested, has been abandoned. (Jan., pg. 37).

Summerside, P.E.I.—We have received information from Prince Edward Island in respect to the reported projected electric railway in Summerside and vicinity, that while there has been some talk about the matter it is not considered likely that there will be anything done in the near future. The names of the persons who are behind the project cannot be ascertained. (Jan., pg. 37).

Toronto and Hamilton Ry.—There have been some negotiations, we are advised, between the T. and H. Ry. officers and the G.T.R. officers, in reference to the use by the former of the latter's right of way across Burlington Beach, but such are not yet completed. The recent press reports that the T. and H. Ry. will begin its construction at once, and that the G.T.R. line across the beach would at once be double tracked in consequence of the agreement are therefore incorrect.

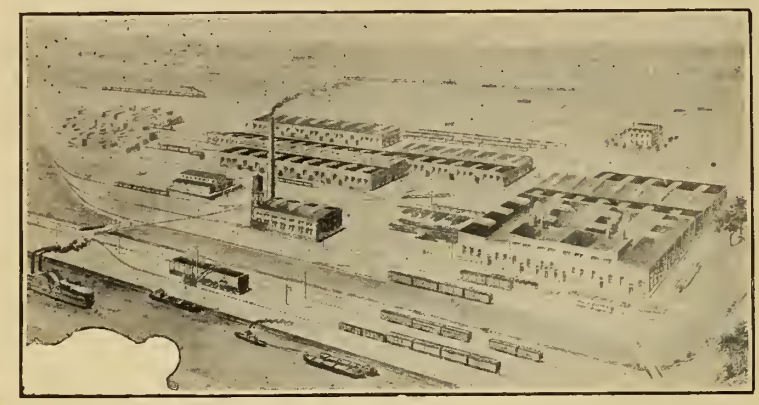
Toronto and York Radial Ry.—Application will be made next session of the Ontario Legislature for an act authorizing the company to construct and operate the railways, extensions and branches which the Toronto and Scarboro Electric Ry., Light and Power Co., the Toronto and Mimico Electric Ry. and Light Co., and the Metropolitan Ry. are empowered under their several acts to construct. It will also ask for authority to construct branches or extensions to the James Bay Ry., and to Stouffville, Whitby, Bowmanville and Cobourg; for a definition of the clauses of the Railway Act which apply to the company's lines; defining its bonding powers, its rights to hold land for market and park purposes; extending the time for the construction of the various lines, and ratifying agreements between the company and the municipalities of Scarboro, Pickering, Whitby (town and township), and Etobicoke. (Jan., pg. 37).

Western Central Ry.—Application will be made next session of the Ontario Legislature for an act authorizing an extension of the proposed line from Guelph, through the counties of Wellington, Halton, Peel, and York to Toronto, with branches within these counties and the town of Waterloo; to increase its bonding powers and for other purposes. Under the existing charter the company has power to construct a line from London to Berlin, and branch lines in Middlesex, Perth and Wellington counties, the provisional directors being A. T. Drummond, H. M. Mowat, J. I. Davidson, Toronto; A. E. Welch, London, Ont.; W. D. Harris, Ottawa, and A. Hickling, London, Eng.

Winnipeg, Selkirk and Lake Winnipeg Ry.—Application will be made at the current session of the Manitoba Legislature for an act amending the incorporation of the company and authorizing it to acquire by agreement the right to operate its line of railway in and upon the streets of Winnipeg, together with the necessary rights and privileges incidental thereto.

Canada Car Company

MONTREAL, QUE. LIMITED



Railway Freight and Passenger cars, both wood and steel, of all descriptions and styles; street cars, car wheels, castings, forgings, and all equipment necessary for car construction.

Capacity—7500 freight cars, 150 passenger coaches per year.

ORDERS SOLICITED

ATTENTION, MASTER CAR BUILDERS!

The M. C. B. rules of interchange provide for the use of THE STEEL BACK BRAKE SHOE on your freight equipment.

The use of OUR STEEL BACK SHOE will mean a saving in brake shoe maintenance, brake heads and brake beams.

THE STEEL BACK BRAKE SHOE is an economy on all railway equipment.

Subscription Agents Wanted.

We want an agent at each railway and shipping centre in the Dominion to secure new subscriptions to THE RAILWAY AND MARINE WORLD, for which we will pay liberal commissions.

The work is easy, the paper recommending itself, and is specially adapted for clerks in transportation offices. It can be done at odd times without interfering with other duties.

For terms and other particulars, address
THE RAILWAY AND MARINE WORLD,
Toronto

NOTICE

The Kingston and Pembroke Railway Company will apply to the Parliament of Canada at its next session for an act extending the time within which it may construct the branch line of railway from Sharbot Lake to Carleton Place, which it has been authorized to construct, and for other purposes.

(Sgd.) JOHN WHITEBREAD,
Secretary.

Dated, November 30th, 1905.

PROFESSIONAL CARDS.

THE RAILWAY AND MARINE WORLD is especially adapted for the publication of professional cards of engineers, inspectors, analysts, electrical experts, naval, grain elevator and other architects, solicitors, etc., who desire to bring themselves under the notice of the managements and officials of the various steam and electric railway, steamship, grain elevator, telegraph, telephone and power companies throughout Canada, as well as the locomotive, car and ship builders, contractors and promoters of railway enterprises. THE RAILWAY AND MARINE WORLD is the only one medium through which all these important classes can be reached.

Rates will be quoted on application.

Electric Railway Notes.

The London Street Ry. expects to have the six new cars ordered delivered by Mar. 31.

A by-law was passed at Fort William, Ont., Jan. 1, providing for the operation of electric cars within the town on Sundays.

M. Power, Superintendent of the Toronto Ry.'s car building shops, has been re-elected a member of the Separate School Board for Toronto.

The Winnipeg Electric Ry. has submitted plans for new poles which it proposes to erect on Broadway, in place of the present wooden poles.

The Halifax Tramway Co. has added two new cars, an electric sweeper and an electric leveller to its rolling stock and equipment. The cars were built by Rhodes, Curry & Co., Amherst, N.S.

A Hamilton, Ont., paper recently stated that it was expected to have the Toronto and Mimico line of the Toronto and York Radial Ry. connected with the Hamilton Radial Ry at Oakville early in the summer; that the through fare would be a cent a mile, and that the trip between Toronto and Hamilton would be made in about 90 minutes.

E. F Seixas, General Manager Niagara, St. Catharines and Toronto Ry., sailed from New York Jan. 13 on the S.S. Minnehaha, for London, Eng., intending to return before the end of February. His eyes have been troubling him lately, and it is hoped that a rest and change will do them good. His duties are being performed temporarily by the company's accountant, J. C. McIntosh.

Electric Ry. Finance, Meetings, Etc.

Brantford Street Ry.—Following are the officers and directors of the re-organized company:—President and Treasurer, A. J. Pattison; Vice-President, J. Firstbrook; other directors: Rev. E. T. Fox, W. S. Dinnick and J. S. King, all of Toronto. The property acquired comprises the line and franchise in the city of Brantford, the cars, power house and plant, and the lien of the Mohawk Park. The lines, according to the returns for 1904, were seven miles in length, and the company then owned its power house, 12 motor cars, four box cars, two platform cars and a snow sweeper. The capital stock subscribed is $200,000, and there is a bonded indebtedness of $125,000 at 5%, maturing in 1932. The report to the Department of Railways and Canals for 1904 showed a total paid up capital of $145,000, of which $125,000 was realized from bonds, and that there was a floating indebtedness of $10,813.88. The gross earnings were $18,158.63, and the year's operations showed a deficiency of $3,441.96. The income for 1905, we have been informed, shows a considerable increase, and the floating indebtedness has been reduced. See also Grand Valley Ry. and Woodstock, Thames Valley and Ingersoll Electric Ry.

British Columbia Electric Ry.—Gross earnings for Nov. $97,165, against $82,625 for Nov., 1904. Working expenses $54,378; renewal funds $8,500; approximate earnings from investments $7,967; net income $42,254 against $43,539 working expenses; $6,695 renewal funds; $2,750 approximate earnings from investments; and $34,541 net income for Nov., 1904. Aggregate gross earnings for five months ended Nov. 30, $491,101 against $374,474 for same period 1904.

Grand Valley Ry.—Following are the officers and directors of the company as reorganized: President and Treasurer, A. J. Pattison; Vice-President, W. S. Dinnick; other directors: J. Firstbrook, Rev. E. T. Fox, J. S. King, of Toronto, and J. R. Stratton, Peterborough, Ont. The line extends from Brantford via Paris to Galt, into which place an entry was secured in Oct. last with a spur to Blue Lake, in the direction of St. George, a total of 22 miles. Of this, six miles to Paris were operated during the year ended June 30, 1904, the mileage to within half a mile of Galt during the greater part of 1905, and the whole line into Galt during the latter portion of the year. The paid-up capital is $700,000, and bonds to the amount of $20,000 a mile were authorized, the total amount issued up to June 30, 1904, being reported to the Dominion Government at $340,000. The company operates under a Dominion charter and can carry freight. With the increased mileage the revenues have increased. Upon the working of the six miles to Paris for the year ended June 30, 1904, the returns made show net earnings of $5,405.76. The company hired power from the Brantford Street Ry. during 1903-04, but subsequently constructed a power station of its own. See also Brantford Street Ry., and Woodstock, Thames Valley and Ingersoll Electric Ry.

Halifax Electric Tramway.—Railway receipts for Dec. $12,642.40 against $12,163.24 for Dec., 1904.

Hamilton, Grimsby and Beamsville Electric Ry.—The financial statement presented at the annual meeting of the shareholders held in Hamilton, Jan. 22, showed earnings amounting to $78,337.51 as compared with $67,725.94 in 1904, an increase of $10,611.57. There was a decrease of $1,108.07 in the operating expenses, making a net increase in profits of $11,719.64. The profits for 1904 were $3,828.37. It was decided to add both years' profits to the profit and loss account, bringing that account up to $39,312.12. The control of the line has been acquired during the year by the Hamilton Cataract Power, Light and Traction Co., and the minority shareholders offered a good deal of criticism upon the mixing up of the transactions of the two concerns in any way, objections being particularly made to the loan of the rails taken up from the Vineland extension to the Hamilton Radial Ry. in connection with its Bartonville extension, and the agreement to grant the Cataract Light, Power and Traction Co. the use of the company's poles for its power line at one-third the cost of maintenance A few years ago the Cataract company offered to pay the entire cost of maintenance of the poles and $1,600 every five years for the same privilege. Following are the officers and directors for the current year: President, J. W. Nesbitt, K.C.; Vice-President, J. Dickenson; Treasurer, J. R. Moodie; other directors: W. C. Hawkins, J. W. Sutherland, J. G. Gauld; Secretary and Manager, G. Waller.

Levis County Ry.—The Quebec Legislature is being asked at its current session on behalf of J. Forman and others, who purchased the line at a Sheriff's sale, for an act authorizing them to hold and operate it. See also pg. 89.

London Street Ry.—Following are the officers and directors for the current year:—President, H. A. Everett, Cleveland, Ohio; Vice-President, T. H. Smallman, London, Ont other directors: P. W. D. Roderick, W. M. Spencer, London, Ont.; H. S. Holt, Montreal; E. W. Moore, C. W. Wason, Cleveland, Ohio; Secretary-Treasurer, G. H. Benston, London, Ont.; Manager, C. B. King, London, Ont. The report of the company's operations for the year has not been given out.

Montreal Park and Island Ry.—At the next session of the Dominion Parliament application will be made for an act authorizing the company to issue additional bonds, preferred stock and common stock, to authorize it to dispose of its railway and to apply the proceeds in payment or part payment of its bonds.

Montreal Street Ry.—Passenger earnings for Dec. $234,710.30; total earnings $236,945.59 against total earnings of $211,283.34 for Dec., 1904. Operating expenses $161,995.10; fixed charges $22,610.57; surplus $52,339.92 against $146,820.79 operating expenses; $18,474.62 fixed charges, and $45,987.93 surplus for Dec., 1904. Net earnings for three months ended Dec. 31, $262,065.54; surplus $196,318.18 against $235,807.69 net earnings and $179,515.17 surplus for same period, 1904.

Niagara, St. Catharines and Toronto Ry.—Gross earnings for 1905 $246,311.41 against $223,924.73 for 1904. Net surplus after paying interest and fixed charges $43,761.29 against $32,965.21 for 1904.

The Nelson Electric Tramway line is operated by the city council, under an agreement with the company. For the year ended Dec. 31, the receipts were $5,461.30, against $4,950.17 for 1904, and the expenses were estimated at $9,125. Of the loss the company is to pay 60% and the city council 40%. The tramway was operated for 42 weeks during the year.

Toronto Ry.—Car earnings for Dec., 1905, $241,489.22 against $213,662.31 fof Dec., 1904.

The company's assessment for 1906 has been increased by the Assessment Commissioner by $482,660.

Woodstock, Thames Valley and Ingersoll Electric Ry.—This line has been acquired by the same interests which control the Brantford Street Ry., and the Grand Valley Ry. The new organization has not been completed, but it is understood that the officers and directors will be practically the same. The line extends from Woodstock to Ingersoll, Ont., 11.50 miles. There is a power house and 7 motor cars. The company has issued $100,000 of common stock, $100,000 of preference stock, and a bonded indebtedness of about $125,000. The gross earnings for the year ended June 30, 1904, were $19,648.29, and the net earnings $9,659.40. We have been advised that the receipts for 1905 show a satisfactory increase and provide for interest on the bonded indebtedness. See also Brantford Street Ry. and Grand Valley Ry.

The Canadian Railway Club's annual dinner at the St. Lawrence Hall, Montreal, Jan. 25, was attended by over 160 members and guests. The President, S. King, Assistant Master Car Builder C.P.R., was in the chair. The toasts were as follows:—The King, proposed by the Chairman. The Railways, proposed by W. G. Ross, Managing Director, Montreal St. Ry., responded to by W. D. Robb, Superintendent Motive Power G.T.R., and H. H. Vaughan, Assistant to the Vice-President, C.P.R. Our Guests, proposed by W. E. Fowler, Master Car Builder C.P.R., responded to by Prof. Stansfield, of McGill University, and W. G. Ross. The Railway Supply Man, responded to by D. M. Brady, R. L. Thomas, and Mr. McGowan, of New York. Excellent vocal music and dialect recitations were interspersed with the speeches, and the dinner was undoubtedly the most successful in the Club's history.

The officials of the C.P.R. passenger department at Toronto sent out a well-designed card for the New Year to their friends. The photographs and autographs of the principal officials as well as some views of scenes on the company's line are given.

The Western Ontario Fish Co. has been incorporated under the Ontario Companies' Act, with a capital of $40,000, and offices at Kenora, Ont., to engage in the fishery business on the Lake of the Woods, and other waters. The company will own a number of fishing tugs. The provisional directors are: G. H. Draper, N. Highbee, and H. E. Hook, of Kenora.

THE PINTSCH LIGHT AWARDED THE GRAND PRIZE
ST. LOUIS, 1904

In the United States 170 railroads have equipped over 25,500 cars with Pintsch Light. In the World more than 135,000 cars, 6,000 locomotives and 1,800 buoys are using Pintsch Light, the test of experience having proven it the most economical, safe and reliable system for car lighting. Pintsch Gas Buoys adopted as standard by the United States Lighthouse Board. Highest awards taken at World's Expositions at Moscow, Vienna, St. Petersburg, London, Berlin, Paris, Chicago, Atlanta, Buffalo, and now St. Louis.

SAFETY HEATING SYSTEMS RECEIVED THE HIGHEST AWARD

Practical service for the past 18 years has demonstrated the reliability, efficiency and adaptability of the Safety Systems of Direct Steam and Hot Water Heating which are being applied in large quantities to railroad equipment. Straightport couplers. Automatic Steam Traps. 140 Railroads are using these devices, applied on 16,000 cars. Standard on Pullman cars.

NEWARK, N.J.

Proposed Grain Clearing House.

At the annual meeting of the Winnipeg Grain Exchange, Jan. 10, a report was presented from a committee which had met the representatives of the terminal elevator companies for the discussion of a proposal to establish a grain clearing house at Fort William and Port Arthur, Ont. The committee recommended the establishment of such a clearing house, which recommendation was endorsed by the meeting. The method proposed for working the clearing house was to have a good responsible manager with an efficient staff at Fort William, whose duty it would be to attend to all inward receipts and outward shipments, with power to order any one elevator to deliver complete cargo to a vessel, and by so doing avoid friction and loss of time in vessel moving from one house to another. In addition to the office in Fort William it was proposed that an office should also be maintained in Winnipeg with the duties of taking over all documents and receiving from the Fort William office all expense bills, weight certificates, etc., and attending to the proper and prompt distribution to the grain trade in Winnipeg. The vessel owners, the elevators and the shippers to contribute to the expense of operation. The vessel owners getting the greatest benefit, it was considered they would contribute the largest share ; the elevators getting the smallest benefit would contribute less than either the vessels or shippers. The cost estimated to shippers on cargoes was not exceeding 25c. per 1,000 bush., this to be reduced later should results permit, and the charge for expense bills with weight certificates to be 5c. per car. It was considered necessary that the trade should express itself ready to use this method of business, and then the vessel owners could be approached to have the matter concluded. The clearing house to take all responsibility for the prompt delivery to vessels in all cargoes and guarantee that all carload papers shall reach shippers or agents who have offices in Winnipeg in ample time to permit of delivery under Winnipeg market rules.

The question of the establishment of such a clearing house came up owing to what the vessel owners claim to be the very unfair treatment vessels have been getting in the way of loading at Fort William and Port Arthur, owing to the way the grain in the elevators was transferred backwards and forwards between different individuals. Sometimes a shipper purchases a shipment of grain which is to be found scattered over anywhere from three to seven elevators according as cars were distributed on arrival at the terminal port. It was found repeatedly that vessels were following one another around to all the elevators, with the net result to the elevators at the end of the day practically the same as if each vessel had put on her full cargo at a separate elevator. The matter was discussed on several occasions, G. T. Marks being largely responsible for keeping it before the persons interested. As to the question of contributing to the cost, the vessel owners do not fall in with the suggestion that they pay the largest share because they may be apparently going to receive the greatest benefit. They say that the reasoning might be all right if vessel owners were getting fair treatment at present. The establishment of a clearing house would, the vessel owners claim, only remove an injustice under which they are laboring at present. The expense of doing the work and sorting out the orders for the different elevators is borne entirely, as it should be, between the shippers and the elevators, as it is no part of the vessel owners' duty to provide for the prompt loading of a cargo. It is further suggested that the shippers have overlooked the fact that the vessel owners have a remedy in their own hands if the shippers and elevators do not get the clearing house in working order, as all they have to do is to make a higher rate when a vessel has to call at more than one elevator for her full cargo. This can easily be arranged, although the vessel owners so far have decided not to do so in the hope that a satisfactory clearing house arrangement can be entered into. Vessel owners are willing to contribute a fair fee towards a clearing house for acting as the vessel's agent if the clearing house did away with the necessity for an agent. They consider that the proposal to charge 25c. per 1,000 bush. looks as if the shippers and elevators proposed to divert a portion of their present expenses on to the vessels.

Grain Elevator Notes.

The International Elevator at Lang, Sask., which collapsed some time ago, has been rebuilt. The farmers formed a company and the Lang Farmers' Elevator is now running, with a capacity of 40,000 bush.

Contracts made for handling grain through the I.C.R. elevator at Halifax, N.S., to the end of 1905 were for over 250,000 bush., and it is expected that the total will be brought up to 1,000,000 bush. before the summer season of navigation opens.

The Hall Elevator and Grain Co.'s elevator at Vancouver, B.C., was expected to be ready for handling grain by the end of Jan. The elevator has a height of 110 ft. above the foundation piers, has 23 bins and a total capacity of 100,000 bush. It is intended to build a two-story warehouse adjoining the elevator.

J. L. Spink (Ltd.) is the title of a company registered under the Ontario Companies' Act, with a capital of $100,000 and offices in Toronto, to carry on a milling, elevating, grain and produce business, and for other purposes. The provisional directors are:—J. L., D. M., R. I., E. F. Spink, of Toronto; and W. B. Spink of Chicago, Ill.

The Montreal Harbor Commissioners are considering the advisability of building two new floating elevators for the purpose of more expeditiously handling the grain passing through the port. It is estimated that the proposed floating elevators will cost $80,000 each. At present the greater portion of this business is conducted by the Montreal Elevator Co.

The Quebec City Council's suit to recover taxes on the Great Northern Ry. grain elevator at Quebec, was heard at the Recorder's Court, Jan. 3, and judgment was reserved. The elevator has been taxed at an annual value of $12,000 a year, but the taxes have not been paid for several years. The G.N.R. contends that the elevator is of little value.

The Michigan-Saskatchewan Land Co. has been incorporated under the Dominion Companies' Act, with a capital of $100,000 and offices at Cupar, Sask., to operate warehouses and elevators, to carry on a real estate business, and to conduct a general merchandise business throughout Canada. The Provisional directors: E. C. Recor, St. Clair, Mich.; W. H. S. Taylor, F. T. Wolcott, Port Huron, Mich.; G. S. Holbert, Salt Lake City, Utah.; D. and A. Wark, Portage la Prairie, Man.; A. S. Burnham, Sarnia, Ont.

Reports from Winnipeg sum up the disposition of the crop of 1905 at Dec. 31 as follows:

	Bushels.
Inspected at Winnipeg	38,498,250
Interior elevators	14,452,000
C.P.R.	12,179,000
C.N.R.	2,273,635
Fort William	2,745,318
In transit C.P.R.	1,400,000
In transit C.N.R.	737,932

The report also states that 8,000,000 bush. were estimated for as being required for seed, and 7,000,000 as being required for flour.

Following are some dimensions of the cement elevator and steel tower erected at Strathcona, Alta., by the Brackman-Ker Milling Co. The elevator is 82 ft. to rim, and 88 ft. to peak and has a capacity of 100,000 bush. It is 40 ft. in diameter outside measure and 39 ft. inside as the walls are six inches thick. Three-quarter inch iron rods wind spirally round the centre of the wall for the first 40 ft., ½ in. iron rods in the same way for the next 30 ft. and then seven-sixteenths in. iron rods from 70 ft. to the top. These spiral iron rods are secured to upright ½ in. straight iron rods, 12 in. apart in the centre of the wall from base to summit. The latest improved rope-driven machinery is installed in a subterranean passage between the mill and elevator and is capable of discharging 2,000 bush. per hour into the mill. The tower is of steel, 6½ ft. square and 112 ft. high.

Quebec as a Summer Port.

In connection with a number of press rumors which have been in circulation recently we may state that the C.P.R. management is in considerable doubt as to the safety of the St. Lawrence channel between Quebec and Montreal for its new steamships the Empress of Britain and the Empress of Ireland, and there is a strong probability that it may be decided not to run them above Quebec, but to make that their summer port.

They are large vessels, being 569 ft. long with a breadth of 65.2 ft. and when loaded will be of deep draught. They will cost over $2,000,000 each, and the management, in view of many unsatisfactory features about the Quebec-Montreal channel and the defects in the pilotage system which have been clearly established, naturally hesitates to risk the new vessels.

Should Quebec be decided on as the C.P.R. summer port it is probable that a large landing stage, on the Liverpool plan, will be constructed in front of the Champlain Market, an ideal site, and that the C.P.R. tracks will be extended from the eastern portion of the city up to that point, where connection will be made with the Quebec Bridge and Ry. Co.'s line from the north end of the Quebec bridge, and by means of that connection with the National Transcontinental Ry. and Mackenzie, Mann & Co.'s eastern lines.

It is also said that the Allan Steamship Lines Co is considering the question of making Quebec the summer port for its largest passenger steamships.

The Grand Falls Power Co. has given notice under the act respecting certain works constructed in or over navigable waters, that it will apply for approval of the Government of plans for the construction of a dam in the St. John River at Grand Falls, N.B. Plans have been deposited with the Minister of Public Works and the Registrar of Deeds in Victoria County, N.B

The Dominion Government Hudson Bay patrol steamer Arctic has been refitted, and is expected to leave Quebec early in the season to resume her station. The steamer Neptune which is temporarily on the station will return to Halifax, N.S. The limits of the Arctic's cruising are Kennedy Channel to the north, the inlets and channels extending from Baffin's Bay and Davis Strait to the west and Greenland to the east.

The Governor of New York in his speech at the opening of the State Legislature Jan. 3, recommended that something be done in the way of preserving Niagara Falls by limiting the amount of water which may be taken from the river by the New York companies now engaged in developing power; by repealing all undeveloped charters, and by instituting legal proceedings for the forfeiture of the charter of any companies which may be guilty of any abuse of their franchises.

Northern Navigation Co.'s Report.

The report for 1905 was issued on Jan. 24, over the signature of H. C. Hammond, as follows:—

Navigation opened on Lake Superior Division on April 26, and on the Georgian Bay Division on April 29, over a week earlier than 1904, and prospects looked bright for a good season's business, but they were not altogether realized. The company did not get through the season without some mishaps, the most serious being the burning of the str. City of Collingwood at her dock in Collingwood on June 19. Being a total loss, the underwriters paid $80,000.00, the assured value in our books. The str. Britannic lying alongside the Collingwood was moved away and sustained only slight damage. Owing to the loss of the Collingwood, the str. Majestic had to be withdrawn from a proposed route between Cleveland, Toledo and Sault Ste. Marie, via the North Channels, and placed on the Mackinac route. This reduced the net earnings of the Georgian Bay Division. There was a strong opposition by all water lines on the Lake Superior Division, and on the Georgian Bay Division two new companies with two steamers each appeared in competition, apparently for amusement, resulting in our having to do considerable business at unprofitable rates.

As premised in last year's report, a large amount of money was expended in improvements and needed repairs to the steamers. The United Empire was rebuilt and many improvements added, and her name was changed to the Saronic and so recorded at Lloyds. Altogether $69,282.00 was spent on the steamers, of which over $51,000.00 was spent on the Saronic alone; her value has been written up in the books $30,000, and $20,000 has been written off other steamers. The difference, $10,000.00, with the $33,180.00 at credit of steamers reserve fund last year, and $26,102.60 charged to profit and loss account, provided the amount expended. Last year the steamers appeared in the balance sheet as $870,000.00, deducting the loss of the Collingwood $80,000, and adding $10,000 as above, shows value of $800,000 this year for eight steamers. The gross earnings of steamers show $455,217.74, and the expenditure $367,466.16, leaving net earnings of $87,751.58, which, with balance at credit of profit and loss, made $106,819.59. This account was charged with claims of 1903, $2,185.40; 1904, $4,407.64. Commission re City of Collingwood, $939.29, being composed of expense of collecting some of the policies and on account of moneys spent recovering safe and guarding wreck. $2,000.00 has been written off special account for linen, carriers, etc., reducing that account to $4,000.00 to be written off during the next two years. There was also charged balance of repair and maintenance account $26,120.60, leaving a free balance of $71.184.66, from which a dividend of 6 % for the year 1905 was declared, amounting to $50,400.00, leaving $20,784.66 carried forward.

Your directors felt justified in declaring a dividend at this rate, having agreed to a settlement of the suit mentioned in last annual report against the estate of the late J. J. Long. This suit was tried before Mr. Justice Street in December, and later he gave judgment in favor of this company for $34,500 and costs. Your solicitors advised us in writing that this judgment would surely be confirmed on appeal, and perhaps the amount would be increased, but looking at it from a business point of view your directors concluded that it would be well to settle, thus doing away with some opposition on the Georgian Bay, and re-establishing friendly relations with T. Long & Bro., Ltd., who are large shippers. They, therefore, accepted an offer of $21,500, payable Feb. 1, and the str. City of Windsor, valued at $9,000, to be delivered with her outfit free of encumbrance, each party paying their own costs. (This settlement does not show in the financial statement presented.)

Your directors are pleased that, not including the claims paid, the operating expenses compare well with the past three years, being for year 1903, 94.16 % of gross earnings against 1904, 89.71 %; 1905, 80.73 %. Our line expenses are $2,000 less than last year, but we must look for increased earnings to reduce the percentage of operating. With regard to the coming season we can only hope that with continued immigration to the west and expenditure in railway building, etc., we shall enjoy our share of prosperity and good earnings.

The annual meeting was held in Toronto Jan. 30, too late to be reported in this issue.

PURSERS WANTED

Several Pursers and Assistant Pursers for Steamers plying on Inland Lakes and Rivers. Men with knowledge of railway work preferred. Apply giving experience by letter to **Box 321, Railway and Marine World, Toronto.**

THE BAKER HOT WATER CAR HEATERS

TEN STYLES

RIVETED STEEL SHELL HEATER

Attention is especially called to our STEEL HEATERS, the JOINTLESS FIRE PROOF and the RIVETED, SINGLE and DOUBLE COILS. Made of ONE QUARTER INCH STEEL. The RIVETED HEATER was constructed to meet demand for a SMALLER and CHEAPER Heater than the Jointless.

The "PERFECTED" HEATER, Single and Double Coil.

The "MIGHTY MIDGET," 19 inches in diameter, has Expanding Coil, and will heat a 55 foot car. This Heater is especially adapted to ELECTRIC CARS.

MONTREAL ST. THOMAS HAMILTON

Atlantic and Pacific Ocean Marine.

The British barque Lass of Melford was driven ashore on the west coast of Vancouver Island, B.C., Dec. 28, and lost with all hands.

The Dominion Government has arranged to renew the mail subsidy to the C.P.R. steamers trading between Vancouver, B.C., and Yokohama, Japan.

The Quebec Transportation Co. in addition to its fortnightly service between Quebec and British ports is considering the desirability of developing a trade to Montreal.

The Allan Line str. Corinthian paid a fine of $500 at Halifax, N.S., Dec. 26, for allowing a Chinaman to land at St. John, N.B., who was not possessed of the necessary papers.

Sir Christopher Furness of the Furness-Withy Line, and Manager of the Manchester Liners, was the first member to be elected to the new British Parliament, being returned unopposed.

Capt. Abernethy of the Donaldson Line str. Tritonia was presented with an easy chair as a Christmas gift by a number of Fredericton, N.B., residents who crossed the Atlantic on the steamer during the summer.

Officials of the Donaldson Line in Glasgow, Scotland, state that nothing is known there of any proposed purchase of the company's steamers by the C.P.R. A Montreal despatch recently gave currency to such a report.

Sir D. Dixon, managing owner of the Lord line of steamers, has been elected Lord Mayor of Belfast, Ireland, for the seventh year since 1892. He has also been re-elected M.P. for the northern division of the city.

The Furness Line str. Florence reached Halifax, N.S., Jan. 4, after a stormy voyage, being 15 days from London, Eng. During the voyage fire broke out in number two hold, but was extinguished before any serious damage was done.

The Grand Trunk Pacific Ry. Co. officially announces that fleets of modern steamships will be established by the company for ocean navigation between the Atlantic port and Europe, and from the Pacific port to China and Japan.

The Elder-Dempster Co.'s str. Angola, engaged on the Canada-Mexican route, which grounded at the entrance to Havana Harbor, Cuba, early in Dec., has been abandoned by the owners to the underwriters. It is not expected that the salvage will be very great.

The C.P.R. company's second new trans-Atlantic str., the Empress of Ireland, was launched at the Fairfield yards, Glasgow, Scotland, Jan. 27. A description of this steamer as well as of her sister ship, the Empress of Britain, was published in our last issue.

The possibility of developing an ocean port at Gaspe, Que., has been recently discussed in some shipping circles in England. The route, it is claimed, would be 582 miles shorter than the present route to Montreal. An attempt to divert trans-Atlantic steamers to a port near Gaspe some years ago proved a failure.

Four new steamers are under construction in Great Britain for the Liverpool-Victoria Line, operated by Alfred Holt & Co., Liverpool, Eng. They are twin screw steel steamers of large cargo capacity and will be named Bellerophon, Teucer, Cyclops, Titan, and Antiochus, and the first named is expected to reach Victoria in April.

Negotiations have been completed for a renewal of the contract for the trans-Atlantic mail service with the Allan Line. The C.P.R. offered to join with the Allan Steamship Co., the service to be given by the two fastest steamers of each company, but the latter declined. The Allan Company has two turbine steamers on the route, and proposes to add two more.

D. McNicoll, Vice-President C.P.R.; G. M. Bosworth, Fourth Vice-President; J. W. Leonard, Assistant General Manager, and A. Piers, Manager Atlantic Steamships, C.P.R., visited Quebec early in Jan. for the purpose of looking over proposed wharfage sites there. This visit has given rise to the suggestion that the company proposes to make Quebec the summer port for its two new steamers, at least.

H. Bourlier, General Passenger Agent for Ontario for the Allan Line Steamship Co., has resigned after 34 years of service. H. F. Bradley, Chief Clerk of the Passenger Department at the Montreal office, has been appointed to succeed him, and H. C. Bourlier, son of H. Bourlier, has been appointed as assistant, and also as travelling agent vice J. H. Thompson, who died recently. Offices 77 Yonge St., Toronto.

H. A. Allan, of the Allan Line, states that it is expected that the repairs to the turbine str. Victorian will be completed in time to permit her to sail from Liverpool for Canada Feb. 22, and that the turbine str. Virginian would be replaced on the run about three weeks later. The latter is having her four-bladed propellers replaced by three-bladed ones of larger diameter, and the number of revolutions will be reduced to 300 per minute.

Officers of the Allan Line have had some negotiations with the Dominion Government with a view of dropping the run to St. John, N.B., for a couple of months, owing to their being short of steamers. The company's turbine steamers are under repair and the Bavarian is on the rocks near Quebec. The Government, however, has decided that the steamers will have to come on to St. John after having put in at Halifax, N.S.

The U.S. str. Valencia, running between San Francisco, Cal., and Puget Sound ports, went ashore near Cape Beale, Vancouver Island, during a fog on the night of Jan. 22, and will become a total loss. There were on board 94 passengers and 60 of a crew, and of these only about 20 were saved. The Valentia was an iron screw steamer, 252.7 ft. long, with a beam of 34 ft., and a depth of 19 ft., and was built at Philadelphia, Pa., 1888.

H. C. Bourlier, who has resigned his position as General Passenger Agent, Allan Line for Ontario, with office at Toronto, has been engaged in transportation service in Canada since 1855. He was G.T.R. agent at Quebec and Point Levis, coming to Toronto in 1858 to take charge of the first Union Station there. After 14 years' service there he entered the service of the Allan Steamship Co., at Toronto, and was G.P.A. for Ontario for the past 34 years.

The Quebec Transportation Co., organized to establish a line of steamships to trade between Quebec and Great Britain, has been reorganized, and now includes representatives of the Canadian Northern Ry. and the Quebec Central Ry., as well as of the Quebec and Lake St. John Ry. The new board was organized Jan. 23 as follows:—President, W. Power, M.P.; Vice-Presidents, J. G. Scott, Q. and L. St. J. Ry.; C. W. Spencer, Mackenzie, Mann & Co.'s Eastern Lines; Managing Director, T. Harling; other directors: J. H. Walsh, Quebec Central Ry.; J. T. Ross and A. E. Doucet. The Canadian Northern Ry. interests, it is reported, have secured one-half of the stock of the Quebec Transport Co., and the management has entered into an agreement with the Transport Co. respecting the supplying of freight to the steamers.

Jas. Thom, heretofore Assistant Manager of the Montreal office of the Dominion Line steamships, and of the Leyland Line, has been appointed Manager, succeeding John Torrance, sr., resigned. Mr. Thom continues to retain his position as manager of the Hamburg-American Line at Montreal. He first entered transportation service with the Canada Shipping Co., owners of the old Beaver Line, in 1868, becoming Freight and Passenger Manager in 1882, remaining in that position until 1893, when he became Manager of the Hamburg-American Line at Montreal. In 1900 he took over the management of Furness, Withy & Co.'s steamers in addition, and in 1903 joined the Dominion Line steamships, retaining the management of the Hamburg-American Line.

The Dominion Government has signed a contract with R. A. Alley, of Vancouver, B.C., for a freight steamship service between Vancouver and New Zealand. The points of call in New Zealand are to be three at least, and are to alternate between Auckland, Wellington, Dunedin and Bluff. The present service is to be bi-monthly, but this is dependent upon the action of the New Zealand Government, which has not yet advised the Dominion Government of what it has done in the matter, although it is understood that the service has been brought about through its influence. The subsidy payable by the two governments is £10,000 a year each, and the contract is to run for three years, althhoug it may be terminated at an earlier date, if the contract with the New Zealand Government is for a shorter period than three years. The steamers which will be placed on the route have not been named, but they form part of the fleet of Bucknall Bros., of London, Eng. Mr. Alley stated recently at Seattle, Wash., that two steamers would be put on the route at once, Bucentaur and Africander, 5,600 tons gross, and 4,250 tons net, and having a speed of 11½ and 10½ knots an hour respectively. The steamers will call at Honolulu, as well as at Auckland, Dunedin, Wellington, Lyttletown and Bluff. They will also run to Sydney, New South Wales, and probably to other ports in Australia.

The Department of Marine has issued a notice to mariners setting forth that Marconi wireless telegraph stations have been established by the Dominion Government on the Atlantic coast and in the Gulf of St. Lawrence as aids to navigation, and are being operated for the Department by the Marconi Wireless Telegraph Co. Stations are being operated at Fame Point lighthouse, off the Gaspe coast; Heath Point lighthouse, Anticosti Island; Cape Whittle, Quebec Labrador; Point Amour lighthouse, Newfoundland Labrador; Belle Isle lighthouse on the north-east end of the island; Point Rich lighthouse, west coast of Newfoundland; Cape Ray and Cape Race lighthouses, south-west point of Newfoundland; Sable Island, near the main station; Cape Sable lighthouse, south-west point of Nova Scotia; and Partridge Island, entrance to St. John Harbor, N.B Vessels fitted with Marconi apparatus passing these stations can communicate with them and messages will be forwarded to their destination at commercial rates. There is a trans-Atlantic station at Glace Bay, N.S., operated by the Marconi Co. as a commercial enterprise, but it does not communicate with vessels. There is a low-power station at Cape Bear, P.E.I., but it is intended only for the use of the steamers crossing in winter between Prince Edward Island and the mainland, and is not available for commercial purposes. The Government telegraph service, under the Department of Public Works, maintains Marconi wireless telegraph stations at Chateau Bay and at Belle Isle south lighthouse to connect its telegraph lines with the ship reporting station on the island. During the winter the operators are removed, and the reports are transmitted from the station at Belle Isle north-east lighthouse to the station at Point Amour. There are also Marconi wireless telegraph stations at Battle Harbor, Venison Tickle, American Tickle, and Domino Tickle, under the control of the Newfoundland Government.

G. B. WYLLIE,
Canadian Passenger Agent,
210 ELLICOTT SQUARE, BUFFALO, N.Y.

Maritime Provinces and Newfoundland.

During 1905 there were 168 vessels registered in Newfoundland.

J. A. McLean has been appointed harbor master for the port of Forchu, N.S.

T. P. Charleson, Ottawa, has been awarded a contract to build a wharf at Shippegan, N.B., at a cost of about $16,000.

W. Cunard, senior partner in S. Cunard & Co., Halifax, N.S., steamship owners and agents, died in London, Eng., Jan. 12, aged 80.

H. M. Leger has been appointed wharfinger of the Dominion Government wharf at St. Marys, N. B., and G. Cook to a similar position at Port Matoun, N.S.

The str. Richard, under charter to the Inverness Ry. and Coal Co., ran ashore near Cape Negro, Shelburne, N.S., Jan. 8, and is reported to be a total loss.

The assets of the Atlantic Whaling and Manufacturing Co., including the steamers Hump and Fin, were sold at St. John's, Nfld., by the liquidators, Jan 10.

The Dominion Coal Co.'s barge Rembrandt, which broke away from a tug off Isaac's Harbor, Nov. 29, has been given up as lost together with her crew of six.

The St. John, N.B., steam ferry boats carried 1,599,728 passengers during 1905, and earned $21,638.06, against 1,567,991 passengers and $21,314.79 for 1904.

The Plant Line str. Arranmore, grounded while entering Boston, Mass., from Halifax, N.S., Jan. 4, and was subsequently released. Six plates had to be replaced in her hull.

The Dominion Atlantic Ry. str. Yarmouth is giving a tri-weekly service between St. John, N.B., and Digby, N.S.; and the str. Prince Albert has been withdrawn from the Kingsport-Parrsboro, N.S., run for the season.

The Reid Newfoundland Co.'s steamers Bruce and Neptune have been undergoing considerable repairs at St. John's, Nfld., recently. The Bruce has been resheathed and the engine and boilers overhauled, whilst the Neptune has been fitted with a new keel.

The str. Elaine is being fitted with a new boiler, brought out from Glasgow, Scotland, and in the overhaul she is receiving will be provided with additional stateroom accommodation. The work is being done at Indiantown, and the steamer's route for the season will be from St. John to Gagetown, N.B.

The str. Acadia, which was built in the U.S. in 1880, and which was purchased in 1886 by the Dominion Government for a fisheries protection cruiser, was sold out of the service in 1904, and has since been lying at Halifax, N.S. She is to be taken to St. John, N.B., where she will be broken up.

Two companies are in course of formation in Nova Scotia for the purpose of putting small freight steamers on runs on the coast. The first of these has chartered a steamer to run from Halifax to Sheet Harbor, beginning April 1, and is having a steamer built at Sheet Harbor, which is expected to be ready in July. The second purposes to run from Halifax to Mushaboom, Isaac's Harbor and other eastern shore ports. The promoters are negotiating for the purchase of a suitable steamer

The S. H. White Co. has been incorporated under the New Brunswick Companies' Act with a capital of $298,000 and offices at Sussex, to take over several businesses including the partnership carried on under the title of the Alma Lumber and Shipbuilding Co. The company proposes to carry on a shipbuilding business in addition to lumbering and general trading operations. The provisional directors are:—S. H. White, W. J. Mills, H. P. Robinson, of Sussex; W. W. White, J. E. Moore, of St. John.

The wrecked French str. Pro Patria having been practically reconstructed, an order-in-council has been passed admitting her to the British-Canadian register at Halifax, N.S., as soon as the usual formalities have been compiled with by the owner, W. W. Lewis. The order also permits a change of name to the Canada, as soon as the registration as the Pro Patria has been completed. It is proposed to organize the Canada Steamship Co. and to put the steamer on a run between Halifax and Sydney, N.S., calling at Gaberous, Louisbourg and Glace Bay en route.

Province of Quebec Shipping.

The work of strengthening the cross wall of Louise dock, Quebec, has been commenced by the contractors.

The Department of Marine has ordered that an inquiry be held into the circumstances attending the loss of the Halifax str. Lunenburg, on the Magdalen Islands, Que.

The ferry boat St. Laurent, which sank at her dock in Montreal recently, has been raised. It is estimated that it will cost from $3,000 to $4,000 to put her in good condition again.

H. Cleghorn, who for a number of years was connected with the Montreal Transportation Co., and subsequently with the Beaver Line of ocean steamers, died in Montreal recently, aged 74.

The owner of the str. Prefontaine has made an apology and paid the costs in some proceedings taken against him for disobeying the orders of the Harbor Master of Quebec in connection with the mooring of the steamer.

Following are the officers and directors of the Ottawa River Navigation Co. for the current year:—President, H. W. Shepherd; Vice-President, H. Wallis; Managing Director and Secretary Treasurer, R. W. Shepherd; other directors: R. Bolton, A. F. Riddell.

The Murray Bay Lumber and Pulp Co. has been incorporated under the Dominion Companies' Act, with a capital of $500,000 and offices at Etmire de la Malbaie, Que., to carry on a general lumbering and manufacturing business, and in addition thereto to develop electric power, and to acquire and operate steam and other vessels.

The ships and all other property of Charles Robin, Collas and Co. (Ltd.), a corporation established in the Island of Jersey, and registered in Quebec, has been made over by deed to the C. Robin, Collas Co. (Ltd.) which has been incorporated under the Dominion Companies' Act, with offices at Halifax, N.S. The company trades in Baie de Chaulers and adjacent districts of Quebec.

The Richelieu and Ontario Navigation Co. will apply next session of the Dominion Parliament for an act giving further and additional powers to issue bonds, change the mode and way of calling and holding the meetings of shareholders, to extend and change the mode of issuing stock, and to give additional powers to make by-laws for the purpose of carrying on its business.

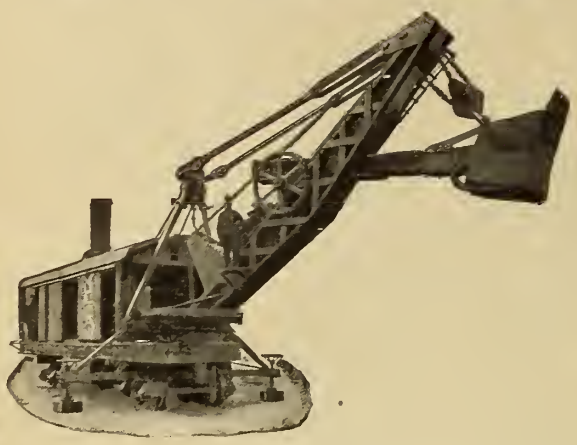
The Dominion Park Co. has been incorporated under the Dominion Companies' Act, with offices at Montreal and a capital of $300,000, to carry on the business of amusement park owners, and in connection therewith acquire and operate boats and launches to be driven by steam, electric or other power. The provisional directors are:—W. G. Ross, D. McDonald, J. E. Conlin, Montreal; C. A. Duclos, K.C., Westmount, Que.; H. A. Dorsey, New York City.

C. J. Smith, General Manager, Richelieu and Ontario Navigation Co., returned to Montreal from a trip to Great Britain and France, Jan. 3. He is reported to have stated in connection with the proposal to add some new steamers to the company's fleet, that as a result of his trip, he was of opinion that at least the hull, engines and boilers can be built in Great Britain and brought to Canada with advantage. The upper works and special fittings for the trade could be added at Sorel.

Following are the officers and directors of the Montreal and Kingston Forwarding Co. for the current year:—President, F. Ross, Quebec; Vice-President, J. B. Carruthers, Kingston, Ont.; Secretary-Treasurer, G. R. Moir; other directors: J. T. Ross, Quebec; W. Stewart, Montreal. Reports as to the year's operations were presented at the annual meeting held in Montreal, Jan. 12, and approved. The directors have decided to make considerable improvements in the fleet during the current year.

A company has been formed in connection with the Quebec and Lake St. John Ry. for the purpose of acquiring the steamers which at present run between Roberval and points on Lake St. John; purchasing additional steamers and opening routes up on the Peribonca, Mistissani and Ashuapmouchan rivers. A charter has been applied for under the Quebec Companies' Act. At a meeting held Jan. 17, officers and directors for the current year were elected as follows:—President, H. J. Lyons; First Vice-President, J. G. Scott; Second Vice-President and Managing Director, R. Dupont; Third Vice-President, F. X. Laroche; Secretary and Traffic Superintendent, T. L. Marcoux; Purchasing Agent, H. B. Locke; other directors: J. L. Guay, L. Lindsay, H. Gagne. The company proposes to operate its steamers on routes aggregating about 200 miles, and at the opening of navigation will have the three steamers hitherto on the lake in service. Later in the season there will be added light draft, flat-bottomed, stern-wheel steamers, now being built for the company at the Polson Iron Works, Toronto. These steamers are being specially built so as to be able to reach the furthest points of settlement in the district during the period of low water. Consideration is being given to the inauguration of a line of freight and passenger steamers to run between Chicoutimi and River du Loup, and so afford a continuous round trip of the Saguenay River. The title of the company is the Lake St. John Navigation Co. It has placed an order with the Polson Iron Works, Toronto, for the construction of two light draught, flat-bottomed, stern-wheel steamers for the river traffic from Roberval, Que. on Lake St. John. One steamer is to have a length of 65 ft., by 17 ft. beam, and the other 100 ft. long, by 20 ft. beam, and to have a draught when loaded not exceeding 18 inches. The hulls are to be of steel, and the stern wheels are to be driven by engines of suitable power to give a speed of 10 miles an hour against the current. These steamers are to be completed in Toronto, then packed in sections and conveyed to Roberval, where they will be put together and put on the lake. The order was placed by R. Dupont, and H. B. Locke, Manager and Purchasing Agent, respectively, Jan. 25, and it is expected that the steamers will be delivered at Roberval and put together in time for the summer business. They are to be specially equipped for the colonization business in the Lake St. John country. Messrs. Dupont and Locke went on to New York from Toronto, to endeavor to arrange for the purchase of one or two steamers, which it is proposed to place on a route from Chicoutimi, to run on the Saguenay River. The company at present owns the following steamers:—Mistassini, built at Roberval, Que., 1891; side wheel, engines 200 h.p.; length, 130 ft., breadth, 22.4 ft., depth, 8.2 ft.; tonnage, gross, 235 tons; register, 148 tons. Peribonka, built at Roberval, Que., 1892; side wheel, engines 28 h.p.; length 90 ft., breadth 21.8 ft., depth 6.2 ft.; tonnage, gross, 179 tons; register, 113 tons; and the Colon, Roberval, and Merilees, tugs, which do not appear on the list of vessels registered in Canada.

STEAM SHOVELS



We build shovels in sizes from 22 to 110 tons, with dipper capacity of ¾ to 4½ cubic yards. Our new design represents the accumulated experience of many years in steam shovel building. Some of the features that we would call attention to are the use of cut gears, swinging jack arms, and the heavy construction of car body. Write us and describe your work, and get our specifications and proposition on your requirements.

VULCAN IRON WORKS CO.

TORONTO AND WINNIPEG

Ontario and the Great Lakes.

Mrs. W. E. Phillips, wife of G. P. Phillips, Dominion Steamboat Inspector, Kenora, Ont., died in the hospital there, Dec. 21.

The Toronto City Council has under consideration tenders for the erection of a new ferry building on the water front at Toronto.

The steamship under construction at Collingwood, Ont., for the Midland Navigation Co., will be named Midland Prince.

Capt. P. Sullivan, St. Catharines, Ont., has not been appointed to the command of the fisheries protection cruiser Vigilant, vacant owing to the resignation of Capt. Dunn, as reported.

An Order-in-Council has been passed authorizing a change in the name of the str. F. B. Bradey, O. no. 107,948, registered at St. Catharines, Ont., to that of Thomas Freel Battle.

It is expected that the str. Cole will be taken off the route between Buffalo, N.Y., and Crystal Beach, Ont., and put on the Detroit, Toledo and Georgian Bay run by her present owners.

The Leamington, Ont., Town Council has petitioned the Dominion Government to vote a subsidy of $3,000 a year for a small steamer to make a daily trip between that town and Pelee Island.

It is reported that the Toronto and St. Catharines Navigation Co. is arranging to have constructed a twin-screw steamer for the run between Toronto and Port Dalhousie, Ont., for the season of 1907.

The Judicial Committee of the Imperial Privy Council has decided on appeal that the U.S. fishing tug Kitty D. was not in Canadian waters when she was seized by the Dominion cruiser Petrel during the summer of 1904.

The Pennsylvania Ry directors have approved of the agreement with the C.P.R. and J. W. Ellsworth, of Cleveland, Ohio, respecting the operation of a joint car ferry service between Ashtabula, Ohio, and Port Burwell, Ont.

Capt. J. H. Scott, for many years master of the freight and passenger str. Persia, running between St. Catharines, Ont., and Montreal, has retired. He navigated the lakes for 52 years, for 38 of which he was master.

The tug Queen of Alexandria Bay passed Brockville, Ont., Jan. 8, having in tow the schooner Jessie of Ogdensburg, N.Y. The ferry boat between Brockville, Ont., and Morristown, N.Y., was making regular trips Jan. 10.

The Wabash and Pere Marquette railway companies have engaged a powerful tug to keep the Detroit River open, perhaps as far as Lake Erie, in an effort to prevent the trouble the Detroit-Windsor car ferries have each winter.

The St. Clair and Erie Ship Canal Co. will apply next session of the Dominion Parliament for an act to revive and amend the act of incorporation and subsequent acts, and to extend the time for the construction of the projected canal.

Capt. A. M. McGregor, of Goderich, for 68 years engaged in navigating the Great Lakes, for 20 of which he was master of the Dominion Government survey str. Bayfield, died at Windsor, Ont., Dec. 20, aged 83, while on a visit to his son.

D. O'Connor, Temagami, Ont., is having a new steamer built at Sorel, Que., for the trade on Lake Temagami. The new steamer is to be shipped in sections to Temagami early in the season, and put together on the lake in time for the tourist trade.

Following are the officers and directors of the Montreal Transportation Co. for the current year:—President, B. MacLennan; Managing Director, Jas. A. Cuttle; Secretary, G. M. Kinghorn; other directors: T. A. Crane, A. Kingman, F. Robertson, A. E. Ogilvy.

T. Long, of Toronto, ex-Secretary and ex-Director of the Northern Navigation Co. of Ontario, accompanied by his wife, daughter and stepson, sailed from Boston, Jan. 13, on the S.S. Canopic for Alexandria, Egypt, intending to be away for several months.

Capt. W. D. Douglas, who died at Winnipeg, Man., Jan 21, aged 71, was a well-known mariner on the Upper Lakes prior to taking up his residence in Winnipeg during the early boom days. He was best known as proprietor of the Leland House there for several years.

A. J. Markham, General Passenger Agent Erie and Western Transportation Co. (Anchor Line), Buffalo, N.Y., has been absent from duty since early in October, shortly after his return from the General Passenger Agents' meeting in Mexico. He has undergone an operation, and it is hoped that he is now on a fair way to recovery.

The Pere Marquette Rd. car ferry Marquette left Cleveland, Ohio, Jan. 3, for her regular trip to Port Stanley, and Rondeau, Ont., but could not make either port owing to the wind. She waited until the weather moderated, making Port Stanley Jan. 6, and Rondeau on the afternoon of the following day. The trip across the lake to Port Stanley usually takes about six hours.

The Canadian canal at Sault Ste. Marie, Ont., was open for 255 days during the season of 1905, viz., from April 10 to Dec. 20, while the U.S. canal was opened four days later and closed four days earlier. During the season 21,679 vessels passed through carrying 44,270,680 tons of freight, and 54,204 passengers, against 16,120 vessels, 31,546,106 tons of freight, and 35,695 passengers for the season of 1904.

Following are the officers of the Collingwood Council of the National Association of Marine Engineers for the current year:—President, J. L. Smith; 1st Vice-President, Jas. Cameron; 2nd Vice-President, W. Harman; Secretary, A. Lockerby; Treasurer, W. Harding; Conductor, Jas. Scott; doorkeeper, Geo. Scott; Auditors, C. Farrar, W. Whipps; Representatives to Grand Council, J. L. Smith, J. W. Aston.

The report of the Harbor Master at Toronto, as to the trade of the port for the season of 1905, shows the following receipts:—Merchandise, 42,753 tons; coal, 182,453 tons; stone, 3,415 tons; horses, 201; lumber, 1,586,000 ft.; ice, 6,317 tons; grain, 18,100 bushels; bricks, 8,375 tons; sheep 22. The harbor dues received on the above amounted to $7,360.17. The total tonnage for the season was 1,405,854.

The Turbine Steamship Co.'s str. Turbinia is running between Santiago, Cuba, and Kingston, Jamaica, as a day steamer, no alterations having been made so that she might take a night run. We were advised Jan. 25, that no arrangements had been definitely concluded in reference to the proposal to secure another steamer for the Toronto-Hamilton run in the spring and late fall in case the Turbinia goes to the West Indies again at the close of the 1906 season. Nothing has been definitely decided with reference to the project to put a steamer on a run between Hamilton and Dundas, Ont.

The Detroit, Belle Isle and Windsor Ferry Co. has placed an order in the U.S. for a new ferry steamer for its trade. She will be built of steel, fitted with six water-tight compartments, her principal dimensions being:—length over all, 180 ft.; between perpendiculars, 165 ft.; breadth, 45 ft.; over guards, 57 ft.; depth of hull, 18 ft.; draught, 12 ft. She will be fitted with triple expansion engines, having cylinders 20, 32 and 50 in. diameter, by 36 in. stroke; supplied with steam by two Scotch boilers 13 ft. 3 in., by 12 feet long, carrying 180 lbs. of steam. She will make 16 miles an hour and carry 2,700 passengers.

The officers and directors of the Turbine Steamship Co. for the current year are;—President, J. Moodie; Vice-President, C. A. Birge; Secretary-Treasurer, G. Hope; other directors: T. Eaton, C. Marshall, W. C. Hawkins, Col. J. A. Davidson. At the annual meeting in Hamilton, Jan 8, the financial statement was presented and considered satisfactory, but it was decided not to declare a dividend, owing to the fact that the directors have under consideration plans for another steamer. As soon as the plans are completed it is proposed to hold another meeting of shareholders to approve of the same, and authorize the raising of the additional capital required.

R. O. and A. B. Mackay, Hamilton, have purchased the str. Pere Marquette no. 2, heretofore engaged on Lake Michigan for the Pere Marquette Rd. The steamer will, it is stated, form the nucleus of a fleet of freight and passenger steamers to run between Hamilton and Montreal, calling at Toronto en route. Pere Marquette no. 2 is a wooden screw steamer, built at Detroit, Mich., 1882. Her dimensions are: length, 178 ft.; breadth, 30 ft.; depth, 12 ft; and she has a gross cargo capacity of 771 tons. She is fitted with fore and aft compound engines, cylinders 21 in. and 37 in. diameter, by 36 in. stroke, to which steam is supplied by one fire box boiler 8½ ft. by 16 ft.

At the annual meeting of the Farrar Transportation Co. at Collingwood, Ont., Jan. 9, reports were presented showing that a satisfactory year's business had been done, and a dividend was declared. The directors were authorized to enter into a contract for a new steamer to have a capacity of 8,000 tons and to cost about $337,000, and H. Calderwood was engaged to prepare the plans and to supervise the construction. The directors were re-elected, the officers and board for the current year consisting of: President, G. A. Farrar; Vice-President, F. Scott; Secretary, G. E. Fair; Treasurer, W. Rowland; Manager, Capt. Pearsall; Master of str. Newmount, Capt. F. A. Bassett; other directors: G. J. Ferris, J. A. Wylie, H. Baird, W. McCallum.

The Montreal, Ottawa and Georgian Bay Canal Co. will apply next session of the Dominion Parliament for an amendment to its act of incorporation, by increasing the capital stock from $10,000,000 to $50,000,000; by authorizing it to issue bonds or other securities to the extent of $100,000,000, and by extending the time authorized for the commencement and completion of the canal. The proposal of the company is to deepen the channel of the Ottawa River at various points between its confluence with the St. Lawrence and near Mattawa, Ont.; to construct a canal from that point through the divide to Lake Nipissing, and to deepen the channel in that lake and the French River out to Georgian Bay, so as to provide either for a 20 ft. or 26 ft. navigation. The Dominion Government in 1904 directed a survey of the whole route to be made, and this was completed during 1905, the engineers in charge being at present engaged in arranging all the information collected and figuring out results. A report is expected to be presented next session of Parliament.

A Montreal inventor has taken out a patent in Canada and the U.S., for a combined steering and propelling apparatus for vessels of every size. The invention is designed to steer and propel a vessel without the use of a rudder, and to reverse or check its speed without stopping the engines.

B.C. and Pacific Coast Shipping.

The Vancouver, Westminster and Yukon Ry. has leased the old ferry slip and some adjacent property at New Westminster, B.C., for wharfage purposes.

The C.P.R. is reported to be making surveys with a view of making Alberni a permanent port for its coasting steamers on the west coast of Vancouver Island.

An order-in-council has been passed authorizing a change in the name of the tow barge Lord Wolseley, no. 86,540, registered at Victoria, B.C., to that of Everett G. Griggs.

Reports from Yukon territory state that the river was open at Yukon Crossing at the end of Dec., something which has not been known since trading began on the river.

Capt. J. W. Rogers has been appointed local pilot for the Fraser River, as the result of a conference between the local pilotage board and the New Westminster City Council.

Press reports current at Vancouver state the Dominion Government proposes to build a cruiser similar to the Canada, and two smaller steamers for the fishery protection service on the Pacific coast.

The Pacific Coast Steamship Co.'s str. City of Pueblo, trading between Seattle, Wash., and other Puget Sound ports and San Francisco, became disabled off the mouth of the Columbia River, and was towed by the steam schooner Chehalis to her destination.

The Alaska Commercial Co.'s str. Portland went ashore on Spire Island, near Ketchikan Dec. 23, and later despatches stated that she would be a total loss. The Portland was one of the oldest vessels on the run between Seattle, Wash., Vancouver, B.C., and Seward, Alaska.

The Pacific Marine Underwriters, Limited, is the title of a company which is seeking an act of incorporation next session of the Dominion Parliament, to carry on the business of marine insurance in all its branches. McPhillips, Tiffin and Laursen, Vancouver, B.C., are solicitors for the applicants.

A report has been circulated in Victoria, B.C., and in places south of the International boundary that the U.S. Government proposed to buy out the Canadian sealing vessels and to pay a percentage of the value of the seal catch. The operations of the sealers have been a cause of difference between Great Britain and the U.S. for some years.

St. Lawrence & Chicago Steam Nav. Co.

The following report was presented at the 15th annual meeting of shareholders in Toronto, Jan. 9:—The season of 1905 on the lakes was a fairly prosperous one. The large crop in Manitoba and the Northwest caused a brisk demand for grain-carrying vessels during the fall months, and fairly remunerative rates of freight and constant occupation were obtained for all the company's steamers. The directors have paid a dividend of 10% on the capital stock and have carrried forward $50,811.90 to credit of profit and loss, making a total at credit of that account of $80,057.27.

PROFIT AND LOSS.

Insurance	$ 17,248.42

Notices to Mariners.

The following notices to mariners have been issued by the Department of Marine:—

118. Dec. 4.—Quebec—261. River St. Lawrence, ship channel between Quebec and Montreal, Ile Bigot to Becancour River, changes in buoyage. 262. River St. Lawrence, ship channel between Quebec and Montreal, Becancour, range lighthouses built. 263. River St. Lawrence, ship channel between Quebec and Montreal, Cap Madeline village, range lighthouses built.

119. Dec. 13.—British Columbia—264. Stuart channel and Trincomali channel, unchartered shoals, hydrographic information. Alaska—265. Clarence strait, Tongras narrows, Guard Island, red sector in light.

120. Dec. 16.—New Brunswick—266. South coast, Bay of Fundy, Dipper harbor, construction of breakwater, temporary buoys. Prince Edward Island—267. South coast, Hillsborough bay, Fitzroy rock, bell buoy replaced by gas and whistling buoy. Quebec—268. Chaleur bay, north side, Port Daniel lighthouse moved to centre of lengthened wharf.

121. Dec. 19.—Atlantic Ocean—270 and 271. Wireless telegraph stations established in Gulf of St. Lawrence, Labrador and Newfoundland coasts.

122. Dec. 22.—British Columbia.—272. West coast of Vancouver Island, Clayoquot sound, Templar channel, Lennard Island, fog alarm to be established. 273. Strait of Georgia, Fraser River lightship, additional light.

123. Dec. 29.—Nova Scotia—274. South Coast, Halifax harbor, mooring buoys withdrawn. Prince Edward Island—275. South Coast, Hillsborough bay, Charlottetown harbor, buoyage.

Northern Navigation Co. of Ontario.

Two years ago we made serious charges against the then management of the Northern Navigation Co. of Ontario. The publisher of this paper, as a stockholder in the company, and as the representative of a number of other stockholders, laid the charges before certain directors of the company and insisted that they should be investigated. An investigation was made, and although it was incomplete and not satisfactorily conducted in several respects, it sustained most of our charges, and at the annual meeting of shareholders in Collingwood in Jan., 1904, our publisher produced indisputable evidence in support of the other charges and clearly showed that the company had been used for the benefit of two of the directors, Thos. and J. J. Long, and that the shareholders had suffered in consequence. Shareholders who were present at that meeting will remember that every attempt possible was made to prevent our publisher from exercising his undoubted right to speak, that he was continually interrupted by the late J. J. Long, and by other directors who should have supported him in getting at the facts, and who to-day probably regret the course they adopted. We had the satisfaction of knowing, both by personal expressions of thanks and by numerous letters received, that our course in this matter was very warmly approved by the shareholders generally, and we have now the further satisfaction that the suit brought by the company against T. Long and J. J. Hopkins, executors of the late J. J. Long, full particulars of which were given in our July 1905 issue, has been decided in favor of the company. This judgment holds that statements of earnings presented by J. J. Long were untrue to his knowledge and were wilfully misrepresented by him in order that the directors might be induced to declare dividends which they would not have declared had they been made aware of the true earnings. And these misrepresentations were made in order to enable J. J. Long to unload his stock at high prices. But he was not the only one who benefited by the result of the misrepresentations. The following details of the stock transactions of the Long Bros. were given in our issue of Jan., 1904:—

"A considerable amount of stock having been placed with the public in 1901, an allotment of new stock having been made in 1902, and the price having worked up to a pretty high figure, it appears that the Long Bros. and their adherents on the board started in to reduce their own holdings. On June 30, 1900, J. J. Long had 409 shares; in May, 1902, he added one more, and in July, 1902, received 205 of the new allotment, a total of 615. Then the clearing out started. On Aug. 5 he transferred 315 shares, and on Dec. 10, 50. On Feb. 17, 1903, a further 200 were disposed of, reducing his holding to 50 shares. On Sept. 30, 1903, 95 shares were transferred to him, but he got rid of them the same day, so that from Feb. up to Dec. 23, 1903, when our information was obtained, he has held only 50 shares.

"Thos. Long acted in unison, only a little more so. On Jan. 30, 1900, he held 410 shares. The new allotment in July, 1902, gave him 205 more, or 615 in all. On July 31 he transferred 265 shares; on Aug. 5, 50; on Nov. 24, 100, and on Nov. 25, 200; leaving none at his credit on the company's books, and he remained in this position, without vacating his seat on the board, until Dec. 10, 1902, when 50 shares were transferred to him by J. J. Long. He still held these on Dec. 23, 1903."

J. J. Long is dead, but Thos. Long remains. He has followed his late brother's example, who after the exposure in 1903-4 went for an extended trip, and he is now in Europe. Whether he knew anything of John's misrepresentations or not, there is no use attempting to dispute the fact that he benefited by their result. J. J. Long, when confronted with the evidence of what had been discovered, agreed to make restitution to the company, and had he lived a few days longer there is no doubt he would have done so. Up to date we have not heard that Thos. Long has offered to contribute anything out of the greatly inflated price he received for his stock. In this connection it is interesting to note that in addition to being an executor, Thos. Long is also the principal heir of J. J. Long's estate.

Following is Mr. Justice Street's judgment in the suit above referred to:—The action was brought to recover from the executors of J. J. Long, deceased, damages alleged to have been suffered by plaintiff owing to certain alleged false and fraudulent misrepresentations made by deceased. The evidence at the trial was to the following effect:—

The Northern Navigation Co. began its operations in 1899; it had a fleet of steamers running on the Upper Lakes and had its head office at Collingwood, where J. J. Long lived and carried on business. The evidence does not show how early his connection with the company began, but he was Vice-President in 1901 and President in 1902 and 1903, and prepared the reports in those years.

The company's stock was originally $317,100. It was increased to $321,700 in 1900,

C.P.R. LANDS

THE CANADIAN PACIFIC RAILWAY COMPANY have 10,500,000 acres of choice farming lands for sale in Manitoba, Saskatchewan and Alberta. Ranching lands generally $4.00 to $5.00 per acre. Lands adapted to grain growing and mixed farming $5.00 to $15.00 per acre according to quality and location. Maps showing the lands in detail will be sent free on application.

TERMS OF PAYMENT.

An actual settler may purchase not more than 640 acres, on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal with interest in nine equal instalments annually thereafter as shewn in the following table:—

160 Acres at	$4.00	per acre,	cash payment	$95.85,	first year's interest	$32.64	and nine instalments of	$80.00
" "	4.50	"	"	107.85,	" "	36.73	" "	90.00
" "	5.00	"	"	119.85,	" "	40.81	" "	100.00
" "	5.50	"	"	131.80,	" "	44.89	" "	110.00
" "	6.00	"	"	143.80,	" "	48.98	" "	120.00
" "	6.50	"	"	155.80,	" "	53.05	" "	130.00
" "	7.00	"	"	167.80,	" "	57.16	" "	140.00
" "	7.50	"	"	179.75,	" "	61.22	" "	150.00
" "	8.00	"	"	196.70,	" "	65.28	" "	160.00

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of 6 per cent. per annum.

Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN,
Land Commissioner C.P.R. Co., Winnipeg.

CANADA NORTH-WEST LAND CO.

This Company has 650,000 acres of selected lands in Manitoba and Assiniboia which offer excellent opportunities to settlers and investors who desire to secure good lands in well-settled districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

DEPARTMENT OF AGRICULTURE AND IMMIGRATION

MANITOBA with its network of railways, giving markets near at hand for all farm products, offers unrivalled opportunities for investment.

PROVINCIAL GOVERNMENT LANDS can still be purchased at from $3 to $6 per acre.

IMPROVED FARMS in all districts of the province can be purchased at from $10 to $40 per acre. These prices are advancing every year.

A FEW POINTERS

On arrival at Winnipeg the wisest policy for any new settler to adopt is to remain in Winnipeg for a few days and learn for himself all about the lands offered for sale and to homestead,

There are districts that have been settled for many years in which land can be purchased. Some of this may be unbroken prairie which still possesses all the richness and productive powers of our virgin prairies. Other lands, cultivated and having comfortable farm buildings, are ready for immediate possession.

There are Provincial Government lands, Dominion Government homesteads, and railway lands to be secured.

The price of land varies from $3 to $40 per acre.

Location with respect to railways, towns, timber and water determines the price of land.

For information regarding homesteads, apply at the Dominion Land Office.

For purchase of Provincial lands apply at the Provincial Land Office in the Parliament Buildings.

For C.P.R. or C.N.R. lands apply at the land offices of said railway companies.

For lands owned by private individuals apply to the various real estate agents in the city.

For situations as farm laborers apply to:

in which year the company purchased $5,370 of the stock of the North-West Transportation Company, owning three large steamers which were competitors with the plaintiff company steamers. The N.W.T. Co.'s head office was at Sarnia.

During 1901 the N.N. Co. purchased 1,503 shares in the N.W.T. Co. which gave it a controlling interest in that company; in order to make this purchase the stock of the N.N. Co. was increased to $560,000.

During 1902 the N.N. Co. purchased the balance of the stock of the N.W.T. Co. and increased its own capital to $840,000. The two companies retained their separate sets of books and were worked as two separate companies until the end of 1902, the accounts of the N.W.T. Co. being kept at Sarnia, and those of the N.N. Co. at Collingwood.

At the end of the season of 1901, the annual report presented to the N.N. Co.'s shareholders shewed the following as the sole entry under the head of "Receipts":—"Net revenue over and above expenses and interest for year ended Dec. 31, 1901, $80,967.90."

A draft of this report was produced and showed how this $80,967.90 was actually made up, viz.:—

Net revenue of steamers, 1901		$34,880.48
Profit on purchase of N.W.T. Co. stock	$18,161.04	
Less interest and expenses in flotation of stock	12,123.62	
		6,037.42
Proportion of profits in N.W.T. Co.'s earnings for 1900 and 1901		40,050.00
		$80,967.90

The last mentioned sum of $40,050.00 did not represent dividends or profits received from the N.W.T. Co., but was a book entry in the books of the N.N. Co., representing estimated profits earned by the Co., and it remained in the books as an asset at the end of 1902, although the N.N. Co. had in the meantime acquired all the stock of the N.W.T. Co. and in its accounts of that year treated the two companies as merged.

On Dec. 15, 1902, a meeting of the N.N. Co.'s directors was held, at which J. J. Long, as President, was in the chair. The entry in the minutes of what took place is as follows:—

"The President read an approximate statement of the season's earnings, showing the net earnings to be $87,583.23. Moved by W. Hendrie, seconded by W. J. Sheppard:—Resolved that a dividend of 5% be and is hereby declared for the six months ending Dec. 31, 1902, on the paid up capital of this company, being at the rate of 10% per annum, and that the same be payable on Jan. 2, 1903, etc., etc." This dividend was paid in due course.

On Jan. 27, 1903, a meeting of the directors was held at Collingwood, the President, J. J. Long, in the chair. He presented the annual financial statement and its report, and it was adopted. This report contained a statement of profit and loss for the year as follows:—

RECEIPTS.

Balance at credit of profit and loss, 1901		$12,356.11
Gross earnings of steamers	$532,301.48	
Total expenses	443,781 56	
Net profit		88,519.92
Premium on shares		28,533.50
		$129,409.53

APPROPRIATIONS.

Half-yearly dividend, July 1, 1902	$28,000.00
Half-yearly dividend, Jan. 2, 1903	41,773.84
Directors' fees, etc	3,910.00
Transferred to rest account	40,000.00
Transferred to profit and loss, 1903	15,725.69
	$129,409.53

Endorsed upon the report presented to the shareholders was a report purporting to be signed by the company's auditors that they had examined the books and vouchers for the year ended Dec. 31, 1902, and found the attached statement a true and correct report of the same.

A directors' meeting was held on June 9, 1903, J. J. Long, President, in the chair. It was moved by W. Hendrie and seconded by H. B. Smith that a dividend of 5% for the six months ending June 30, 1903, should be paid to the shareholders, and this dividend amounting to $42,000, was accordingly paid.

At the end of the season of 1903 it was found that the net earnings for that year of the amalgamated company had been only $26,397.60, and as $42,000 had been paid out in July for dividends the whole profit for the year as well as the balance of $15,725.69 carried to the profit and loss account from 1902 were wiped out by the July dividend, with the exception of $123.29 and no dividend was therefore declared. No dividend has since been declared.

At the beginning of 1904, J. J. Long ceased to be the President and went to Europe, and his successor, H. C. Hammond, ascertained in March of that year, by an expert examination of the books, that the profits for 1902, instead of being $88,519.92, as represented by the report to the shareholders in that year, were only $57,568.85, and a correspondence upon the subject took place between Mr. Hammond and J. J. Long, who was still in Europe and who did not return until June, 1904. Mr. Long said that the figures for the report had been furnished to him by C. A. Macdonald, who kept the accounts of the N.N. Co. and had done so since its formation, and that he could no doubt explain the discrepancy. Mr. Macdonald, on being applied to, stated that the figures in the report were not those which he had given to Mr. Long. Finally, after Mr. Long's return, Mr. Macdonald was brought down to Toronto by Mr. Hammond, upon the day when J. J. Long had gone to Collingwood, and his story was taken down and put in the form of a statutory deelaration by the solicitor for the N.N. Co. Upon the facts stated in this declaration, J. J. Long was charged with having been guilty of fraud in the preparation of the reports for Dec., 1902, and Jan., 1903, and damages were claimed from him, and as appears from the report for 1904, put in as an exhibit, negotiations for a settlement took place, which came to an end by the death of J. J. Long about July 4, 1904.

It is admitted by defendants that in the approximate statement submitted to the directors by J. J. Long on Dec. 15, 1902, upon which the dividend for that half-year was actually declared, the net earnings of the company for the season of 1902 were overstated over $30,000; and that in the report for the same year in which the approximate estimate was supposed to have been corrected by the ascertainment of actual results, the net earnings for that season were over-stated nearly $31,000, but it is contended by the defendants that the proof of wilful and fraudulent mistatement on the part of J. J. Long, sufficiently convincing to justify me in finding him to have been guilty of deceit, is not forthcoming.

The plaintiffs' case largely, though not entirely, depends upon the evidence of C. A. Macdonald, who kept the books and accounts of the N.N. Co. for several years at Collingwood. After the return to Canada of J. J. Long early in June, 1904, and after two interviews upon the subject between him and Mr. Hammond, Macdonald was brought down to Toronto on June 15, 1904, and he made a statutory declaration in Mr. Hammond's office, drawn by the solicitor for the company, from the statement made by Macdonald. This declaration was produced at the trial by the plaintiff, at the request of the defendants who put it in. Macdonald was sworn as a witness at the trial and his evidence was to the following effect, agreeing in substance with his statutory declaration:—Down to the end of 1902, the accounts of what was called the Sarnia branch of the business, that is to say, the business connected with the steamers of the N.W.T. Co., were kept at the office of that company in Sarnia. The accounts of what was called the Collingwood branch, that is the business connected with the steamers of the N.N. Co., were kept by Macdonald at the office of that company in Collingwood. In Dec., 1902, the accounts of the Sarnia branch of the business had not been completed, and the only information possessed by Macdonald with regard to them was derived from the "trip sheets" of the Sarnia steamers, which were forwarded each week to the Collingwood office. These sheets showed the gross amount of freight and passenger earnings of the trip to which they related and the expenses of the trip, but did not show the line expenses, that is to say the general expenses of the whole business apart from the particular expenses of each trip. The accounts of the Collingwood business had not been completed for the season, so that only an approximate estimate of the earnings could be made. It was usual about the middle of Dec. to make up an approximate estimate of the earnings for the year for the purpose of the declaration of a dividend, and Macdonald upon being asked by J. J. Long, shortly before the directors' meeting of Dec., 1903, to prepare such a statement, thus described what took place:—"As nearly as I can remember, I made up an approximate statement of the earnings of the N.N. Co., shewing the result of that, and then made up an approximate statement from the trip sheets of the N.W.T. Co. and gave these figures to J. J. Long, who usually made out the wording and everything of the report himself.

"How did you come to make up that report?

"A. At his request.

"Q. Well, what did you put in the report?

"A. Just the figures that I got from the trip sheets.

"Q. And from the books of the N.N. Co. Did you give that report to Mr. Long?

"A. I did, sir.

"Q. Did you explain anything in particular about it to him?

"A. I explained to him at the time that the trip sheets did not appear to have the line expenses included in the expenses of the trip.

"Q. What did he say as to that?

"A. He said to never mind that, to make the report up according to the trip sheets."

Macdonald then said that from the information he had before him the largest amount he could have estimated as the profit of both lines for the season was about $67,000. The approximate estimate submitted by J. J. Long to the directors' meeting on Dec. 15, 1902, showed the earnings at $87,585.23. Macdonald then stated that shortly before the directors' meeting of Jan. 27, 1903, at which the annual statement and report for the year was presented, he was asked by J. J. Long to prepare the figures for the statement. At that time his own accounts of the Collingwood branch were completed, but he had no return of the result of the accounts for the year from the Sarnia branch. At the request of J. J. Long he telephoned to the Sarnia office for them and gave them to him for insertion in the proposed statement, which Long then prepared. Macdonald says the statement as prepared by Long did not contain the figures given him, but showed figures more favorable to the company by some $20,000 or $30,000: he could not recollect the exact amount, but it was in that neighborhood. He was asked why he did not call Mr. Long's attention to the discrepancy and he answered with emphasis:—"Nobody

would be likely to tell Mr. Long he was doing things wrong; he was making up the statement to suit himself. I had nothing to do with making it up. I gave him all the facts I could give him." An answer perfectly natural and unstudied, which seemed to throw valuable light upon the relation in which the two men stood to one another—Macdonald a mere bookkeeper, doing only what his employer told him to do, and not venturing to remonstrate.

A partial draft of the report of the directors to the shareholders for 1902, with pencil figures and amendments of the previous year's report in the handwriting of J. J. Long, was produced, showing his own personal connection with the statement and report. The report when drawn by Long was handed to Macdonald in order that it might be typewritten, and he did not see it again until it was printed. Endorsed upon the printed report is the certificate of the auditors of the company dated Jan. 24, 1903, in which they certify that they have examined the books and vouchers and find the attached statement true and correct. The two auditors were called as witnesses and stated they had never seen the books and vouchers relating to the Sarnia branch of the business, and their recollection was that the certificate they signed was confined to the Collingwood branch. My view on this point was that they had probably signed the certificate which was drawn and laid before them without observing its contents. The books of the Collingwood branch were made to agree with the report for 1902 in the following manner by Macdonald:—He took from the reports the gross earnings as stated there of both branches. He deducted from them the gross earnings of the Collingwood branch, which he knew, and treated the balance as the gross earnings of the Sarnia branch, charging it to the N.W.T. Co., and crediting it to the revenue account in his own books. In the same way he took from the printed report the gross expenses stated there of both branches. He deducted from them the gross expenses of the Collingwood branch, which he knew, and treated the balance as the gross expenses of the Sarnia branch, crediting it to the N.W.T. Co., and charging it to the revenue account in his own books. Macdonald says he made these entries by J. J. Long's express direction. When the accountant, W. H. Cross, came to examine the books in March, 1904, he discovered that the result of these entries was to show a profit of nearly $31,000 greater than the books themselves actually showed at the time they were made.

Macdonald's evidence was given, so far as I could judge, with fairness and candor. He appeared at one time to have varied from a former statement in some degree, but I came to the conclusion that this arose from his having misunderstood the precise question which was asked him. It was strongly urged against the credibility of his testimony, that having made the statutory declaration of June 15, 1904, he was in vincilus and was not free to vary from it except at the risk of a prosecution for perjury. The foundation for the criticism of counsel for the defendant upon the action of the solicitor for the N.N. Co., in obtaining this declaration, seems to be the remarks of Lord Langsdale, Master of the Rolls in Howey v. Mount, followed as they are by those of Sir Henry Strong, C.J., in the Welland Election case, in both of which cases the action of a solicitor who took in the one case an affidavit, and in the other case a statutory declaration from a person whom he intended to examine as a witness in a proceeding then pending in court, was spoken of as erroneous or "improper," because the effect would be to entangle the conscience of the proposed witness. These cases, perhaps, can scarcely be taken as being on all fours with the present, for the reason that when Macdonald's statutory declaration was taken no action was pending, nor so far as appears was the necessity for bringing an action contemplated. At the same time, however, I am bound to say that a simple signed statement would have been quite as effectual for any conceivable purpose, more so for most purposes, and would not have been open to the objections which have been very fairly taken here, and the taking of statutory declarations under any similar circumstances is certainly not a practice which should be followed. In weighing Macdonald's evidence against this objection to it, I have sought in vain for any motive which should cast upon him the blame for that which has taken place, and lift it from Long's shoulders. There is no doubt that the report exaggerated the earnings for 1902 by some $30,000 and that the books of the company were by means of fictitious entries made to corroborate the misstatement in the report. Either Macdonald or Long is responsible. Macdonald is here and has told the story which I have given above; Long is not here to contradict him, but Macdonald was, so far as I can see, without any motive to misrepresent the position of the company or to throw upon Long the odium of having wilfully misled the board and the shareholders. When Macdonald made his statement to Mr. Hammond, J. J. Long was alive and in a position to contradict it. It is not as if the charges had been kept back until Long was dead. Long, on the other hand, was in a position with regard to the company which made a continuance of confidence in its earning power a matter of much importance to him and there seems no doubt that he profited largely by the erroneous belief of other people in the ability of the company to pay dividends which his report of Jan., 1903, was calculated to induce. On Feb. 17, 1903, he sold 200 shares of his stock for $28,385, that is to say, at a premium of 42%; and on Sept. 30, 1903, he sold 94 shares at a premium of 17¾%, retaining only the 50 shares required to qualify him. Besides this the firm of T. Long & Bro., composed of himself and his brother, sold 100 shares on Feb. 19, 1903, and 70 more on March 2, 1903.

In considering the question of the motive and intention to be imputed to J. J. Long, it appears to be pertinent, although my conclusions by no means depend upon it, to refer to the misleading character of the statement inserted as to the net revenue for 1901 in the report for that year, and the absence of the item making up the figures of $80,967.90, which were set forth in the draft report, but not in the report presented to the shareholders, and to the fact that in July and Nov. and Dec. of 1902, J. J. Long sold a large quantity of stock at high prices. No dividend has been paid on the stock since that paid in July, 1903. It does not appear that any statement of approximate earnings for the half-year was or could be furnished so early in the season and I think it must properly be assumed that the dividend of $42,000 then paid was paid upon the strength of the report of the previous Jan.

Upon the whole, therefore, I find myself compelled to the conclusion that the statement of approximate earnings laid before the directors by J. J. Long on Dec. 15, 1902, and the annual statement presented by him to the board on Jan. 27, 1903, and afterwards to the shareholders were **untrue to his knowledge** and that the earnings for the year 1902 were **wilfully misrepresented by him** in order that the directors might be induced to declare dividends which they would not have declared had they been made aware of the true earnings.

The question as to whether the directors acted upon the representation made to them is a question of fact which I have to determine. The evidence of W. Hendrie, one of the directors to whom the reports were presented, and who agreed to the declaring of the dividends of Jan. and July, 1903, was very positive that he would not have done so had the true facts been made known, but his cross-examination shows the difficulty that any honest witness must necessarily feel in saying positively what course he might have taken upon a state of facts different from that upon which he had acted. Apart, however, from any positive evidence upon the point I think I am at liberty to come to a conclusion from the probabilities of the case as to whether the directors acted upon the misrepresentation made to them in declaring these dividends. It is against probability that J. J. Long would have misrepresented the earnings of the company if he had believed that the directors with the true facts before them would have declared 10% dividends. He therefore may be assumed to have been of opinion that the misrepresentation was necessary to induce them to do so. Then the misrepresentation was one which was well calculated to induce them to declare the usual dividends for it showed earnings for the year amply sufficient for the purpose. The dividends of 10% required earnings of at least $84,000 to support them. The earnings shown by the report were $88,519.92, sufficient to pay the dividend and leave a surplus, whereas the real earnings were only $57,568.85, which would not have justified a dividend of even 7% for the year. I come to the conclusion, therefore, that in declaring the dividends of Jan. and July, 1903, the directors acted upon the misrepresentation made to them by J. J. Long.

The defendants contend that the N.N. Co. has suffered no damage because the money which was paid out was paid out in dividends to the shareholders and was not paid out of capital, but out of monies which could lawfully be applied in payment of dividends. It is true that these dividends were not paid out of the actual fixed capital of the company, and that the payment was not utra vires, and that it was paid to the persons who were then the shareholders of the company, but the fact remains that by reason of the misrepresentation of the position of its affairs the company has parted with sums of money which, but for that misrepresentation, it may reasonably be assumed would still be at its credit. The fact that the then shareholders received their money does not help the company back to its money. It is the company and not the shareholders who now sue to recover it; and it is evident, though that makes no difference in the principle, that the present shareholders are not the same as those who received the dividends. But for the misrepresentation the company would now be in possession of so much more working capital, or would be indebted to the bank in so much less.

The amount of the damages which the N.N. Co. should recover is a matter of more difficulty. To speculate as to whether the directors would have declared any dividend, and if so at what rate, would be to embark upon a most unsatisfactory and uncertain enquiry. On the other hand, I do not think I can err against the defendants if I assume that the earnings of the company were misstated by J. J. Long in a round amount which he thought would be sufficient to induce the directors to keep up the 10% dividend, and with it the market price of the stock. On the other hand, if the company is put back in the position in which it would have been had the representation made to the directors been true, I think it will have received all that it can properly claim. I therefore assess the damages at $34,500 which I make up by taking the amount of the misrepresentation at the end of Dec., 1902, to have been roundly $30,000, and I add three years' interest at 5%. The defendants must also pay the costs of the action.

Niagara Navigation Co.'s Meeting.

The annual meeting was held in Toronto Dec. 28, the President, E. B. Osler, in the chair. Following are extracts from the directors' report for the year ended Nov. 30:

The new issue of 1,008 shares of stock has all been subscribed and paid for, with the exception of 41 shares, which will be held in the treasury until funds are required. Bonds authorized by shareholders to be issued to provide balance of cost of new steamer and for taking up old bonds will be sold as money is required to pay on the contract. Considering the satisfactory earnings, the directors decided to write off 5% on steamers. The balance carried forward is opportune in view of the outlay for new steamer and increased expense which will attend the improved service. Work upon the new ship is progressing and it is expected she will be ready when needed next season. After providing for the dividend, interest on debentures, and writing off 5% on vessel property, the balance to credit of profit and loss account stands at $98,002.16.

ASSETS.

Steamers	$707,500.00	
Less 5% written off	35,375.00	
		$672,125.00
Real estate, wharves, etc.		52,500.00
Stores		1,449.33
Accounts receivable		2,506.13
Cash on hand and in bank		115,857.16
New stock subscribed and paid	$96,300.00	
Paid on account of steamer in course of construction	40,261.94	
Balance in bank, special account	56,038.06	
		96,300.00
		$940,737.62

LIABILITIES.

Capital stock authorized	$1,000,000.00	
Subscribed and paid		$701,300.00
Debentures outstanding, 4½%		111,000.00
Interest accrued on same		2,081.25
Accounts payable		367.34
Dividend 4% payable Jan. 2, 1906—		
Old stock	$24,200.00	
New stock	3,786.87	
		27,986.87
Balance forward		98,002.16
		$940,737.62

PROFIT AND LOSS ACCOUNT.

Balance from 1904		$88,139.60
Net earnings		102,419.43
		$190,559.03
12 months' interest on debentures		$ 4,995.00
5% written off steamers		35,375.00
Dividend 4% paid July 2, 1905	$24,200.00	
Dividend 4% payable Jan. 2, 1906	27,986.87	
		52,186.87
Balance carried forward		98,002.16
		$190,559.03

Following is a comparison of net earnings for the past five years:—1901, $100,294.21; 1902, $52,158.63; 1903, $75,686.54; 1904, $67,760.57; 1905, $102,419.43

On the motion for the adoption of the report, E. B. Osler and Barlow Cumberland warmly praised the Manager, B. W. Folger, for his excellent work, and it was pointed out that the earnings were the largest in the history of the company, having even exceeded the Pan-American year.

A by-law was passed providing that at all special and general meetings of shareholders three shall form a quorum, provided the total number of shareholders does not exceed 10, and that if there be more than 10 shareholders then there shall be added to the number for a quorum, one for each 15 additional shareholders up to 60, and one for each additional 20 shareholders over 60, provided that the quorum required shall in no case exceed 10. Persons represented by proxy are to be counted as being present. Another by-law

was passed changing the date of the annual meeting from the second Tuesday in Dec. to the second Tuesday in Jan.

The directors' remuneration for 1905 was fixed at $2,000.

The directors were re-elected, the board for the current year being constituted as follows:—President, E. B. Osler; Vice-President, Barlow Cumberland; other directors, Hon. J. J. Foy, W. Hendrie, J. B. Macdonald, R. H. McBride, C. Cockshutt.

The Grounding of the Virginian.

Judgment has been given in the matter of the investigation which was held at the Admiralty Court, Quebec, on Sept. 13, 1905, before Commander O. G. V. Spain, R.N., Wreck Commissioner, assisted by Capt. John Temple, master mariner, and A. Larochelle, President Corporation of Quebec Pilots, assessors, into the causes which led to the stranding of the British S.S. Virginian on Crane Island, River St. Lawrence, on Sept. 1. The judgment, which was unanimous, is as follows:

On Aug. 20, 1905, the S.S. Virginian sailed from Antwerp, bound to Quebec and Montreal. That she proceeded on her voyage, nothing particular occurring until Aug. 31, at 2.50 p.m., when off Father Point, Pilot Jos. Pouliot, who holds a branch for and below the harbor of Quebec, was taken on board. On Sept. 1, at 1.45 a.m., the channel gas buoy was abeam, and at 1.55 a.m. Pillars Light abeam, the weather being moderately clear, but with several patches of smoke close to the water. At this time the engines were slowed and the master, on the advice of the pilot, gave orders to prepare to anchor for the remainder of the night. At about 2.40 a.m., the smoke apparently clearing away, and the lights showing brightly, the Virginian being then abeam of the Beaujeu Bank east end gas buoy, the pilot countermanded the order to anchor until the vessel was through the Narrows, the said vessel at that time was going slow, and the tide being about half flood. At 2.55 a.m. the Virginian passed close to the Beaujeu Bank west end gas and bell buoy, still going at slow speed, and the helm was starboarded in order to bring the vessel into the main channel. The ship immediately answered her starboard helm and she was "steadied" by orders of the pilot, when her head fall off to starboard again. At this point the helm was put hard a-starboard, but the engines going dead slow, the ship, no doubt on account of her slow progress through the water, refused to answer her helm; the engines were then put half-speed and the ship's head began to come round. On seeing this the pilot ordered her slow again, but at this moment she grounded and remained fast. At the time of the disaster, the pilot, captain, second officer and quartermaster were on the bridge, and the orders of the pilot, who was in charge of the navigation of the ship, were carried out in every detail. By the evidence adduced, on one other occasion some years ago, difficulty was experienced by the pilot in charge of the Virginian at the time by the ship not answering her helm promptly; but the Court finds in this particular instance Pilot Jos. Pouliot, who was in charge, is to blame for not paying proper attention to the speed of his ship, and also for not giving her sufficient starboard helm after passing the Beaujeu Bank west end gas and bell buoy. Taking into consideration Pilot Jos. Pouliot's previous excellent record of 26 years without a mishap, his certificate as a branch pilot for and below the harbor of Quebec is suspended until Sept., 1906. The Court also finds that Capt. P. F. Donnelly and officers of the Virginian are in no way to blame for the casualty.

Harbor and Canal Construction in 1905.

For the year ended June 30, 1905, there was expended on capital account by the Dominion the following amounts on canals, harbors, and survey works in connection with the projected Georgian Bay-Ottawa canal:

PUBLIC WORKS DEPARTMENT.

Montreal Harbor	$186,350.11
Port Colborne Harbor	121,187.28
Quebec Harbor	149,990.67
River St. Lawrence Ship Channel	664,677.42
Georgian Bay to Montreal Waterways survey	251,540.96
St. Andrew's Rapids	4,014.33
	$1,377,760.77

RAILWAYS AND CANALS.

Lachine	$112,460.47
Sault Ste. Marie	110,181.69
Rideau	1,565.84
Trent	333,261.75
Welland	890,457.82
Murray	100.00
Cornwall	104,093.45
Farran's Point	8,108.99
Galops	343,071.99
North Channel	93,025.89
Rapide Plat	8,109.98
St. Lawrence River	25,743.51
Soulanges	34,202.71
Williamsburg	8,209.63
	$8,197,075.51

Among the Express Companies.

The Canadian Ex. Co. has opened an office at Maple Lake, Ont.

The Western Ex. Co. is preparing to erect a concrete building for its offices at Marquette, Mich.

T. D. Stanley, Agent Canadian Ex. Co., and the G.N.W. Telegraph Co., St. Marys, Ont., has been appointed police magistrate for that town.

The Christmas and New Year's traffic is reported by officials of the Canadian and Dominion Ex. companies to have been the heaviest for years.

The Maritime Ex. Co. has adopted the Canadian Ex. Co.'s produce, or general special scale, also the scale on shipments of 500 lbs. or over. On sec. D matter destined for Lunenburg, N.S., a minimum of 7c. must be charged for each company.

The Dominion Ex. Co. has opened offices at Curzon, Harrison Mills (formerly Harrison), Harrison Siding, Jakeson, McCoy, Tromp Jct., Sumas Jct. (formerly Huntington Jct.), B.C.; Kroneau, Overee, Sask.; Canadian Northern Jct., Christie, Creeford (formerly Dooley), Dalny (formerly Corona), Gravity, Kaleida Jct., Lydiatt (formerly Eggo), Man.; Argentine, Boyce (formerly Boyce Lake), Divers, Gillies Depot (formerly Cassidy), Johnson's (formerly Johnny Lake), Rabbit Creek, Lomond, Mississauga, Wakami (formerly Winnebago), Wayland (formerly Windermere), Ont.

The Hamilton, Ont., str. Turbinia reached Kingston, Jamaica, Jan. 8, from Halifax, N.S. She experienced bad weather on the trip, and sustained considerable damage to her fittings. Repairs were made at Kingston before she commenced the run between that port and other points in Jamaica and Cuba for the winter months.

Capt. Amundsen, who has just sailed through the north-west passage, that is to say he has sailed from the Atlantic to the Pacific Ocean by the Arctic Ocean, has made a number of valuable observations in regard to the magnetic pole, etc. The value of these observations is being worked out by the authorities and will not be given out for some time. The vessel in which the passage was made grounded at one point in 9 ft. 6 in., and at no place was deep water found. The result of the trip shows that the long sought for north-west passage is not deep enough for vessels of commercial tonnage.

THE
Wabash System

Is the Great Trunk Line between the east and the west, the short and true route from Canada to Hot Springs, Ark., the greatest health resort in America, Old Mexico the most interesting country on the face of the globe, Texas and California the lands of sunshine and flowers. Telegraph and Cable Matters.

The DeForest Wireless Telegraph Co. is erecting a tower and station at Toronto Junction, Ont.

The C.P.R. Telegraph Department is constructing a new telegraph line into the Nicola Valley, B.C.

Two of the operators at Cape Sable wireless telegraph station left without notice at the end of 1905, and the chief operator had to do night and day duty until new assistants were secured.

The Toronto Assessment Commissioner has increased the assessment of the C.P.R. telegraphs by $59,592, and the G.N.W. Telegraph Co.'s property in the city by $53,881, over the figures for 1905.

The Canadian Northern Telegraph Co. has completed its line into Prince Albert, Sask., where an office has been opened. It has also completed stringing an additional wire from Brandon to Neepawa, Man.

During the last weeks of 1905 an average of about 13,000 messages a day were handled at the cable office of the Western Union Telegraph Co. at North Sydney, N.S. The largest number of cable messages handled in any one day was 13,898.

The Canadian Northern Telegraph Co. has completed its line into Edmonton, Alta., and has established a night and day commercial service. Pending the completion of the station temporary accommodation was provided in a box car.

The Western Union Telegraph Co. installed an electric light and power plant at its cable station, Canso, N.S., recently. At the station of the Commercial Cable Co., at the same place, an additional cable to Great Britain, and a new cable to Newfoundland, were completed during 1905.

Fanning and Washington Islands in the South Pacific Ocean are being offered for sale under instructions from the Registrar of the British High Commissioners' Court for the Western Pacific. Fanning Island is the mid-ocean station of the British Trans-Pacific cable connecting British Columbia and Australia.

T. W. McKenzie, C.P.R. station agent, Kenton, Man., has taken out a patent in Canada for an automatic call telegraph instrument which he claims will call any office the operator may desire, sign his own call, and do it perfectly. As soon as the office called breaks in, his machine instantly stops, closes his key automatically, and allows the other operator to answer the call, or call whomsoever he desires.

The U.S. Government's cable and wireless telegraph service between Seattle and Nome and St. Michael, Alaska, is reported to be a thorough success. The wireless telegraph is operated over a section of 107 miles. During 1905 over a million words were transmitted, and as many as 2,000 words an hour have been sent. There were 134,630 messages transmitted in addition to official messages. The commercial messages were largely code, and no repetitions were asked for over the wireless section.

The Department of Marine proposes to have a stricter enforcement of the law in regard to compass adjustment, and the certificates of masters and mates than heretofore. and the inspectors at the various ports have been notified in regard to these matters. Reports from the U.S. state that lack of knowledge of the compass has been responsible for many of the losses on the Upper Lakes during 1905, and the Pittsburg Steamship Co. has directed its navigating officers to attend schools of instruction during the winter and take up the use of the compass and course correction.

General Telephone Matters.

A by-law was passed at Fort William, Ont., Jan. 1, authorizing the improvement of the municipal telephone system.

The Bell Telephone Co. has completed the stringing of a new long distance line between Kingston and Brockville, Ont.

The Wallacetown and Lake Shore Telephone Co. has been asked to extend its line through Eagle to West Lorne, Ont.

The telephone, street railway and electric lighting systems at Port Arthur, Ont., are reported to have yielded a profit of $23,145 during 1905.

The special legislation affecting the Bell Telephone Co. is responsible for a reduction in its assessment in Toronto of $250,142 from the amount at which it stood in 1905.

The Mayor of Ottawa in his inaugural address declared himself in favor of government ownership of long distance telephone lines and of municipal ownership for local lines.

The New Brunswick Telephone Co. has opened a new line from St. John, serving Point Lepreaux, Mace's Bay, Dipper Harbor, and Chance Harbor, at which points offices have been opened.

The telephone line between Penticton and Peachland, B.C., is expected to be completed early in Feb. Some delay was occasioned in the construction by reason of the non-receipt of the wire from England.

The improvement and extension of the telephone system in Edmonton, Alta., is under consideration by the city council. It is proposed to standardize the system, and to introduce an automatic switchboard.

The Little Nation Telephone Co., which has lines connecting Portage la Nation, St. Andre Avellin, Ripon, Seguin, Cheneville, Namur, and St. Emile de Suffolk, Que., has completed an arrangement for a connection with the Bell Telephone Co. at Papineauville, Que.

The Wallacetown and Lake Shore Telephone Association has its offices at Wallacetown, Ont., its officers and directors for the current year being:—President, T. Lunn; Secretary, Dr. Crane; other directors, J. Watkins, J. Steel, Geo. Braddon. A dividend of 10% was declared at the annual meeting held Dec. 29.

The Central Telephone Co. has acquired the property and charter of the Sackville Electric Light and Telephone Co., Sackville, N.B. A number of persons are interested in both companies, and are accepting stock in the Central Telephone Co., in payment for their interest in the S. E. L. and T. Co. The transfer was made Jan. 1.

The Bell Telephone Co. has given notice that it will apply for a writ of certiorari to have a revision in the Superior Court of the decision in the Montreal Recorder's Court declaring that the civic by-law imposing a tax of $5 on slot machines applied to the company's slot telephones. The Recorder fined the company $10 for operating each telephone without a license.

The Bell Telephone Co. has created a new office, that of General Manager and L. B. MacFarlane, heretofore General Superintendent at Montreal, has been appointed thereto. He is succeeded by C. F. Sise, Jr., heretofore Assistant General Superintendent. W. H. Hayes, heretofore district manager at Windsor, Ont., has been appointed District Manager for Manitoba and Saskatchewan; districts no. 3 and 4 will be combined under J. L. Richmond.

The Grand Manan Telephone Co. has been incorporated under the New Brunswick Companies' Act, with a capital of $2,000 and offices at Grand Manan, to construct telephone

lines principally on the island of Grand Manan, and to make connection by cable with any of the smaller islands adjacent thereto. G. E. Dalziel, Castalia; F. Ingersoll, North Head; W. A. Fraser, Woodward's Cove; I. Ingalls, Grand Harbor; J. W. Wooster, Seal Cove; all in the parish of Grand Manan, are the provisional directors.

Application will be made next session of the Manitoba Legislature for an Act incorporating a company with the title of the Independent Telephone Co. (Ltd.), with power to construct, maintain and operate a system of local, municipal and toll telephone lines, and to assist in and promote the incorporation of subsidiary companies for municipal purposes with similar powers. T. A. Potter, of Mason City, Iowa, and C. H. Webster, of Minneapolis, Minn., are interested in the proposal, and have been in Winnipeg recently in connection with the application.

The Canadian Independent Telephone Association, represented by its President, Dr. J. F. Demers, appeared before the Dominion Tariff Commission at Quebec, Dec. 29, and asked that the tariff be varied so as to enable the independent telephone companies to import their instruments, batteries and other supplies at a reasonable price. There were, he said, over 150 of these independent companies or associations in active operation in Canada, some having a dozen subscribers, others a couple of hundred or so, while some had more than a thousand. The average number of subscribers would be 60, who would all be stockholders. The smaller associations and companies were at present co-operative and largely non-commercial, that is, not run for profit, and in most of them each subscriber is a shareholder. The duty is 25%, and the purchasers also paid the freight, the supplies being sold f.o.b. at the factories in the U.S. The independent companies had tried instruments made in Canada, but, he claimed, they had to abandon them as inferior.

The Railway Stores Department and its Relationship to Other Departments.

By J. H. Callaghan, General Storekeeper, C.P.R.

The various suggestions as to system, method, principle, etc., offered in this paper are drawn up in the main from the method which is in vogue on the C.P.R., but which should in a large measure be applicable to any well-organized railway system or large manufacturing industry. The relationship of the stores department to all other departments on any railway system is a matter of vital import, and when it is taken into consideration that this relationship spreads over an area incorporating officers from the section foreman to president it will be readily understood no little amount of time, thought, tact, and diplomacy must be given apart from the established system of handling the department's business to engender or promote harmony between the stores and the various other officers that the best results may be obtained. There are many ways in which this good-fellowship may be brought about. The best and shortest in my experience is, being able to fill orders for material promptly when and where required. Needless to say, this is a condition much desired by all good store-keepers, but, from various conditions, particularly in Canada, where the markets are not yet in form to allow of this golden rule, it is not always possible to fill requisitions as promptly as the storekeeper would like, and it is from delays to work consequent upon the inability of the storekeeper to supply the necessary material at a time when it is urgently required that much of the dissatisfaction between the stores and other departments is brought about. Fortunately, conditions are changing much for the better, and we are gradually drawing nearer to the time I hope when the much hackneyed phrase "Waiting material," will be a thing of the past. In anticipating the needs and requirements of a great system like the C.P.R., the hearty assistance and co-operation of the mechanical departments' officers, by this I mean the locomotive and car departments, is of much value and to be desired, andno effort is spared to bring this condition about. I would like to say something about the relationships existing between the stores and operating officers but, on account of the length of this paper, I am with much reluctance obliged to reserve the remarks.

Our general storehouse is located at the Angus main shops at Montreal for many reasons, some of which follow:—This location allows of local distribution to the various shops, as well as shipments to the line from the one stock and by one staff. By this concentration the work is handled upon such a large scale as to allow of departmentalizing it and placing efficient men in these departments to properly conduct the specific lines of material carried in them. The offices of the Superintendent of Motive Power and Master Car Builder are located at the main shops, so also is that of the General Storekeeper, and this condition of nearness allows of prompt action being taken at a time when delays to cars or locomotives for want of certain materials occurs. I have found in my experience railway officers can do more satisfactory business in a ten minute chat than is often done in a week's correspondence. I might continue indefinitely to cite my reasons for this location of the general store, but as I deal later on in this paper with the different departments which go to make up the whole the few reasons offered will in a measure bear me out.

WILLIAM WHYTE,
Second Vice-President Canadian Pacific Railway.

The area of our lumber piling yard is something like 40 acres, which is practically divided into two sections, one being used for material required for the construction of sleepers, coaches, etc., and the other for freight car equipment, orders, and repairs. The yard as laid out has 25 tracks, from which cars can be loaded or unloaded conveniently. Ample facilities for the drying of lumber are furnished by two kilns, which are located in the lumber yard, and which have a holding capacity of 140,000 and 280,000 feet respectively. Then again, there is a shed provided for the kiln-dried lumber with a capacity of 500,000 feet. In addition to inspecting, culling, and tallying all lumber as it comes into the yard, the greatest care must be exercised in seeing that the same is properly and neatly piled for air drying and secured as far as possible from the effects of the weather. None the less important, however, is the matter of inspection and tallying, and to give you some idea as to the accuracy we aim at in this connection the following concise outline of our method may be of interest. When a car of lumber arrives in yard and is placed at proper piling ground, a checker and a proper complement of help is detailed to unload it; when completed the tally card is handed into the lumber office, where it is properly compared with shipper's advice, and if any material discrepancy is found it is at once rechecked by the foreman or office man (often both) to verify the correctness of the tally. All differences such as culls, shortages, and overages are shown on face of invoice before same is passed for payment, and the final settlement of such differences is arranged between the General Purchasing Agent and shipper. A correct record of all tallies is kept in a book for the purpose, which shows car number and initial, date of receipt, description of material, number of pieces and feet, price, requisition number, name of shipper, and all details in connection therewith.

The method of supplying lumber from the yard to the various shops is somewhat as follows:—Memo orders are sent to the yard by the different foremen, who are properly authorized to issue them and given to the checkers who deal out the amount required and charge same to the account shown on the order. These orders are promptly turned into the lumber office, where they are entered into a book, from which statements are made daily and sent the General Car Foreman for examination as to their correctness. From these statements proper shop requisition forms are made and sent the lumber foreman, who checks them with his record and passes them on to the office, where they are charged up to the various accounts for which they were issued.

The stock books carried in the lumber yard

Galena-Signal Oil Company,

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated Galena COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

Guarantee cost per thousand miles, for from one to five years, when conditions warrant it.

Maintain Expert Department, which is an organization of skilled railway mechanics of wide and varied experience.

Services of Experts furnished free of charge to patrons interested in the economical use of oils.

CHARLES MILLER,

PRESIDENT.

are drawn up on much the same lines as the standard stock book in general use in the department, with the exception that receiving and day books take the place of stock cards. At the end of each month the stock books are extended and balanced, the balance showing the amount on hand of each item of lumber in stock. From these books a detailed statement is prepared and sent to the office of the General Storekeeper showing the stock in pieces and feet and total value of same. A duplicate of this statement is also sent the Master Car Builder or General Car Foreman for his information.

As an illustration of the import attaching to this detail of the stores department, the following figures are interesting:—For the 10 months ended Oct. 31, 1905, there were no less than 2,350 cars of lumber unloaded and piled, a total of 28,188,000 ft., or an average of 113,000 ft. daily. The quantity delivered to shops and shipped on the line for the same period amounted to about 4,000,000 ft. in excess of these figures, or an average of 130,000 ft. per day. The stock carried for all purposes during the present year has varied from 8,000,000 to 13,000,000 ft., board measure, of which quantity 1,500,000 are carried for the purpose of supplying outside points and repair work, the balance for new equipment orders. The woods carried in this stock range from the ordinary spruce, pine, birch, and oak used for freight car construction, to the rarest imported woods used in finishing the up-to-date passenger rolling stock of the company.

Up to the present we have not been provided with a proper plate rack, but an appropriation covering the cost of one has been approved, and we expect in a short time to have our steel plates and boiler tubes properly housed. This expensive class of material is now carried at the west end of our locomotive and erecting machine shop, where proper piling ground has been laid out for it and excellent trackage for the prompt and economical handling of cars is available. We have in this yard a self-propelling crane of five ton capacity working most of its time loading and unloading and placing tires, wheels, axles, etc. This machine has practically done away with the services of a labor gang heretofore employed in this yard. A flat car loaded with an assortment of steel plates can now be unloaded and the various sizes of plates put on the proper piles in something like 30 minutes.

Tires are unloaded from cars by means of a chain sling attached to the crane and are swung round into their respective groups without double handling. Axles, wheels, bolsters and brake beams are handled in much the same manner. The crane is sometimes used for shunting purposes, and I have known months when 80 to 100 cars have been moved by it, so that our switching problem in so far as this part of our yard is concerned does not affect us very much.

The stock book incorporating the contents of this yard is the same as is in general use, and it is from this record the statement of locomotive tires, steel plates, etc., furnished the Superintendent of Motive Power monthly is made.

Our wheel foundry has capacity for daily output of 300 wheels, and during the past year 80,204 wheels were turned out of it. In order to allow of this large output something like the following raw metals were used:—Charcoal pig iron 9,506 tons, Malleable scrap 700 tons, scrap wheels 12,680 tons; total 22,680 tons. The cast wheels for the entire system are shipped from this foundry, so also are wheels for new rolling stock orders.

In the Grey iron foundry we have a daily output of 30 tons, and during the past year 8,373 tons of all kinds and patterns of castings have been delivered to the shops and shipped from one end of the road to the other. Apart from coke, sand, etc., 8,626 tons of metals were used in turning out these castings.

The entire intake and output of these foundries is charged to the General Storekeeper, so that great care is necessarily exercised in checking shop deliveries and line shipments to see that proper credits accrue to the General Storekeeper in his earnest endeavor to reduce his stock balance. The method of record keeping for these foundries is the same as is in use in every other unit of the department.

The handling of new and second-hand rails and fastenings is a subject which, while coming under and being a part of the General Storekeeper's business on the C.P.R., is not so arranged on many other railways, so that I will treat this detail more from a C.P.R. standpoint than otherwise. During 1905 the company placed orders for 81,000 tons of standard 80 lb. rails, say 650 miles, and the necessary fastenings. This order covered shipments for the company's new lines in Ontario, together with allotments for the various Eastern Line Divisions, while the bulk of the shipments were made to Western Lines. Our method of handling new rails, the details of which would be of little interest to you, worked so satisfactorily last season that this deal has long since been cleaned up, and we are now working on an order for 70,000 tons, being part of 1906 season's orders.

The second-hand rail business, however, is a very different proposition, the main difference being with the new rails; the mill man has them and is glad to sell them and make prompt delivery, whereas, with the second-hand rail the superintendent, roadmaster, or possibly the section foreman has them sometimes hidden away in an old ballast pit or some other out of the way place, and they are anything but anxious to make prompt delivery, or for the matter of that, delivery at all, and this is just where the relationship of the General Storekeeper with the superintendent, roadmasters, and others get so close at times as to be almost pleasant. We have centralization yards for these rails located at various points on the several grand divisions. These yards take care of the rails picked up from the different districts on the division where they are located. In these yards I have stored at the present time something like 240 miles, or 22,900 tons of second-hand rails properly sorted and easily available for prompt filling of properly approved requisitions. In classifying these rails, all fit for main line of the different weights are kept in separate piles, so also are the rails fit for branches and sidings, while battered, piped, curve worn, and bent rails are put aside to be put through the rail saw and bender. All second-hand rails received at these yards are carefully checked by competent track men, so that none but the best of them enter into service again.

Of all the interesting shops at Angus, the frog and switch shop has perhaps a little more business interest for the stores department than any other. This shop, which I think will compare favorably with anything of its kind in the country, so far as its equipment, layout, and certainly turnout is concerned, is a feature by itself. From this shop the total switch material for the whole system is supplied. To give a brief idea as to what this means, the following figures may be of interest. During the year to date there has been delivered from this shop to the line the following switch material:—2,500 spring and rigid frogs; 1,755 switch stands; 1,550 split switches; 64 diamond crossings. In the construction of this new work, together with the thousands of switch rods, head chairs, step chairs, connection plates, etc., and the repairs to similar material, something like the following new material was used:—975 tons standard 80-lb. rails, 300 tons b.b. iron, 450 tons grey iron, steel and malleable castings. This shop, though operated by the mechanical department, is exclusively a manufacturing material plant, and in this sense is a branch of the stores department.

The question of scrap handling is of such import to a railway company I do not care to exclude it from this paper; at the same time there has been so much written on the subject there does not appear to be much left for me to tackle. However, as we have a system very much our own of taking care of scrap on the C.P.R., I will endeavor to outline it and point out wherein it differs from methods in force on many American lines. All scrap material is the property of the General Storekeeper and is subject to his instructions no matter where located, same as new material. Scrap statements are made up at the various divisional and other points of the different divisions each month and forwarded to the office of the General Storekeeper. These reports are carefully gone over and a statement prepared showing all saleable scrap, and the same is sent the General Purchasing Agent with request to dispose of it. While our scrap sales amount to a very large figure, by far the majority of our scrap is not sold, but used in our own works. In this particular we differ from nearly all other railways with possibly a few exceptions. Our wheel foundry takes care of all scrap wheels and a very large percentage of scrap malleable couplers and steel knuckles, while our grey iron foundry takes care of all scrap castings. These are the two largest items of scrap accumulations. In our coach and car blacksmith shop many scrap axles are used for coach equalizers, and tons of iron rods are here straightened and made up into bolts, etc. In the locomotive blacksmith shop something like 3½ tons of good, clean, practically the best no. 1 scrap is used per day for blooms which are worked up into frames, frame legs, side rods, etc., so that while the same interest attaches to scrap handling on the C.P.R. as exists on other roads the interest runs in a somewhat different direction, namely, that of discriminating between material which can be further used by the company and that which should be sold. All scrap is brought in from the line to the general scrap dock at Angus, excepting certain saleable scrap at Toronto Jct., which is sold to Ontario mills to avoid hauling to Montreal, which is our principal scrap market. When the scrap arrives at Angus it is placed along either side of the scrap dock, where it is unloaded into properly classified bins, and it is from these bins the locomotive and car departments pick the material which is considered fit for further service, it being understood the residue is sold in the open market. We have at Angus a very up-to-date scrap dock and, with the addition of a few machines for breaking off coupler straps, cutting, and straightening rods, which we expect to get in the near future, we hope to take a place with the best in the scrap handling business.

Surplus and obsolete material is a subject which cannot be given too much attention and I find on many of the American lines is gone into as a specialty and with very satisfactory results. During the past year we have made fair headway at cleaning up our outside points, but there is still a lot to do at headquarters. Fortunately the majority of this class of material with us consists of castings and forgings brought about from alteration in patterns and changes in design of locomotives and cars. Another cause, however, for the carrying of surplus stock at outside points is traced to the numerous changes of the various types of locomotives from one division to another, and the consequent ordering by the other fellow of repair parts from the general store when the repair parts in stock of the division from which the engines have been transferred might just as well have accompanied the engines if the official responsible for the transfer would only advise the General Storekeeper. We are now having

monthly statements made from out line stock books of all materials stocked three months and over, and from these lists shipping directions are issued from time to time as requisitions present themselves, thereby reducing the demands on the general store and General Purchasing Agent. During 1905 the figures representing the sales of scrap, surplus, and obsolete material apart from the value of the quantity of this class of material further used in our own works was the largest in the history of the department, and while this showing is interesting and satisfactory, I know with the co-operation of all interested in the ordering and using of material a vastly better showing is easily within reach.

While we have always had supply cars in commission on the C.P.R., it was found necessary at the beginning of last year to rearrange the service of these cars. Prior to date mentioned we operated the cars from the following divisional stores:—Hochelaga general stores for the Eastern and Lake Superior Divisions. Toronto Jct. for the Ontario Division. McAdam Jct. for the Atlantic division. But, with the steady growth of business and increase in mileage necessitating opening up of additional stations, etc., it was deemed essential this important arm of the stores department be reorganized to allow of the cars covering a greater area, and at the same time aim at cutting in on the alarming demands made on the cars for supplies, and I may say up to the present the results have been most gratifying. With the true spirit of centralization I decided to operate all supply cars from headquarters, or properly speaking, Angus general store, and with this object in view I brought the supply car men in from the Ontario and Atlantic Divisions, together with the stock carried for the cars on these divisions, and rearranged the routings of the service. Circular letters were issued to the various operating officers, and the new service went into effect without a hitch. Apart from the savings already made by these cars, which more than offsets the cost of three modern up-to-date ones, and which I hope to get into service this year, the new system makes possible the following improvements, which were only obtainable in a small measure under the old method:—Reduces baggage shipments and the consequent complaints to such a degree as to almost wipe them out. Does away entirely with waybilling, packing, and boxing at the general store. Delivers goods promptly and allows of the collection of the worn out material the new issuance is required to replace. Avoids complaints as to shortage and practically makes the lost, short, and over report, brought about by transfer in freight shipments, a dead letter; finally the relationship of the stores to the operating department is brought nearer.

As we have on the Eastern Lines of the system 37 storekeepers and foremen in charge of supplies, the question of uniformity in handling business at these different points is a matter which requires a good deal of attention, and this is where the department's inspectors can do a lot of valuable work. In the inspection of railway stores there is a great field for the right man, perhaps not so much in the up-to-date divisional store as in the far-off car repairer's shack or section foreman's tool house. These are the places where he picks up valuable information as to the delays to cars waiting material, and section gangs walking to work on account of the hand car which was sent to shops for repairs some time before not being returned, and many other items of similar interest, all of which are promptly reported to headquarters, where every effort must be made to relieve these conditions. Then again, there is the system of dropping into the different supply cars as they go over their respective routes and see that proper dispatch is given them and proper and efficient service in the issuance of supplies is given agents, section foremen and others.

The records kept at the various outside points as to material carried, ordered, and disbursed are all carefully checked from time to time by the inspector, and reports of such inspections are sent the General Storekeeper. Not only are records gone over, but the actual stock carried is checked, and questions of shortage of material, surplus stock carried, etc., are gone into. If inspection be made at one of the larger repair yards the inspector goes over the ground with representatives of the locomotive and car departments as well as the storekeeper, and it is from this healthy co-operation between departments only that the best results as to an efficient and thorough inspection can be obtained.

There is not a department on any railway system which offers better opportunities to grasp railway generalities than does the stores department, and in this connection I might instance the names of some of the foremost railway men of the present period who have risen from its ranks:—S. F. Forbes, General Purchasing Agent, Chicago, Rock Island and Peoria, formerly Storekeeper of the Chicago and North-Western; J. A. Whaling, General Purchasing Agent, Wisconsin Central, who succeeded our President as General Storekeeper on the Milwaukee Road; Sir Thos. Shaughnessy, President of the C.P.R., and a long list of others. At the same time I know of no other department which offers the same field for criticism, but, so long as the criticisms are of a good healthy nature, and tend to bring about practical and economical results, they are to be encouraged rather than scoffed at.

The foregoing paper was read at a recent meeting of the Canadian Railway Club.

Early Railroading in Manitoba.—Col. McLennan, of Cornwall, Ont., has in his possession a telegram giving the first order for the running of a passenger service on the line from Emerson to St. Boniface, Man., on what is now the Emerson branch of the C.P.R. He was then in charge of construction of that branch for the contractors, Upper & Willis, who sent him the following telegram from St. Paul, Minn., on Dec. 6, 1878:—"Have our engine take caboose and coach from St. Paul and Pacific at the Y on arrival of Crookston train daily except Sundays running through to St. Boniface. Leave St. Boniface daily, except Sundays, at 4 a.m., St. Paul time, arriving at St. Vincent Y at 8. Stop at Mennonite Crossing, Rat River, Rosseau and Emerson. This order to take effect Saturday, Dec. 7, 1878. Do not touch any freight until ordered. Charge $3.25 fare through each way, and 5 cents per per mile for way passengers."

Riley & Co., Marine Underwriters, Montreal, wrote us recently:—"We must compliment you on your journal's size and the volume of information it furnishes. It has grown greatly, and we trust it will continue to grow and flourish with the growth of the country."

The C.P.R. and the G.T.R. baggage departments have arranged to issue parcel tags to the merchants of Montreal for use in addressing parcels of out-of-town residents who desire their purchases to be delivered at the companies' parcel rooms to be called for. The circular announcing the arrangement says that parcel tags will be supplied by the baggage masters of the companies at either of the Montreal stations; the tags will have a duplicate and a third numbered coupon; the duplicate will be given to the purchaser, and the third coupon will be detached at the parcels room and given to the delivery man as a receipt for the parcel. A charge of 5c. per parcel will be made, provided they are claimed within 24 hours, and a further charge of 5c. per 24 hours will be made for parcels not so removed.

The Canadian Car Service Rules.

The following memorandum was issued by the Board of Railway Commissioners under date of Jan. 25:—

Numerous complaints and objections have been presented to the Board of Commissioners respecting charges made by railway companies for demurrage or delay in the loading or unloading of cars by shippers or consignees, and the rules governing such charges. Some of these complaints and objections go to the foundation of the charge, and challenge its legality. Others relate only to the rate, or to the rules or their administration. The practice of railway companies, before the constitution of the Board, was to charge lower tolls on goods in carload lots than for less quantities. This practice was sanctioned by the freight classification, and has been followed in the tariffs authorized by the Railway Act, 1903. It appears to the Board to be reasonable that railway companies which deliver cars to, or place them at the disposal of, shippers or consignees, for loading or unloading, should have some means of limiting the time to be occupied in the loading and unloading, and should impose a reasonable additional or increased toll on traffic carried at carload rates for any detention or use of the cars, or continued occupation of its tracks, beyond such time as is reasonably required for loading or unloading. From the public point of view, it seems to the Board that such a practice affords only a fair and just distinction between those who exercise diligence and those who do not, and is of general advantage in encouraging the rapid release of railway cars for further use. After careful consideration, the Board is of opinion that it is lawful for railway companies to make the carload rates higher in cases in which such delay occurs than in those in which it does not, and that it is within the power of the Board to determine the amounts of the additional tolls, and to make general rules and regulations governing their imposition.

In some cases parties have asked that the allowance of the charge be made conditional upon a provision for what has been called "reciprocal demurrage," or some penalty or charge for delay by railway companies in supplying cars, or in receiving, transporting, or delivering traffic. This latter subject requires more investigation and consideration than the Board has yet been able to give to it. The Board deems it advisable to provide, as soon as possible, for the substitution of an improved set of car service rules, without the delay that would be necessary for investigation of and determination upon the other subject.

The Board has also been asked to allow an average to be struck of the times occupied in loading and unloading various cars, giving credit to parties for surplus time not used as against over-time. The Board does not think that there would be many cases in which this would result in any considerable advantage to such parties, and apprehends that any such advantage would be more than compensated for by the introduction of complications and grounds for dispute.

Objection has been made to the Board against the system by which several railway companies have joined in an association or bureau for investigating cases of delay in the loading or unloading of cars, and enforcing their charges therefor. This appears to the Board to be a matter of internal management on the part of railway companies with which the Board should not interfere. It would be quite competent for any railway company to constitute a separate department and appoint separate officials for the management of this part of its business, and there seems to be no reason why several railway companies should not appoint joint officials for

the purpose, or commit this work to a joint department. This system appears to offer some advantages in the way of securing greater uniformity in administration, and providing some check on discrimination. The Board hopes that railway companies will endeavor to secure the fair and impartial administration of the rules, and in case it is found that the giving of preferences cannot be otherwise prevented, it may be necessary to abolish the car service toll entirely. The Board can only view such a bureau as an agency, and such officials as agents of the railway companies concerned, and it has carefully avoided the adoption of any rule which might appear to confer upon any such body or officials the right of deciding disputes as between the companies and the public, or the power to bind any but the railway companies.

The impracticability of framing rules adequate for all cases is conceded, so that while these rules are made imperative, the Board expects that, when in doubt, the officer appointed for the purpose will interpret them liberally, but without unjust discrimination or undue preference. After giving every opportunity which seemed to the Board to be reasonably possible for the various interests affected to present their views upon the subject, the Board has adopted a set of rules to which it desires that a fair trial should be given. The compilation of these rules, and the settlement of numerous details, has involved a great deal of care and consideration, and has taken considerable time. The Board recognizes that some interests may not yet have had notice of the inquiries being made, or an opportunity of fully presenting their views, and that, in some details, the rules now adopted have not come to the attention even of those who have discussed the subject before the Board. On that account, although desiring that a reasonable time may be taken for a trial of the new set of rules, the Board will give careful attention to any material representations respecting them which any party may desire to make.

The new rules are intended to take effect over the whole of Canada as respects all railways under the jurisdiction of the Board.

The order, which is also dated Jan. 25, follows:—

Whereas numerous complaints have been made to the Board with respect to charges made by railway companies for delay in loading and unloading of cars, and the rules regulating the same; and whereas it appears to the Board that all such charges and rules should be disallowed, and that, in cases in which railway cars are, or are to be, loaded or unloaded by shippers or consignees, railway companies should be authorized, subject to the rules hereinafter contained, and by way of compensation for unduly prolonged detention and use of cars and use of tracks, to increase, as hereinafter specified, their tolls upon traffic carried, or to be carried, in carloads, or at carload rates; and whereas it appears to the Board to be important, in the public interest, to secure the fullest possible use of railway cars, tracks and equipment, and for that object to discourage the delay aforesaid; now, therefore, in pursuance of secs. 23, 25, 257, and 275 of the Railway Act, 1903, and of all powers possessed by the Board under the said act—It is ordered that

1. Except as mentioned in the proviso to paragraph no. 4 of this order, all tolls or charges heretofore charged or imposed by any railway company for delay in, or additional time used in, the loading or unloading of cars, whether under the name of demurrage, car rental, or car service, or otherwise, and all rules regulating the same be and the same are hereby abolished and disallowed; and all railway companies subject to the jurisdiction of the Board shall henceforth cease to impose and use the same.

2. Except as mentioned in the proviso to paragraph no. 4 of this order, every portion of any freight tariff, or bill of lading, of any railway company providing for a charge for delay in the loading or unloading of cars, or for demurrage, car rental, or car service, is hereby disallowed, and the following tolls and rules are substituted for such charges, and for the rules regulating such charges.

3. The railway companies are authorized to cancel the aforesaid portions of their existing freight tariffs, and to substitute the tolls and rules hereinafter specified, by the publication and filing of general notices in lieu of individual supplements to the various tariffs.

4. This order, and the rules hereinafter set forth, shall come into force and take effect on and from March 1, 1906; provided that nothing in this order, or in the rules hereinafter set forth, shall be deemed to apply to or affect the loading of cars delivered, or placed, for loading prior to the coming into force of this order, or to the freight delivered to a railway company for carriage before the coming into force of this order.

5. All freight traffic, in carloads or less, which is, or is to be, loaded or unloaded by the shippers or consignees thereof, shall be subject to the following rules, to be known as "The Canadian Car Service Rules":—

Rule 1. When cars are held under load, or awaiting loads, beyond the free time allowed by rule 2, for any reason for which the consignee or shipper is responsible, a toll of $1 per car per day of 24 hours, or any part thereof, shall be charged to, and paid by, the shipper, consignee, or other party responsible therefor, in addition to all other tolls paid or payable, in respect of the goods carried, or to be carried, in or on such car.

Rule 2. Twenty-four hours shall be allowed the consignee, after notice of arrival, in which to pay the tolls or charges (if any) and give orders for special placing or delivery (subject to rules 11 and 15). Forty-eight hours free time shall be allowed for loading or unloading (except as hereinafter provided). On cars placed for loading or unloading, before or at 11 a.m., the free time shall begin at 1 p.m. following; if placed after 11 a.m., the free time shall begin at 7 a.m. following. Exceptions: (a) Twenty-four hours additional free time shall be allowed for unloading coal, coke and lime in bulk, and for loading or unloading the following descriptions of lumber only, namely, boards, deals and scantlings. (b) Five days free time shall be allowed at Montreal and at tide-water ports for unloading lumber and hay for export. (c) In the portion of Canada to which the Manitoba Grain Act, 1900, and its amendments, apply only 24 hours free time shall be allowed for loading grain. (d) Twenty-four hours additional free time shall be allowed for clearance of customs, where the destination is a port of entry, making the allowance for clearance of customs, and for giving, placing or delivery orders, 48 hours in all. Where the destination is not a port of entry, 48 hours shall be allowed for clearance of customs at the outside port of entry.

Rule 3.—No car service toll shall be charged for Sundays or legal holidays.

Rule 4.—Car service tolls shall not be collected from the consignee for any delays for which the customs officials may be responsible.

Rule 5.—Cars shall be so placed as to be easily accessible at all times during the period allowed for loading or unloading. At stations where such placing is at the time reasonably practicable, cars shall be placed so as to be easily accessible on both sides. Time lost to the shipper or consignee through interruption, either by movement of trains or shunting of cars, or any other cause for which the railway company is, or may be held to be, responsible, shall be added to the free time allowance.

Rule 6.—If wet or inclement weather, according to local conditions, renders loading or unloading impracticable during business hours, or expose the goods to damage, the time allowance shall be extended so as to give the full free time of suitable weather. But if the parties neglect or fail to avail themselves of the first 48 hours, or 72 hours, as the case may be, of suitable weather, they shall not be allowed additional free time by reason of such neglect.

Rule 7.—When, owing to conditions for which the railway company, or connecting railway companies is or are responsible, or to any neglect or default of its or their agents or employes, or to storms or floods, or to accidents on a railway, or accident to the equipment of the railway company or companies, cars are tendered to the consignee in numbers beyond his ascertained reasonable ability to unload within the authorized free time, such additional time shall be allowed as may be necessary, with the exercise of due and reasonable diligence on the part of the consignee, to unload the cars so in excess.

Rule 8.—The consignee shall be promptly notified of the arrival of his freight, and shall be held to have been notified when notice of arrival has been delivered at his address, or place of business; provided that, if such notice be given later than 6 p.m., it shall be considered not to have been received until 7 o'clock the following morning. If notice be mailed, the consignee shall be held to have been notified at 7 a.m. of the day following.

Rule 9.—If the consignee fail to give placing or delivery orders within the 24 hours allowed by rule 2, the car shall be considered to be intended for public team track delivery and shall be placed accordingly; and, if not unloaded within the free time, such car shall be subject to the car service toll.

Rule 10.—The railway agent shall notify the consignee or his carter, on application, where his car has been placed for unloading. Any time within the free time allowance lost to the consignee in so doing, for which the railway company is responsible, shall be added to the free time allowance. If a car has been placed before 7 a.m., and at that hour the agent or his representative is unable or fails to inform the consignee or his representative, on application, as to the placing of the car and where it has been placed, then the free time shall not commence until 12 noon following, unless the consignee commences to unload before noon, in which case the time so lost to the consignee shall be added to the free time allowance as aforesaid.

Rule 11.—Freight for which the railway company holds previous or standing orders from consignee for placing on designated tracks or private sidings, shall not be entitled to the extra 24 hours allowed by rule 2 for paying freight charges and giving placing or delivery orders, but when in bond shall be entitled to the 24 hours allowed by rule 2 (d) for clearance of customs.

Rule 12.—When both cars and tracks are owned by the same private party, no car service tolls shall be charged.

Rule 13.—The delivery of cars to private tracks shall be considered to have been made when such cars have been properly placed on the tracks designated, or when they would have been so placed but for some condition for which the shipper or consignee is responsible. If cars cannot be so placed, the railway company holding them shall so notify the consignee, in order that he may have the opportunity of designating some other siding on which he is willing to load or unload, if he so desires.

Rule 14.—If, after placing, cars are ordered to another siding on the same road, at the same station to complete loading or unloading by the same shipper or consignee, the free

CONSTRUCTION DEPARTMENT

2530 FIRST ST. WASHINGTON, D. C., November 23rd, 1904

Cyclopean Iron Works,

Jersey City, N. J.

Gentlemen:

For the past year and a half, we have been constructing for the United States Government, the Filtration Plant at Washington, D C.--second largest in the world--requiring the placing of 111000 cubic yards of concrete.

Realizing that only through proper handling facilities could we hope to successfully and properly distribute this vast amount of concrete, we ordered several classes of concrete buckets from leading manufacturers. From you we obtained three buckets on trial, and found them so satisfactory that we placed an order for five additional Later on in the season, when we found our needs increasing, we again placed an order with you for six more buckets--at the same time suggesting some changes that would adapt them to our peculiar work. These last have arrived and are giving entire satisfaction.

Out of the sixty-two buckets which we have on this work, we have found that for all around good concrete work, your bucket has no superior. It is easily handled, requires practically no effort in dumping, and leaves no concrete clinging to the sides.

Yours very truly,

THE SAND FILTRATION CORPORATION
OF AMERICA.

time shall be computed from the original placing, less the time occupied in replacing the car.

Rule 15.—If, after arrival at destination, a car is reconsigned under switching arrangements, the original consignee alone shall have 24 hours in which to give orders for special placing or delivery, and he shall pay $1 a day, or any part thereof, for all time in excess of the 24 hours, so that the final free time of 48 hours, or 72 hours, as the case may be (authorized by rule 2), shall still remain to the party who accepts delivery.

Rule 16.—If an authorized employe upon a railway which performs switching services gives notice that such railway is unable to receive cars for private sidings, owing to conditions for which the shippers or consignees are responsible, then any other railway company having cars for such consignees shall so advise them, and the car service toll shall be charged until the cars on such private sidings have been unloaded or loaded, as the case may be, or until such sidings have been otherwise cleared.

Rule 17.—Cars held in transit for inspection, grading, cleaning, bagging, completion or change of load, or change of destination, under a through rate from the original shipping point to the final destination, with or without a stop-over charge, and detained over the time allowed for such purpose in the published tariffs, shall be subject to the car service toll. If such shipments are transferred to other cars, the car service tolls shall follow on the cars to which transfer is made.

Rule 18.—Manufacturers, lumbermen, miners, contractors or others, who have their own tracks and motive power, and handle cars for themselves or other parties, shall be charged car service tolls on all cars delivered to them from the time placed upon the interchange tracks until returned thereto, after allowance has been made for the time necessary for them to do the switching (not to exceed 24 hours), and for the free time authorized by rule 2.

Rule 19.—Cars shall not be held back for the purpose of evading these rules. Loaded cars held back for cause must be reported.

Rule 20.—When cars are delayed or refused by consignees because of alleged incorrectness in the railway weights or charges, car service tolls shall not be charged if the railway weights or charges are proved to be incorrect.

Rule 21.—If payment of car service tolls properly due be refused, delivery of only the car or cars on which such car service tolls are due shall be withheld, by means of sealing or locking, or by placing where such cars only shall not be accessible. If the owners or users of private sidings, or the owners of railways referred to in rule 18, refuse to pay any car service tolls which may already be due, delivery of cars to such sidings or railways shall be suspended, and deliveries shall be made on the public team tracks until such unsettled car service tolls have been paid.

Rule 22.—In this order, and the rules therein contained:—(a) The singular includes the plural, and the plural the singular, and the masculine the feminine, as the case may be; (b) Any reference to a rule by number is to be considered as a reference to that one of the foregoing rules which is so numbered; (c) The expression "car service toll" means the additional or increased toll authorized by rule 1.

The Canadian Transfer Co.'s shareholders met in Montreal Jan. 30, for the annual meeting and re-elected the following as directors:—Col. F. C. Henshaw, H. Paton, C. Cassils, G. R. Starke, Sir H. M. Allan; F M. McRobie, Manager and Secretary.

March Birthdays.

Many happy returns of the day to

W. G. Annable, General Baggage Agent, C.P.R., Montreal, born at Ottawa, Mar. 3, 1875.

P. S. Archibald, C.E., General Manager Elgin and Havelock Ry., Moncton, N.B., born at Truro, N.S., Mar. 21, 1848.

C. N. Armstrong, ex-General Manager Atlantic and Lake Superior Ry., Montreal, Que., born at Maskinonge, Que., Mar. 19, 1850.

Hon. A. G. Blair, K.C., ex-Chief Railway Commissioner for Canada, Ottawa, born at Fredericton, N.B., Mar. 7, 1844.

D. E. Brown, General Agent C.P.R. for China, Japan, etc., Hong Kong, born at Owen Sound, Ont., Mar. 20, 1855.

G. J. Bury, General Superintendent Central Division C.P.R., Winnipeg, Man., born at Montreal, Que., Mar. 6, 1866.

Allan Cameron, General Traffic Agent, C.P.R., for Great Britain and Europe, London Eng., born near Owen Sound, Ont., Mar. 14, 1864.

F. G. J. Comeau, General Freight Agent Dominion Atlantic Ry., Halifax, N.S., born at Meteghan River, N.S., Mar. 10, 1857.

A. E. Cox, Storekeeper Canadian Northern Ry., Winnipeg, Man., born at Huddersfield, Eng., Mar. 12, 1863.

H. B. Curtis, General Superintendent Newfoundland Express Co., St. John's, Nfld., born at Adrian, Ohio, Mar. 21, 1848.

Hon. L. J. Forget, President Montreal Street Ry. Co., born at Terrebonne, Que., Mar. 11, 1853.

C. O. Foss, on survey National Transcontinental Ry. in New Brunswick, born at Wentworth, N.H., Mar. 20, 1852.

H. W. Gays, General Manager Ottawa and New York Ry., Ottawa, Ont., born at Brant, Erie co., N.Y., Mar. 21, 1848.

F. Grundy, Vice-President Quebec Central Ry., Sherbrooke, Que., and President Temiscouata Ry., born at Bury, Lanc., Eng., Mar., 28, 1836.

J. Halstead, chief clerk to Assistant General Freight Agent C.P.R., Vancouver, B.C., born at Bracebridge, Ont., Mar. 2, 1877.

R. M. Hannaford, Engineer Permanent Way, Buildings and Bridges, Montreal Street Ry., Montreal, born there, Mar. 22, 1865.

W. Harty, M.P., President Canadian Locomotive Co., Kingston, Ont., born in Biddulph tp., Middlesex, Ont., Mar. 8, 1847.

C. A. Hayes, Assistant General Freight Agent G.T.R., Chicago, Ill., born at West Springfield, Mass., Mar. 10, 1865.

H. S. Heydon, ex-General Agent Canada Atlantic Ry.,New York City, born at Newark, N.Y., Mar. 28, 1861.

C. B. Hibbard, General Manager Quebec Southern Ry., Montreal, born at St. John's, Que., Mar. 31, 1858.

J. Hobson, Chief Engineer G.T.R., Montreal, born at Guelph, Ont., Mar., 1834.

T. M. Kirkwood, director Central Ontario Ry., born at Toronto, Mar. 23, 1859.

F. Lee, Division Engineer, C.P.R., Winnipeg, born at Chicago, Ill., Mar. 7, 1873.

R. W. Long, Division Freight Agent G.T.R. Stratford, Ont., born at Appin, Ont., Mar. 20, 1873.

C. E. Lytle,General Superintendent Duluth, South Shore and Atlantic Ry., Marquette, Mich., born at Newark, Ohio, Mar. 2, 1859.

D. D. Mann, Vice-President, Mackenzie, Mann & Co., Ltd., and 1st Vice-President Canadian Northern Ry. Co., Toronto, born at Acton, Ont., Mar. 23, 1853.

Owen McKay, ex-Chief Engineer, Lake Erie and Detroit River Ry., Walkerville, Ont., born in Ross tp., Renfrew co., Ont., Mar. 13, 1848.

W. C. Orchard, Chief Freight Tariff Bureau C.P.R., Montreal, born in London, Eng., Mar. 16, 1865.

H. Parry, General Agent Passenger Department, New York Central Rd., Buffalo, N.Y., born at Hamilton, Ont., Mar. 27, 1865.

R. Patterson, Master Mechanic G.T.R., Stratford, Ont., born at Brantford, Ont., Mar. 13, 1860.

J. A. Sheffield, ex-Superintendent Sleeping and Dining Cars, C.P.R., at Montreal, born at Columbus, Ohio, Mar. 16, 1845.

J. F. Slocum, Secretary-Treasurer International Ry. Co., Buffalo, N.Y., born at Geneva, N.Y., Mar. 25, 1876.

C. J. Smith, General Manager Richelieu and Ontario Navigation Co., Montreal, born at Hamilton, Ont., Mar. 10, 1862.

W. Y. Soper, director Ottawa Electric Ry. Co., Ottawa, Ont., born at Oldtown, Me., Mar. 9, 1854.

J. N. Sutherland, General Freight Agent C.P.R., St. John, N.B., born at Sydney, N.S., Mar. 17, 1843.

W. F. Tye, ex-Chief Engineer C.P.R. Montreal, born at Haysville, Ont., Mar. 5, 1861.

G. W. Vaux, Assistant General Passenger and Ticket Agent, G.T.R., Chicago, Ill., born at Montreal Mar. 21, 1866.

H. Wallis, ex-Chief Mechanical Superintendent G.T.R. Montreal, born at Derby, Eng., Mar. 10, 1844.

D. O. Wood, General Freight Agent for Ontario Allan Line Steamships, Toronto, born at Kleinburg, Ont., Mar. 16, 1864.

Canadian Ticket Agents' Association.

A meeting of the Executive Committee was held in Toronto, Feb. 6; present: W. Jackson, Chairman; W. Bunton, President; E. de la Hooke, Secretary; W. Maughan, J. P. Hanley, R. J. Craig, C. E. Horning, W. McIlroy, and C. R. Coleman. J. F. Dolan was prevented from attending owing to the death of his youngest sister, Mrs. J. M. Eagan, of Butte, Montana. There were also present, by invitation, J. H. Flock, K.C., Honorary Counsel, and Acton Burrows, Manager of THE RAILWAY AND MARINE WORLD, the Association's official organ.

Invitations for the holding of the next annual meeting were read from Mobile, Alabama; Milwaukee, Wis.; Denver, Col.; and Sault Ste. Marie, Ont., and after very full consideration Mobile was selected.

L. W. Landman, G.A.P.D., New York Central Lines, Toledo, Ohio; E. N. Aiken, N.E.P.A., Queen and Crescent Route, Detroit, Mich; and E. Britton, D.P.A., Pere Marquette Rd., London, Ont., were then invited to the meeting and gave considerable information to assist the committee in preparing an itinerary.

The annual meeting will be held in Mobile about Oct. 15. The party will assemble in Detroit, Mich., travelling thence by special train on the Wabash Rd. to St. Louis, and from there by the Mobile and Ohio. A day will probably be spent in Mobile, after which the party will proceed by Louisville and Nashville Rd. to New Orleans, La., where a two days' stay is likely to be made. From New Orleans the Queen and Crescent Route will be taken to Cincinnati, Ohio, to which city half a day will probably be devoted. Then the Cincinnati, Hamilton and Dayton and the Pere Marquette will be taken back to Detroit, where the party will disperse after a trip which is expected to occupy about eight days. The details and exact dates were left in the hands of the Secretary.

A hearty vote of thanks was passed to the public bodies in Milwaukee and Denver for the cordial invitations they had extended.

An invitation having been read from the American Association of General Passenger

and Ticket Agents, it was decided to ask W. E. Rispin, of Chatham, Ont., to attend that Association's meeting at Atlantic City, N.J., in Oct. next, as the representative of the C.T.A.A.

R. M. Roy, of Peterboro', Ont., was elected Honorary Photographer of the Association.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments, Etc.

Alberta Northern Ry. and Coal Co.—Application will be made next session of the Dominion Parliament for an act incorporating a company with this title to construct a railway from Lethbridge northwesterly to High River, thence northerly to Calgary, thence west of the Edmonton branch of the C.P.R. to Edmonton, with branch lines to Red Deer and Wetaskiwin, Alta., as well as to other points not named. Power is also asked to operate telegraph and telephone lines; to develop and sell electric power; to run steamboats and ferries, and to develop coal and other mines. A. J. Arnold, Windsor, Ont., is solicitor for the applicants.

Alberta Ry. and Irrigation Co.—The Dominion Parliament will be asked next session to pass an act extending the time within which it may construct and complete the railways and branches which it has been authorized to construct. (Aug., 1905, pg. 349).

Algoma Central and Hudson Bay Ry.—A press report recently credited F. H. Clergue with stating that the line would be extended during the current year 25 miles to connect with the C.P.R. We were officially advised, Feb. 16, that the Board had not reached any definite decision with regard to intended extensions or betterments. The main line extends from Sault Ste. Marie to mileage 70, at the north branch of the Chippewa River; the grading is done through to Josephine Jct., which is 101 miles from the present track end. At Josephine Jct. the line will join the existing line from Michipicoten Harbor. The distance from Josephine Jct. to the C.P.R. main transcontinental line is 35 miles. (July, 1905, pg. 281.)

Brandon Transfer Ry.—The Dominion Parliament will be asked next session for an act incorporating a company with this title to construct and operate a transfer railway from the main line of the C.P.R., where it crosses sec. 22, tp. 10, range 19 w.p.m., southerly or southeasterly to the southern boundary of Brandon; thence easterly to the eastern boundary of the city, thence northerly to the C.P.R. main line near sec. 24, tp. 10, range 19, w.p.m., with power to construct branch lines not exceeding six miles in length. Coldwell, Coleman and Noble, Brandon, Man., are solicitors for the applicants.

Calgary and Fernie Ry.—Application will be made next session of the Dominion Parliament for an act incorporating a company with this title to construct a railway from Calgary, Alta., southwesterly through Kananaskis Pass to the headquarters of the Elk River, B.C., thence to Fernie. Ross and Alexander, Victoria, B.C., are solicitors for the applicants.

Crawford Bay and St Mary Ry.—Application will be made next session of the Dominion Parliament for an act authorizing the company to extend its proposed railway from Fort Steele, B.C., easterly by the most feasible route to Lethbridge, Alta., and granting an extension of time for the construction of the various lines. (Aug., 1904, pg. 275).

Detroit River Tunnel Co.—At a meeting of shareholders at Detroit Mich., recently, the following were elected directors: W. K., F. W. Vanderbilt, C. M. Depew, S. B. Barger, W. H. Newman, H. McK. Twombly, C. F. Cox, New York; H. B. Ledyard, H. Russel, Detroit, Mich., N. Kingsmill, K.C.; W. P. Torrance, Toronto. This is the company organized to construct a tunnel between Windsor, Ont., and Detroit, Mich., the preliminary work for which is in progress. (Oct., 1905, pg. 459).

Essex Terminal Ry.—Application will be made next session of the Dominion Parliament for an act extending the time for the commencement and completion of the proposed railway and other works; to make changes in the provisional directorate, and to change the head office of the company. J. H. Coburn, Walkerville, Ont., is solicitor for the applicants. (Aug., 1904, pg. 275).

Great Northern Ry. of Canada.—It has been announced in Montreal that a contract has been let to J. P. Mullarkey of Montreal, and M. J. O'Brien of Renfrew, Ont., for the construction of the cut-off from Burrill's Siding, Que., to Quebec city, about 80 miles, and a line to connect the Montford and Gatineau division with the main line at St. Jerome, Que., about 20 miles. The first line will give the G.N. Ry. an independent entrance into Quebec city, its present entrance being over the tracks of the Quebec and Lake St. John Ry. from Riviere a Pierre Jct., and the second line will join up the old Montford and Gatineau Ry. with the rest of company's lines. The work on the two lines is fairly light.

Next session of the Dominion Parliament application will be made for an act granting an extension of time for the construction of uncompleted portions of its authorized lines between St. Jerome, St. Sauveur or Lachute and a point on the Ottawa, Northern and Western Ry., in Wright county, Que. (Dec., 1905, pg. 563.)

James Bay Ry.—The question of the crossing of a G.T.R. siding in the Don Valley was the occasion of some little conflict between gangs of men employed by the two companies recently. The J. B. Ry. men got their track laid successfully, but the matter was taken before the Courts by the G.T.R.

We have been advised that the grading, excepting bits aggregating less than a mile in the Don valley, and three or four miles between Beaverton and Washago, has been completed to six miles north of Parry Sound, Ont. Beyond this, up to the crossing of the C.P.R. near Sudbury, grading is being proceeded with. About 2,000 men are employed on the different sections, the total mileage being about 250 miles. From six miles north of Parry Sound south to the crossing of the Severn River, about 54 miles, track has been laid, about one-half being ballasted, and the steel bridges in. Track is laid from Beaverton south for 42 miles, that is to about 23 miles north of Toronto. Stations have been built at Parry Sound, Barnsdale, Foote's Bay, Beaverton, Pefferlaw and Mont Albert. It is expected to have the line between Toronto and Parry Sound in operation early in the summer, and to have it completed to Sudbury this year. The materials, as far as at present possible, have all been provided. The fencing and the construction of the telegraph line is being carried on along with the tracklaying. (Dec., 1905, pg. 565.)

Kettle Valley Lines.—The Dominion Parliament will be asked next session for an act authorizing the Kettle Valley Ry. Co. to extend its constructed or authorized lines as follows:—From Midway to Hedley, B.C.; from Hedley along Twenty Mile Creek for 20 miles; a branch from the line between Midway and Hedley to Penticton, B.C. Running powers and rights over the constructed or projected lines or branches of the Columbia and Western Ry., between Grand Forks and Midway, will be asked for, together with an increase of capital to $5,000,000, and of bonding powers from $35,000 to $40,000 a mile. (Oct., 1905, pg. 459).

The Minnesota-Canadian Bridge Co. is the title of the company under which the Canadian Northern Ry. interests will apply for incorporation next session of the Dominion Parliament for the purpose of constructing a bridge across the Rainy River near Fort Frances, Ont. (Feb., pg. 65).

Quebec and James Bay Ry.—Application will be made at the current session of the Quebec Legislature for an act reviving the charter of this company, and extending the time for the construction and completion of the projected railway from Quebec to some convenient point on James Bay.

The Quebec and Lake Huron Ry. Co. will apply next session of the Dominion Parliament for an act authorizing an extension of time for the commencement and completion of the projected railway from Quebec to Lake Huron, at or near the mouth of French River. J. C. Langelier, Que., is Secretary of the Q. and L. H. Ry. Co. (Feb., 1905, pg. 51.)

Quebec and New Brunswick Ry.—A meeting of shareholders was called to be held at Quebec, Feb. 28, for the purpose of electing directors; authorizing the removal of the head office from Quebec to Edmundston, N.B., ratifying the acts of the directors, and authorizing legislation, if deemed advisable, affecting any portion of the railway to be built.

Saskatchewan Central Ry.—Application will be made next session of the Saskatchewan Legislature for an act incorporating a company with this title to construct the following lines of railway:—From the International Boundary south of Maple Creek to that town, thence northeasterly to the North Saskatchewan River at the eastern boundary of the province; from North Portal northerly to the intersection of the North Saskatchewan River and the eastern boundary of the province; from Battleford northerly to Meadow Lake; from Onion Lake southerly to Rosthern, thence easterly to tp. 41, range 3, west of the second meridian. H. A. Robson, Regina, is solicitor acting for the applicants.

Southern Central Pacific Ry.—Application will be made next session of the Dominion Parliament for an act reviving the charter of this company or such of its sections as may have lapsed; to change the names of the provisional directors, and to authorize the construction of a branch line from near the Old Man River, Alta., northwesterly across the Peace River to the boundary between Alberta and B.C. The company was incorporated in 1903 to construct a railway from Vancouver, B.C., via the Kootenay Pass, to Hudson Bay, at least 100 miles north of Fort Churchill. J. D. McLennan, Cleveland, Ohio; J. Milne, Duluth, Minn.; J. Whalen, Port Arthur, Ont., and E. F. B. Johnston, Toronto, were the provisional directors named in the act.

Superior and James Bay Ry.—The Ontario Legislature will be asked next session for an act granting an extension of time within which the projected railway may be constructed. The solicitors for the applicants are Nesbitt, Gauld and Dickson, Hamilton, Ont.

Toronto Union Station.—It is stated, on what we consider reliable authority, that the G.T.R. and C.P.R. have given a commission to Carrere and Hastings, New York, to design the new Union Station at Toronto; that Ross & MacFarlane, Montreal, will be supervising architects, acting on behalf of the New York firm, and that a contract for the entire construction of the station has been let to Westinghouse, Church, Kerr & Co., New York City.

Toronto Union Station Co.—The Dominion Parliament will be asked next session to pass an act incorporating a company with this title with power to acquire lands, to erect buildings, to construct lines of railway, tracks

and sidings, necessary for a Union station, and to issue bonds and other securities in connection with the undertaking. Power will also be asked to take over the present Union Station, to give power to the G.T.R. to transfer the same, and to authorize the G.T.R. and the C.P.R. to hold stock in the company and to guarantee its bonds. The notice of the application is signed by W. H. Biggar, General Solicitor for the G.T.R.

Vancouver, Victoria and Eastern Ry.—The lines belonging to this company at present in operation in British Columbia, are 45.87 miles in length as follows:—Grand Forks to Granby Smelter, 4.75 miles; Grand Forks to Phoenix, 24.62 miles; International boundary line at Laurier to International boundary line at Danville, including spur into Grand Forks, 16.50 miles. South of the International boundary the line connects with the Washington and Great Northern Ry., which is operated by the Spokane Falls and Northern Ry., a subsidiary of the Great Northern Ry., U.S., as well as the V., V. and E. Ry. This line runs from Marcus, Wash., to the International boundary near Laurier; from the International boundary near Danville to Republic, and from a point north of Republic to the International boundary near Midway, B.C. There are now under construction the following lines under the V., V. and E. charter, with connections with the W. and G. N. Ry. on the Washington state side of the boundary:—From Midway to Molson, 29 miles; from International boundary to Princeton, 59 miles; Cloverdale to Sumas on the west side of the Cascade mountains, about 27 miles; total, 115 miles. The contractors are Siems and Shields, St. Paul, Minn. The officers of the company are:—President, J. Hendry, Vancouver, B.C.; Vice-President, L. W. Hill, St. Paul, Minn.; Secretary, J. Jeffrey; Treasurer and Assistant Secretary, E. Sawyer; Chief Engineer, J. H. Kennedy, Grand Forks, B.C.; controller, J. G. Drew. (Dec., 1905, pg. 569.)

West Canadian Collieries Co.'s Line.—A spur line, 2,850 ft. in length, of double track, with a double crossing about the centre, has been constructed between the C.P.R. tracks and the Bellevue collieries of the W. C. C. Co. The Bellevue mine is 51.4 miles west of Macleod, Alta.

The Western Lumber and Development Co. will apply next session of the Dominion Parliament for an act giving extensive powers, including the right to construct railways, telegraph and telephone lines, and to charge tolls for the use of the same.

Yonge St., Toronto, Bridge.—A deputation from the Toronto City Council recently had an interview with representatives of the C.P.R. and G.T.R. with respect to the proposed bridge over the railway tracks at the foot of Yonge St., Toronto. The Mayor has given out the following statement:—"Two suggestions were considered; (1) That the railways pay the city a lump sum and let the city build the bridge; $100,000 was mentioned, but only approximately. (2) That the railways build the bridge and the city take care of any land damage. These are both to be looked into, and the engineers of the railways and city are, in any event, to at once determine more definitely the location and plans of the bridge with a view of minimizing all possible land damages."

Yukon.—Application will be made next session of the Dominion Parliament for an act incorporating a company with authority to construct a standard or narrow gauge railway from the Yukon River, near the mouth of Indian River, along the valley of the latter river to Quartz Creek; thence southeasterly to Dominion Creek, and along Dominion Creek to Arkansas Creek and Lombard Creek; also from the mouth of Quartz Creek to Hunker Creek, along the valley of this creek to Klondyke River, thence to the mouth of Bonanza Creek. Power is also sought to construct branch lines, telegraph and telephone lines, to develop electric power and for other purposes. J. L. Bell is solicitor for the applicants.

National Transcontinental Railway.

The Commissioners of the Transcontinental Ry. have asked for tenders for the construction of two sections of the line, and for a 3,000 ft. steel viaduct at Cap Rouge valley, Que. The sections for which tenders are asked are: From near the Quebec Bridge, now under construction by the Quebec Bridge and Ry. Co., to near La Tuque, Que., about 150 miles, described as District B; from near Winnipeg to Peninsula Crossing, Ont., near the junction point of the Lake Superior Branch of the Grand Trunk Pacific Ry., about 245 miles, and described as District F. Tenders are also asked for a steel viaduct 3,000 ft. long across the Cap Rouge valley in District B. Plans, profiles and specifications are to be seen at the offices of the Commissioners, Ottawa; for District B and for the steel viaduct, at the office of the District Engineer, Quebec, and at the District Engineer's office, Kenora, Ont., for District F. Tenders are to be put in by Mar. 12.

The located route between Winnipeg and the junction with the Lake Superior branch, it is stated, is practically an air line with a maximum grade of 0.4 of 1%. Three surveys were run, but the route selected is the most favorable one. It runs about midway between the C.P.R. and the route at first surveyed by the G.T. Pacific engineers. Starting from a point due east of Boniface, Man., it follows the township line between ranges 10 and 12 to Cross Lake, on the boundary between Ontario and Manitoba, crossing the C.P.R. between Culver and Rennie. The line will cross the Brokenhead and Whitemouth Rivers, but the line will be several miles north of the Julius muskeg, where the C.P.R. encountered a lot of difficulty during the construction of that line. Passing Cross Lake to the north the line makes a change of about 15 degrees from the direct east, touching the southern extremity of Sandy Lake and crossing the Winnipeg River where it enters the lake. At a point due north of Kenora the C.P.R. and the Transcontinental Ry. are 16 miles apart, the first survey of the G. T. Pacific Ry. engineers being six miles still further north. From due north of Kenora the route is due east, the deflection being not more than three miles at any point, and the angles not more than 30 degrees. The height of land is crossed 13 miles north of Scovil. Here the C.P.R. and Transcontinental Ry. route gradually get further apart, till at the 5th meridian they are 33 miles distant, and at Lake Superior Jct., or Peninsula Crossing, they are 41 miles apart, Raleigh on the C.P.R. being almost due south. The route is a difficult one, being largely through a rocky country with a network of small lakes and tamarac swamps.

The Dominion Public Accounts show that during the year ended June 30, 1905, there was charged to capital on account of surveys, etc., for the National Transcontinental Ry., $778,491.28.

GRAND TRUNK PACIFIC RY.

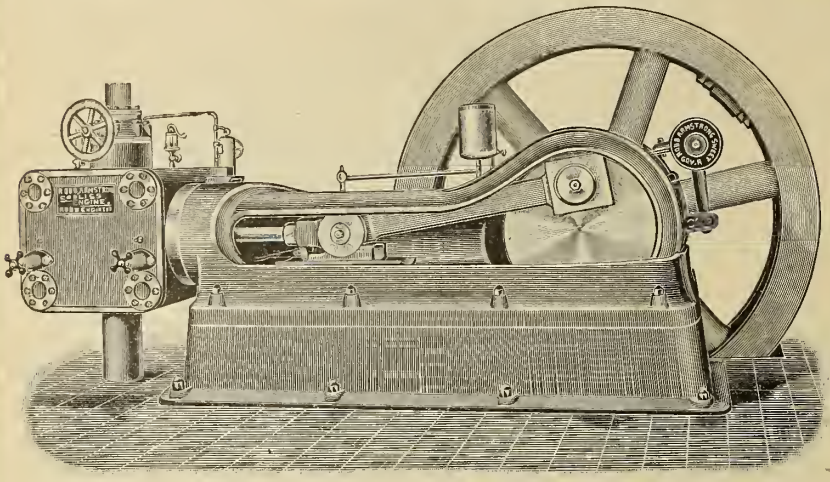
The section of the main line for the construction of which the G. T. Pacific Ry. is responsible, will extend from Winnipeg to the Pacific coast, and construction is already in progress from Portage la Prairie, Man., to the Touchwood Hills, Sask. Tenders have been invited for construction from the Touchwood Hills to Edmonton, Alta., about 400 miles. Plans, profiles and specifications were to be seen at Montreal from Feb. 1, and the tenders were opened for consideration Feb. 20. In connection with this portion of the line some difficulty arose with the C.P.R. in regard to the route through the Eagle Hills district. Some negotiations took place between representatives of the companies, and C. Schrieber, Consulting Engineer to the Department of Railways, brought about a settlement. The result is that a double track line will be constructed through the country where the two routes were crossing each other. The company has under construction a line known as the Lake Superior Branch from Fort William, Ont., to the point of junction with the Eastern Division, which is to be built by the Transcontinental Ry. Commissioners. The contractors for this branch have a number of sub-contractors at work covering the grading for the first 75 miles, and clearing for 150 miles out. Additional sub-contracts are being let, and in a short time work will be in progress over the whole 200 miles of the branch. The general contractors, Foley Bros., Larson & Co., are putting their warehouses and supplies at Niblock, English, Ignace and Dinorwic stations, and have constructed roads from these points to the route of the new line. The supplies were being teamed in, while the snow is on the ground, to the part of the line furthest from the C.P.R., and most difficult to get supplies to. There are about 1,000 men at work on the line at present, but it is hoped in a short time to have 3,000. We were recently advised that there had been considerable clearing done on the first 100 miles out of Fort William, and the grading is now under way, cuts having been opened at various points along the line, viz., on residency 2, near Fort William; residency 3, Kakabeka; residency 4, Kaministikwia; residency 6, Buda, and residency 7, Osko. West of that point only clearing is being done. The contractors are engaged in constructing the roads from the C.P.R. to various points on the survey lines, so as to be in a position to get men and equipment in, and to commence work on the second hundred miles. The engineers upon the work on behalf of the company are:—District Engineer, T. C. Taylor, Fort William; Assistant Engineers, A. G. Allan, Fort William; G. Macrone, Savanne, Ont.; Assistant Engineer, location party no. 2, A. E. Griffin, Fort William; Assistant Engineer, location party no. 3, W. F. Graham, Fort William; Resident Engineers, S. Street, R. A. Frederick, H. B. Diblee, S. F. Hazlewood, J. M. Fotheringham, Fort William; A. E. Morris, Kakabeka, Ont.; C. D. Fairchild, W. R. Smith, J. A. Vickery, J. S. Leitch, E. R. Brobeck, Savanne, Ont.

Since the above was written it is announced that contracts for construction have been awarded as follows:—Touchwood Hills to Saskatoon, 140 miles, to Canadian White Co., Ltd., Montreal; Saskatoon to Edmonton, Alta., to Foley Bros., Larson & Co., St. Paul, Minn. These contracts, with those previously let for the Lake Superior Branch, and the section from Portage la Prairie to Edmonton make a total of 942 miles under contract.

Application will be made next session of the Dominion Parliament for an act amending the charter of the G. T. Pacific Ry. Co., by giving it authority to guarantee the bonds of any company incorporated for the construction of branch lines, or of any company whose bonds it is authorized by section 28 of its act of incorporation to acquire and hold.

The Grand Trunk Pacific Branch Lines Co. is the title of a company which it is proposed to organize upon the passing of the necessary act next session of the Dominion Parliament, in the interests of the G. T. Pacific Ry. The powers to be asked include the construction of 21 branch lines, the start-

A Fine Steam Plant



"I will say without qualification that it is as fine a boiler and engine plant as I have ever had the pleasure of seeing for its size. The engine was working without heating and absolutely without any noise. I wish to congratulate you on your success in building this class of engine and hope that we may have pleasure in dealing with you again."

The above refers to a 350 horse power Robb-Armstrong Corliss engine and two 175 horse power Robb-Mumford boilers installed by us.

ing and terminal points of which are more or less definitely stated; the extension of any of the branch lines northerly to the shores of Hudson Bay, and such other lines of railway as the company may from time to time deem expedient for operation in conjunction with the G. T. Pacific Ry., subject to the approval of the Governor-in-Council. Power is also asked to operate any or all of the lines to be constructed, or to lease, sell or otherwise dispose of them, or any of them, to the G. T. Pacific Ry.; to specify the bond issue of the company, and to confer upon it similar powers to those given to the G.T.P. Ry. Co., in connection with the carrying on of a general navigation business, the operation of hotels, the issue of bonds on other property than the railway, the issue of land grant bonds, the construction of telegraph and telephone lines, the development of water-powers, the erection of warehouses, grain elevators, etc., the operation of tramways, as well as for other purposes.

The branch lines, the location of which are more or less definitely fixed, include the following:—From Moncton, N.B., to Halifax, N.S., or other suitable port on the Atlantic coast; from a convenient point on the Transcontinental Division G. T. Pacific Ry. to St. John, N.B., or other suitable port on the Bay of Fundy; lines from Montreal, Ottawa and North Bay, Ont., to the Transcontinental Division G. T. Pacific Ry.; from the Transcontinental Division G. T. Pacific Ry. northeast of Fort William, Ont., to a junction with the G.T.R. north of Toronto, with the right to pass through or reach by a spur line Sault Ste. Marie or Sudbury, or both; from and around Winnipeg, through the surrounding districts, and to the boundaries of Manitoba; from Brandon, Man., to a junction with the G.T.P. Ry.; from Brandon to the International boundary; from Brandon to Calgary, Alta.; from Yorkton, Sask., to a junction with the G.T.P. Ry.; from Regina, Sask., to a junction with the G.T.P. Ry.; from Regina to the International boundary; lines from Prince Albert, Sask., and Battleford, Sask., to the G.T.P. Ry.; from Calgary, Alta., to the G. T. P. Ry. at its fourth terminal; from Calgary to the G.T.P. Ry. at its fifth terminal; from Calgary to the International boundary; from Vancouver, B.C., to a junction with the G.T.P. Ry., or the Pacific, Northern and Omenica Ry.; from the north shore of Vancouver Island generally southerly and southeasterly to Victoria, and from Dawson, Yukon, to a junction with the G.T.P. Ry. The notice is signed by W. H. Biggar, K.C., Montreal, who is General Solicitor to the G.T.R.

The Dominion Parliament will be asked next session to pass an act authorizing the Pacific, Northern and Omenica Ry. to construct a line from the junction of the Skeena and Copper rivers, or the vicinity thereof, to the junction of the Bulkley and Telkwa rivers, and to amend section 7 of the company's act of 1902. The charter is now owned by the G.T.R. interests in connection with the G. T. Pacific Ry.

The American Association of General Baggage Agents will meet for their 26th annual convention at Los Angeles, Cal., Nov. 14. J. E. Quick, General Baggage Agent, G.T.R., Toronto, is Secretary-Treasurer.

The Dominion Transport Co., Montreal, has been granted supplemental letters patent under which its capital has been increased from $500,000 to $2,000,000, and it is authorized to extend its operations so as to include the business of carriers and forwarders by land and water, and with any kind of power; a general and manufacturing business; the business of warehousemen, cold storage and general storage, and to acquire other businesses of a similar nature, or to purchase shares of companies having similar powers.

G.T.R. Betterments, Construction, Etc.

The G.T.R. has at present a number of very extensive works of betterment in progress, in process of arrangement or in contemplation at various points on its system. At Montreal extensive alterations are being made at the freight yards, and a new sorting freight yard with roundhouse, etc., is being laid out at Turcot. While this is being gone on with the negotiations are being completed and plans finally arranged for the raising of the tracks in the city, and the construction of a new passenger station at or near Bonaventure.

At Belleville, Ont., midway between Montreal and Toronto, and the point at which the traffic from Midland comes on to the main line, the company has been purchasing considerable areas of land. Local reports state that it is proposed to enlarge the freight yards, and to double track the line from Belleville to Midland.

The yard improvements at Toronto and Mimico are nearly completed, but there are still some large works being arranged for. Apart from the erection of the new Union Station, the question of the re-arrangement of the tracks both east and west of Toronto is being discussed between the company's officials and the city council. The matter was recently discussed by the Mayor and C. M. Hays, Second Vice-President and General Manager, the latter of whom expressed an opinion that the city ought to pay one-half of the cost of street crossings. The section of the work particularly under discussion was the proposed depression of the tracks between Bathurst St. and Sunnyside, and the elevation of the tracks from Sunnyside to the Humber. There is some talk of surveys having been made for a line from Weston to Beeton, and the construction by the G.T.R. of the projected line between Meaford and Owen Sound; this would give the G.T.R. a direct line from Toronto to Owen Sound, as it has already a line between Beeton and Meaford, via Collingwood.

It is reported that tenders have been asked at Stratford for the erection of additions to the locomotive repair shops there. It is said that a boiler shop, 225 by 120 ft., and a plate shop, 125 by 50 ft., will be erected, and the present boiler shop will be used as an erecting shop, accommodating 12 more locomotives.

The Mayor of London and F. H. McGuigan, Fourth Vice-President, had an interview recently with respect to the elevation of the tracks in London. The plans, which will be submitted at an early date, will provide for the elevation of six or eight tracks through the city, the construction of a new station, the re-arrangement of the yards and the erection of a new freight shed. A new station at East London is also possible. The expenditure involved is estimated at about $1,000,000. Press reports state that an hotel will also be built at London by the company.

A rumor is current to the effect that in order to meet the competition of the C.P.R. and the James Bay Ry., which will have their Toronto-Sudbury lines built into Muskoka this year, the G.T.R. will build a branch from its Toronto-North Bay line to Port Carling.

A Detroit despatch states that it is proposed to undertake the work of laying a second track between Detroit and Durand, Mich., in order to have it completed by the time the Detroit tunnel is finished.

The work in connection with the installation of the plant, and the other alterations necessary for the operation of the traffic through the Sarnia tunnel by electricity, is now in hand, and it is the intention to prosecute it to as early a completion as possible. There will be but one power-house, which will be located at Port Huron, Mich.

Orders by the Railway Commissioners.

The following orders have been issued by the Board of Railway Commissioners:—

878. Jan. 16.—Authorizing Blenheim tp. council, Oxford co., Ont., to carry Hewitt drain across G.T.R. tracks.

879. Jan. 16.—Authorizing Brantford Gas Co. to lay gas main under the G.T.R. tracks in Brantford, Ont.

880. Jan. 17.—Authorizing the G.T.R. to strengthen Hawk Rock trestle, mileage 113⅞; Little East River bridge, milcage 153½, near Novar, Ont.; and North End viaduct, mileage 194 1-16, on the 12th district, instead of reconstructing them as authorized by orders of May 2 and May 17, 1905.

881. Jan. 16.—Authorizing the Vancouver, Victoria and Eastern Ry. and Navigation Co. to carry telephone wires across Columbia and Western Ry. tracks.

882. Jan. 17.—Authorizing the Esquimalt and Nanaimo Ry to make a deviation of its line, as already constructed from Ladysmith, B.C.

883. Jan. 17—Authorizing the C.P.R. to construct a bridge across Pitt River, B.C.

884. Jan. 17.—Sanctioning location plans for an extension of the C.P.R. Stonewall branch from Teulon, Man., to tp. 18, range 2, w.p.m.

885. Jan. 17.—Authorizing the Dominion Natural Gas Co. to lay gas mains under G.T.R. tracks at Paris, Ont.

886. Jan. 18.—Sanctioning the laying of sewer pipes under the Toronto Belt Line Ry. of the G.T.R., and the C.P.R., by the Toronto City Council, on Mark St., Toronto.

887. Jan. 18.—Authorizing the Peterborough City Council to lay sewer pipes under G.T.R. tracks at nine different points in Peterborough, Ont.

888. Jan. 18.—Authorizing the Galt Gas Co. to lay a gas main under the G.T.R. tracks in Galt, Ont.

889. Jan. 18.—Authorizing the Peterborough City Council to lay water mains under G.T.R. tracks in Peterborough, Ont.

890. Jan. 18.—Approving traffic forms of Maine Central Rd., under sec. 275.

891. Dec. 7, 1905.—Authorizing Chatham, Wallaceburg and Lake Erie Ry. to cross the Pere Marquette Rd. tracks in Wallaceburg, Ont.

892. Jan. 22.—Approving an order by the Exchequer Court for the appointment of a Receiver for the Bruce Mines and Algoma Ry.

893. Jan. 23.—Sanctioning detail plans of a bridge across the Gorge, Shawinigan Falls, Que., for the St. Maurice Valley Ry.

894. Jan. 23.—Authorizing the G.T.R. to construct a siding to the Kilgour Manufacturing Co.'s premises, Hamilton, Ont.

895. Jan. 25.—Authorizing the C.P.R. to construct a siding to the Laidlaw Lumber Co.'s premises, Toronto.

896 and 897. Jan. 25.—Authorizing the Brantford Electric and Operating Co. to carry its wires across the Toronto, Hamilton and Buffalo Ry. tracks at certain points in Brantford, Ont.

898. Jan. 25.—Authorizing the C.P.R. to construct a branch line to J. A. Harrison's premises, Toronto.

899 and 900. Jan. 25.—Authorizing the G.T.R. to construct a branch line to the Meaford Manufacturing Co. and the Meaford Wheelbarrow Co.'s premises, Meaford, Ont.

901. Jan. 26.—Authorizing the C.P.R. to construct a branch line to the Brampton Pressed Brick Co.'s premises, Brampton, Ont.

902. Jan. 26.—Authorizing the Winnipeg, Selkirk and Lake Winnipeg Ry. to operate

its line across Evelyn St., Selkirk, Man., across a spur line of the C.P.R.

903. Jan. 27.—Authorizing the James Bay Ry. to place its tracks across the G.T.R. tracks at grade level near Washago or Rama Island, Ont., subject to specified conditions. These provide that the James Bay Ry. shall at its own expense and subject to the supervision of the G.T.R. engineers insert a diamond in the G.T.R. tracks at the point of crossing, provide an interlocking plant with derails on both lines, and that plans for the diamond, interlocking plant, semaphores and all machinery shall be submitted to the Board for approval. It is also ordered that in the passage of trains of the same or superior class over the crossing, G.T.R. trains shall have priority; that the man in charge of the crossing shall be appointed by the G.T.R., and that the James Bay Ry. shall pay the whole cost of providing, maintaining and operating the interlocking plant. Pending the installation of the interlocking plant, which is to be in by May 31, the James Bay Ry. may use the crossing for construction trains only on paying for a watchman to be nominated by the G.T.R.; the movement of its trains not interfering with G.T.R. trains. In all questions of liability for accident at the crossing the watchman to be employed shall be taken to be the employe of the James Bay Ry., and not of the G.T.R.

904. Jan. 25.—Authorizing the Wellington Colliery Co., Ltd., to carry its tracks across the Esquimault and Nanaimo Ry. tracks near Ladysmith, B.C.

905. Jan. 27.—Authorizing the Canadian Northern Ry. to carry its tracks at rail level across the tracks of Qu'Appelle, Long Lake and Saskatchewan Ry. (operated by the C.P.R.) at Prince Albert, Sask.

906. Jan. 25.—Authorizing Car Service Rules. See pg. 125.

907. Jan. 30.—Approving plans, profile and book of reference of the Toronto and Niagara Power Co. for the location of its railway from the county line between Haldimand and Brant counties to Cainsville, Ont.

908. Jan. 31.—Authorizing the municipal authority of Warwick, Que., to extend a highway across the G.T.R. tracks there.

909. Jan. 31.—Setting aside order of Board of Jan. 5, 1905, in so far as it affects the right of way of the James Bay Ry. on lot 13, con. 2, from the Bay, York tp., Ont.

910 and 911. Feb. 1.—Authorizing the Bell Telephone Co. to carry its wires across the C.P.R. and G.T.R. tracks in the parish of Pointe Claire, Que.

912. Feb. 5.—Authorizing the Atlantic, Quebec and Western Ry. to construct two steel bridges across the west and north Nouvelle Rivers, Que.

913. Sept. 19, 1905.—Varying order of Feb. 10, 1904, and authorizing the Vancouver, Westminster and Yukon Ry. to use its tracks from Lytton Square to Begbie St, Vancouver, B.C, and making certain other provisions with regard to the rates to be charged between the C.P.R. and the V.W.and Y. Ry.

914. Feb. 6.—Dismissing an application of the C.P.R. (lessee of the Ontario and Quebec Ry.) for the rescinding of the Board's order, Jan. 5, 1905, respecting the construction of a spur line across lot 13, con. 2, from the Bay, York county, Ont., by the G.T.R., so far as the C.P.R. was interested therein.

915. Feb. 6.—Authorizing the G.T.R. to lay an additional track across Brant St., Burlington Junction station, Ont., on placing an additional gate to be worked by an independent lever across the siding.

916. Feb. 6.—Authorizing the Guelph and Goderich Ry. to use a crossing of the G.T.R. in Guelph, Ont., previously authorized by order of Board dated Dec. 23, 1904.

917. Feb. 7.—Amending order of Jan. 16, 1906.

918. Feb. 2.—Authorizing the James Bay Ry. location of its line through the township of Rama, Ont., mileage 80.26 to 88.03.

919. Feb. 9.—Extending time for temporary use of Tottenham crossing by the C.P.R. across G.T.R. tracks.

920. Feb. 13.—Authorizing the Canadian Machine Telephone Co., to cross C.P.R. tracks in Peterborough, Ont.

Manual of Recommended Practice.—The Committee on Publications of the American Engineering and Maintenance of Way Association has published a manual of the recommended definitions, specifications and principles of practice adopted by it from year to year after consideraton of reports of committees which have investigated the subjects within the scope of the Association's work. The present volume is the first edition of the work, and it is to be supplemented or revised annually after each convention. The specifications and principles of practice are in the nature of recommendations only, and are not binding on the members or railways they represent. The subjects for which recommendations are laid down include roadway, ballasting, ties, rail, track, buildings, masonry, signs, fences, crossings, cattleguards, signalling and interlocking, records, reports and accounts, water service, yards and terminals, iron and steel structures.

The C.P.R. expects to inaugurate its double daily transcontinental service in May, about a month earlier than in 1905.

A Melbourne, Australia, correspondent writes us that another good season for the agriculturist and pastoralist is almost assured, and that the probability is that the gross and net revenue of the Victorian State Railways, of which Thos. Tait is chief commissioner, will be the highest in their history.

The Railroad Gazette, New York, recently announced that the general offices of the Canadian Northern Ry. had been removed from Toronto to Montreal. There was no foundation for this statement. The general offices are still at the corner of King and Toronto streets, Toronto, and there is not the slightest idea of a removal.

Representatives of the Lumbermen's Association of Ontario and of the Canadian Manufacturers' Association met a committee of the Canadian Freight Association in Toronto recently and requested that the equipment of flat cars with stakes and cross pieces for carrying lumber should be provided by the railway companies and not at the expense of the shippers. The freight officials will discuss the matter with the operating departments, after which it will be further considered.

The C.P.R. has advanced a claim against the Dominion Government amounting to $528,176 as subsidy payable for the construction and equipment of a line from Kirkella, Man., to the Pheasant Hills country. There is a difference between the C.P.R. and the Department of Railways as to the interpretation of the contract, and the matter has been referred to Judge Burbidge of the Exchequer Court. The claim is based on a contention that the contract entered into between the Government and the company requires the provision of sufficient rolling stock for the accommodation of the traffic business of the line and that the company was to receive a subsidy for the construction and equipment of the line. On behalf of the Government it is claimed that the subsidy does not include the equipment of the line, and that prior to 1901 it was customary to insert a qualifying clause. The C.P.R. contends that the omission of the qualifying clause was intentional and payment should therefore be made.

C.P.R. Betterments, Construction, Etc.

Atlantic Division Surveys.—On the occasion of a recent visit of J. W. Leonard, Assistant General Manager Eastern Lines, to Fredericton, N.B., he was reported to have confirmed a statement that the company was having a survey made from Debec, near Woodstock, N.B., to Bancroft, Me., for the purpose of giving the C.P.R. and the Maine Central Rd. a shorter line from Aroostook county and northern New Brunswick to Boston.

Branch at Westmount.—Plans have been deposited and the approval of the Railway Commissioners will be asked for the construction of a spur line from Westmount, Que., station, across Bethune St., for a distance of 561 ft.

Highlands to Canada Sugar Refinery, Montreal.—The branch line for which approval has been granted will be six miles long, and will be known as the South Bank branch. It will start from the Montreal-St. John line near Highlands, eight miles from Windsor St. station, where a heavy fill is encountered, and a plate-girder span will be required to carry the track across the highway near the Lachine canal. As the gradient will be comparatively easy, about three-quarters of a mile of this will be necessary to reach the canal bank level. The line will then follow near the canal bank and, after passing through Cote St. Paul, will swing closer to the canal bank, crossing the G.T.R. under grade near the swing span. From this point the track will be laid along St. Patrick St. to connect with the tracks at the Canada Sugar Refinery. Work has been started on the line, the temporary trestle from Highlands being completed, and the grading finished for 1½ miles towards Cote St. Paul. The work will be continued during the summer, and is expected to be completed before the end of the year.

The Electrification of Branch Lines in Quebec, and in the mountains of B.C., has been and still is under the management's consideration, but we were recently advised that no decision had been arrived at.

Construction Projects for Ontario.—The C.P.R. has in contemplation considerable improvements to its existing lines in Ontario, as well as extensions of the same. Of the improvements to existing lines in contemplation, perhaps the most important is the straightening of the line in the vicinity of Tweed, Ont. From Sharbot Lake the line runs southerly, passing through Tweed, and then runs north again to Havelock, almost on a line with Sharbot Lake. The proposal is to straighten out the line by the construction of a cut-off, thereby securing better gradients, a shorter line by some 14 miles, and avoiding some sinkholes and other objectional features in the roadbed. A number of survey parties are at work in the district between Sharbot Lake and Havelock. This particular work, it is understood, is being contemplated in connection with the project for the construction of a line from some point on the Montreal-Toronto line to Victoria Harbor, on Georgian Bay. The construction of this line was authorized by the Dominion Parliament in 1905 by an act incorporating the Georgian Bay and Seaboard Ry., the provisional directors being mainly associated with C.P.R. interests. Surveys for the line were made in 1905, and surveys are again being made in the same territory. Following a recent statement of Sir T. G. Shaughnessy before the Transportation Commission, forecasting an extension of the C.P.R. to Victoria Harbor, local papers have been speculating as to what would be done there in the way of wharf construction, etc. We have been advised that the company's plans have not been matured, and that it is impossible to say

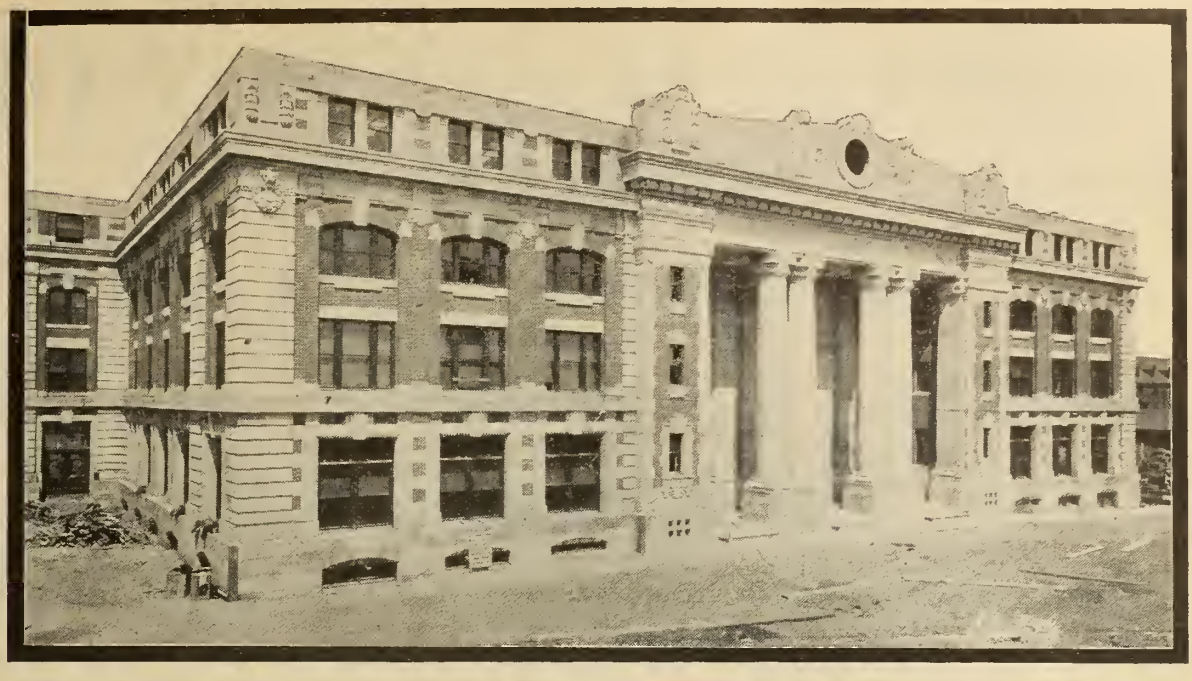
HALIFAX and the SYDNEYS

Give every satisfaction to shippers

just to what extent facilities will be provided at Victoria Harbor in connection with the Georgian Bay and Seaboard Line, or when work will be started. As a matter of fact we have been informed that the general route plans in connection with the line have not been approved. Another project discussed in 1904-05 was the construction of a line under the charter of the Campbellford, Lake Ontario and Western Ry., from near Blairton to near Leaside Jct., both on the C.P.R. Montreal-Toronto line. This would give the company access to a number of points at or near the Lake front with which it has not now any connection.



CANADIAN PACIFIC RY. STATION AND GENERAL OFFICES, WINNIPEG.

On the other side of Toronto, the Toronto-Sudbury line, from near Bolton to Sudbury, via Parry Sound, will give the company an independent connection between Toronto and its transcontinental line, and will transfer a good deal of business from North Bay to Sudbury. The line is expected to be opened for traffic as far as Bala Falls, Muskoka, in June, in time for the tourist traffic.

The completion of the Guelph and Goderich Ry. during the year will open up a considerable area of new country, and the projected branch into Stratford will connect with a line from Ingersoll, an extension of the Tillsonburg, Lake Erie and Pacific Ry., now extending from Port Burwell to Ingersoll, and recently acquired by the C.P.R. The T., L.E. and P.R. Co. is authorized to construct a line to Collingwood either by Stratford or Berlin. A line is projected from Woodstock to the Niagara River, under the charter of the South Ontario Pacific Ry. In connection with this project, D. McNicoll, Vice-President, informed the St. Catharines Board of Trade in answer to an enquiry, that no decision had been reached as to the route, whether it would pass through St. Catharines or not. A Buffalo despatch, Feb. 8, stated that the C.P.R. was behind a proposal incorporated in New York State, with the title of the Buffalo Subway Ry. Co., which proposed to construct a subway from Niagara St., Buffalo, to East Buffalo, with a railway to connect with a tunnel under Niagara River. The President on the following day said the C.P.R. had nothing to do with any such proposal. Another western Ontario proposal is a line under the charter of the Western Counties Ry., from near London into Huron and Bruce counties, and still another is for a line from near London to Sarnia, under the charter of the London and St. Clair Ry. Survey parties are in the field at various points on these projected lines, and plans for the line from Woodstock to Niagara Falls, via Brantford, Hamilton and Grimsby, have been filed with the Railway Commission. Nothing, however, has been decided in regard to construction.

Western Lines Construction Plans.—On the lines west of Port Arthur, apart from the important work in connection with the second track construction between Fort William and Winnipeg, a good deal of branch line construction is contemplated. The location plans of the West Selkirk branch extension from Winnipeg Beach to near Gimli, 9.4 miles, have been approved by the Railway Commissioners, and construction will be gone on with in all likelihood this season. The principal new construction, however, in the new provinces, will be the extension of the Pheasant Hills branch westerly to Saskatoon, and thence towards the branch line which is being constructed easterly from Wetaskiwin. The extension of the Pheasant Hills branch was located through the Eagle Hills country, and some difficulty was experienced owing to the G. T. Pacific Ry. surveys crossing it at a different level. As a result of negotiations between the two interests and C. Schrieber, Consulting Engineer to the Department of Railways, an arrangement was made by which a double track line will be constructed at the points where the two routes come together, and will be used by both companies. The branch of the Calgary and Edmonton Ry. from Wetaskiwin, Alta., which is already in operation to Daysland, 50.5 miles, will be extended easterly to meet the extension of the Pheasant Hills branch. The two branches will affect a junction, and will give the C.P.R. a new and shorter line between Winnipeg and Strathcona, opposite Edmonton, than it now has. These two lines it is desired to have completed in time to handle the crops of 1907. To run through portions of the territory to the north of these two extensions, two other extensions are projected, and some construction work is likely to be done this season. These are an extension of the Manitoba and Northwestern Ry., which now has its terminus at Sheho, Sask., to Prince Albert, and the extension of the branch now terminating at Stettler, Alta., 51 miles from Lacombe, easterly for a further distance of 50 miles.

The company has power to construct a high level bridge across the Saskatchewan River for the purpose of taking the Calgary and Edmonton Ry. from Strathcona, the present terminus, into Edmonton, and the G.T.R. interests behind the G. T. Pacific Ry. have a charter authorizing the construction of a railway and general traffic bridge across the river into the city. At present both C.P.R. and G. T. Pacific engineers are engaged in taking soundings in the river opposite Ninth Ave. Press reports stated that preliminary plans had been prepared and tenders would be asked for by the C.P.R. for the construction of the piers at once, the work to be gone on with this season. We were advised, however, Feb. 17, that it had not then been definitely decided whether or not the work would be gone ahead with this season. It is meanwhile stated that negotiations are going on between the C.P.R. and G.T.P. Pacific Ry. officials in reference to the construction of a bridge jointly.

A straightening out of curvature and reduction of gradients in the Mountain district is being surveyed for, and the construction of some miles of the Kootenay Central Ry. from Golden are included in the new works contemplated in B.C.

In Feb., 1904, an order-in-council was passed authorizing the construction of a branch line from near Banff to some coal mines entirely within the Rocky Mountains Park. Plans transmitted show that the line as constructed differs from the line as located, and an order-in-council has been passed varying the original order so as to agree with the route of the line as constructed.

In connection with the invitation of tenders for the construction of the two sections of the Transcontinental Ry., the commissioners made a charge of $1 per mile for profiles and specifications. Hitherto these have been supplied free.

The G.T. Pacific Ry. has announced that the name of Prince Rupert had been selected for the Pacific terminus of the company's line, and has awarded the prizes offered in the recent competition. Miss E. M. Macdonald, Winnipeg, Man., was the winner; and special prizes were awarded to Mrs. J. Orme, Bonnechere, Ont., and R. Kirkwood, Copper Cliff, Ont., each of whom suggested Port Rupert.

In connection with the adoption of Quebec as the terminal port in Canada for the C.P.R. new Empress steamers, sailing from Liverpool, Eng., we were advised Feb. 21, that the plans for the accommodation to be provided had not progressed sufficiently for a decision to be arrived at as to what is actually required or will be done. Daily press reports stated that the railway between Montreal and Quebec was to be provided with a second track, but we were advised on the same date, that this had not been decided upon either.

MONTREAL STEEL WORKS

MANUFACTURERS OF **STEEL CASTINGS** LIMITED

Railway Rolling Stock Notes.

The Intercolonial Ry. has ordered from Rhodes, Curry & Co., Amherst, N.S., two louble track snowplows.

The Canada Car Co. is building 30 steel underframe flat cars for the Cleveland-Sarnia Saw Mills, to be 61 ft. over end sills and 9 ft. over side sills.

The Canadian Locomotive Co. recently delivered 10 mogul locomotives to the G.T.R., and one six-wheel switcher to the West Canadian Collieries, Frank, Alta.

A report from Moncton, N.B., states that the frames have been completed for four locomotives to be built at the I.C.R. shops there. The locomotives are to be duplicates of Nos. 44 and 46.

The Intercolonial Ry. received during the month preceding Jan. 25, 37 box cars, 60,000 lbs. capacity, from Rhodes, Curry & Co., Amherst, N.S., and four parlor cars from the Crossen Car Manufacturing Co., Cobourg, Ont.

A press report recently stated that electric motor cars were to be built at the C.P.R. Angus shops for branch lines in the Province of Quebec. We were recently advised that the matter had not even been discussed by the management.

The 1,000 box cars which the G.T.R. is having built by the Canada Car Co., Montreal, will have an inside length of 36 ft., and a height of 8 ft. The 2,400 box cars which the C.C. Co. is building for the G.T. Pacific Ry., will be of the same dimensions.

The Temiskaming and Northern Ontario Ry. has under consideration the purchase of the following additional rolling stock:—Two locomotives, four first-class coaches, two baggage and express cars, twenty-five flat cars, two vans and two cafe parlor cars.

The White Pass and Yukon Ry., in addition to overhauling at its shops, Skagway, Alaska, two locomotives which it sold to the Klondike Mines Ry., Dawson, Yukon, has also overhauled one locomotive which it has sold to the Tanana Mines Ry., in Alaska.

The Temiskaming and Northern Ontario Ry., in addition to the wrecking crane and ballast unloader, the order for which was referred to in our last issue, has placed an order for a ballast plow with W. H. C. Mussen & Co., Montreal; and for a steam shovel in the U.S.

The Central Ontario Ry. has placed an order with the Canadian Locomotive Co., Kingston, Ont., for an eight-wheel locomotive, having cylinders 18 by 24 ins.; driving wheels, 63 in. diameter; weight of engine, 115,000 lbs.; weight of tender, about 75 000 lbs.; tank capacity, 3,800 gals.

The C.P.R. placed orders for the following rolling stock during the two months preceding Feb. 16: 10 freight locomotives, 5 baggage cars, 4 hand derrick cars, 100 box cars, 50 flat cars, and 10 stock cars, at its Angus shops, Montreal; and 500 steel coal cars from the Dominion Steel Car Co., Montreal.

The Locomotive and Machine Co. of Montreal has delivered 16 Pacific-type passenger locomotives to the I.C.R., and six 2½ yard Atlantic type steam shovels to the C.P.R. It is also delivering three 10-wheeled freight locomotives a week to the C.P.R. Delivery at this rate will continue until Mar. 31.

The C.P.R. during the two months preceding Feb. 16, received the following new rolling stock:—10 freight locomotives and 3 steam shovels from the Locomotive and Machine Co. of Montreal; 8 locomotives, 10 first-class cars, 20 colonist cars, 7 baggage and express cars, 659 box cars, and one dynamometer car from its Angus shops, Montreal.

The C.P.R. has ordered from the Dominion Steel Car Co., Montreal, 500 steel gondola coal and ore cars, capacity 55 tons; length of car inside body, 36 ft. 9 in.; width of car inside body, 9 ft. 7 in.; brake beams, Simplex; bearings, Canada Bronze Co. These cars will be of the Class E 12 National Type, with 12 bottom drop doors, the Canadian patents for which are controlled by the Dominion Dump Car Co.

The Intercolonial Ry. received the following additional rolling stock between Jan. 25 and Feb. 16:—10 Pacific type passenger locomotives from the Locomotive and Machine Co., of Montreal; 79 box cars, 80,000 lbs. capacity from Rhodes, Curry & Co., Amherst, N.S.; 22 box cars, 60,000 lbs. capacity, from the Crossen Car Manufacturing Co., Cobourg, Ont.; and 5 box cars, 60,000 lbs. capacity, from another Canadian builder.

The question of the operation of the Vernon River loop and Montague branches of the Prince Edward Island Ry. by motor cars, in place of steam locomotives and cars, has been under the consideration of the operating officials, but we were advised Feb. 1, it had not been passed upon by the Department of Railways. The operation of these, as well as other small branches, by some means, less expensive than steam, during the summer months at any rate, it is considered would be of advantage to the line.

The Dominion Coal Co., owning the Sydney and Louisburg Ry., in its report for 1905, says:—"Recognizing that an ample equipment of rolling stock, particularly cars, is a necessity for rapid delivery, for avoiding delays to ship, and for saving in operating expenses generally, it was decided this year to purchase 150 fifty-ton steel cars at a cost of $162,000. The greater number of the company's wooden cars have been remodelled and practically rebuilt in the company's own shops, and this part of the equipment is now in a thoroughly efficient and serviceable condition; this repair work has been charged to operating expenses.

The switching locomotive recently completed at the St. Thomas, Ont., shops of the Michigan Central Rd., was the last of an order for six. These locomotives are being used on the grades between Niagara Falls and Montrose yard, and at Windsor, Ont. The general dimensions follow:

CYLINDERS.—Diameter, 19 in.; stroke of piston, 26 in.

BOILER.—Diameter of boiler shell, 65 in. inside; number of flues, 282; length, 132 in.; diameter of flues, 2 in.

FIREBOX.—Width at top, 55 in.; width at bottom, 42 in.; length, inside, 108⅛ in.; height, 68⅛ in.

WHEELS.—Six Drivers; diameter of wheel castings, 44 in.

WEIGHT.—Total, 135,900 lbs, all on drivers.

TANK.—Capacity, 3,650 gals. water; 9 tons coal; number of wheels, 8; diameter of wheels, 33 in.

The G.T.R. placed the following orders for rolling stock during 1905: 10 ten-wheel passenger locomotives with the American Locomotive Co., New York; 10 ten-wheel passenger engines and 55 Richmond compound consolidation freight engines with the Locomotive and Machine Co. of Montreal; 15 Richmond compound mogul engines with the Canadian Locomotive Co., Kingston, Ont.; 250 box cars, 60,000 lbs. capacity, with Rhodes, Curry & Co., Amherst, N.S., 1,000 box cars, 60,000 lbs. capacity; 8 smoking cars and 42 first-class coaches with the Canada Car Co., Montreal; 14 baggage cars, 3 parlor-cafe cars, 28 caboose cars, at its own shops, Point St. Charles, Montreal; 8 caboose cars at its own shops, Port Huron, Mich. Of these orders there were delivered up to Dec. 31, 1905, seven locomotives from the Canadian Locomotive Co., 150 box cars from the Canada Car Co.; 28 cabooses and four baggage cars from the Montreal shops, and eight cabooses from the Port Huron shops. The combination consolidation freight engines being built at Montreal are somewhat of a departure from the company's former standard, and will be the standard for the future.

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The Vulcan Iron Works Co., Toledo, Ohio, has issued a characteristic calendar for 1906.

W. H. Marshall, recently elected President American Locomotive Co., assumed his duties Feb. 15.

Jas. Smart, sr., founder of the James Smart Manufacturing Co., Limited, Brockville, Ont., died there Jan. 27.

Steam Shovel News, published at Toledo, Ohio, in the interests of the Vulcan Iron Works Co., will in future be issued monthly.

Harry A. Norton, of Boston, Mass., and Coaticook, Que., sailed on Feb. 3 for a trip round the world in the interest of Norton Jacks.

The Canadian Bronze Co. has passed a by-law that its affairs shall be managed by a board of five directors, of whom three shall form a quorum.

The Robb Engineering Co., Amherst, N.S., has received an order through M. J. Heller, of San Francisco, for a 150 h.p. tandem compound engine for the Nipissing Mining Co., Cobalt, Ont.

The American Locomotive Co. has issued as a booklet a paper on four-cylinder balanced compound locomotives, read by F. J. Cole, its Mechanical Engineer, before the Railway Club of Pittsburg, Pa.

M. Beatty & Sons, Limited, Welland, Ont., will apply this session of the Ontario Legislature for an act confirming a by-law of the town of Welland, fixing the assessment of the property of the company at $10,000 for a period of twenty years.

The Canadian Westinghouse Co. has issued a special booklet describing and illustrating the electrical apparatus which it manufactures at Hamilton, Ont. It has also issued circulars no. 1126, describing Type C Transformers; no. 1127, describing Control Apparatus and Trolleys for single-phase Railway Systems, and no. 1107, describing Westinghouse Automatic Circuit-breakers Carbon Brake.

The Montreal Steel Works, Ltd., has decided to issue at par the remaining 1,000 shares of ordinary stock, $100,000, which was authorized at a shareholders' meeting held on Mar. 31, 1905. The management considers that in order to continue the programme of extension to the works it is necessary to increase the capital stock at an early date. The capital stock is $800,000 of preferred, authorized and paid-up, and 7,000 shares of $100 each, authorized ordinary shares, of which 4,000 have been subscribed and paid up.

The Chicago Pneumatic Tool Co.'s 4th annual report, for 1905, issued recently, shows that the profits for the year were $852,612.56. After writing off deprecation, etc., and paying 4% dividend, $315,134.39 was carried to surplus account. The company's assets are placed at $10,000,718.21—showing a surplus over liabilities of $536,-292.15. The report states that the year's sales were the largest in the company's history. Mention is also made of the acquirement of the Canadian Pneumatic Tool Co., Ltd., Montreal. The capacity of the various plants was materially increased during the year, still the capacity is insufficient and a further increase is under consideration.

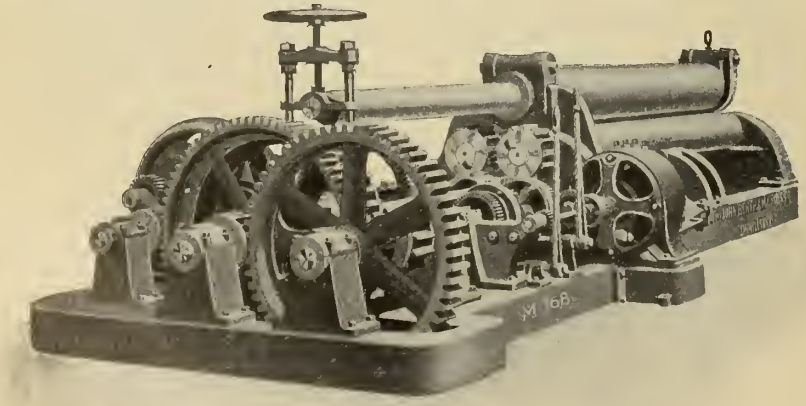
BERTRAM PLATE-BENDING ROLLS



MOTOR DRIVEN

These machines are built in four sizes for plates from 12 feet wide, 1¼ inches thick, to 16 feet wide and 1 inch thick. The rolls are arranged in pyramid form and driven by a motor with reversing mechanism. The top roll is raised and lowered by an independent motor. The rolls and hoisting mechanism are steel throughout, and the machine has strength and power to bend plate full width between the housings to a complete circle in from one to three passes.

FULL PARTICULARS AND PHOTOGRAPHS OF BERTRAM'S LINE OF MACHINE TOOLS MAY BE HAD FROM

Grand Trunk Ry. Earnings, Expenses, etc.

The following statement of earnings, supplied from the Montreal office, includes the G.T. of Canada, the G.T. Western, and the Detroit, Grand Haven & Milwaukee Rys.

	1905.	1904.	Increase.	Decrease.
Jan	$2.896.439	$2,674,242	$222,197	....

GRAND TRUNK RY. CO.

Subject to audit, the accounts for the half-year to Dec. 31, 1905, show the following results:

Gross receipts		£3,289,000
Working expenses, including special appropriation of £30,000 to close the bridge renewal account		2,345,900
Net receipts		£ 943,100
Net revenue charges for the half-year, less credits		513,800
Balance		£ 429,300
Deduct Canada Atlantic deficiency for the year	£18,000	
Less Detroit, Grand Haven and Milwaukee surplus for the half-year	£17,300	700
Surplus		£ 428,600

This surplus of £428,600 added to the balance of £7,400 from June, 1905, makes a total amount of £436,000 available for dividend, which will admit of the payment of the dividends for the half-year on the 4% guaranteed stock and first and second preference stocks, and a dividend of 2% for the year on the third preference stock, leaving a balance of about £4,200 to be carried forward. The accounts of the Grand Trunk Western Ry. for the half-year show a surplus of £18,200, which amount is carried forward to the current half-year.

MAINLY ABOUT PEOPLE.

A. L. Killaly, C.E., Cardinal, Ont., wa- married Feb. 7, to Miss S. Greenwood, Corns wall, Ont.

Mrs. D. H. Keeley, wife of the Superintendent of Government Telegraphs, Ottawa, died there Feb. 15.

W. Walker, Superintendent Dominion Transport Co., Toronto, died at his residence there Feb. 22, aged 61.

D. W. Campbell, Canadian Manager Elder, Dempster Steamship Co., left Montreal, Feb. 15, for a trip to Mexico.

S. H. Haycock, for many years engaged in construction work on the St. Lawrence River canals, died at Ottawa, Jan. 29.

Lieut.-Col. Stark, Manager Dominion Transfer Co., Montreal, was married Feb. 26, to Mrs. T. J. Alloway, of that city.

P. Lund, of Breckenridge & Lund, railway contractors, etc., Cranbrook, B.C., was married recently to Miss A. Couzens, Chatham, Ont.

Mrs. Gorrie, wife of A. J. Gorrie, General Superintendent Great Northern Ry., Montreal, has been suffering from pleurisy for some time.

W. Molson Macpherson, agent of the Dominion, Leyland & Manchester Steamship lines at Quebec, and Mrs. Macpherson, are visiting India.

Major H. O. Wicksteed, who died at Ottawa recently, was uncle of H. K. Wicksteed, Chief Locating Engineer, Mackenzie, Mann & Co., Toronto.

R. Forget, M.P., President Richelieu and Ontario Navigation Co., was entertained at dinner by the Sorel, Que., employes of the company, Feb. 15.

D. D. Mann, accompanied by Mrs. Mann and son and Miss Williams, left Toronto early in Feb. for the Mediterranean, intending to return early in May.

Mrs. J. M. Egan, sister of J. F. Dolan, City Passenger Agent, Richelieu and Ontario Navigation Co., Montreal, died suddenly at Butte, Montana, early in Feb.

F. P. Brady, General Superintendent C.P.R., North Bay, Ont., was presented with a cabinet of silver and a table by the local Knights of Columbus, Feb. 12.

G. Ham, of the C.P.R. head office staff, returned to Montreal from Preston Springs, Ont., Feb. 8, and subsequently went on a trip to Winnipeg and other Western points.

R. J. Cherry, formerly in the C.P.R. service on the Pacific Division, has been appointed Superintendent Dairy Car Service, Aitcheson, Topeka and Sante Fe Rd.

W. E. Fowler, Master Car Builder C.P.R., who underwent an operation for appendicitis at King's Hospital, Detroit, Mich., early in Feb., is convalescing satisfactorily.

A. E. Trites, railway contractor, Moncton, N.B., recently met with a rather severe accident while inspecting the work in progress on a line he is constructing in Maine.

M. J. B. Whyte, who has resigned his position as General Freight and Passenger Agent, White Pass and Yukon Route, left Vancouver, B.C., Feb. 9, for a trip to Ireland.

A. B. Newell, herctofore Vice-President and General Manager White Pass and Yukon Route, has gone into railway supply manufacturing business with a Chicago firm.

E. A. James, Manager Canadian Northern Ry., Winnipeg, who is on extended leave of absence, owing to ill-health, is staying at Los Angeles, California, with his wife and son.

W. M. Kirkpatrick, Export Freight Agent, C.P R., sailed from St. John, N.B., on the SS. Manitoba, Feb. 17, for Great Britain, expecting to be gone about six or seven weeks.

Miss H. Butler, sister of M. J. Butler, Deputy Minister Railways and Canals, Ottawa, was married at Belleville, Ont., Feb. 7, to W. Featherstonhaugh, C.E., Edmonton, Alta.

C. M. Hays, Second Vice-President and General Manager, G.T.R., accompanied by Mrs. Hays and family, left Montreal, Feb. 11, for England, where they will remain for some weeks.

The engagement is announced of C. E. McPherson, General Passenger Agent C.P.R., Winnipeg, to Miss Josephine Troop, daughter of Howard D. Troop, steamship agent, etc., St. John, N.B.

The engagement has been announced of Miss H. Wainwright, daughter of W. Wainwright, General Assistant and Comptroller, G.T.R., Montreal, to A. R. Chapman, St. Stephen, N.B.

G. B. Johnson, C.E., son of ex-Mayor Johnson, Belleville, Ont., has been appointed assistant engineer in charge of the Naziang section of the Shanghai-Nanking Ry., Naziang, China.

R. G. Foster, who has retired from the position of superintendent of the Montreal Rolling Mills, after 35 years' service, was presented with a gold watch, chain and locket, by the staff, Feb. 2.

Lady Shaughnessy, wife of the President C.P.R., and Miss Shaughnessy; C. R. Hosmer, director C.P.R., Mrs. and Miss Hosmer, sailed from New York, Feb. 17, for a tour in the Mediterranean.

R. E. Welsh, of the C.P.R. Assistant Freight Traffic Manager's office, Winnipeg, Man., was presented recently with a travelling case, and entertained at dinner by his fellow clerks, on leaving the service.

J. G. Scott, General Manager Quebec and Lake St. John Ry., is expected to return to Quebec early in March, from London, Eng., where he has been attending the meeting of bondholders, and conferring with the directors.

Judge Snider, of Hamilton, Ont., has been appointed third arbitrator in the expropriation proceedings of the G.T.R. against a number of firms interested in the land required for the new Union Station, Toronto.

F. Nicholls, President Canadian General Electric Co., etc., Toronto, was recently presented with a shield by members of the Royal Canadian Yacht Club in appreciation of his services in connection with the Canada Cup races of 1905.

R. Beatty, who died at Hamilton, Ont., recently, was Purchasing Agent for the Great Western Ry. at the time of its amalgamation with the G.T.R., and remained with the latter company for some years in its purchasing department.

W. Carroll, who died at Hamilton, Ont., Feb. 12, aged 84, was flagman at the Thames St. crossing of the G.T.R., Hamilton, for over 25 years, and only retired from active work about six months ago. He was father of J. Carroll, G.T.R. station agent, Hamilton.

H. J. Lamb, C.E., who was placed in charge of the work of the Department of Public Works, including work on harbors and rivers in Western Ontario, at London, Ont., on the appointment of J. C. Sing to Toronto, has been permanently appointed at London.

D'A. C. Coleman, chief clerk to the General Superintendent Central Division C.P.R., Winnipeg, was presented with a dining-room suite by the officials of the division on Feb. 17, in connection with his marriage to Miss A. Grant, of Calgary, which took place Feb. 21.

H. W. Weller, Manager in Canada for Babcock & Wilcox, is an enthusiastic photographer. The Montreal Standard has recently published a number of illustrations of "Montreal after Nightfall," from photographs taken by Mr. Weller on residential streets.

GRAND TRUNK RAILWAY SYSTEM

THE PIONEER RAILWAY OF CANADA

The Only Double Track Railway in the Dominion

Total mileage of System, 4,637 miles. Double track, 1,019 miles. THE LONGEST DOUBLE TRACK RAILWAY IN THE WORLD UNDER ONE MANAGEMENT.

FINEST ROADBED. MODERN AND LUXURIOUS TRAINS. COURTEOUS EMPLOYES. BEAUTIFUL SCENERY.

4 EXPRESS TRAINS each way between MONTREAL and TORONTO, week days

2 FAST LIMITED TRAINS each way between MONTREAL and TORONTO, daily

Through Express Trains between BOSTON (via Boston and Maine Railroad), MONTREAL, TORONTO and CHICAGO; also between NEW YORK, TORONTO and CHICAGO, via Lehigh Valley Railroad, Grand Trunk and Niagara Falls.

Dining, Cafe-parlor and Library Cars on day trains. Pullman Vestibuled Sleeping Cars on night trains.

J. Hendry, President Vancouver, Westminster and Yukon Ry., Vancouver, B.C., who had his leg broken while on the trip with the Canadian Manufacturers' Association to Great Britain in 1905, has sufficiently recovered to be able to walk with the aid of a couple of canes.

The following advertisement appeared in the Toronto Globe recently:—

WANTED—INFORMATION AS TO THE whereabouts of one T. W. Holland, late General Manager of the Republic & Grand Forks Ry. Co., of Grand Forks, B.C.; address the undersigned, who will pay a liberal reward. C. F. Packard. Copeland, Idaho.

R. H. McCready, at one time station agent on the I.C.R. at Aulac, N.B., has been appointed assistant to the General Superintendent, Bangor and Aroostook Rd., with special charge of operations upon a newly constructed branch. For some time previously he had been Trainmaster.

F. Grundy, Vice-President; J. H. Walsh, General Manager, and E. O. Grundy, General Freight and Passenger Agent, Quebec Central Ry., were entertained at dinner by citizens of Sherbrooke, Que., Jan. 30, in connection with the retirement of the first-named from the position of General Manager, and the promotion of the two latter.

W. A. Brown was presented recently with a cabinet of silver by business men of Port Arthur, Ont., and a gold watch by the Canadian Northern Ry. employes there, on his promotion from the position of Superintendent at that point to that of General Superintendent at Winnipeg. The citizens presented Mrs. Brown with a gold bracelet.

W. S. Painter, who has been appointed architect, C.P.R., Montreal, was born in New York, in 1876, and during his professional career has had to deal with the planning and construction of a number of large buildings in the U.S. and Canada. He has been located in Montreal since 1891, and was recently engaged in connection with the construction of the G.T.R. roundhouses at Mimico, Ont., and Turcot, Que.

H. W. Gays, General Manager; G. H. Phillips, General Freight and Passenger Agent; H. K. Gays, Assistant General Passenger Agent, New York and Ottawa Ry., and W. Gays, also in the employ of the same company, are among the incorporators of the Quebec and Ontario Lumber Co., which has been incorporated under the Dominion Companies' Act, with offices at Ottawa, and a capital of $20,000.

H. J. Beemer, railway contractor and promoter, formerly of Ottawa, and now of New York, is engaged with a number of others in prosecuting O. A. Rogers, of Phœnix, Ariz., on a charge of embezzling $300,000. Mr. Beemer with a number of others joined a mining syndicate, and the alleged embezzlement took place in connection with some of its transactions. It is reported in Ottawa that Mr. Beemer has lost $200,000 in the concern.

F. Shaughnessy, son of Sir Thomas G. Shaughnessy, President C.P.R., accompanied by his tutor, is on a trip round the world, travelling all the way via C.P.R. trains and steamers. Montreal was left Jan. 19, and St. John, N.B., two days later. On reaching Liverpool, Eng., they will go on board the C.P.R. str. Monteagle, which is being sent out to Hong Kong to strengthen the Pacific Ocean fleet, and from Hong Kong will travel to Vancouver, B.C., by one of the Empress steamers on the regular line. They expect to return to Montreal during May.

Hon. L. P. Brodeur, who has been appointed Minister of Marine in succession to the late Hon. R. Prefontaine, was born at Belœil, Que., Aug. 21, 1862. He was educated at St. Hyacinthe College, graduating LL.B. at Laval University, Montreal, 1884. He practised law for some years, and became a newspaper editor in 1896. He was elected to the House of Commons in 1891, and was re-elected in 1896, and 1900 and 1904. From 1896 to 1904 he filled the position of Deputy Speaker and Chairman of Committees, and from 1904 to the date of his present appointment was Minister of Inland Revenue.

The following item, referring to W. Whyte, Second Vice-President C.P.R., has been reproduced by the Winnipeg Tribune from its issue of Feb. 15, 1896: "Sir Donald A. Smith is in the city. Regarding Wm. Whyte, of the C.P.R., and rumored promotion, Sir Donald said: 'I would like to say that no promotion which the C.P.R. could give Mr. Whyte would exceed his abilities or his merits. In him the company has always had one of its ablest officials.'" At that time Mr. Whyte was General Superintendent Western Division, his promotion to the position of Manager Western Lines taking place May 3, 1897.

Mrs. Jas. Dobson, of Toronto, mother of C. A. Dobson, Dominion Express Agent, Hamilton, Ont., celebrated her 90th birthday recently. She was the second daughter of Capt. Wm. Moore of the Township of York, who fought under General Brock in the war of 1812. Her late husband was the first reeve and justice of the peace of Yorkville in 1852. He fought as a Government officer in the rebellion of 1837. He was appointed postmaster of Yorkville, which position he held until his death in 1894. His daughters, the two Misses Dobson, who live with their mother, still conduct the Yorkville post office.

S. Ennes, who has been appointed Trainmaster G.T.R. Western Division, Durand, Mich., was born at St. Louis, Mo., Mar 19, 1862, and entered railway service in 1881, his record being: July, 1881, to Jan., 1882, operator Texas and Pacific Ry.; Jan., 1882, to Aug., 1884, brakeman Southern Pacific Rd.; Aug., 1884, to May, 1886, operator, Missouri Pacific Rd.; May, 1886, to June, 1893, Train Dispatcher, same road; June 1893, to 1898, Chief Train Dispatcher, same road; 1898 to 1899, Inspector of dispatching, same road; 1899 to 1901, Instructor standard rules, same road; 1901 to Mar., 1904, Division Superintendent, same road; Mar., 1904, to Dec. 1, 1905, Superintendent Western Maryland and Baltimore Rd.

C. F. Wenham, formerly General Agent, C.P.R., Chicago, Ill., has been arrested in New York on a charge of embezzling $54,473.35, and has been admitted to bail. In the complaint leading up to the arrest, it is set forth that the C.P.R., on April 15, 1903, purchased from Elder, Dempster & Co. a line of steamships plying between St. John and Quebec and points in England; that Wenham was General Agent for the company in Chicago; that he failed to render bi-monthly statements of the sale of passenger tickets made by him; that he changed dates on certain tickets to make it appear that they had been sold prior to the transfer of the business of the line and returned by purchasers, and that other reports that were made were false. In the Federal courts in Chicago, a judgment for $54,473.35 was obtained against Wenham Dec. 8, and in order to recover this sum the action was instituted in New York, as Wenham has gone there to reside.

Evidence of the value which is attached to the accuracy and up-to-date nature of THE RAILWAY AND MARINE WORLD'S information in regard to the development of transportation facilities, etc., was recently afforded by the receipt of an order, entirely unsolicited, to supply the paper regularly to His Majesty's War Office, St. James' Square, London, Eng.

Railway Commissioners' Freight Orders.

In our January issue, pg. 13, we gave an order issued on Nov. 28, 1905, in connection with interswitching at Lindsay, Ont. It appears that a mistake was made in the issuance of the order, and on Nov. 30 the Board issued a supplementary order directing that all that portion of the order of Nov. 28 following and including paragraph 3 be struck out, and the following substituted therefor:

3. That pending such further evidence and consideration and until further order, the following provisions shall apply subject to any order of the Board for the increase or decrease of rates on traffic carried in the meantime:

1. That the rates to be charged for such tariff shall be those provided for by any joint tariffs in existence between the railway companies interested, and, in the event of there being none, the rates charged by the G.T.R. between the same points; and in the absence of either, the rates charged by the C.P.R., or the Lindsay, Bobcaygeon and Pontypool Ry. Co., between the same points.

2. That in the division of the said rates, the G.T.R. shall be entitled to charge and receive the following tolls for switching freight and live stock traffic from and to its connection at Lindsay St. with the tracks of the C.P.R., or the Lindsay, Bobcaygeon and Pontypool Ry., viz.:

(a) To and from all tracks and sidings used for the purpose of loading and unloading cars, owned or controlled by, or connecting with the lines of the G.T.R., on the east side of the River Scugog, $3 per carload of 40,000 lbs., or less; $4 per carload of over 40,000 lbs., but not over 60,000 lbs.; and $5 per carload of over 60,000 lbs.; no extra charge to be made for switching the empty car in the opposite direction.

(b) To and from all tracks and sidings used for the purpose of loading and unloading cars owned or controlled by or connecting with the G.T.R. lines on the west side of the River Scugog, excepting such sidings adjoining the G.T.R. freight shed or sheds, as may be necessary for the convenient transfer thereto and therefrom of freight ordinarily handled by the G.T.R. employes; $4 per carload of 40,000 lbs. or less; $5 per carload of over 40,000 lbs. but not over 60,000 lbs.; and $6 per carload of over 60,000 lbc.; no extra charge to be made for switching the empty car in the opposite direction.

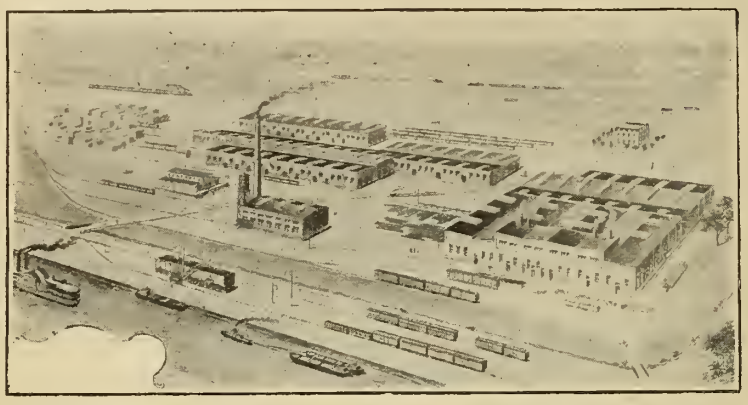
3. That all other devices, such as free or assisted cartage, or cartage allowances, intended to equalize the facilities of the respective railways for the collection and delivery of freight at or near Lindsay, except such as may be published in the freight tariffs of the companies, are prohibited.

SWITCHING AT OWEN SOUND.

In the matter of the complaint of John Wright & Sons, millers, of Owen Sound, Ont., under sec. 254 of the Railway Act, 1903, that the rate of 2½ c. per 100 lbs., charged by the C.P.R. Co. on grain from the railway company's elevator at Owen Sound to the public siding most convenient to the complainant's mill, is excessive and unreasonable in itself, and discriminatory with respect to the rates charged by the railway company for haulages to and from certain private sidings at Owen Sound; filed under reference 18069, file 727. Upon hearing all parties concerned and the reports of its Chief Traffic Officer, the Board doth order that the rate on grain purchased f.o.b. cars at the railway company's elevator at Owen Sound, from the elevator track to unloading sidings within the company's terminal at Owen Sound, do not exceed 1c. per 100 lbs. on the actual quantity loaded in the car, with a minimum of 40,000 lbs. for each carload.

Canada Car Company

MONTREAL, QUE. LIMITED



Railway Freight and Passenger cars, both wood and steel, of all descriptions and styles; street cars, car wheels, castings, forgings, and all equipment necessary for car construction.

Capacity—7500 freight cars, 150 passenger coaches per year.

ORDERS SOLICITED

ATTENTION, MASTER CAR BUILDERS!

The M. C. B. rules of interchange provide for the use of THE STEEL BACK BRAKE SHOE on your freight equipment.

The use of OUR STEEL BACK SHOE will mean a saving in brake shoe maintenance, brake heads and brake beams.

THE STEEL BACK BRAKE SHOE is an economy on all railway equipment.

WARING-WHITE BUILDING CO., London, England

The Canadian Freight Association has submitted for the consideration of the Board of Railway Commissioners proposed changes in and additions to the Canadian Freight Classification, which it is proposed to issue as supplement 6.

Canadian Northern Ry. Construction.

If it be decided to build the new terminal, offices, etc., on the site of the present offices in Winnipeg, the C.N.R. officials will vacate their present quarters in the spring, and will locate in rented offices in the Scott Block and in the Canadian General Electric Co.'s building. The erection of the new building will be the most important of the company's operations in Winnipeg during the current year. With the completion of the main line to Edmonton, Alta., and the extension of what was at one time regarded as the main line from Melfort to Prince Albert, Sask., W. Mackenzie, the President, recently announced that the company would devote its attention to branch line construction and the development of the territory through which the main line runs. Steel was laid into Prince Albert from Melfort, Jan. 26, and a yard has been laid out there. A temporary bridge has been constructed across the river, and the permanent bridge, the floor of which is 90 ft. above the level of the river, is about completed. Ballasting and other work is being gone on with, and a regular train service is expected to be placed in operation early in the spring.

The new construction arranged for, or projected for, the current season, includes a start on the branch from near Erwood, Sask., towards Hudson Bay, the contract for which is reported to have been let to James Cowan, of Kirkfield, Ont. Engineers have been in the field locating this line since Nov., 1905, and a large number of teams have been engaged since early in Jan. hauling camp equipment and supplies from Erwood northerly. Another branch line upon which work will be gone on with during the season will be an extension of the branch from Swan River. This is a line midway between the main line and the Prince Albert branch, and will open up a very fertile stretch of country.

C.P.R. Western Officials' Conference.

A conference of officials of the C.P.R. Western Lines was held at Field, B.C., Feb. 12 and 13, to which the following were invited, the address being Winnipeg, unless otherwise mentioned: W. Whyte, Second Vice-President; R. Marpole, General Superintendent, Vancouver; G. J. Bury, General Superintendent; R. R. Jamieson, General Superintendent, Calgary; A. Price, Supt. of Transportation; O. O. Winter, Superintendent, Fort William; J. T. Arundel, Superintendent; G. E. Graham, Superintendent Winnipeg Terminals; J. J. Scully, Superintendent, Brandon; J. Brownlee, Superintendent, Moose Jaw, Sask.; J. Niblock, Superintendent, Calgary, Alta.; G. Erickson, Superintendent, Cranbrook; T. Kilpatrick, Superintendent, Revelstoke, B.C.; J. S. Lawrence, Superintendent, Nelson, B.C.; F. F. Busteed, Assistant Chief Engineer; J. E. Schwitzer, Principal Assistant Engineer; Frank Lee, Division Engineer; N. E. Brooks, Division Engineer, Calgary; C. Cartwright, Division Engineer, Vancouver; J. Callaghan, Div. Engr. Construction; W. A. James, Div. Engr. Construction; H. B. Lake, Chemist; B. S. Jenkins, Gen. Supt. Telegraphs; S. Edwards, Supt. Construction T.D.; J. Wilson, Supt. Telegraph Dept., Vancouver; J. Tait, Asst. Supt. Telegraph Dept.; R. Barnwell, Fuel, K. and Tie Agent; F. T. Griffin, Land Commissioner; J. L. Doupe, Asst. Land Commissioner; J. S. Dennis, Asst. to 2nd Vice-President, Calgary; F. W. Peters, Asst. Freight Traffic Manager; W. B. Lanigan, General Freight Agent; B. W. Greer, General Freight Agent, Vancouver; H. E. MacDonell, General Freight Agent, Nelson, B.C.; H. H. Abbott, Asst. General Freight Agent, Calgary, Alta.; W. C. Bowles, Asst. General Freight Agent, Vancouver, B.C; C. H. Smith, Asst. General Freight Agent, Vancouver, B.C.; C. E. McPherson, General Passenger Agent; H. W. Brodie, Asst. General Passenger Agent; E. J. Coyle, Asst. General Passenger Agent, Vancouver; W. Bell, Supt. S.,D. & P. Car Dept.; J. Sparks, Asst. General Baggage Agent; S. C. Sykes, Asst. Supt. S.,D. & P. Car, Vancouver, B.C.; W. Cross, Asst. to 2nd Vice-President; G. Hall, Asst. Supt. Motive Power; G. H. Eaton, Asst. Master Car Builder; C. H. Temple, Master Mechanic; J. Cardell, Master Mechanic, Calgary; S. Phipps, Master Mechanic, Revelstoke; S. J. Hungerford, Supt. Loco. Works; H. H. Boyd, Asst. Electrical Engineer; J. A. Macgregor, Asst. Supt. Car Service; W. O Miller, Car Service Agent, Vancouver; W. B. Harris, Car Distributor, Calgary; W. H. D'Arcy, General Claims Agent; J. N. Brooks, Freight Claims Agent; J. Jones, Freight Claims Agent, Vancouver, B.C.; L. O. Genest, General Storekeeper; F. E. Gautier, Purchasing Agent; J. P. O'Leary, Supt. Hotel Construction; G. Ford, Supt. Dominion Express; L. P. Stockett, General Manager Pacific Coal Co., Bankhead, Alta.

A special train for the conveyance of the officials left Winnipeg Feb. 10 at 2.20 o'clock, reaching Field Feb. 12 at 9.40. Returning Field was left Feb. 13 at 2.30 o'clock, and Winnipeg reached Feb. 15 at 11. W. Whyte presided at the meeting, A. Price acting as Secretary. The following was the programme:

MONDAY, FEBRUARY 12.

10.00 to 11.30—"How to Improve Our Passenger Service" (Traffic Officer's Standpoint), C. E. McPherson. "How to Improve Our Passenger Service" (Operating Officer's Standpoint), R. Marpole. Discussion led by W. Bell.

11.30 to 12.30—"Block Signalling, and How It Can Be Advantageously Applied On Our Line," F. Lee. Discussion led by O. O. Winter

14.30 to 15.30—"How to Secure the Maximum Service From Cars," J. A. Macgregor. Discussion led by J. T. Arundel.

15.30 to 16.30—"How Freight Claims Can Be Reduced," W. H. D'Arcy. Discussion led by B. W. Greer.

16.30 to 17.30—"Roundhouse Practice," C. H. Temple. Discussion led by S. J. Hungerford.

17.30 to 18.30—"Saving Effected by Grade Reductions," F. F. Busteed. Discussion led by G. Erickson.

20.30 to 21.30—"Car Inspection," G. H Eaton. Discussion led by T. Kilpatrick.

TUESDAY, FEBRUARY 13.

10.00 to 11.00—"Organization," G. J. Bury. Discussion led by J. E. Schwitzer.

11.00 to 12.00—"Best Methods to Adopt to Secure Competent Engine Crews," G. Hall. Discussion led by S. Phipps.

12.00 to 13.00—"Water Treatment," W. Cross. Discussion led by H. B. Lake.

14.30 to 16.00—"The Effect of Train Service in Securing Competitive Freight," F. W. Peters. "Prompt Handling of Competitive Freight," R. R. Jamieson. Discussion led by H. E. Beasley.

16.00 to 17.00—"Economic Use of Western Coals," R. Barnwell. Discussion led by J. Brownlee.

17.00 to 18.00—"Relation of the Telegraph to the Operating Department," B. S. Jenkins. Discussion led by J. S. Lawrence.

20.00 to 21.00—"Purchase and Handling of Stores," F. E. Gautier. Discussion led by L. O. Genest.

TRANSPORTATION APPOINTMENTS.

Canadian Pacific Ry.—W. F. Tye, Chief Engineer, having resigned to go into construction work, F. P. Gutelius, Engineer of Maintenance of Way, is acting as Chief Engineer.

W. S. Painter has been appointed Architect for the company, with office at Montreal. The position is a new one.

P. B. Earle, of the Fourth Vice-President's office, is discharging the duties of Export Freight Agent at Montreal, during the absence in Great Britain of W. M. Kirkpatrick.

C. Spencer, heretofore conductor on the Montreal-Ottawa run, has retired, and has been given a position as travelling conductor over the Eastern Division. He will inspect the cleanliness and ventilation of the cars, encourage the men in being careful about their personal appearance; attention and politeness to passengers, and generally to give the younger conductors and train men the benefit of his experience.

E. Marshall, heretofore locomotive foreman, Hochelaga, Que., has been appointed locomotive foreman, Outremont, Que., succeeding A. A. Scott.

—. Nowell, heretofore locomotive foreman Angus shops, Montreal, has been appointed night-foreman at Outremont, Que., succeeding J. Wilkinson, promoted.

J. Wilkinson, heretofore night-foreman, Outremont, Que., has been appointed locomotive foreman, Hochelaga, Que., succeeding E. Marshall.

A. A. Scott, heretofore locomotive foreman at Outremont, Que., has been appointed Locomotive Inspector, Angus shops, Montreal.

—. Hudson, heretofore erecting shop foreman, Carleton Jct., Ont., has been appointed locomotive foreman, Ottawa.

C. A. Stark, heretofore locomotive foreman, Ottawa, has been appointed general foreman, Carleton Jct., Ont.

T. Mullins has been appointed chief clerk Toronto city ticket agent's office, vice P. D. Sutherland, promoted.

The following changes have been made in the district of the roadmasters on the Ontario Division west of Toronto:—Roadmaster W. Code's district will extend from Toronto Jct. to London Yard, and from Guelph Jct. to Guelph. Roadmaster A. McAuley's district will extend from the east end of London yard to Windsor. J. E. Steele, has been appointed Roadmaster with jurisdiction over the Ingersoll and Port Burwell branches (the old Tillsonburg, Lake Erie and Pacific Ry.), with office at Woodstock, Ont., temporarily.

J. N. Brooks is acting Freight Claims Agent, Central and Western Divisions. We are advised that it is not expected to appoint a successor to R. E. Larmour, heretofore Freight Claims Agent for the divisions for some time.

W. S. Merchant has been appointed travelling passenger agent at St. Louis, Mo., succeeding C. E. Benjamin, promoted.

Percy D. Sutherland, heretofore chief clerk in the Toronto city ticket agent's office, has been appointed chief clerk of the passenger branch in the office of the General Agent for China, Japan, etc., at Hong Kong, succeeding H. B. Carter, resigned. Mr. Sutherland sailed from Vancouver Feb. 19.

T. J. Smith, heretofore with the Great Northern Ry., U.S., at Seattle, Wash., has been given a position in the C.P.R. freight offices in Liverpool, Eng., immediately under J. J. Gilbertson, the company's agent there.

H. McMurtrie, heretofore C.P.R. representative at Philadelphia, Pa., having resigned, F. W. Huntington has been appointed general agent, Passenger Department, and F. T. Goodman has been appointed general agent, Freight Department, there.

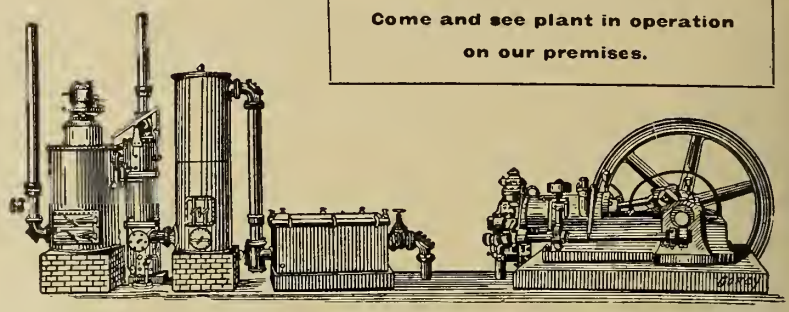
Central Vermont Ry.—A. S. Wright, formerly locomotive foreman G.T.R., London,

YOU WILL SAVE MONEY BY INSTALLING

The Pintsch Suction Gas Plant in your factory.

We guarantee your fuel consumption will not exceed $\frac{3}{4}$ to $1\frac{1}{4}$ lbs. coal per B.H.P. per hour.

Come and see plant in operation on our premises.



N. J. HOLDEN CO. LIMITED 66 McGILL STREET, MONTREAL AND FORESTERS' BUILDING TORONTO

THE PINTSCH LIGHT AWARDED THE GRAND PRIZE ST. LOUIS, 1904

In the United States 170 railroads have equipped over 25,500 cars with Pintsch Light. In the World more than 135,000 cars, 6,000 locomotives and 1,800 buoys are using Pintsch Light, the test of experience having proven it the most economical, safe and reliable system for car lighting. Pintsch Gas Buoys adopted as standard by the United States Lighthouse Board. Highest awards taken at World's Expositions at Moscow, Vienna, St. Petersburg, London, Berlin, Paris, Chicago, Atlanta, Buffalo, and now St. Louis.

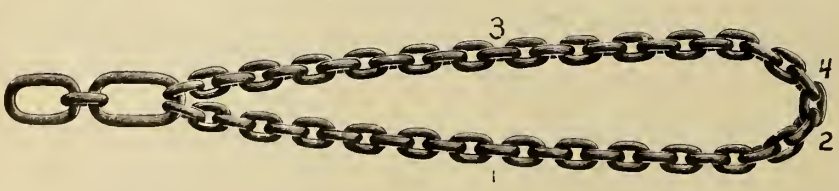
SAFETY HEATING SYSTEMS RECEIVED THE HIGHEST AWARD

Practical service for the past 18 years has demonstrated the reliability, efficiency and adaptability of the Safety Systems of Direct Steam and Hot Water Heating which are being applied in large quantities to railroad equipment. Straightport couplers. Automatic Steam Traps. 140 Railroads are using these devices, applied on 16,000 cars. Standard on Pullman cars.

The Safety Car Heating and Lighting Co.

160 Broadway, NEW YORK

CHICAGO PHILADELPHIA ST. LOUIS SAN FRANCISCO



This Chain, plying to and fro on this Sprocket, lasts from four to six times as long as if winding round a post. Hence economy and safety. This Chain also is held by the Sprocket in four places all the time, instead of only by one end, as on a post or drum. Hence safety again. When this Chain gets worn and breaks, a new Chain instantly replaces it automatically. Hence greater safety. The Sterling Safety Brake is the safest, most economical and most powerful of hand brakes.

STERLING-MEAKER CO., NEWARK, N.J.

Ont., and latterly in charge of water service on the Midland Division, has been appointed Locomotive Foreman, C.V. Ry., St. Albans, Vt.

Delaware, Laekawanna and Western Rd.—W. E. Dowle, heretofore Divisional Freight Agent, Buffalo, N.Y., has been appointed Assistant General Freight Agent, a new position, with office at Buffalo, N.Y.

Erie Rd.—J. R. Cathcart, heretofore city passenger agent at Niagara Falls, N.Y., has been appointed City Passenger Agent at Buffalo, N.Y., succeeding R. F. Schornstein, resigned.

J. B. Dolan has been appointed city passenger agent at Niagara Falls, N.Y., succeeding J. R. Cathcart, promoted.

Grand Trunk Pacific Ry.—The medical work of the Lake Superior branch is under the immediate control of the contractors, Foley Bros., Larson & Co., consequently no appointments of medical officers have been made on behalf of the company on that part of the line.

Grand Trunk Ry.—P. Butler, heretofore travelling passenger agent Canada Atlantic Ry., has been appointed G.T.R. city ticket and passenger agent at Ottawa, succeeding S. Ebbs, resigned.

G. R. Layher, heretofore agent Wabash Rd. at Louisiana St., Buffalo, N.Y., has been appointed agent for the G.T.R. at Black Rock, N.Y., succeeding J. J. Beck, appointed Superintendent Union Station, Toronto.

The following agents have been appointed: Beloeil, Que., F. Wood; Suspension Bridge, N.Y., E. O. Foster; Moose Creek, Ont., O. Parent; Sprucedale, Ont., D. F. Milloy. Outside ticket agent: Parry Sound, Ont., W. J. Fowler.

S. Ennes has been appointed Trainmaster, Districts 25, 27, 28 and 29, suceeeding H. W. Matthews, assigned to other duties. Office, Durand, Mich.

Great Northern Ry. of Canada.—F. Nicholls has been elected First Vice-President, succeeding Col. McNaught.

Halifax and South-Western Ry.—P. Mooney has been appointed District Freight and Passenger Agent. Office, Halifax, N.S.

The International Mereantile Marine Co. announces with great regret, on account of his long and valued services, the resignation of J. A. Wright, Manager for the U.S. and Canada of the Passenger Department of the company's lines. Mr. Wright resigned to accept a partnership in the firm of Huhn, Edey & Company, bankers and brokers, New York City. A few days later he was taken seriously ill with pneumonia, but at latest reports was recovering.

Lake Ontario and Bay of Quinte Steamboat Co.—It is understood that consequent upon the death of C. F. Gildersleeve, the offices of President and General Manager will be divided, and that H. H. Gildersleeve, Manager Northern Navigation Co., Collingwood, Ont., will become President, and E. E. Horsey, the present Traffic Manager, will become General Manager.

Lake Shore and Michigan Southern Rd.—D. C. Moon, heretofore General Superintendent, has been appointed Assistant General Manager, succeeding E. A. Handy, promoted. Office, Cleveland, Ohio.

H. A. Worcester, heretofore General Superintendent Michigan Central Rd., Detroit, Mich., has been appointed General Superintendent L. S. and M. S. Rd., succeeding D. C. Moon, promoted. Office, Cleveland, Ohio.

C. S. Blackman, formerly General Eastern Agent, Big Four Route, Buffalo, N.Y., has been appointed Travelling Passenger Agent there for the L. S. and M. S. Rd.

M. J. McCarthy, heretofore Master Mechanic, Michigan Central Rd., Canada Division St. Thomas, Ont., has been appointed Master Mechanic, L. S. and M. S. Rd., at Elkhart, Ind.

Michigan Central Rd.—H. C. Nutt, heretofore General Superintendent Chicago, Burlington and Quincy Rd., St. Louis, Mo., has been appointed General Superintendent M. C. Rd., succeeding H. A. Worcester, appointed General Superintendent Lake Shore and Michigan Southern Rd.

D. Meadows has been appointed Assistant Master Mechanic, Canada Division. Office St. Thomas, Ont.

Minneapolis, St. Paul and Sault Ste. Marie Ry.—H. M. Lewis has been appointed Assistant General Passenger Agent, succeeding W. S. Thorn, deceased. Office, St. Paul, Minn.

Niagara, St. Catharines and Toronto Ry.—Niagara, St. Catharines and Toronto Navigation Co.—E. H. Pepper has been appointed General Agent; freight and passenger department, with headquarters at Toronto, vice H. G. Luke.

Kingston and Pembroke Ry.—A. McNaughten, heretofore Auditor, has been appointed Secretary-Treasurer, succeeding J. Whitebread, resigned.

E. H. Welch has been appointed Auditor, succeeding A. McNaughten, promoted.

Pere Marquette Rd.—J. F. Dimling, heretofore Division Engineer, Grand Rapids, Mich., has been appointed Chief Engineer. Office, Detroit, Mich.

J. Tuthill, heretofore Bridge Engineer, has been appointed Engineer of Bridges and Buildings. Office, Detroit, Mich.

The office of O. C. LeSuer, Division Engineer, Buffalo Division, St. Thomas, Ont., has been removed to Detroit, Mich., and his jurisdiction extended over what is known as the Detroit District, composing the Buffalo Division of the P.M. His title will remain the same, but he will report to the Superintendent instead of to the Chief Engineer as in the past.

The office of Master Car Builder of the Cincinnati, Hamilton and Dayton and Pere Marquette Rd. has been abolished. It is reported that W. D. Lowry, who held that position, will remain with the C., H. and D. Rd.

Wabash Rd.—The handling of the U.S. mail on the Wabash Rd. will be conducted under the direction of D. O. Ives, General Traffic Manager, St. Louis, Mo., instead of as heretofore.

E. K. Woodward, Engineer of Maintenance at Peru, Ind., has been appointed Principal Assistant Engineer, succeeding H. M. Cryder, resigned. Office, St. Louis, Mo.

J. N. Hoffner has been appointed District Passenger Agent at Buffalo, N.Y., reporting to R. N. Collyer.

White Pass and Yukon Route.—J. H. Rogers, heretofore General Agent at Dawson, Yukon, has been appointed Traffic Manager, with offices at Vancouver, B.C., and Skagway, Alaska.

H H. Phillips has been appointed Purchasing Agent, vice J. W. Young, resigned.

F. B. Wurzbacher has been appointed General Agent at Skagway, Alaska, with the same jurisdiction over all traffic matters heretofore exercised by R. D. Pinneo.

M. J. B. White, General Freight and Passenger Agent, having resigned, the office has been abolished. R. D. Pinneo, heretofore Assistant General Passenger and Freight Agent, Skagway, Alaska, has been appointed Freight and Passenger Agent. Office at Vancouver, B.C.

C. L. Coon, city passenger and ticket agent, G.T.R., Buffalo, N.Y., died there Feb. 25, aged 38, after a brief illness, and was buried at Watertown, N.Y. He was appointed C. P. & T. A. at Buffalo on the promotion of J. D. McDonald to the District Passenger Agency at Toronto, May, 1902.

Railway Finance, Meetings, etc.

Bruce Mines and Algoma Ry.—The Exchequer Court has made an order appointing a Receiver for this line, which extends from the shore of Lake Huron, to Rock Lake, Ont., 17 miles, and has charter powers to extend to the C.P.R. transcontinental line.

Canadian Pacific Ry.—A resolution has been passed by the directors authorizing the increase of the capital stock from $110,000,000 to $150,000,000, and a meeting of the shareholders has been called to be held in Montreal March 19, for the purpose of sanctioning the same, and determining the amount or amounts and the time or times at which the new stock is to be issued; and the purposes to which it will be applied.

Kingston and Pembroke Ry.—Following are the officers and directors for the current year:—President, W. D. Matthews, Toronto; Vice-President and General Manager, W. R. Baker, Montreal; other directors: W. Harty, M.P., R. V. Rogers, B. Crawford, Kingston, Ont.; A. R. Creelman, K.C., Jas. Oborne, Montreal; H. P. Timmerman, W. B. Hart, Toronto; Secretary-Treasurer, A. MacNaughton.

New Brunswick Coal and Ry. Co.—The Treasurer of New Brunswick in his budget speech, Feb. 19, stated that the report of the Commissioners in charge of the operations of the railway showed that from July 1, 1905, to Jan. 31 of the current year, the gross earnings of the line had been $24,605.71, the operating expenses $22,416.58, leaving net earnings of $2,189. There was in the hands of the Receiver-General a balance of $52,075 of the sum authorized to be devoted to the purposes of the line, and the Commissioners had a balance of $3,629.79 in hand. No provision, said the Treasurer, had been made for the remuneration of the Commissioners.

Quebec Central Ry.—Gross earnings for Jan., $61,134.51; net earnings, $18,225.58, against $46,441.18 gross and $7,322.68 net for Jan., 1905.

Quebec Southern and South Shore Ry.—Senator F. L. Beique has completed the payments required for the purchase of these lines at the recent sale by order of the Court of Exchequer. The purchase was made on behalf of the Delaware and Hudson Rd., the price being $1,061,000. The question of the sale has been taken to the courts by the Rutland Road and others who allege that other offers were more advantageous to the creditors than the one accepted, and will be argued on March 1.

Temiscouata Ry.—Traffic receipts for Jan., $10,898.18 against $8,707.14 for Jan., 1905.

Toronto, Hamilton and Buffalo Ry.—Earnings for Jan., $66,087.26 against $53,180.48 for Jan., 1905.

Canadian Freight Classification.

By supplement 6 to Canadian Freight Classification 12, submitted for the approval of the Board of Railway Commissioners, it is proposed to make the following changes in Classification 12 and supplements 4 and 5 thereto, and the approval of the Board to such changes has been requested, viz.:—

Present.	L.C.L.	C. L.	*Proposed*	L.C.L.	C.L.
Asbestos: Page 15, also page 4, supplement No. 4.					
Asbestos Pipe, or Pipe Covering	2	4	Asbestos Boiler or Pipe Covering, in bags, crates O. R. B. or in boxes	2	4
Hemp: Page 54.					
Hemp in boxes, O.R. of fire and water	2	5	Hemp: In uncompressed bales or bundles	1	5
Hemp in bales O.R. of fire and water	3	.5	In compressed bales or in boxes	3	5
Hemp C.L. minimum 20,000 lbs			C.L. minimum weight 20,000 lbs.		

THE BAKER HOT WATER CAR HEATERS

TEN STYLES

RIVETED STEEL SHELL HEATER

Attention is especially called to our STEEL HEATERS, the JOINTLESS FIRE PROOF and the RIVETED, SINGLE and DOUBLE COILS. Made of ONE QUARTER INCH STEEL. The RIVETED HEATER was constructed to meet demand for a SMALLER and CHEAPER Heater than the Jointless.

The "PERFECTED" HEATER, Single and Double Coil.

The "MIGHTY MIDGET," 19 inches in diameter, has Expanding Coil, and will heat a 55 foot car. This Heater is especially adapted to ELECTRIC CARS.

Subscription Agents Wanted.

We want an agent at each railway and shipping centre in the Dominion to secure new subscriptions to THE RAILWAY AND MARINE WORLD, for which we will pay liberal commissions.

The work is easy, the paper recommending itself, and is specially adapted for clerks in transportation offices. It can be done at odd times without interfering with other duties.

For terms and other particulars, address

THE RAILWAY AND MARINE WORLD,
Toronto

PROFESSIONAL CARDS.

THE RAILWAY AND MARINE WORLD is especially adapted for the publication of professional cards of engineers, inspectors, analysts, electrical experts, naval, grain elevator and other architects, solicitors, etc., who desire to bring themselves under the notice of the managements and officials of the various steam and electric railway, steamship, grain elevator, telegraph, telephone and power companies throughout Canada, as well as the locomotive, car and ship builders, contractors and promoters of railway enterprises. THE RAILWAY AND MARINE WORLD is the only one medium through which all these important classes can be reached.

Rates will be quoted on application.

STEAM SHOVELS

We build shovels in sizes from 22 to 110 tons, with dipper capacity of ¾ to 4½ cubic yards. Our new design represents the accumulated experience of many years in steam shovel building. Some of the features that we would call attention to are the use of cut gears, swinging jack arms, and the heavy construction of car body. Write us and describe your work, and get our specifications and proposition on your requirements.

ELECTRIC RAILWAYS.

Toronto Railway Co.'s Report.

Following are extracts from the report for the year 1905 presented at the 14th annual meeting in Toronto, Feb. 7:—The gross earnings were $2,747,324.58, showing an increase of $302,790.34, or 12.38%, a continuation of the healthy increases made during several years past. The distribution of gross earnings was as follows:—Operating expenses, $1,560,437.42; interest charges on bonds, $171,599.80; payments to city on account of percentages of earnings due under the franchise agreement, $292,706.72; payments to city on account of pavement charges, $79,996.94; four quarterly dividends of 1¼%, each, aggregating $350,000.00; leaving a surplus of $292,583.70. Of this $50,000.00 has been transferred to contingent account, and the balance, $242,583.70, has been carried to the credit of profit and loss. This account now shows accumulated profits amounting to $1,714,798.77, all of which has been applied in capital expenditure. The capital expenditure during the year amounted to $507,493.79, the principal items of which were the completion and equipment of sub-power stations on Yonge St., and Front and Frederick streets, the laying of underground cables, the constructinon of double-truck convertible cars, and the equipment of 100 cars with air brakes. The renewal of the steam plant which was commenced three years ago has been completed, and other repairs and improvements have been effected. During the year there was paid to the City Council for percentages, pavement charges, and taxes, $405,638.89.

Passengers carried, 67,881,688; transfers, 23,625,752, against 60,127,460 and 20,480,270 for 1904. Percentage of operating expenses 56.08% against 58.2 % in 1904.

The annual statement of the Toronto and York Radial Ry., the control of which was obtained in 1904, showed a surplus of $20,248.01 after paying operating expenses and meeting interest on bond issue. Extensions on the Mimico Division from Long Branch to Port Credit, 3.6 miles, and on the Scarboro Division from the Halfway House to Scarboro Post Office, 3.3 miles, were completed and put into operation Dec. 24. The extension of the Metropolitan Division from Newmarket to Jackson's Point, 24.4 miles, is under construction. A private right-of-way has been secured and fenced in, grading has been completed, and all culverts and bridges built (with the exception of the trestle work over the G.T.R. at Newmarket), and rails have been laid the full distance.

Following are the officers and directors for the current year:—President, W. Mackenzie; Vice-President, F. Nicholls; other directors: Hon. G. A. Cox, Sir H. M. Pellatt, W. D. Matthews, J. Gunn, Toronto; R. Forget, Montreal.

Projects, Construction and Betterments.

Brandon, Man.—At the inaugural meeting of the City Council, recently held, the Mayor stated that it had been announced that an application would be made for a street railway franchise; if such were to be granted the community must reap the full benefit and its interests be guarded. Personally he was in favor of the city owning its own lines. (Nov., 1905, pg. 541.)

Edmonton St. Ry.—The City Council of Edmonton, Alta., is of opinion that the franchise granted to R. P. Inglis, Montreal, for the construction of an electric railway, two miles of which were to be in operation by Sept., 1905, had been forfeited. The company formed by Mr. Inglis claims that it still holds the charter, and says it is ready to proceed with construction, having purchased plant, etc. The matter may probably reach the courts. The city commissioners are at present figuring on the construction of three miles of line during the current year, and will present estimates next meeting of the council. (Aug., 1905, pg. 369.)

Hamilton, Caledonia and Lake Erie Ry.—W. Anderson, one of the promoters of this projected electric railway, stated Feb. 12, that construction would be commenced at an early date. The company, which has power to bore for and distribute natural gas, has now secured the right to lay mains for conveying natural gas alongside its railway. A contract has been made to supply the Hamilton Steel and Iron Co. with 1,000 ft. per day, and Mr. Anderson claims there will now be no difficulty in getting the project financed. (Oct., 1903, pg. 341.)

Hamilton Radial Ry.—The bridge at Oakville, Ont., has been completed and track laid over it. There are only about seven miles of track to be completed to make the connection with the Toronto and York Radial Ry. Co.'s Mimico line which is now running into Port Credit. (Jan., pg. 35.)

Hamilton Terminal Ry. Co.—The Ontario Legislature will be asked at the current session for an act incorporating a company with this title with power to construct a railway in Hamilton and the county of Wentworth, Ont. Staunton and O'Heir, Hamilton, Ont., are solicitors for the applicants.

A special meeting of the Hamilton City Council was held, Feb. 6, in connection with the application of the Hamilton Cataract Light, Power and Traction Co., with reference to the construction of the union terminal station, which it is proposed to erect at a cost of $250,000. The company desires to construct a line on Catharine St., from Wilson St. to the proposed station at the corner of King and Catharine streeets; to use Main St. for outgoing radial railway cars, and the right to connect the street railway and the Hamilton, Grimsby and Beamsville Ry. at the corner of Main and James streets.

Kenora, Ont.—The town council has been asked by the Board of Trade to secure surveys and estimates of the cost of an electric railway between Kenora and Keewatin, Ont., about three miles.

Montreal Street Ry.—A large tract of land has been purchased in the east end upon which it is intended to erect a power house at a cost of about $1,000,000, of a larger size and capacity than the present one on William St. (Dec., 1905, pg. 593.)

The South-Western Traction Co. has had its cars running from London, Ont., to the point where its line will pass under the G.T.R. (Wabash) main line, about a mile north of St. Thomas. At this point a subway is being constructed, and it is expected that this will be completed in a few weeks. The line is graded through from London to Port Stanley, and steel has been laid to a couple of miles south of St. Thomas, with the exception of the break at the subway. The two large steel bridges over the Thames at London and over Kettle Creek at St. Thomas are being proceeded with, the latter, we were advised, Feb. 13, would be completed within a few days. The bridges are approached in each instance by 400 to 500 ft. of trestlework which, with the steel-work, are of standard steam railway design. H. W. Middlemist, civil engineer, Toronto, was engaged in laying out the work. During the current season it is intended to finish the line into Port Stanley, and to proceed with the lines from London to Delaware, and from London to Ingersoll. (Feb., pg. 89.)

Toronto Ry.—An order has been placed in the U. S. for 5,000 tons of 90-lb. girder rails to re-lay a number of the main lines in the city. It is proposed to re-lay altogether about 42 miles of track at present. (Jan., pg. 37.)

Windsor, Essex and Lake Shore Rapid Ry.—Grading is reported to have been completed on this line between Windsor and Kingsville, Ont., and tracklaying is said to be going on. (Jan., pg. 37.)

Winnipeg, Selkirk and Lake Winnipeg Ry.—The application for an act, which was made at the opening of the current session of the Manitoba Legislature, authorizing the company to acquire an entrance into Winnipeg, has been withdrawn. The reason for the withdrawal was the decision of the directors to transfer the line and franchise to the Winnipeg Street Ry. The shareholders' meeting to approve of this step was held Feb. 27. (Feb., pg. 89.)

Electric Ry. Finance, Meetings, Etc.

British Columbia Electric Ry.—Gross earnings for Dec., $106,472, against $89,447 for Dec., 1904. Working expenses, $54,402; renewal funds, $8,500; approximate income from investments, $7,967; net income, $51,537, against $42,143 working expenses; $6,695 renewal funds; and $43,359 net income for Dec., 1904. Aggregate gross earnings for six months ended Dec. 31, $597,573; net income, $278,089, against $463,921 gross, and $188,922 net for same period, 1904.

Halifax Electric Tramway.—Car earnings for Jan., $11,732.96, against $10,255.82 for Jan., 1905.

Montreal St. Ry.—Passenger earnings for Jan., $236,311.83; total earnings, $238,230.15, against $201,096.12 and $203,235.40 respectively for Jan., 1905. Operating expenses, $158,829.92, fixed charges, $37,090.49; surplus, $42,309.74, against $151,675.88 operating expenses; $19,035.25 fixed charges, and $32,524.27 surplus for Jan., 1905. Total earnings for four months ended Jan. 31, $957,599.49; net earnings, $341,465.77; surplus, $238,627.92, against $841,349.63 total earnings, $287,367.21 net earnings, and $212,039.44 surplus for same period 1904-05. Interest on Montreal Park and Island Ry. Co.'s bonds owned by the company not included.

It was reported, Feb. 22, that the company had purchased the line and franchise of the Montreal Terminal Ry., paying the sum of $50,000 therefor, but we were officially informed Feb. 23, that there was no truth in the statement. The M. T. Co. owns a line from Craig St., near the city hall, to the eastern boundary of the city, and other lines outside the city, a total of 18.34 miles. It is believed negotiations for the purchase are in progress.

Niagara Gorge Rd.—The annual meeting was not held on the regular date owing to the continued absence of the President in

SOMETHING NEW ON THE RAILS

RUSSELL INSPECTION CARS

3 Models—Gasoline Driven. **Model 12 Weighs only 300 lbs.**

Carries comfortably three passengers and luggage.
Has four wheels of equal size with engine midway between the rails.
Easily lifted from the track by two men.
More easily removed or turned by one man handling from the rear like a wheelbarrow.
Extremely simple and reliable motor.
Maximum speed 33 miles an hour.
Takes any Railway grade with ease.
Quickly taken apart for stowing in baggage car.

the south, and on Feb. 16 we were advised that no date had been fixed for the meeting.

Niagara, St. Catharines and Toronto Ry.—Gross earnings for Jan., $12,095.95, against $11,265.03 for Jan., 1905. Surplus for Jan., $3,137.39, against $2,604.32 for Jan., 1905.

St. Thomas Street Ry.—The St. Thomas City Council will apply next session of the Ontario Legislature for an act authorizing the issue of debentures not exceeding $30,000 for paying off floating debts incurred for, among other things, the purchase of a storage battery, and an extension of the street railway.

Toronto Ry.—The Toronto City Council will apply at the current session of the Ontario Legislature for an act for a number of purposes, including the following: To compel the Toronto Ry. to furnish and maintain suitable sanitary conveniences for the car employes; to enable the city to take over or expropriate the property, rights and franchises of the Toronto Ry., upon the terms and conditions which the agreement with the company provides for the city's taking over the railway at the termination of the company's franchise; the said expropriation not to be made until the same has been approved of by a vote of the ratepayers qualified to vote on money by-laws; to interpret the agreement between the Toronto Ry. and the city so as to make it clear that the city has the right to lay down new lines and operate cars thereon in case the company refuses or neglects to do so.

Car earnings for Jan., $236,129.03, against $196,969.98 for Jan., 1905.

Winnipeg Electric Ry.—Following are the officers and directors for the current year:—President, W. Mackenzie, Toronto; Vice-President, W. Whyte, Winnipeg; Secretary, F. M. Morse, Winnipeg; other directors, Sir Wm. C. Van Horne, Montreal; D. D. Mann, D. B. Hanna, Toronto; H. Sutherland, A. M. Nanton, R. J. Mackenzie, Winnipeg. The annual report has not yet been issued.

An agreement has been signed for the purchase of the line, property and franchise of the Winnipeg, Selkirk and Lake Winnipeg Ry., and the contract came up for ratification at a meeting of shareholders of the latter company, held in Winnipeg, Feb. 27.

Woodstock, Thames Valley and Ingersoll Electric Ry.—The annual meeting was held at Woodstock, Feb. 6. Following are the officers and directors for the current year:—President and Treasurer, J. G. Wallace; Vice-President, W. J. Ickes; other directors: D. W. Karn, E. W. Nesbitt,; Secretary, H. H. Powell; General Manager, Dr. S. R. Ickes; Auditor, M. J. Brophy.

Electric Railway Notes.

The Montreal Street Ry. is having built by the Canada Car Co., Montreal, 10 closed cars, 51 ft. 10 in. long, over bumper castings.

A. T. Goward, local manager at Victoria for the B.C. Electric Ry., is expected to return early in March from a month's holiday trip to California.

The Peterborough Radial Ry. Co. passed a by-law at its annual meeting recently, directing that its affairs shall be managed and controlled by a board of seven directors.

The St. John, N.B., Ry. Co. has created the office of General Manager, and has appointed W. Z. Earle, heretofore Secretary-Treasurer, thereto. Mr. Earle, as well as previous occupants of the office of Secretary-Treasurer, performed the duties of Manager. The position of Secretary-Treasurer, as rearranged, has been filled by the appointment of H. M. Hopper.

The car barns of the International Ry. near the Whirlpool Rapids, on the Canadian side of the Niagara River, were destroyed by fire, Feb. 12. A snow-plough and 27 cars were destroyed. Fourteen of the cars destroyed were open bench cars used for the belt line service in summer. Machinery supplies, etc., were also burned. The total loss is estimated at $75,000. A new car house, shop, etc., will be built in Canada, but the exact location had not been fixed Feb. 22.

The B.C. Electric Ry. is building at its New Westminster shops a combination work and line car with snow-plough attachment and a number of dump cars for the North Vancouver line construction; four double-ended semi-convertible cars for the Vancouver-Kitsilanto line; four double-truck cars for the Vancouver city line; four single-truck and two double-truck cars for the Victoria lines; two interurban cars for the New Westminster-Vancouver line, and a double-truck freight car. It is also rebuilding passenger cars nos. 3 and 39.

Jas. Milne, who has been appointed General Superintendent British Columbia Electric Ry., was born at Woodside, Aberdeen, Scotland, Jan. 29, 1865, and after a technical course at Gordon College, Aberdeen, served

JAMES MILNE, M.E. & E.E.
General Superintendent B.C. Electric Ry. Co.

a five years' apprenticeship to mechanical engineering. He came to Canada in 1887, and after some time spent in the employ of private firms, was appointed General Superintendent of the Incandescent Electric Light Co., Toronto, subsequently entering the employ of private firms where he remained until his present appointment. For two years he was a lecturer on steam and steam engines, applied mechanics and electricity at the Toronto Technical School in its early days.

The Toronto Ry. has at present a six-inch, T-rail in use on its Dupont St. line which, we are advised, has so far proved satisfactory, and C. H. Rust, City Engineer, has recommended its further adoption. It is proposed to use the T-rail on Dovercourt Rd. during the coming summer, and if it is found satisfactory there, its further use will be urged. The advantage of the T-rail is that there is no groove to become clogged with ice and dirt. The early style of T-rail, which was used on some street railway tracks, was not satisfactory as it was not deep enough for paved streets, but a rail 7 inches in depth is now manufactured, and a special paving block is made to fit alongside the rail. Such rails have been laid in Milwaukee, St. Paul, Minneapolis and Duluth, Minn., with very good results.

Grain Elevator Notes.

The Grand Valley Elevator Co.'s elevator at Grand Valley, Ont., is offered for sale.

The C.P.R. was reported to be despatching daily during Feb. three trains of 25 cars each loaded with grain from the elevators at Fort William, Ont., for St. John, N.B.

The old Northern Elevator on the waterfront at Toronto has been sold, and the building will be diverted to other purposes. It has not been used as an elevator for some years.

A project is under consideration at Berlin, Ont., for the construction of a large grain elevator and cold storage warehouse there. The proposal is to erect the buildings on G.T.R. property near the station.

The Tupperville Milling and Elevator Co., Tupperville, Ont., has decided to go into liquidation, and a resolution was adopted Feb. 8, authorizing the directors to wind up its affairs. J. W. Simpson is Secretary of the company.

Application will be made at the current session of the Ontario Legislature for an act incorporating the Twin City Chamber of Commerce, for the purpose of establishing a grain and produce exchange at Port Arthur or Fort William, Ont.

The Red Deer Mill and Elevator Co., Blackfolds, Alta., proposes constructing a line of 35,000 bush. elevators along the main line of the Canadian Northern Ry., and also on the C.P.R. branch lines running north and south from Calgary, Alta.

The 1,000,000 bush. elevator constructed at Montreal is expected to be ready for receiving grain on the opening of navigation. It will be operated by the Montreal Warehousing Co., a G.T.R. corporation. The position of the structure is such that it will be enabled to load or unload steamers in the canal basin and in the river, while a belt conveyer gallery has been erected for loading the trans-Atlantic steamers.

The Northern Navigation Co. has leased the grain elevator at Point Edward, Ont., and will operate it in connection with its steamers as well as for general business. In making contracts for outside steamers it will be arranged that the N.N. Co.'s steamers will have first call on the elevator, owing to the fact that they are being run on schedule time. Is is not intended that there will be any advance in the rates for running the elevator, it being intended to operate it on the same basis as other houses on Georgian Bay.

The Inspector of Grain at Port Arthur and Fort William prepared statistics showing the distribution of the grain crop of 1905. The totals show that 40,982,787 bush. of wheat were shipped eastward, of which 29,763,905 were shipped almost exclusively to Canadian ports in Canadian bottoms, and 11,212,882 in U.S. bottoms to U.S. ports, against 27,091,092, and 2,822,302, respectively, in 1904; and 28,160,976 and 6,532,049 respectively for 1903. The distribution of the wheat forwarded from Port Arthur and Fort William, in Canadian vessels, was reported to be as follows:—

	1905 bush.	1904 bush.	1903 bush.
Depot Harbor	9,067,510	7,109,528	4,193,463

Richelieu and Ontario Navigation Co.

The report for the year presented at the annual meeting in Montreal, Feb. 19, showed gross earnings of $1,217,373.61, an increase of $217,504.10 over 1904, and net profits, after providing for fixed charges, interest, etc., of $239,294.55, being an increase over the previous year of $144,981.62. The operating expenses were 78.86% of the gross earnings as against 88.64% for the year 1904. The bond issue originally amounting to $571,833.33 now stands at $351,373.35. During the year the company redeemed $27,253.33 of the bonds, and has in its treasury $1,946.66 of bonds redeemable Mar. 1, 1906. Since the last annual report, the steamer Montreal has been completed, and was placed in commission May 24, 1905. Her operation warrants the congratulations previously extended. The steamer Belleville has been lengthened with satisfactory results. The heavy traffic of last season and the increased movement of tourists and commercial business generally, necessitate steamers of greater capacity. In view of this, the directors placed an order for a new steamer for the St. Lawrence River rapids, and are also making inquiries looking towards the building of a new steamer equal to or larger than the Montreal for the Montreal-Quebec route. The hotels, shops, wharves, and shore properties have been thoroughly maintained during the year, and quite a number of improvements and betterments have been made on the same. The marine railway dock, referred to in the last report, is still receiving the attention of the directors, who will continue to press upon the Government the urgency of this very necessary public work. Application has been made to Parliament to amend the acts of incorporation by giving further and additional powers, and for authority to issue bonds.

Surplus		254,660.05
		$3,955,423.45

President R. Forget in presenting the report and financial statement stated that the bank loan of $127,000 represented work in progress at the works at Sorel, and that it would be wiped out by June. The expenses in connection with the accident to the Canada had been wiped off the books. Although a promise could not be made, he saw no reason why the payment of dividends should not be resumed in the summer. The idea of the new bonds was to have power to issue $1,000,000, using a portion to pay for the vessels now building and for those contemplated.

The report having been adopted the retiring directors were re-elected, and a vote of thanks was accorded them for their services on motion of Barlow Cumberland. The directors elected were:—R. Forget, M.P., W. Wainwright, G. Caverhill, W. Hanson, Hon. J. L. Forget, C. O. Paradis, H. M. Molson, Col. F. C. Henshaw, Sir H. M. Pellatt, J. K. Osborne, Hon. E. B. Garneau.

The Canadian Lake and Ocean Navigation Co.'s turret deck type str. Scottish Hero, heretofore engaged in the coal trade between Sydney, N.S., and Montreal, will be brought to the Upper Lakes in the spring. Upon reaching Quebec she will be cut in two, and towed through the canals in sections, being put together again on reaching Lake Erie or Lake Huron. She will be engaged in the bulk freight trade on the Upper Lakes.

Shipping Federation of Canada.

The report presented at the annual meeting of the Shipping Federation of Canada, in Montreal, Feb. 14, showed that a large number of important matters had been dealt with during the year. H. A. Allan, the President, in his report dealt with the chief events of the year, among the matters upon which he touched being the St. Lawrence channel and the work now in progress in Montreal harbor. In this connection he said it was the duty of the Government to carry on energetically and systematically the deepening of the channel and not to stop at 30 ft., but continue until such a depth and width is provided as would allow the largest vessels afloat to use the port and wharves. Another important matter to which he alluded was the shed accommodation and the facilities for moving cargo. At Montreal there never had been any shore appliances available for the rapid handling of cargoes, except grain elevators. The sooner such were provided, and the heavy charges for handling freight were reduced, the better it would be for the port. At Hamburg there were over 500 cranes available for the rapid shifting of freight. If vessels were to be attracted to Montreal, the facilities that could be obtained elsewhere must be provided. Now that the Montreal pilotage and pilotage below Quebec were under the authority of the Minister of Marine, it was hoped that the long looked for board of management, consisting of a member of the department, a nominee of the Shipping Federation and a nominee of the pilots, would take practical effect and be constituted at an early date for the management of the pilotage services.

The report of the council was a lengthy one, and dealt in detail with the various questions discussed during the year, giving the correspondence that had taken place in regard to them and the results obtained. These included the pilotage above and below Quebec, aids to navigation, pilotage regulations at Halifax, wireless telegraph stations, allotment of berths at Montreal, and the many other matters affecting the shipping interests before Parliament, with

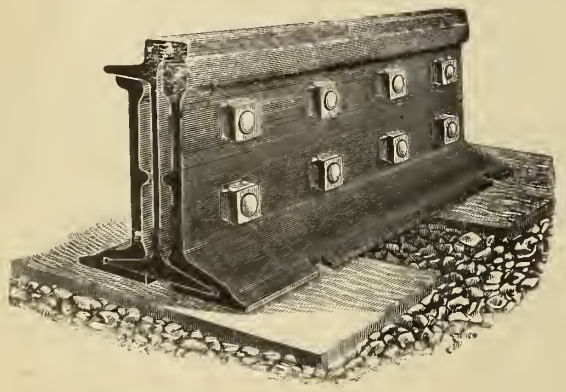
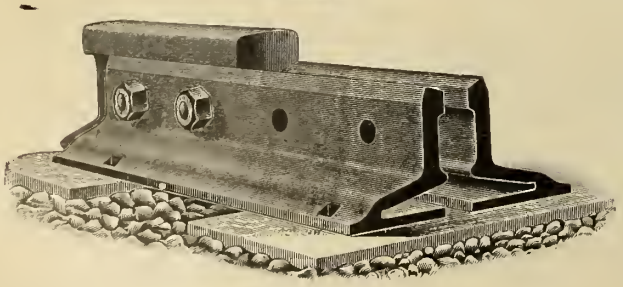
Railroad Essentials.





The day has passed when men of finance are willing to place their money into bad material in railroad construction only to be compelled to replace it by renewals or reconstruction after very little use. Many of the best and most successful steam and electric railroads use the rail joints of the Continuous patent type for standard track work, insulated joints, step joints, and electric bonding joints for the reason that experience has proven it to be the best appliance of its kind ever put upon the market, as evidenced by the fact that it is used in all parts of the world on over 20,000 miles of track.

the local authorities, etc. An appendix contained a large amount of statistical and other information relating to the ocean-going as well as the inland marine interest of Montreal.

The officers and committee for the year are: President, H. A. Allan; Chairman Executive Council, Jas. Thom; Vice-Chairman Executive Council, R. W. Reford; members: D. W. Campbell, C. McLean, F. L. Wanklyn; Treasurer, J. R. Binning; Manager and Secretary, T. Robb.

Lake of Bays Navigation.

The Huntsville, Lake of Bays and Lake Simcoe Navigation Co.'s annual meeting was held in Toronto Feb. 21. The annual reports are not made public, but the Manager advises us that the statements submitted were satisfactory, and showed larger net earnings than in 1904. The officers and directors for the current year are: President, C. O. Shaw, Huntsville; Vice-President, H. Foster Chaffee, Toronto; Manager and Secretary-Treasurer, W. Duperow, Huntsville; other directors: A. A. Mahaffy, Bracebridge; John McKee, and S. H. Jacobs, Huntsville. The board is an entirely new one with the exception of Mr. Duperow. A good deal of the stock, a considerable portion of which was held by the estate of the late G. F. Marsh, the founder of the company, has changed hands lately. The authorized capital is $100,000, of which $58,000 has been subscribed and paid up. The company was incorporated in 1902, and bought the boats previously operated by G. F. Marsh, giving him $25,000 paid-up stock therefor. Since then the company built the Huntsville and Lake of Bays Ry., one mile long. Bonds were issued to cover the cost of the railway and of the additional steamboat now being built, and a chattel mortgage of $25,000 has been given the Toronto General Trusts Corporation to secure the bond issue.

Masters' and Mates' Association.

The annual meeting of the Grand Association of the Canadian Association of Masters and Mates was held in Toronto, Feb. 13 and 14, the delegates present being captains representing the local associations at the points named:—

J. Wilson, Grand Master, Collingwood; J. McGiffin, First Grand Officer, Toronto; W. Ireland, Grand Secretary, Parry Sound; J. Dix, Grand Pilot, Kingston; Jno. Towers, Grand Watchman, St. Catharines; W. J. Madden, Grand Look-out, Penetang; J. W. McCoppen, Auditor, Port Colborne; R. D. Simpson, Owen Sound; B. Burke, Penetang; A. McCaulay, Midland; W. C. Jordan, F. Scott, Collingwood; G. McKay, St. Catharines; H. O. Jackson, T. Sullivan, and J. McMaugh, Toronto. In all eight local associations were represented, viz., Toronto, Collingwood, Parry Sound, Penetang, Midland, Owen Sound, Kingston, St. Catharines.

A report was received from the delegation sent to Ottawa last year to make certain recommendations to the Department of Marine. On account of the death of Mr. Prefontaine, another delegation will be sent to lay before the new Minister a number of matters, including the removal of restrictions on Canadian vessels entering Lake Michigan, improvements of the law regarding the examination of masters and mates, and the appointment of paid examiners. The committee reported that a light had been placed on Welcome Island, Thunder Bay, and suggested that the following aids to navigation should be provided this spring or as soon after as possible:—A gas buoy or light ship, latter preferred, with fog horn on Surprise Shoal, one of the danger spots on Georgian Bay; a gas buoy on Kennedy Shoal, Georgian Bay; a gas buoy on Graham Shoal, off Duck Island, Lake Huron; a light and fog horn on the west end of Michipicoten Island; that the front light on the end of the pier at Port Dalhousie be a red light; should electric light become extinguished by accident the revolving light on the back range should not be replaced by a red light; it is also strongly recommended that a fog horn be placed on the pier at Port Dalhousie. A bell gas buoy to be placed on the Niagara Shoal, Lake Ontario; that the lights on the Eastern Gap at Toronto be improved; that a gas buoy be placed off the False Ducks, Lake Ontario, for deep water boats; that the shoal on the port side of the channel in the River St. Lawrence, below the foot of the Lift Lock, Galops Canal, be removed, said shoal having been formed by mud scows dumping their loads. The committee also favored the deepening of the Welland Canal to a uniform depth of 20 ft. and the construction of a turning basin at St. Catharines.

Notice of motion was given for the next annual meeting to strike out the words "and mates" from the title of the Association. This is the result of the withdrawal from the association of a number of mates, who considered that their interests in the matter of wages had not been looked after by the Association, this being a matter with which the Association has always declined to deal.

The following officers were elected for 1906:—Grand Master, Capt. J. McGiffen, Toronto; Grand First Officer, Capt. Frank Scott, Collingwood; Grand Secretary-Treasurer, Capt. H. O. Jackson, Toronto.

Capt. Thos. Donnelly, of Kingston, addressed the delegates on various marine matters, including the Turbinia-Primrose collision, and Acton Burrows, Manager of THE RAILWAY AND MARINE WORLD, spoke briefly, expressing his desire to co-operate with the Association in regard to the improvement of aids to navigation, etc. Incidentally he referred to the neglect of the Secretary, W. Ireland, to answer correspondence, and similar complaints were made by some of the delegates. When the election of Secretary was taken up W. Ireland was again a candidate, but was defeated by Capt. H. O. Jackson. It is believed that the securing of an efficient secretary will materially advance the interests of the Association.

The next meeting will be held in Toronto on the second Tuesday in Feb., 1907. It is expected that local associations will soon be established at Montreal, Wiarton, Muskoka Lakes and at a point on the Upper Lakes.

Hon. L. P. Brodeur has been sworn in as Minister of Marine and Fisheries in succession to the late Hon. R. Prefontaine.

Justice Dunlop of the Quebec Superior Courts has been appointed a Deputy Judge in Admiralty of the Exchequer Court of Canada.

The special report of H. Holgate, C.E., upon construction matters on Trent Valley Canal, criticizes the work done under the charge of R. B. Rogers, Superintendent and Engineer; R. A. Davey, resident engineer, Kirkfield; D. E. Bethune and —. Spence, inspectors of construction at Kirkfield and Peterboro respectively, and it is understood that their resignations will be asked for.

The annual meeting of the National Association of Marine Engineers was held at Levis, Que., Feb. 1 and 2, when there was a large attendance of delegates from the local organizations in Ontario, Quebec and the Maritime Provinces. The officers for the current year are: Grand President, F. S. Henning; Grand Vice-President, J. S. Crepeau; Grand Secretary, N. J. Morrison; Grand Conductor, T. Therault; Grand Guardian, D. Leclerc; Auditors, J. Gillis, W. Noonan.

The Navigation of the St. Lawrence.

In connection with this question it is well to bear in mind that the accidents that have taken place may be called strandings, with practically no dangers or loss of life. The question that arises here is, what can best be done to avoid these strandings in future?

In the first place a vessel touches above Lake St. Peter where there is practically no rise or fall of the tide. To get her off she requires to be lightened, and as a rule the rivalry of the enterprising press of a lower port usually makes the most of the grounding, which generally spreads and does considerable harm to the St. Lawrence route, for the majority of the travelling public do not know whether the accident is above or below Quebec. Take the port of New York. There is hardly a week passes but that some such accident takes place, and practically nothing is heard of it, and the Baltimore press never calls the dredged channel at Sandy Hook a "ditch." No one benefits by the attacks on the channel above Quebec, but the loss is to the whole Dominion by diverting passengers and freight for transit and shipment to rival foreign ports.

The Government has a good deal in hand in connection with the different improvements and aids to navigation, and has completed a 30-ft. channel with a minimum width of 450 ft. between Sorel and Montreal, which is lighted with gas buoys, and enables vessels to navigate and arrive in Montreal at night. This part of the channel has practically been free of accidents, with the exception of a collision, and this may be said took place owing to the want of knowledge of those in charge of one of the vessels, and there is every prospect of the channel being completed between Sorel and Batiscan, except the Lake St. Peter work and Champlain curve this year. Below Quebec the Government has had to construct a special dredge to deepen the channel near Crane Island, where there is at present 21 ft. at low water. In addition to this, the establishment of range lights in the channel has been found of great assistance to those navigating it.

The Government has at last taken control of the pilotage service between Montreal and Quebec. This is an important factor in navigating on the route. The system of admitting and licensing pilots, and of regulating the employment, has been unsatisfactory to all concerned, and it is the general opinion that anyone who is able to pass the necessary examination and can prove he has acquired the necessary experience should be admitted to practice as a pilot, and the examination should be held before competent nautical examiners, and after he is admitted the least possible number of restrictions should be placed upon the pilot in the exercise of his calling. It should be within his power, if he is competent and industrious, to become prominent in his calling, earn the most he possibly can for his work, and acquire all the experience he is able to gather. In the past pilots were limited to one voyage a week, in order that colleagues who were less able or industrious might make a living. This is now practically done away with. The greatest incentive for the man for the efficient purpose of his duties, is the knowledge that there are others ready and able to fulfil them in his stead if they can secure the opportunity of doing so.

It is not in the interest of anyone that pilots should find themselves in a position which practically makes them masters of the situation, and secure them from all risk of competition. The solution of the past and present difficulties is to be found in remedying the present system, and if the proper steps are taken by the Minister of Marine to make the examination and the licensing of the pilots thorough, everything

fter that should be left to the ship-owners nd the pilots to settle between themselves. hip-owners are willing, and will pay a good rice for good pilots, but it is unfair to ask hem to pay a good price for bad or indifferent ilots. The fees at present charged for the ervice of a pilot, in comparison with the mount of work he has to do, are certainly xcessive, and some of them are making as uch as $2,366.30 for six months' work, and hey can do something else for the remaining ix months. The present fees have been in orce for many years, and were fixed at a ime when it took sometimes days for a sailing essel to go from Quebec to Montreal. ilots are still paid the same rate for work hich now probably takes up from ten to ourteen hours of their time. The total mount earned by each pilot appears in self to be excessive when compared with he amount of work they do. It is clearly ut of all reason. Ship-owners do not object o pilots earning as much or more than they o at present, but they think they should be bliged to do more work for it.

The late Minister of Marine introduced nto Parliament a bill which empowered him o take the place of the harbor commissioners f Quebec as the pilotage authority below uebec. The pilots below Quebec are formed nto a corporate body, and have certain owers that give the rights of the pilotage elow Quebec to the members of their corpora- ion. This practically means a monopoly, nd no one can become a pilot without first f all being a member of the Corporation of ilots. The Corporation controls and divides he earnings of the members so that the man ho does the least work gets the same share s the man who does the most. The prin- iple of this is bad, and prevents the further eveloping of the abilities of pilots, and ractically puts them all on the same level, naking the idle and incompetent pilot think hat the country owes him a living, and that e should be provided with experience, ork and an income at the expense of the ountry, the same as his competent and nergetic colleague.

There can be no just reason why those who re idle, incompetent or unlucky, should be rovided with a living in this particular calling ny more than in any other. There must e failures in every walk of life, and pilots re certainly no exception. There is no eason why the pilotage below Quebec should eep on the active list 119 men whose total ross earnings for 1904 amounted to $109,000, nd who had an average number of 14½ rips per pilot, the distance between Quebec nd Father Point being 157 miles. Com- are this with the Montreal pilotage, which as 53 pilots, which number has been found ufficient for the present requirements of he trade. Their total earnings amounted o $70,000, the largest sum earned by any ne pilot was $2,360, and the smallest $262. he average number of trips per pilot was 9, the distance between Montreal and Que- ec being 140 nautical miles. This practi- ally shows that the Montreal pilots do double he work that the Quebec ones do, and there s only one way of remedying this, viz., to hrow the St. Lawrence pilotage service ntirely open to all experienced and com- etent navigators, and that no restrictions e made in the numbers, and if there is insuf- icient work for those enrolled, there is no eason why they cannot find employment in ther walks of life.

Capt. Amundsen, the Norwegian navi- ator who reached Yukon Territory recently nd reported having discovered the north- est passage connecting the Atlantic and acific oceans, has returned to his vessel, he Gjoa, lying off Herschel Island, near the outh of the Mackenzie River.

The Lake Freight Outlook.

Our Winnipeg correspondent writes as follows:—"A general survey of the prospects for the coming freight season on the Great Lakes warrants the conclusion that all records of the past will sink into oblivion when the tale of 1906 is told. The grain trade, which is the backbone of the Canadian merchant marine, is in an unusually prosperous condition after the phenomenal crop of last season, and the best authorities figure that of that crop there is yet to move over the lakes some 50,000,000 to 60,000,000 bushels of wheat alone, which is more than was moved during the entire season last year. On top of the wheat there is also about one hundred million bushels of oats, barley, flax, etc., which in itself is sufficient to keep the Canadian fleet busy until the new crop is moving. In the past the lack of proper facilities at the east end of the route has prevented Canadian vessels from reaping their share of the benefits of the western prosperity by the diversion of a large percentage of the crop to U.S. ports in U.S. vessels, and while the G.T.R. has on order sufficient equipment to take care of the business, very little of this will be available for the spring movement, and the blockades at the eastern elevators will again drive considerable grain to Buffalo. Opening grain rates have been made by the Canadian vessels at 2¼c. per bush., Fort William to Georgian Bay ports, and 7¼c. to Montreal; in the latter case marine insurance being included. Owing to the large quantity of grain remaining in the western country, chartering commenced very early this season, some being done as early as the first of the year, and by the middle of Feb. practically 75% of the Canadian fleet had been chartered, shippers in their anxiety to secure first boats at the opening running the rate up to as high as 2¾c., but a number of owners are holding off for 3c. for the first trip, with every prospect of getting that rate, as the first boat at the opening sometimes means a term of storage saved to the shipper at the western terminal.

Owing to the exceptionally large movement of iron ore already contracted for on the U.S. side of the line, the U.S. fleet is likely to be too busy with its own contracts to pay any attention to the Canadian market either in grain or coal, and therefore it is expected that Canadian vessels will handle a much larger percentage of the coal into the Canadian head of the lakes than in former seasons, more especially as the new coal dock at Port Arthur will be in operation at the opening of navigation, which will mean the abandonment of the West Fort William docks, these latter docks being so poor in the matter of despatch and lack of room that in the past the Canadian vessels have preferred to come up light rather than subject themselves to the inevitable delays at the West Fort. While some Canadian coal contracts have been made for the lake haul no rate has yet been arranged, but in view of the amount of other tonnage which is already in sight, coal freight will no doubt range slightly higher than last season. Owing to the continued prosperity at Sault Ste. Marie, the Lake Superior Corporation will not only exclusively use its own bulk carriers in its own ore, coal and rail trade, but has already chartered a number of outside vessels for the same trades, and the Midland smelter has also done some chartering ahead, while the ore movement to Hamilton, via Point Edward, is still being handled by a contract which has some years yet to run. U.S. ore rates from Duluth and Two Harbors to Lake Erie ports remain the same as last season, viz., 75c., but rates to Canadian ports are a matter of arrangement on each charter, and are therefore not public, but in view of amount of freight in sight for the coming season, a 75c. rate has been mentioned by owners as being about what they expect to secure on season contracts.

The prosperous conditions prevailing last season have induced several owners to arrange for additional tonnage, chief among which may be mentioned the new 10,000 ton vessel for the Midland Navigation Co., the vessel to be delivered in time for the fall movement. This vessel should carry without any trouble 300,000 bushels of wheat, and with good water may handle 350,000. The Farrar Transportation Co. is having plans prepared for a vessel of the same size, and expect to have it ready for the spring of 1907. The Collingwood Shipping Co. has ordered a vessel of 125,000 bush. capacity in England, and expects to have her ready at the opening of navigation this spring. J. T. Matthews, of Toronto, is also expecting a new canal-size vessel out in the spring which he expects to run between Montreal and Fort William in the package freight trade. Besides these there are a number of U.S. steel vessels of about 100,000 bush. capacity under option to Canadian owners, so, considering all sides, there is not likely to be any shortage of Canadian tonnage on the lakes for some time to come, especially as the present fleet is fully capable of handling the western crop as fast as the western railways can get it to the lake front, provided the despatch at eastern elevators is at all reasonable.

Lake Wheat Rates for 1906.

The following minimum rates for the carriage of wheat from Fort William or Port Arthur in Canadian vessels have been agreed on by the grain carriers' section of the Dominion Marine Association.

A. To all Canadian and U.S. ports above Lake Erie. From opening of navigation to May 31 inclusive, 2¼c.; from June 1 to June 30, both inclusive, 2c.

B. To Montreal. From opening of navigation to May 31 inclusive, 7¼c. insured by carrier; 7c. insured by shipper. From June 1 to June 30, both inclusive, 7c. insured by carrier; 6¾c. insured by shipper.

C. To Kingston or Prescott. From opening of navigation to May 31 inclusive, 5⅜c. insured by carrier; 5⅛c. insured by shipper. From June 1 to June 30 inclusive, 5⅛c. insured by carrier; 4⅞c. insured by shipper.

The carrier cannot insure cargo in shipments A. Rate B is rate A plus an announced "rail rate" of 5c. Rate C is rate B, less the new river rate of 1⅞c. Rates B and C will increase or decrease by whatever fraction of a cent the "rail rate" may vary from the basis of 5c. taken; and the words "rail rate" are to mean the net cost to the shipper or consignee "at and east" of Georgian Bay to Montreal. The above minimum for June is to apply to July and August shipments arranged for prior to a meeting to be held not later than June 15, and no rate for shipment after August is to be given prior to such meeting. It is expected that the first trips on the opening of navigation will be at somewhat higher figures than the minimum figures above given.

Notices to Mariners.

The Dominion Department of Marine has issued the following notices:

No. 1. Jan. 3.—British Columbia—1. Strait of Georgia, time of slack water. 2. Strait of Georgia, time of the tide.

The financial statement was received and considered satisfactory, and a by-law was passed reducing the number of directors to six. Following are the officers and directors for the current year:—President, J. S. Playfair; Vice-President, F. J. Phillips; other directors: Sir J. Boyd, J. R. Cockburn, G. T. Fergusson, R. A. Lucas, H. C. McLean, M. S. Wilson. Under the new by-law two of the directors will retire, viz., Sir J. Boyd and G. T. Fergusson. W. F. Wasley, heretofore acting Manager and Treasurer, has been appointed Manager.

The Manchester Ship Canal has recently been successfully navigated by the Drayton Grange, a steamer of 6,592 tons gross.

A writ has been applied for by the executors of the J. J. Long estate, owning four-ninths interest; S. H. Lindsay, executor of the estate of C. Cameron, owning three-ninths interest, and J. K. McLaughlin, owning one-ninth interest in the str. City of Windsor, against Capt. P. Campbell, owning the other ninth interest, for an order compelling him to carry out an alleged agreement signed by him to transfer the steamer to the Northern Navigation Co. This company agreed to accept the steamer in part settlement of the damages awarded in its action against the Long estate, and the executors undertook to deliver the vessel. There appears to be some differences between Capt. Campbell, in whose name the steamer is registered, and the Long estate, which he claims require adjustment.

Northern Navigation Co. of Ontario.

There was a small attendance at the annual meeting in Toronto, Jan. 30, at which H. C. Hammond, President, occupied the chair. The report and statement of accounts, as published in our last issue, were adopted after a brief discussion, in the course of which Acton Burrows said that the result of the recent suit against the executors of J. J. Long was a complete vindication of the course he had adopted at the annual meeting two years ago, when he exposed the methods of the Long management. He also called attention to the fact that the auditors' certificate was printed on the back of the report, but their names were not appended to the financial statements as printed. This was the same plan that had been adopted in previous years, and at the recent trial the auditors had sworn that the accounts presented to the shareholders on one occasion were not the ones they had certified to. He was satisfied that the affairs were being honestly conducted under Mr. Hammond, but in view of what had occurred in the past he thought the auditors' signatures should be appended to the financial statements, and not merely to a separate certificate.

In answer to a question, Mr. Hammond said that he did not think the shareholders need expect a greater dividend than 6% for some time to come.

The directors were re-elected as follows:—H. C. Hammond, Hon. J. S. Hendrie, F. A. Lett, W. D. Matthews, W. J. Sheppard, H. B. Smith, C. E. Stephens, H. Y. Telfer, C. D. Warren.

A resolution thanking Mr. Hammond for his untiring efforts on behalf of the company having been moved by Acton Burrows, a shareholder suggested that the other directors be included, but Mr. Burrows declined to agree to this on the ground that several of the directors had been on the board for years during the time that the company was being exploited for the benefit of the Long Bros., and that if they did not know what was going on they should have known, and should have prevented it.

The directors re-elected H. C. Hammond President, W. J. Sheppard Vice President, and C. E. Stephens Secretary-Treasurer.

H. Bourlier, who recently retired from the Allan Line Steamship service, having resigned the Presidency of the Toronto Steamship Agents' Association, C. A. Pipon, Passenger Agent for Ontario for the International Mercantile Marine Co., has been elected President of the Association. A. F. Webster is the Secretary-Treasurer.

A deputation consisting of T. Robb, Manager and Secretary Shipping Federation of Canada; F. L. Wanklyn, Dominion Coal Co., and a member of the Executive Committee of the Shipping Federation, and Mr. Scantlebury, mechanical engineer, Montreal, waited on the Minister of Marine, at Ottawa, Feb. 12, in reference to the inspection of boilers upon vessels plying on the St. Lawrence, which are subject to British inspection, and to urge that under the circumstances there was no necessity for the officials of the department to apply hydraulic pressure in their inspections. No memorial was presented on the subject, but arguments were advanced. The object of the delegation, we are informed, was to endeavor to get freight steamers registered outside of Canada, but engaged in the coasting trade of Canada, exempted from the Canadian annual inspection. At present there are a large number of British built steamers, some of which, however, are registered in Norway and Sweden, engaged in the coasting trade in Canada, all of which are subject to the Canadian Inspection Act, and are inspected annually by the officers of the department.

Atlantic and Pacific Ocean Marine.

The finding of the court which investigated the stranding of the Allan Line str. Bavarian on Wye Rock, Que., Nov. 3, 1905, as published in our Jan. issue, has been issued in London, Eng., by the Imperial Board of Trade.

The C.P.R. str. Monteagle, heretofore in the company's Atlantic trade, has been transferred to the Pacific Ocean, and will leave Hong Kong on her first trip to Vancouver, B.C., May 2. She is a twin screw steamer of 5,500 tons, and has accommodation for 125 saloon passengers.

The Department of Marine has issued an additional notice to the effect that in the list of Marconi wireless telegraph stations issued Dec. 19, 1905, and given in our last issue, pg. 99, there should have been added the station at Camperdown heights, at the entrance to Halifax Harbor, N.S.

Several marine surveyors recently visited the wrecked str. Bavarian, on Wye Rock, Que., and report her to be in the same position as when she stranded. The surveyors state that there is no reason to doubt her safety during the remainder of the winter and express confidence in her being floated in the spring.

The launching of the Empress of Ireland, the second of the two trans-Atlantic liners under construction at Glasgow, Scotland, for the C. P. R., took place Jan. 27. The steamer was named by Mrs. A. Gracie, wife of the Managing Director of the builders, and Archer Baker, European Manager, represented the C.P.R.

The contract arranged with the Allan Steamship Lines for the carrying of the Canadian mails to Great Britain provides that the turbine steamers Victorian and Virginian will each earn $5,000 a trip, and the Tunisian and Bavarian, the next two in speed, $3,750 a trip. All four have to make 10 trips a year. The remaining vessels of the Allan fleet are to be paid at the rate of $2,500 a trip, and have to make weekly runs.

The Dominion Line is reported to be making arrangements to put on some additional steamers on its St. Lawrence-Liverpool route at the opening of navigation to Montreal in May. It is stated that the Ottawa and Kensington will be taken off the route and replaced by the Majestic and Teutonic, at present in the White Star Line between Liverpool and New York. Another report states that two large new steamers will be ordered for the season of 1907.

The announcement was made Feb. 1 by Sir T. G. Shaughnessy, President C.P.R., that it had been decided to make Quebec its summer port for its new steamers, Empress of Britain and Empress of Ireland. At a meeting of the Quebec Harbor Commissioners held Jan. 30, a resolution was passed favoring the granting to the company of all the facilities required for the purpose. The company has secured accommodation in the Richelieu and Ontario Navigation Co.'s building, Quebec, for its offices.

The action of Wm. Petersen, and Wm Petersen, Limited, of Newcastle-on-Tyne, Eng., against Sir W. G. Armstrong, Whitworth & Co. (Limited), Elswick-on-Tyne, Eng., to recover damages for breach of contract, came before the Supreme Court of Judicature, recently, but judgment has not been given. The plaintiffs were negotiating with the Canadian Government with a view of obtaining subsidies for running a line of fast steamers between Canada and Great Britain, and state that the defendants entered into an agreement with them in connection with the matter; on the Armstrong firm withdrawing its support the plaintiffs were unable to go on with the project and desire to obtain damages. The defendants deny that any agreement was arrived at; that there were merely negotiations with the Canadian Government for the proposed line, and that they were justified in the withdrawal.

The Allan Line fleet comprises 27 vessels having a total tonnage of 149,635 tons. Following are the steamers:—

Virginian, turbine, triple screw	12,000	tons
Victorian, " "	12,000	"
Tunisian, twin screw	10,576	"

The Ocean Steamship Co. and the China Mutual Steam Navigation Co., maintain a joint service between London, Glasgow and Liverpool, Great Britain; Victoria and Vancouver, B.C.; Tacoma and Seattle, Wash.; Yokohama, Kobe, Hong Kong, and other Asiatic ports. Freight is carried on through bills of lading for San Francisco and all Pacific coast points, and from Puget Sound to Australia and European ports as well as to ports in Asia. The steamers leave Great Britain for Vancouver and Victoria, and Tacoma for the Orient, about every 28 days. The Ocean Steamship Co. has a fleet of 36 steamers having a gross tonnage of 180,409 tons, and has five steamers of over 8,000 tons each under construction. Reference was made to these steamers in our last issue. The China Mutual Steam Navigation Co. has a fleet of 13 steamers having a gross tonnage of 76,055 tons. The managers are Alfred Holt & Co., Liverpool, Eng., and Dodwell & Co. (Ltd.), are agents at Vancouver and Victoria, B.C.

The contract for the new steamship service between Vancouver, B.C., and New Zealand, was entered into by the Dominion Government and R.A. Alley, of Vancouver, steamship and financial agent. The contract calls for the inauguration of the service within three months of the signing of the agreement with New Zealand, and the first sailing from Vancouver is to be two months after the first sailing from New Zealand. The subsidy is £10,000 a year, payable in four instalments, £1,600 each, on the completion of each of the first four round voyages, and the balance of £2,000, on the completion of the year's services, and so on annually. The agreement is for three years, and the rates for freight and passengers are to be subject to the approval of the Department. The ports of call in New Zealand are to be Auckland, Wellington, Lyttelton, Dunedin and Bluff, and the contractor has been authorized to arrange calls at Victoria, B.C., and Fiji. The first steamer to be placed on the route is the Beucentaur, which sailed from England Jan. 27, for West Port, New Zealand, via Cape Town. She is due to reach West Port about April 10, and is expected to leave New Zealand for Vancouver about April 25, and the first sailing from Vancouver for New Zealand will be about June 15. The other steamer to be employed on the service will be the Afrikander, or should circumstances require, the Transvaal.

Maritime Provinces and Newfoundland.

The shipbuilding yards at Lunenburg, N.S., have under construction five schooners for launching in the spring.

The United States ocean tug Gypsum King, recently wrecked at St. Mary's Ledge, N.B., has been sold by the underwriters for $175.

The Boston, Mass., tug Underwriter was seized by the Canadian Customs authorities and fined $400 for failing to report her arrival at Campobello, N.B., on a recent trip.

The investigation into the loss of the Halifax str. Lunenburg on the Magdalen Islands, Que., recently, has been concluded at Halifax, N.S., but the finding of the court has not been given out.

The Neptune Whaling Co.'s affairs are being wound up in liquidation. The company's land, factories, etc., at Lark Harbor, Bay of Islands, Nfld., and its str. Neptune have been sold by the liquidators.

W. F. Napier, Restigouche, N.B.; W. Currie, Campbellton, N.B.; W. H. McLeod, Richibucto, N.B., have been appointed members of the pilotage authority of Richibucto, N.B., in place of three deceased members.

Capt. Jas. Sutherland, North Sydney, N.S., has been appointed examiner of masters and mates for the port and district of North Sydney, in place of Commander Worgan, resigned. He has also been appointed instructor for the marine school there.

The Reid Newfoundland Co.'s str. Bruce left the dry dock at St. John's, Nfld., in the beginning of Feb., after a thorough overhaul. Her place in the dry dock was taken by the Cacouna for general repairs and over-

NOTICE

is hereby given that the Annual Meeting of the Shareholders of the **VICTORIA ROLLING STOCK COMPANY, OF ONTARIO, LIMITED,** will be held at the office of Messrs. DEPARTMENT OF AGRICULTURE AND IMMIGRATION

MANITOBA with its network of railways, giving markets near at hand for all farm products, offers unrivalled opportunities for investment.

PROVINCIAL GOVERNMENT LANDS can still be purchased at from $3 to $6 per acre.

IMPROVED FARMS in all districts of the province can be purchased at from $10 to $40 per acre. These prices are advancing every year.

A FEW POINTERS

On arrival at Winnipeg the wisest policy for any new settler to adopt is to remain in Winnipeg for a few days and learn for himself all about the lands offered for sale and to homestead.

There are districts that have been settled for many years in which land can be purchased. Some of this may be unbroken prairie which still possesses all the richness and productive powers of our virgin prairies. Other lands, cultivated and having comfortable farm buildings, are ready for immediate possession.

There are Provincial Government lands, Dominion Government homesteads, and railway lands to be secured.

The price of land varies from $3 to $40 per acre.

Location with respect to railways, towns, timber and water determines the price of land.

For information regarding homesteads, apply at the Dominion Land Office.

For purchase of Provincial lands apply at the Provincial Land Office in the Parliament Buildings.

For C.P.R. or C.N.R. lands apply at the land offices of said railway companies.

For lands owned by private individuals apply to the various real estate agents in the city.

For situations as farm laborers apply to:

haul. The company's str. Eagle has been fitted with forced draught.

A number of St. John, N.B., newspaper men made a trip in a steam tug up the St. John River as far as Public Landing, Feb. 2. This point is about 400 yards further up the river than was reached Jan. 16, 1892, which was the previous record, both as to distance from St. John traversed and date.

A director of the Charlottetown Steam Navigation Co. is reported to have stated to a Charlottetown paper that the company's str. Princess had not been sold to the Dominion Government. It was reported that the Government had purchased the steamer for use as a revenue cruiser and survey steamer.

Several meetings of the managers and directors of the steamship companies doing business on the St. John River, N.B., have been held to discuss the question of an amalgamation with a view of eliminating the present losses. As a result it has been found impossible to come to any basis of agreement, and all the steamers will be running during the summer as usual.

F. W. Hales, Secretary of the Charlottetown Steam Navigation Co., died at Charlottetown, P.E.I., Feb. 17, aged 77. He was a native of London, Eng., and was long identified with the late Sir George Williams in founding the Y.M.C.A. He went to P.E.I. in 1850 and farmed for some years, becoming Secretary of the C.S.N. Co. on its organization in 1866. His daughter is the wife of T. C. James, Superintendent of the Anglo-American Telegraph Co. at Charlottetown.

It is reported in Boston, Mass., that C. W. Morse, of the Eastern Steamship Co., is negotiating for the purchase of the Canada Atlantic and Plant Steamship Co.'s charter and steamers. A. Perry, of Rockland, Me., who has control of the C. A. and P. S. Co., is reported to have said, Feb. 10: "It can be said positively that the Plant Line has not yet changed hands. It pays well, and I have no reason to sell, but of course I would sell if I were offered enough."

The Kennebecasis Steamship Co. has been incorporated under the New Brunswick Companies' Act with a capital of $20,000, and offices at St. John. N.B., to carry on a general navigation business on the St. John River and its tributaries. The incorporators include:—A. T. Mabee, S. H., R. G. Flewelling, A. W. Hicks, Hampton, N.B.; A. B., J. B. Moore, S. Cox, Westfield, N.B.; G. H. White, Sussex, N.B.; A. Flewelling, Kingston, N.B.; F. S. Mabee, St. John, N.B

Province of Quebec Marine.

The Montreal Transportation Co. has purchased the tugs Hall and Curlew from the U.S. for the purpose of towing grain barges from Kingston, Ont., to Montreal.

C. J. Smith, General Manager Richelieu and Ontario Navigation Co., Montreal, attended the annual meeting of the Association of Passenger Steamboat Lines recently held in New York.

Commander Spain, R.N., has taken over the control of the pilots on the Lower St. Lawrence from the Quebec Harbor Commission, on behalf of the Department of Marine. The control of the pilotage on the river from Montreal to the sea is now in charge of the Minister of Marine, and a general reform of the system will be undertaken.

The Dominion Government str. Montcalm returned to Quebec Jan. 29, from Seven Islands, having made the trip of about 600 miles in 46 hours actual running time, or 59 hours including stopover. Considerable ice was met with in the river, in some places the steamer having to cut her way through 20 inches.

The Lake St. John and Saguenay Navigation Co. has asked the Quebec Government for a five years' subsidy for the maintenance of its service on Lake St. John and tributary waters. The principal claim of the company for a subsidy is that it is promoting settlement in the district. The company's steamers will be operated on the following routes during the season:—St. Felicien, 20 miles; Mistassini, 46 miles; Honfleur, 33 miles; Peribonca, 32 miles; Grand Discharge, 36 miles; St. Jerome, 21 miles; St. Gideon, 28 miles. All steamers start from Roberval. These routes are on the Lake St. John Division.

The steamer which the Richelieu and Ontario Navigation Co. is having built at Toronto for running the rapids of the St. Lawrence River into Montreal will have the following general dimensions:—Length over all, 240 ft.; breadth of hull at main deck, 41 ft.; extreme breadth over wales, 43 ft.; draft, 6 ft. The steamer will be fitted with sleeping accommodation for passengers in 94 staterooms; there will also be provided four parlors and two bathrooms. On the promenade deck there will be a large observation space forward for passengers, then a cabin for shelter in stormy weather; behind which will be provided stateroom accommodation, a small cabin and a small open promenade space at the extreme stern. The hurricane deck will be above this, and will be left entirely open, except for a small cabin with staterooms, and will be used as an observation deck when running the rapids. This deck, which will be extended to the stern of the vessel, will be covered with a light awning. The pilot house and texas will be forward on this deck, and the pilot house will be sufficiently raised for the proper handling of the boat with passengers occupying the deck in front of it. The vessel will be propelled by twin screws, driven by two sets of triple expansion engines, each engine to have four cylinders working on four cranks, to be jet condensing with independent air pump. Steam will be supplied from Scotch or cylindrical return tubular-type boilers, to pass the Canadian Government inspection for a working pressure of 180 lbs., and to be fitted with a hot draught system. It is expected she will develop a speed of 18 miles an hour. The special fittings will comprise general donkey and fire pump, steam windlass, stockless anchors, hot draught fan with direct connected engine, fresh water pump and sanitary pump, ash ejector, combined steam and hand-steering gear of the most efficient type, and suitable for the quick handling of the vessel, necessary in the rapids; two direct connected multi-polar generating sets. The new steamer is expected to be completed in time to go into service during the 1906 season of navigation.

Ontario and the Great Lakes.

The harbor at Duluth, Minn., was open from March 30, 1905, to Feb. 10, 1906, a period of 318 days.

The annual meeting of the shareholders of the Rainy River Navigation Co. was held at Kenora, Ont., Feb. 7, when the retiring directors and officers were re-elected.

The str. Jessie Bain, it is expected, will be placed on the Deseronto-Picton route, instead of returning to the Gananoque-Clayton ferry run. She is being rebuilt at Kingston, Ont.

The Farrar Transportation Co., Collingwood, Ont., has decided to construct a new 9,000 or 10,000 ton steamer for the Upper Lakes, to be ready for the season of 1907, an order for which will probably be placed in March.

The Grand Lodge of the Shipmasters' Association has passed a resolution favoring the adoption of rules similar to those now in use on St. Mary's River, to be put in force and made obligatory on all vessels using the dredge channel of Detroit River.

The Port Huron and Duluth Steamship Co., which runs steamers between Sarnia, Ont., and Duluth, Minn., has purchased the str. Russia, which it has been operating for the past two years under charter. The company also operated under charter the str. Wyoming.

We were advised, Feb. 14, that the plans for the new steamer for the Niagara, St. Catharines and Toronto Navigation Co., to run between Toronto and Port Dalhousie, Ont., had not been completed. The new steamer is expected to be completed for the season of 1907.

A Congressional sub-committee at Washington, D.C., has recommended the granting of a federal charter for the construction of a canal from Pittsburg, Pa., to Ashtabula, Ohio. The projected canal would be 100 miles long and 12 feet deep, and is estimated to cost about $60,000,000.

The Dominion Fish Co. has purchased the freight and passenger str. Telegram from Capt. Cleland, to whom the D. F. Co. sold it in 1902. The steamer will be run on the Owen Sound, Wiarton, Lion's Head and Providence Bay route, in conjunction with the Manitou and Caribou.

The St. Lawrence and Chicago Steam Navigation Co. has placed an order for a steel freight steamer, which will be the largest yet built in Canada. She will be over 500 ft. in length, will be constructed on Lake Erie, and will run from the head of the lakes to Port Colborne, Ont.

The Hamilton and Fort William Navigation Co.'s directors reported at the annual meeting held recently that the season of 1905 had been a very profitable one, and the shareholders passed a resolution declaring a dividend of 8%. The retiring directors were re-elected, and W. Southam was again chosen President.

Arrangements are being pushed for the inauguration of the new steamship line along the south shore of Lake Ontario. It is proposed to start the new line July 15, and to run steamers between Lewiston and Alexandria Bay, N.Y., calling at a number of intermediate ports. Capt. M. J. Galvin, F. W. Wheeler, of Buffalo, are the principal promoters of the project.

The Canadian Lake and Ocean Navigation Co. has made two charters for carrying wheat on the opening of navigation, one from Fort William to Montreal at 7c., and one to Kingston at 5½c., insurance to be paid by shipper. The Midland King and Midland Queen, owned by the Midland Navigation Co., have also been chartered for several trips from Fort William to Georgian Bay, at 2¼c.

U.S. engineers appointed by the War Department, and engineers representing the Detroit River Tunnel Co. have held several meetings to arrange all matters in connection with the construction of the tunnel. The Lake Carriers' Association withdrew its opposition, the Tunnel Company agreeing to leave 1,000 ft. of the channel open for navigation while each section of the tunnel was being constructed.

Another break in the eastern embankment of the Trent Valley Canal was reported Jan. 26, and the necessary repairs have been ordered. W. Ross, the engineer appointed to investigate the defects at the lift lock at Peterborough, the construction of the lift lock at Kirkfield, and other matters on the canal, has made a report to the Government. The Minister of Railways and Canals, and the Deputy Minister, inspected the work Jan. 31.

IDEAL RAILWAY FENCING

MADE TO LAST

Large gauge (No. 9) hard steel wire is used throughout, decreasing cost of maintenance, insuring durability and serviceability.

IDEAL FENCE has been adopted as a standard by all the leading Railways in Canada. More IDEAL is used by Railways this year than all other makes combined.

C.P.R. LANDS

THE CANADIAN PACIFIC RAILWAY COMPANY have 10,500,000 acres of choice farming lands for sale in Manitoba, Saskatchewan and Alberta. Ranching lands generally $4.00 to $5.00 per acre. Lands adapted to grain growing and mixed farming $5.00 to $15.00 per acre according to quality and location. Maps showing the lands in detail will be sent free on application.

TERMS OF PAYMENT.

An actual settler may purchase not more than 640 acres, on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal with interest in nine equal instalments annually thereafter as shewn in the following table:—

160	Acres at	$4.00	per acre,	cash payment	$95.85,	first year's interest	$32.64	and nine instalments of	$80.00
"	"	4.50	"	"	107.85,	"	"	"	36.73	"	"	90.00
"	"	5.00	"	"	119.85,	"	"	"	40.81	"	"	100.00
"	"	5.50	"	"	131.80,	"	"	"	44.89	"	"	110.00
"	"	6.00	"	"	143.80,	"	"	"	48.98	"	"	120.00
"	"	6.50	"	"	155.80,	"	"	"	53.05	"	"	130.00
"	"	7.00	"	"	167.80,	"	"	"	57.16	"	"	140.00
"	"	7.50	"	"	179.75,	"	"	"	61.22	"	"	150.00
"	"	8.00	"	"	196.70,	"	"	"	65.28	"	"	160.00

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of 6 per cent. per annum.

Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN,
Land Commissioner C.P.R. Co., Winnipeg.

CANADA NORTH-WEST LAND CO.

This Company has 650,000 acres of selected lands in Manitoba and Assiniboia which offer excellent opportunities to settlers and investors who desire to secure good lands in well-settled districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

SOLE AGENTS:

James Hutton & Co., Montre

Reports from the lakes state that an early opening of navigation is looked forward to. As an instance of the openness of the water, the fact that the Crawford Tug Co.'s str. Hodgson made a trip from Wiarton to Lion's Head, 35 miles north, in four hours, on Feb. 5, may be mentioned. On the return journey four inches of ice had to be broken through in Wiarton harbor. On Feb. 1, the tug Mary B. arrived at Port Stanley from Port Burwell, Ont.

Two steamers are under construction on the Georgian Bay for trade on Lake Nepigon. One is a passenger steamer, length, 60 ft.; breadth, 12 ft.; depth, 6 ft.; and the other is a freight steamer, length, 75 ft.; breadth, 15 ft.; depth, 6 ft. 6 in. The frames and the necessary woodwork will be prepared on the Georgian Bay and shipped to Nepigon, where the steamers will be completed. The engines in both cases are under construction at Goderich, Ont.

A company is being formed at Mattawa, Ont., for the purpose of purchasing the plant and business of the Lumsden line of steamers on Lake Temiskaming. The steamers owned are the Meteor, Jubilee and Temiskaming, which are valued at $30,000; the wharves and other property are valued at $18,000. The vessels were run by the late A. Lumsden, and are now being operated by his estate. J. A. Larochelle, of Mattawa, is the principal promoter of the company.

The steamer which the Huntsville, Lake of Bays and Lake Simcoe Navigation Co. is having built for its trade, will be named Algonquin, and will have the following general dimensions:—Length, 127 ft.; breadth, 23 ft. She will be fitted with fore and aft compound engine; cylinders, 14 and 28 in. diameter by 20 in. stroke, calculated to give a speed of 15 miles an hour. She will have large dining-room accommodation, as well as eight staterooms. It is expected she will be running about June 15.

Speaking recently at a dinner to the engineers connected with the Public Works Department, Hon. C. S. Hyman, Minister of Public Works, made special reference to the transportation question. He pointed out that additional facilities would have to be provided so that grain might be carried to Georgian Bay ports, and referred to the projected canal from Georgian Bay to the Ottawa River. The results of the surveys recently made, he hoped, would be such as to enable the Government to complete that great work.

Conmee and Bowman, Port Arthur, Ont., have placed an order on the Georgian Bay for a tug and tow barge. The tug will have the following dimensions: length, 85 ft.; breadth, 21 ft.; depth, 12 ft.; and will be specially built so that she can be utilized for icebreaking purposes. She will be fitted with a Clyde built boiler, 160 lbs. working pressure, and fore and aft compound engines, cylinders 15 and 30 in. diameter, by 24 in. stroke. The tow barge will be 175 ft. long, have a breadth of 40 ft. and a depth of 28 ft.

The steel tow barge under construction on the Georgian Bay, for the Montreal Transportation Co., for its Port Colborne, Ont.-Montreal trade, will have the following general dimensions:—length, 256 ft. over all; 200 ft. keel; beam, 41 ft.; depth, 19 ft. She will be fitted with double bottom for water ballast, steam pumps for shifting water ballast, steam steering gear and all modern improvements. She will have a capacity of 75,000 bush. of grain, and will be ready about June 15: She was designed by H. Calderwood, and is being built under his inspection.

The Muskoka Lakes Navigation and Hotel Co. is having built at Toronto a steel day type excursion steamer for its trade on the Muskoka Lakes, of the following dimensions: length, 152 ft. over all; breadth, 30½ ft. over wales; 28½ ft. moulded; depth, 8 ft. 11 in. moulded. She will be fitted with twin screws, driven by two sets of triple expansion engines, cylinders 10, 16 and 26 in. diameter, by 16 in. stroke; steam being supplied by four Scotch boilers, 7 by 11 ft., at 175 lbs. pressure. A speed of 16 miles an hour will be developed, and the steamer will have accommodation for 700 passengers. She is being built under the inspection of H. Calderwood.

The Midland Dredging and Construction Co., recently incorporated under the Ontario Companies' Act, proposes to engage in a general dredging and contracting business. Its offices are at Midland, Ont.; D. L. White, Midland, is its President, and D. S. Pratt, Secretary-Treasurer. The company is having constructed a modern 5-yard steel dipper dredge, by M. Beatty & Sons, Welland, Ont. A contract has been let to H. Calderwood, naval architect, Toronto, for the construction of two 5-pocket steel dump scows of the following dimensions:—length, 102 ft. over all; beam, 28¼ ft.; depth, 9 ft. They will have a capacity of 300 yards each and will be built on the Georgian Bay.

Application will be made at the current session of the Ontario Legislature for an act incorporating a company for the purpose of constructing, operating and maintaining a system of navigable waterways, with or without portage railways, connecting Georgian Bay with Lake Simcoe and Lake Couchiching, or else Nottawasaga Bay with Lake Simcoe, and from Lake Simcoe to Lake Ontario, either in York or Ontario county; also from Nottawasaga Bay, along the valley of the Nottawasaga River to Lake Ontario, near Humber Bay. The company also asks to have the right to make slack water navigation and such incidental works and structures as may be found requisite to the full and proper utilization of the same. W. Cook, Toronto, is solicitor for the promoters.

At the meeting of the International Water Lines Passenger Association in Toronto, in Jan., a gavel was presented to the retiring chairman, C. E. Markham, which was made from wood from the steamer Independence, which was built in Chicago in 1846, as nearly as can now be told, and in 1848 was hauled over the portage at Sault Ste. Marie in the winter and next season began the navigation of the greatest of the great lakes. Her exact dimensions are not known, but she must have been about 200 ft. long. Her career was a checkered one and ended in disaster. In 1852, while Capt. John Averill, until lately a resident of Chicago, was sailing her, she went on the beach at Eagle Harbor and spent the winter there. In the spring she was released by Capt. Calloran, and that fall again met with misfortune on Chequamegon Point, where Ashland now is. She went ashore on the point in a blinding snowstorm, and again spent the winter on land. She was purchased where she lay by Capt. McKay, father of Capt. George McKay, of Cleveland, and early in the spring of 1854 the Captain set about releasing her. He built a crib out in the lake for his windlass, and Indians from La Pointe filled this with boulders brought from shore in their canoes. With the windlass on the crib and the house—moving jacks pushing against the hull on the shore, Capt. McKay, assisted by one or two heavy seas, finally managed to get the steamer into the lake again, after spending the entire summer at the work. When free she was towed to La Pointe by his crew of Indians in their small boats, and one of the first recollections of Capt. George McKay, the veteran of the U.S. Lake Carriers' Association, is this scene which he witnessed as a boy. After getting the sand out of her hull and machinery at La Pointe, Capt. McKay set sail for Sault Ste. Marie, arriving there in November. Completing his refitting he took on a large cargo of supplies for the copper country and set sail Nov. 22, 1854, on what was to prove the last voyage of the ill-starred craft. When a few miles from Sault Ste. Marie, the boiler of the Independence exploded, killing seven persons and blowing the stern of the vessel which sank on the Laverne Shoals.

The Midland Navigation Co. is having built on the Georgian Bay, a bulk freight steamer to the highest requirements of the Great Lakes Register and Bureau Veritas inspection. Her dimensions are: length, 486 ft. over all; between perpendiculars, 466 ft.; beam, moulded, 55 ft.; depth, moulded, 31 ft. She will be fitted with a cast iron sectional 4-bladed propeller, 14 ft. 6 in. diameter, 16½ ft. pitch, true screw; driven by a vertical triple expansion engine, cylinders 23, 38½ and 63 in. diameter, by 42 in. stroke. Steam will be supplied at 180 lbs. pressure by two Scotch marine boilers, 15½ by 12 ft.; having 318 tubes of 3½ in. outside diameter. The hull will be of steel, fitted with double bottom for water ballast, and the cargo space divided into four watertight compartments by means of steel bulkheads. The engines will be placed as far aft as possible and will be divided from the cargo space by bulkheads. The main deck will be laid at the fore and aft ends only, so as to leave plenty of space for the handling of cargo, etc; the forecastle deck will be forward, and will have a steel house forward which will include steel pilot house and texas; there will be a steel deckhouse on the spar deck, as well as other accommodation for the crew, etc. There will be 14 cargo hatches, and two steel pole masts. In the forecastle there will be the owner's room, four staterooms, bathroom, mates' and watchmen's rooms, and wheelmen's room, etc.; in the spar deck deckhouse there will be accommodation for deck hands, etc; and in the afterhouse will be accommodation for the engineers, a dining-room, galley, pantry, etc. The machinery for cargo handling, etc., includes steam windlass on main deck forward for anchor, with overhead capstan on forecastle deck, and reversible steam capstan aft on spar deck; four double cylinder 8 by 10 winding engines on spar deck; steam and hand steering gear; two horizontal duplex pumps, cylinders 14 x 18 x 18; steam fire pump in cargo hold, and steam fire pump in engine room 8 x 4 x 10. Steel lifeboats are to be provided as required by the Canadian Inspection Act. She will have a capacity for 325,000 bush. of wheat, and when loaded down to 21 ft. draught will have a carrying capacity of about 10,000 tons. She will be the biggest freight carrier in Canada, and one of the biggest on the Great Lakes; the boilers also will be among the largest constructed for any vessel on the Great Lakes. The steamer was designed by and is being built under the inspection of H. Calderwood, naval architect, Toronto.

Manitoba, Alberta, Saskatchewan, Etc.

The question of the improvement of the Red and Saskatchewan rivers, with a view of making them more suitable for navigation purposes, is of increasing importance, and it is understood will be pressed upon the consideration of the Government next session of the Dominion Parliament.

G. Malhoit, resident engineer of the Department of Public Works at Winnipeg, Man., made a general survey of the Winnipeg River during 1905, with a view to its improvement for navigation. He has prepared a report which will be considered by the Department, and the question will probably be brought forward during next session of Parliament. Mr. Malhoit was at Ottawa recently to discuss his report with the Department.

B.C. and Pacific Coast Marine.

The action for salvage brought by the C.P.R. for services rendered by the str. Queen City to the schr. M. Turner, of San Francisco, has been compromised, $2,594 having been agreed upon as their value.

The Vancouver Shipmasters' Association has elected the following officers for the current year: President, Capt. Wilbur; Vice-Presidents, Capt. Kidd, Capt. Babbington, Capt. Bissett; Secretary, Capt. M. Morrison; Treasurer, Capt. J. R. Newcombe.

Pacific coast reports state that the lights on the U.S. and Canadian shores of the entrance to the Straits of St. Juan de Fuca, near Victoria, are so nearly alike that there is a danger of mistakes occurring. If this is the case a change should be at once made.

A steel screw steamer has been launched at Philadelphia for the Pacific Coast fishery of the New England Fish Co. Her dimensions are: length, 142 ft.; breadth, 24 ft.; draft, 15 ft.; and she will be fitted with triple expansion engines capable of making 13 knots an hour. The new steamer has been named the Manhattan, and is expected to start on her voyage round Cape Horn early in March.

An investigation into the loss of the str. Valencia was opened at Victoria, B.C., Feb. 5, by Capt. Gaudin, Agent of the Department of Marine, assisted by Capt. G. G. Cox, Lloyd's agent, and Capt. Newcombe, Master of the fisheries protection cruiser Kestrel. The str. was a U.S. one, operated by the Pacific Coast Steamship Co., and ran ashore in a fog near Cape Beale, Vancouver Island, Jan. 22, about 100 lives being lost. The object of the inquiry is to ascertain whether the wreck was caused by any inefficiency of the lights maintained by the Dominion Government, or the coast. The loss of the vessel formed the subject of a discussion with the President of the U.S. at Washington on Feb. 7, and as a result the board which recently investigated the burning of the excursion str. General Slocum with the loss of 1,000 lives, has been directed to make an investigation into the Valencia disaster also.

Among the Express Companies.

The ninth annual drive and dinner of the Dominion Ex. Co.'s employes at Montreal took place Feb. 3.

W. S. Stout, President and General Manager Dominion Ex. Co., returned to Toronto, at the end of Jan. from the Pacific coast.

The Canadian Ex. Co. has issued notices to wholesale liquor dealers that it will not accept consignments of liquor for points in Albert County, N.B.

The offices of the American Ex. Co. at Cape Vincent, N.Y., were burned out Feb. 6. Among the parcels destroyed were a number belonging to the Canadian Ex. Co., taken over from Kingston, Ont.

O. E. Ford, heretofore cashier Dominion Ex. Co., Vancouver, B.C., has been appointed the company's agent at Rossland, B.C., succeeding J. H. Young, transferred to Victoria, in place of F. Oliver, resigned.

The Dominion Ex. Co. has opened offices at Bawlf, Daysland, Erskine, Exshaw, Larmour, Nevis, O'Haton, Stettler, Alta.; Cardell, Sask.; Moor Park (formerly Creeford), Man.; Burbridge (formerly Bouchette), Que.

J. H. Young was presented with a travelling bag and outfit by the business men of Rossland, B.C., on leaving the Dominion Ex. Co.'s agency there to take up the duties of agent for the same company at Victoria, B.C.

The Dominion Ex. Co.'s agents are authorized at common points with the Canadian

BELL TELEPHONE CO. OF CANADA

Ex. Co., to waybill shipments for common points of Canadian Ex. Co., with the Maritime Ex. Co., through to distination at one graduate or the lowest through rate.

Statistics recently published show that the Dominion Ex. Co. is the third largest company of its kind on the continent, being exceeded only in point of agencies by the American and Wells-Fargo companies. During the past year, the company increased its business and agencies to such an extent that it passed the United States Ex. Co., which had previously stood third.

The Dominion Ex. Co. announces that its agents at common points with the Canadian Ex. Co., where the American or National companies are not represented, are authorized to waybill through at one graduate or one minimum to Amherstburg, Ont., an exclusive office of the American Ex. Co., on the rate furnished by the Tariff Department, or on the rate of the Canadian Ex. Co. if lower; route via Windsor, Ont., for transfer to American Ex. Co.

Telegraph and Cable Matters.

The C.P.R. Telegraph Department has closed its offices at Headingly and Stockton, Man.

The Newfoundland Post Office has opened a telegraph office in connection with its system at Gaff Topsail.

The G.N.W. Telegraph Co. has opened offices at Alliston Station, Minden, Ont.; Bristol, St. Norbert, Que.

The Marconi Wireless Telegraph Co. has been given a contract by the Reid Newfoundland Co. to equip its str. Bruce with wireless telegraph apparatus.

The list of offices, revised tariff, instructions and rules for 1906, has been issued by the C.P.R. Telegraph Department. It extends to 606 pages against 416 for 1905.

An unnamed company in which Victoria, B.C., men are interested, is reported to have asked the Dominion for a subsidy of $15,000 to cover the installation of six wireless telegraph stations on the Pacific coast.

A number of the cables connecting the West Indian Islands with each other and the mainland were interrupted Feb. 2, the disturbances being mainly to the south. The Halifax-Bermuda-West Indian cable was not interrupted.

The C.P.R. Telegraph Department has completed a new copper wire between Montreal and St. John, N.B., about 482 miles. The work was done by two gangs, one starting at Montreal and the other at St. John, and was completed in 35 days.

The Anglo-American Telegraph Co. has announced that it will receive at its Newfoundland offices messages for Anticosti Island, to be transmitted via the Marconi Wireless Telegraph Co.'s station at Cape Ray, at a charge of 45c. for 10 words, and 3c. for each additional word, address and signature free.

The C.P.R. Telegraph Department has been revising some of its rates in Western Canada. The rate from Lethbridge to Medicine Hat, Alta., is being reduced from 50c. to 25c., the rate now in force between Lethbridge and Calgary and Edmonton, Alta. New rates, it is stated, will also be put in force to points on the Pacific coast and in the State of Montana.

In the action of Moss against the C.P.R. Telegraph Department, Justice Britton of the Ontario Courts found that the plaintiff had not complied with the conditions to be observed in sending a telegram, and therefore could not hold the department responsible for any mistakes that might occur. But in case the suit should be brought before an-

The Canadian Pacific Railway Company

NOTICE TO SHAREHOLDERS.

A Special General Meeting of the Shareholders of the Company will be held at the principal office of the Company at Montreal, on Monday the 19th day of March next, at noon, pursuant to the Act of the Parliament of Canada, 55-56 Victoria, Chapter 35, entitled "An Act respecting the Canadian Pacific Railway Company," for the purpose of considering and, if approved, of authorizing an increase of the present authorized ordinary capital stock of the Company from one hundred and ten million dollars to one hundred and fifty million dollars, being an increase of forty million dollars, and of determining the amount or amounts and the time or times of the issue or issues of said stock, the purposes to which the proceeds thereof shall be applied and of adopting such resolutions or by-laws as may be deemed necessary in connection therewith in order to enable the Directors of the Company to give effect to the same.

The Common Stock transfer books will be closed in Montreal, New York and London, at 1 p.m. on Saturday, February 24th instant; the Preference Stock Books will be closed in London on the same date.

All books will be reopened on Tuesday, April 3rd, 1906.

By Order of the Board,

CHARLES DRINKWATER,
Secretary.

other Court on the point of law, Judge Britton made an appraisement of the damages suffered by the plaintiff, which he placed at $400.

The Marconi Wireless Telegraph Co. of Canada, in replying to some questions asked by shareholders in Vancouver and New Westminster, B.C., has set out in detail the extent of the work done on the Atlantic coast, viz., the construction of 14 stations for the Dominion Government, four for the Newfoundland Government, and the completion and equipment of its high power stations at Glace Bay and Sydney, N.S. At these points there is an increasing volume of commercial business, in addition to the reporting of vessels. "It is natural," says the General Manager, "that in an enterprise of this nature considerable time must elapse before the development can entirely cover the field that is open to it, and in our case, it so happens that the primary demand has been for a large number of stations in the east. It is, however, reasonable to expect that in course of a little time we shall make similar advances on the Pacific coast.

Montreal Telegraph Company.

At the 59th annual meeting in Montreal recently, the balance sheet for the year ended Dec. 31, 1905, was presented as follows:

ASSETS.

Lines in Canada and the U.S.	$1,625,890.00
Cables in Canada and the U.S.	33,487.39
Offices and equipment of offices in Canada and the U.S.	212,500.00
Real estate in Montreal, Ottawa, Quebec and Toronto	279,946.46
	$2,151,823.85
Cash, accounts receivable, bonds and other securities, and real estate (not included in lease to G.N.W.	136,384.66
	$2,288,208.51

LIABILITIES.

Shareholders' capital		$2,000,000.00
Excess in value of property operated by G.N.W. Tel. Co. over shareholders' capital		151,823.85
		$2,151,823.85
Dividend payable Jan. 15, 1906	$40,000.00	
Unclaimed dividends, etc.	911.58	
Contingent fund	95,473.08	
		$136,384.66
		$2,288,208.51

The directors' report said: The dividend guaranteed by the Western Union Telegraph Co., under the terms of the agreement of Aug. 17, 1881, was distributed in the usual manner and on the fixed dates, with a payment of 10c. a share to shareholders of record on Sept. 30 last. The company's property in the foregoing statement, valued at $2,151,823.85, is operated and maintained by the G.N.W.T. Co. of Canada. Its operation and maintenance is also guaranteed by the Western Union Telegraph Co. of New York, under an agreement with this company for 97 years from July 1, 1881. The company continues free from debt or encumbrance of any kind.

The following were elected officers and directors for the current year:—President, H. A. Allan; Vice-President, A. J. Paterson; other directors: W. Wainwright, W. McMaster, W. R. Miller; Secretary and Treasurer, D. Ross-Ross.

General Telephone Matters.

The Bell Telephone Co. is negotiating for a five years' franchise in Sarnia, Ont.

It is understood that the Government of Saskatchewan will ask authority of the Legislature to consider the establishment of a Government owned telephone system in the province.

The telegraph line connecting Tara and Keady, Ont., is owned by Dr. McNally. An arrangement has been completed by which the line has been connected with the Bell Telephone Co.'s line at Tara.

The Bell Telephone Co.'s local manager at St. Thomas, Ont., recently informed the members of the local Board of Trade that the central energy system would be put in at as early a date as possible.

A committee has been formed among the grainmen at Neepawa, Man., to formulate a system of municipal telephones for the Langford and Rosedale districts, to exchange with the Neepawa civic system.

The Bell Telephone Co. will apply next session of the Dominion Parliament for an Act amending the acts under which it is carrying on business throughout the Dominion, and authorizing an increase in its capital.

A. Robinson, manager of the municipal electric light and telephone system, Kenora, Ont., was rendered insensible from an electric shock received while attending to some repair work on the roof of the company's station, recently.

The Chicago Telephone Co. is looking for a location for a factory in Canada. The municipal council of Three Rivers, Que., has passed a resolution offering the company a bonus and exemption from taxation to establish itself there.

The New Brunswick Telephone Co. is asking the St. John City Council for permission to open a number of streets in order to put down conduits for its telephone cables. The company proposes to do away with poles from the streets entirely.

The Southwold and Dunwich Telephone Association has been formed at Iona, Ont., in the same territory that the Wallacetown and Lake Shore Telephone Association is working. The officers are:—President, W. R. Pollard; Vice-President, R. Silcox; other directors, A. Turner, J. Orchard.

A conference, attended by the county and township councillors of Waterloo county was recently held at Berlin, Ont., at which it was decided to send a memorial to the Legislature urging the Government to take into immediate consideration the question of establishing a provincial telephone system.

The Edmonton, Alta., Board of Trade recently had a lengthened discussion on the telephone question. The general feeling is in favor of the inauguration of an automatic system, municipal ownership of local lines, and Government ownership of long distance lines. The matter will be looked into by a delegation which will visit Winnipeg at an early date.

A proposition is under consideration for the conversion into a copper line of the present iron wire connecting Edmundston, N.B., and Riviere du Loup, Que., about 100 miles. When this work is done the New Brunswick Telephone Co. will be enabled to establish a direct connection with Montreal through

The Canadian Pacific Railway Company

Dividends for the Half-year ended 31st December, 1905, have been declared as follows:

On the Preference Stock, two per cent.

On the Common Stock, three per cent.

WARRANTS for the Common Stock dividend will be mailed on or about April 2nd, to shareholders of record at the closing of the books in Montreal, New York and London, respectively.

The Preference Stock dividend will be paid on Monday, 2nd April, to Sharcholders of record at the closing of the books at the Company's London Office, No. 62 Charing Cross, London, S.W.

The Common Stock Transfer Books will close in Montreal, New York and London, at one p.m. on Saturday, February 24th. The Preference Stock Books will also close at one p.m. on Saturday, February 24th.

All books will be reopened on Tuesday, April 3rd.

By Order of the Board,

CHARLES DRINKWATER, Secretary.

the lines of the Kamarouska Telephone Co. The iron wire is on this company's line.

The Dunwich and Dutton Telephone Association has been formed to construct telephone lines from Dutton to various points throughout the township of Dunwich, Ont. It is expected to start construction at an early date. The officers are: President, W. A. Galbraith; Vice-President, Dr. W. T. Hamilton; Secretary-Treasurer, W. H. Barnum; Trustees: J. B. Crawford, J. H. McIntyre.

The Beauce, Que., Telephone Co., at its annual meeting, Feb. 8, declared a dividend of 8%, and placed $1,000 to reserve fund as the result of its operations for 1905. Following are the officers and directors for the current year: President, A. Pacaud; Vice-President, H. Lacoursiere; other directors: Senator Bolduc, P. F. Renault, P. Angers, J. Cloutier, J. Poirier, H. A. La Rue, J. A. Mailhoux.

The New Brunswick Telephone Co. has decided during the current year to construct a new copper circuit between St. John and Fredericton, N.B., making four lines between these points; a copper line between Canterbury and St. Stephen, 65 miles, and a new copper circuit from Buctouche to Campbellton, about 185 miles. By this latter circuit all the north shore points will be brought into direct communication with St. John.

A bill has been introduced in the British Columbia Legislature for the purpose of controlling the rates charged by telephone companies, and also to give private persons the right to connect with any telephone line. The question of rates to be charged for such connections are to be settled by municipal councils, and in unincorporated places by the Government; and schedules of rates are to be submitted annually for approval by June 1.

The Manitoba Legislature on Jan. 30 appointed a special committee to enquire into the different systems of telephones and into the telephone system of the province in general. Hon. Colin Campbell, Attorney-General, was appointed chairman, and the committee began its sittings Jan. 31. The committee declined to allow telephone companies to appear by counsel and take part in the cross-examination of witnesses. Witnesses representing the automatic telephone system, the Bell Telephone Co., a number of local telephone companies, and some telephone experts have been examined by the committee. The members of the committee have visited Chicago, Ill., to inspect the telephone systems there.

DETROIT RIVER TUNNEL.

The plans for the tunnel under the Detroit River, between Detroit, Mich., and Windsor, Ont., to be constructed by the Michigan Central Rd., which operates the Canada Southern Ry., have been completed.

The length of this tunnel, including approaches, will approximate 12,800 ft., or 2.42 miles. The subaqueous portion of the tunnel will be 2,625 ft. long. The other portions are to be as follows:—Easterly open cut, 3,400 ft.; easterly approach tunnel, 3,100 ft.; westerly open cut, 1,540 ft.; westerly approach tunnel, 2,135 ft. The bids for this work were based upon sectional letting, the two open and two tunnel approaches mentioned in the foregoing constituting sections 1, 2, 3 and 4, in the order above named; the subaqueous tunnel constituting section 5, the Windsor shaft section 6, and the Detroit shaft section 7.

The location of the river portion of the tunnel is such as to be substantially tangenital to the curve upon which trains enter the station on the Detroit side and to the curve by which trains now turn toward the ferry slip, on the Canadian side. Such curvature as is necessary is located in the approach tunnels on each side, as shown in the general location plan. The summit on the Canadian side is at the western extremity of the new Windsor yards, as on the Detroit side the approach ends in the Detroit yards. On the Windsor side it is proposed to erect a passenger station a short distance east of the summit, and the plans show a suggested connection with the C.P.R. at this point. A connection with the Wabash-G.T.R. line is suggested at Walkerville Jct., from which point also freight cars of the Pere Marquette are taken to Detroit by the C.P.R. The location appears to be the best possible, taking into consideration the various interests that will or may be served.

The feature of engineering difficulty is, of course, the submerged section of the tunnel. For the construction of this main section five plans are presented, to the bidders. For the purpose of reducing hazard, cost, time of construction, length of tunnel and lift of traffic tonnage, and also to widen the field of bidders, the tunnel company offers three designs which dispense with the necessity of using shields for the construction of the subaqueous portion. Design "A" was evolved by W. J. Wilgus, Vice-President of the New York Central, and at the head of the advisory board of engineers, of which H. A. Carson and W. S. Kinnear are the other members. It may be briefly described as a method by which the previous material underlying the river may be replaced by a watertight material of concrete, placed under water, and through which, without the use of shields, the inner tubes or tunnel proper may be constructed, so as to secure watertightness and continuity of strength, with an absence of high air pressures. This method also dispenses with the use of cofferdams. The progressive stages of this design are:

(a) The dredging of a trench.

(b) The depositing in the bottom of this trench so as to form a barrier between the underlying clay and sand and the superimposed concrete, of "two men" stone to the depth of 18 inches; that is, durable, sound stone, ranging in size from quarry spawls to a maximum size that can be handled by two men.

THE HON. L. P. BRODEUR, M.P.
Minister of Marine and Fisheries

(c) The construction of temporary platforms in accordance with the permits of the United States and Canadian governments, upon which the contractor's machinery, including mixers, etc., may be placed, these platforms to move progressively across the river as the dredging and other work permit.

(d) Depositing of concrete by the Tremie bucket or other process approved by the engineer for a depth of approximately 2 ft.

(e) The placing of saddles, with the aid of blocking and wedges, upon this bed of concrete, upon which forms can be laid. As an alternative method it is suggested that piling can be driven after the trench is excavated, and the piling cut off at a proper height to receive the saddles, so as to dispense with the use of blocking and wedges.

(f) The construction, on shore, of forms consisting of timber and steel in convenient lengths of 50 to 500 ft., to be coupled together in pairs or otherwise, to be floated into position and gradually sunk until they rest on the saddles.

(g) Placing concrete under, around, between and on top of the forms by the bag, Tremie or bucket process, so as entirely to encase the forms. It is optional with the contractor to join adjacent forms under water in such a manner as to secure watertight connections, or to leave an open space between them, to be filled with concrete, to act as a bulkhead, separating the adjacent forms, and to be cut out after the water has been expelled.

(h) The pumping of the water from the first section after the concrete has had an opportunity thoroughly to set. If the leakage is found to be excessive, the procedure is to use air of sufficient pressure to enable the waterproofing to be perfected and the inner tube or tunnel to be properly constructed.

(i) Should the contractor elect to adopt rolled steel for the forms, they would be constructed with watertight joints in such a manner, that left in the work, they will act as waterproofing to prevent the percolation of water against the exterior of the inner tubes of the tunnel proper. Should the contractor elect to use wooden forms, waterproofing may be placed on the exterior of the forms before they are sunk into position, so that when the forms are removed the waterproofing will remain in place. This method would require the use of air pressure to prevent hydrostatic pressure from distorting the waterproofing.

(j) The construction of the inner tubes of the tunnel proper, after measures have been taken to make all sections thoroughly watertight.

DESIGN "B."

The second design offered by the company, which does not require the use of shields, was proposed by H. A. Carson, of the advisory board of engineers. It is a method by which the inner tubes of the tunnel proper are first built in floats or on dry land, floated and sunk into position on a foundation like that described for the first plan, and joined together by a suitable method, giving continuity of construction and watertightness. DETROIT RIVER TUNNEL—PLAN SHOWING CONNECTING LINES.

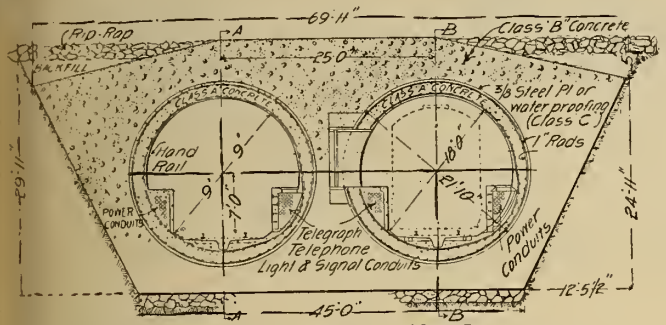
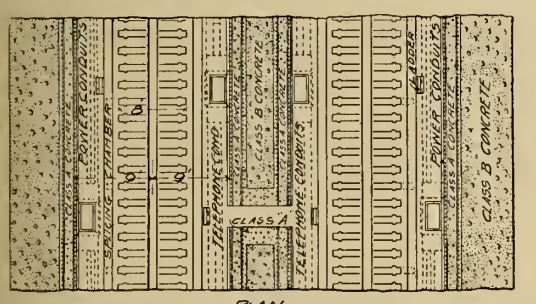
this method great pains would of necessity be taken in joining the sections, so that the joint will not be an element of weakness in the structure, but will be fully as strong as any portion of it. These tubes would then be encased in concrete and protected by backfilling and by riprap.

Design "C" is practically the same as design "A," except that a certain style of steel form and arrangement of reinforcement are prescribed.

Design "D" gives the bidders the option of selecting the well-known shield method of construction. It is pointed out, however, that the necessity of retaining the summits of the tunnel gradients as estimated causes a location of the top of the tunnel for the subaqueous section so close to the river bed as to require artificial filling in order to hold air, the use of which is necessitated by the shield method. Contractors who choose this method must therefore be under the necessity of estimating for the placing of temporary blankets or masses of clay on top of the location of the tunnel, so as to give the necessary thickness between the top of the shield and the water to prevent or reduce the escape of compressed air.

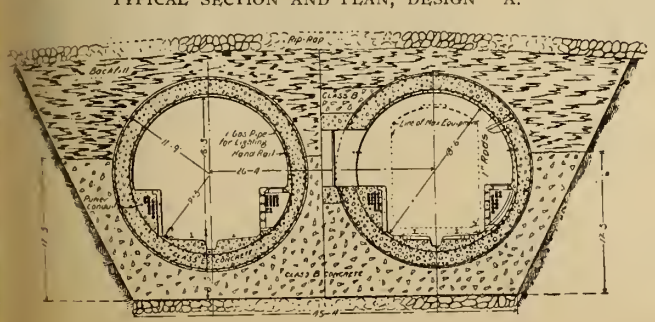


TYPICAL SECTION OF TUNNEL



PLAN

TYPICAL SECTION AND PLAN, DESIGN "A."



TYPICAL SECTION, DESIGN "B."

CONTRACTOR'S ALTERNATIVE METHOD.

Design "C," before mentioned, gives the contractor the option of submitting supplemental specifications and plans illustrating the type of construction upon which he would prefer to bid, provided that the established gradients on the easterly and westerly approaches shall be the same as the company's plans, namely, 2% equated for curvature on the westerly approach, and 1½% equated for curvature on the easterly approach. It is further provided that the depth from the surface of the Detroit River to the outer clearance line of the tunnel construction shall not be less than 41 ft. where the depth of water now equals or exceeds that distance. The tunnel company express a strong preference for the fixing of the summits of the easterly and westerly gradients at the points shown upon the company's plans, because the established points are based upon convenience to the track and yard layouts adjacent.

GENERAL DESCRIPTION.

The maximum depth of the river at the proposed site of the tunnel is about 45 ft., and it is provided in the specifications, as mentioned elsewhere, that the clearance line of the tube structure shall not be less than 41 ft. below the surface where the depth of water now equals or exceeds that amount. The maximum velocity of current at the time measurements were taken (Aug. 28 to Sept. 5, 1905), was 3.40 ft. per second, and at the bed of the river 1.17 ft. per second.

The soil to be excavated consists principally of blue clay, with greater or less admixtures of gravel and sand In the borings taken on each side of the tunnel site, at intervals of 100 ft. throughout the entire length of subaqueous and approach tunnels, hard pan was struck at about 35 feet below the lowest point in the bed of the river. In case of the use of piling as an additional support for the bottom of the tunnel it is required that piles be driven to refusal.

As shown by the accompanying engravings of typical sections of the tunnel, it is provided that the interior diameter of the tube shall be 18 ft., giving a height above top of rail of 16 ft. Power conduits will be located on the outer side of the tube interior, and telegraph, telephone, light and signal conduits upon the inner side with a clearance of 11 ft. 6 in. between. In all of the various possible designs submitted for the consideration of contractors provision is made for the liberal use of concrete. Design "A" provides for filling the tunnel trench to a depth of 5 feet with Class B concrete above the shell of the tunnel tube, which is itself of Class A concrete, 2 ft. in thickness, reinforced with 1-in. steel longitudinal rods, spaced 14 in. centre to centre, and inner and outer circumferential rods of the same size, spaced 6 in. centre to centre. In the main features of construction the other designs submitted, with the exception of the shield method, do not differ essentially. Design "B" provides for a filling of concrete up to only a short distance above the centre line of he tubes, the balance being backfilling, and a protection of riprap, while Design "C" provides for outer and inner shells of ⅜-in. steel, the outer shell being supported by rings of 10-in. I-beams of 30-pound section, spaced 4 ft. centre to centre.

Design "D" provides for a tube, built up of cast iron rings composed of segmental sections 2 ft. 6 in. in width and 6 ft. 3.1414 in. in length on the outer face, with flanges 11 in. in width, and 1½ in. thick on the inner edge, and two intermediate brackets of the same thickness, supporting the longitudinal flanges of each section. Each section is tapped for a 1¼ in. pipe for grouting.

The specifications for the tunnel structure indicate that much attention is to be given to the quality of Portland cement used, to its mixing and the method of application, in order to insure the greatest degree of strength and permanency.

It is the purpose of the tunnel company to secure structures the interiors of which shall be permanently free from moisture or discoloration due to the percolation of water, oils or other liquids from outside sources, by use of a continuous, flexible waterproof sheet, surrounding the exterior of the structure. Coal tar of the grade known as "straight run coal

tar pitch" will be used. Felt must be dipped in pitch and weigh not less than 15 lbs. to each 100 square ft. The Class "A" waterproofing will consist of three layers of felt and four layers of coal tar pitch in alternation, each strip or piece of felt to be laid so as to lap well over the previously laid strip.

The Detroit River Tunnel Co. has already completed the excavation of a large portion of the Windsor shaft, and will complete in a similar manner the excavation of the Detroit shaft. This work will be turned over to the contractor, who will complete the excavation and assume maintenance of the temporary work that has been placed.

Answering questions that may arise as to what obstruction to navigation would be occasioned by the trench method of construction proposed, by the plans submitted, it was shown to the satisfaction of the Lake Carriers' Association, at a meeting held in Detroit on Jan. 23, with the Board of United States Engineers appointed by the War Department, that the impairment of the waterway will be immaterial. The total width of the river from harbor line to harbor line is 2,400 ft. It was shown that the tunnel building operations will not obstruct more than 600 ft. of this distance at any one time, leaving the remainder clear to navigation. It was, however, suggested that a patrol boat be maintained to serve as a pilot to passing vessels to indicate to them the particular portion of the channel that at any time was free and unobstructed, and to the maintenance of this boat H. B. Ledyard, Chairman of the Board of Directors, at once assented on behalf of the Michigan Central Rd. It is expected that the actual work in the river will be completed in eight or nine months.

The cost of the tunnel is estimated at from $7,000,000 to $8,000,000, and it is expected to have a capacity for the handling of about 4,000,000 cars per year. The present business of the Michigan Central Rd. amounts to about 400,000 cars annually, and other roads that may be expected to use the tunnel handle about 300,000 cars.

The construction of the tunnel is in the hands of an advisory board of engineers, consisting of W. J. Wilgus, H. A. Carson and W. S. Kinnear, Mr. Kinnear being chief engineer and in direct charge of the work.—Railway Age.

The Executive Council of the Canadian Manufacturers' Association, with a view of building up trade at Canadian ports, has passed a resolution favoring the application of the preferential tariff in favor of British goods only on such as are landed direct at Canadian ports. At present the preferential tariff is applied to goods entering Canada, through U.S. ports as well as to goods coming direct to Canadian ports.

The Shedden Forwarding Co. has been granted a supplemental charter under the Dominion Companies' Act, by which its capital is increased from $700,000 to $1,500,000 and its powers have been extended so that it may engage in the manufacture of vehicles of every description; construct and operate grain elevators and warehouses; develop electric and other power; and acquire stock in similar enterprises.

C.P.R. Western Officials' Conference.

Following are the opening remarks of W. Whyte, Second Vice-President C.P.R., at the conference of officials, Western Lines, held at Field, B.C., Feb. 12 and 13:—

There is nothing novel about such a meeting as this in territory under my jurisdiction, as I understand that officers have frequently called conferences of those acting with them, and this widening out of the idea was adopted by myself to permit of an exchange of ideas and experience of all the principal officers, and in order that by personal contact with those occupying similar offices and with those in other departments, a better understanding and improvement might result, as well that a more profitable administration of the different departments of the railway might result to the company. The calendar year which has just closed has been, in my experience, by far the most successful in the operation of the Western Lines with respect to the volume of business handled, and particularly in the improvement made in most features of its transportation, increased tonnage and reduction in the expense of transport, as well as the improvement in the passenger service and the handling of package freight, and I think, also, from the fact that there has been less disturbance of the car and the power supplied during the movement of the wheat crop in districts not directly affected by that movement. There has also been an improvement in the carrying out of work authorized by the appropriation and in the building of new lines, much of the work having been

hurried through and in use, and the new equipment thereon made available for the handling of wheat traffic.

The disturbing factor that has given myself and the operating officers most grave concern has been the frequency of serious accident, and one of the most important considerations that led to my calling the present meeting was to see if by conference, we could gain additional knowledge how to combat the influences or circumstances that lead up to this most regrettable feature of our operation. Notwithstanding that we are working under a set of almost perfect rules, and have gone to the greatest amount of trouble to educate our men to a knowledge of them, we are yet without that benefit which should have accrued to us from the adoption and grounding of this knowledge into the minds of employes. I have urged most particularly upon all concerned the exercise of the greatest care in selecting men for the telegraph, engine and train services, and have pressed as strongly upon officers supervising these departments, to keep their men in an up-to-date knowledge of the rules pertaining to their duties, and particularly to notice their habits. I have felt that selection, character and obedience to the rules and its features that lead to safety, leaving only that chance which we cannot guard against—error in judgment. Apart from this, the matters that I look for the most improvement in, this present year, are:—First, the time of our passenger trains, accelerating their speed as far as the track conditions will permit, and cutting out all dead time at stations; also the education of the enginemen so that they will make greater effort to maintain their schedule, or to recover time lost prior to taking hold. Second, the first-class freight service. Third, the car supply for points distant from headquarters. Fourth, the hurrying home of foreign equipment. In no account in our expenses have we made such an improvement as in this, but it has not yet reached my expectations.

I would urge upon all concerned to curtail their correspondence, doing as much of their business as possible in personal contact with their officers, thereby leaving more time at their disposal and hands unfettered for originating improvements in the handling of traffic. I would urge, now that the rates paid in all departments have gone up so much in the past two years, that we should take every means to cull from the service all who are not fully capable of giving service equivalent to the rates paid, and a continued and improved economy in the employment of men in all branches of our maintenance work.

This company has been the pioneer of business enterprise in the west, and it is essential that it should retain the lead, both in its methods and in its administration of them. This is no small task when we think of the great increase in the wealth of the country, which has attracted so many shrewd men from many countries, the fusion of whose business wits has done much to greatly stimulate trade. No matter what competition we have in the future, this company's railway must always remain the main artery through which the trade of the west will pulsate. If the officers and men will see that all the business offering to it is taken care of promptly, and that all its scheduled trains, whether they be passenger or freight, are run strictly to schedule, and that fine courtesy on the part of its employes, for which this company is so justly celebrated, is maintained, we have no need to be alarmed at the advent of any competing lines, and I would urge upon all that they leave no impediment in the way of accomplishing this result.

Canadian Car Service Rules.

J. E. Duval, Manager of the Canadian Car Service Bureau, in issuing a copy of the Canadian Car Service Rules as promulgated by the Board of Railway Commissioners, and published in THE RAILWAY AND MARINE WORLD for March, has sent the following instructions to agents:—

The foregoing rules are promulgated by the Board of Railway Commissioners for Canada with respect to the payment and collection of car service charges and their strict enforcement is made imperative. Agents have no authority to vary or depart therefrom.

The manager is authorized by the railway companies to act for each and severally, and will interpret these rules liberally, and enforce them without unjust discrimination or undue preference.

Where any uncertainty exists as to the interpretation of the rules or their application the manager must be communicated with promptly.

Claimants seeking refund should be advised to address the manager direct, enclosing paid car service bill and stating fully the grounds upon which refund is asked.

The manager will supply each railway with the authorized blank forms. Agents will make requisitions on the railway company, in the usual manner, for the necessary supply. Economy must be observed in the use of books, blanks, etc., and care is required in the preservation of all records.

All car service charges shall belong to the railway upon whose tracks the cars are detained, and must be collected and remitted in the same manner and with the same regularity and promptness as other transportation charges or tolls.

When the name and address of the party to notify are not shown on the way bill for a car consigned "to order," or when the consignee cannot be located promptly, the forwarding station must be communicated with by telegraph.

If shipper refuses to pay car service charges on any car delayed in loading or for forwarding instructions, the agent must refuse to issue bill of lading or forward the freight until car service charges are paid or authorized billed as advance charges and inserted in the bill of lading. If the regulations of the freight department require that all charges shall be prepaid, the car service toll must be collected before the bill of lading is issued.

Car service charges which accrue at any point other than the forwarding point, or point of delivery, and not collected, must be billed forward for collection.

In all cases where cars are refused by shipper or consignee, or where payment of the car service toll is refused, a special report with full particulars must be made promptly to the manager.

When a shipment has been transferred, the notice of arrival must also show the original car number.

Cars loaded with the railway company's material or supplies must not be reported.

All cars either of railway or private ownership, which are, or are to be, loaded or unloaded by the shippers or consignees thereof, must be reported on the prescribed forms, whether car service charges accrue or not.

Full instructions are also given in regard to the use of the various forms.

The question of building car works in or near Toronto for Mackenzie, Mann & Co.'s railway system is believed to be under consideration.

We are advised that there is no foundation for the report that the C.P.R. has arranged a traffic agreement with the Oregon Rd. and Navigation Co., to which reference was made in a recent issue.

Canadian Society of Civil Engineers.

The 20th annual meeting of the members was held in Toronto. The society was welcomed to Toronto on behalf of the Engineers' Club of Toronto by its President, F. L. Somerville, Division Engineer, G.T.R.

The council reported that there were now 10 honorary members, 406 members, 424 associate members, 36 associates and 513 students on the roll, a total of 1,389 against 1,261 in 1905. Thirteen meetings were held during the year, four business meetings and nine sectional meetings. The Gzowski medal for 1904-05 was awarded to C. B. Smith, Chairman and Consulting Engineer, Temiskaming and Northern Ontario Ry. Commission for his paper on the Construction of the Canadian Niagara Power Co.'s 100,000 h.p. hydro-electric plant at Niagara Falls, Ont. The Treasurer's report showed an income of $8,107.23, exclusive of a balance of $3,270.81, brought forward from 1904, and the expenditure was $10,057.74, leaving a balance of $1,320.30.

The council reported a recommendation of the committee on standards to the effect that it was not desirable for the society to take any action lending its official approval to any particular design or method of manufacture. Standardizing of methods of testing is commended in the hope of making a uniformity in the English, Canadian and United States methods. The standards committee report was submitted by Prof. R. J. Durley, of McGill College, Montreal, who pointed out the vast field of labor and the importance of undertaking. The report will be discussed at a future meeting.

The election of officers resulted as follows:—President, H. D. Lumsden, Ottawa; Vice-Presidents, M. J. Butler, Ottawa; C. B. Smith, Toronto; W. McL. Walbank, Montreal; Councillors, W. F. Tye, P. Johnson, H. Holgate, J. Kennedy, R. A. Ross, L. A. Herdt, J. E. Hardman, J. B. Porter, J. G. G. Kerry, R. J. Durley, Montreal; D. MacPherson, Ottawa; R. McColl, Halifax, N.S.; C. Fergie, Sydney, N.S.; E. A. Hoare, Quebec; H. MacLeod, Winnipeg; J. S. Dennis, Calgary, Alta.; G. H. Webster, E. Mahum, Vancouver, B.C.

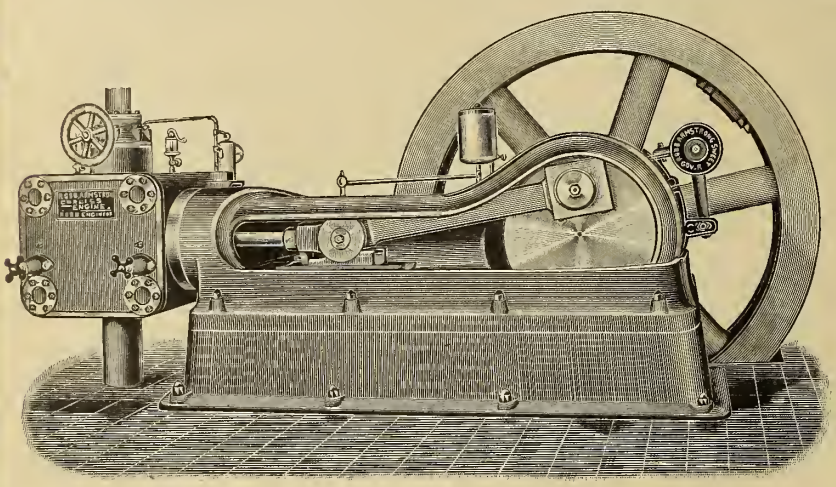
On the second day W. J. Francis read a paper on "Hydraulic Locks on the Trent Canal," and papers on "Tide Levels and Datum Planes on the Pacific Coast," by D. W. B. Dawson, of the Department of Marine, Ottawa, and on "Dam Construction," by C. P. Baillairge were distributed.

The retiring President, E. Marceau, gave an address on "The Origin of our Canal System," in which he reviewed the origin and growth of the St. Lawrence, Ottawa and Richelieu river canals. The first canal construction was commenced in 1708 when the Order of Sulpicians undertook to construct a canoe route to avoid the most dangerous of the Lachine rapids. This was never completed, but traces of it can still be found. It was many years afterwards before anything was done, and in a table arranged by Mr. Marceau, the development of the canal system is divided into four periods, viz.:—1st, 1777 to 1816; 2nd, 1816 to 1840; 3rd, 1840 to 1870; 4th, 1870 to 1895. Maps and plans reproduced from old drawings etc., were shown to illustrate the address.

A resolution was passed instructing the council to represent to the Dominion Government the necessity for more complete coordination of various surveys conducted by its departments, the securing of permanent records, and the ultimate establishment of a general topographic and geodetic survey scheme. Another resolution supported the Government's reafforestation scheme, and the establishment of a Dominion school of practical forestry.

During the meetings the members visited the power development plants at Niagara

A Fine Steam Plant



"I will say without qualification that it is as fine a boiler and engine plant as I have ever had the pleasure of seeing for its size. The engine was working without heating and absolutely without any noise. I wish to congratulate you on your success in building this class of engine and hope that we may have pleasure in dealing with you again."

The above refers to a 350 horse power Robb-Armstrong Corliss engine and two 175 horse power Robb-Mumford boilers installed by us.

April Birthdays.

Many happy returns of the day to—

J. A. Armstrong, Chief Dispatcher C.P.R., Ottawa, born at South Durham, Que., April 6, 1863.

Adam Brown, formerly President Wellington, Grey and Bruce Ry. (now G.T.R.), Vice-President G.N.W. Telegraph Co., and Postmaster of Hamilton, born at Edinburgh, Scotland, April 3, 1826.

A. Buchanan, Superintendent of Motive Power, Central Vermont Ry., St. Albans, Vt., born at New York City, April 3, 1870.

W. J. Camp, Electrical Engineer C.P.R. Telegraphs, Montreal, born at Oakville, Ont., April 22, 1855.

A. H. Clark, Master Mechanic Irondale, Bancroft and Ottawa Ry., Irondale, Ont., born April 5, 1867.

J. H. Flock, K.C., Honorary Counsel Canadian Ticket Agents' Association, London, Ont., born at Toronto, April 6, 1834.

B. W. Folger, Manager Niagara Navigation Co., Toronto, born at Kingston, Ont., April 8, 1872.

W. E. Fowler, Master Car Builder C.P.R., born at Weymouth, Dorsetshire, Eng., April 27, 1856.

G. H. Garden, C.E., Chief Engineer Alberta Ry. and Irrigation Co., Lethbridge, Alta., born at Woodstock, N.B., April 5, 1849.

F. A. Gascoigne, Car Accountant C.P.R., Montreal, born at Gosport, Hants, England, April, 1866.

J. P. Gay, Manager G. T. Despatch Fast Freight Line, Detroit, Mich., born at Hamilton, Ont., April 26, 1857.

E. A. Geiger, ex-Superintendent Brockville, Westport and Northwestern Ry., Brockville, Ont., born at Newark, N.J. April 10, 1863.

B. C. Gesner, formerly Air Brake Inspector I.C.R., now travelling representative Galena-Signal Oil Co., born at Cornwallis, N.S., April 23, 1859.

A. L. Hertzberg, Engineer Maintenance of Way, C.P.R., Montreal, born in Norway, April 30, 1855.

E. J. Hilliard, Commercial Agent G.T.R., Buffalo, N.Y., born at Montreal, April 14, 1870.

J. M. Horn, city freight agent Canadian Northern Ry., Winnipeg, born at Schoots, Lanarkshire, Scotland, April 12, 1880.

E. A. James, Manager Canadian Northern Ry., Winnipeg, Man., born in London, Eng., April, 1865.

B. S. Jenkins, General Superintendent C.P.R. Telegraphs, Winnipeg, Man., born April 8, 1859.

J. S. Lawrence, Superintendent C.P.R., Nelson, B.C., born at Toronto, April 9, 1863.

D. McNicoll, Vice-President C.P.R., Montreal, born at Arbroath, Scotland, April 7, 1852.

W. A. Ritchie, District Superintendent The Pullman Co., Montreal, born at Edinburgh, Scotland, April 13, 1854.

E. V. Skinner, Assistant Traffic Manager C.P.R., New York, born in London, Eng., April 22, 1849.

J. Sparks, Assistant General Baggage Agent C.P.R. Western Lines, Winnipeg, Man., born in London, Eng., April 25, 1874.

A. M. Sutherland, Assistant Superintendent Duluth, South Shore and Atlantic Ry., Thomaston, Mich., born at Hartford, Conn., April 2, 1844.

J. R. VanCleve, Master Mechanic Alaska Central Rd., Seward, Alaska, born at Little Falls, Minn., April 6, 1859.

W. Wainwright, General Assistant and Comptroller G.T.R., Montreal, born at Manchester, Eng., April 30, 1840.

J. J. Wallace, General Freight Agent I.C.R., Moncton, N.B., born in Albert Co., N.B., April 20, 1847.

G. C. Wells, Assistant General Passenger Agent C.P.R., Montreal, born at Brockville, Ont., April 15, 1866.

Hon. J. Wood, President and General Manager New Brunswick and Prince Edward Island Ry., Sackville, N.B., born at Sackville, N.B., April 18, 1843.

W. Woollatt, ex-General Superintendent Buffalo Division Pere Marquette Rd., Walkerville, Ont., born at Weedon, Hertfordshire Eng., April 2, 1855.

J. B. Lambkin, Assistant General Passenger Agent, Intercolonial Ry., Moncton, N.B., born Quebec city, April 5, 1858.

Quebec Railway Subsidies.

At the recent session of the Quebec Legislature subsidies were granted to a number of railways as follows:—

ATLANTIC, QUEBEC AND WESTERN RY.—For 50 miles from Gaspe towards Causapscal on the I.C.R., and for 100 miles from Paspebiac to Gaspe, following the shore as nearly as possible, 4,000 acres of land a mile.

GREAT NORTHERN RY.—For 85 miles from Quebec to near Garneau Jct., or Grand Mere, and for 18 miles from St. Sauveur to St. Jerome, 2,000 acres of land a mile.

INTERPROVINCIAL AND JAMES BAY RY.—For 50 miles from Gordon Creek, at the terminus of the C.P.R branch line from Mattawa, Ont., to Ville Marie, 4,000 acres of land a mile.

JOLIETTE AND LAKE MANUAN COLONIZATION RY.—For 60 miles from Joliette towards Manuan Lake, 4,000 acres of land a mile.

LOTBINIERE AND MEGANTIC RY.—For 30 miles from Lune Ridge to the Quebec Bridge, 2,000 acres of land a mile.

MATANE AND GASPE RY.—For 30 miles from near St. Octave on the Intercolonial Ry., to Matane, 4,000 acres of land a mile.

NORTHERN COLONIZATION RY.—For 32 miles from Nominigue to L'Original Rapid, 3,000 acres of land a mile.

ORFORD MOUNTAIN RY.—For 5 miles from Eastman to Lake Bonaille, 2,000 acres of land a mile. For 10.84 miles from Kingsbury in the direction of Windsor Mills, 4,000 acres of land a mile, but not to exceed $43,373.50. This latter subsidy is in lieu of a lapsed balance granted by other acts.

PONTIAC AND INTERPROVINCIAL RY.—For 20 miles from Waltham station to Ferguson's Point; 4,000 acres of land a mile.

QUEBEC AND LAKE ST. JOHN RY.—For 2 miles from mileage 38, La Tuque branch to La Tuque, on River St. Maurice; for 1 mile from Roberval to the Government wharf on Lake St. John; for 3.8 miles from Valcartier to St. Catherine; for 4½ miles from Valcartier towards Gosforth; for 12 miles extension of the last mentioned line, including a branch 3½ miles long to the River aux Pins in St. Gabriel West, at the rate of 3,000 acres of land a mile, except the mile from Roberval to the Government wharf, for which the subsidy is 4,000 acres of land.

QUEBEC CENTRAL RY.—For 9 miles from St. Francis to St. George, Beauce, 4,000 acres of land a mile.

ST. MAURICE VALLEY RY.—For 30 miles from Three Rivers to Grand Mere, and to a junction with the National Transcontinental Ry., 2,000 acres of land a mile.

For a line from Roberval for 30 miles towards James Bay, a subsidy of 4,000 acres of land was voted; and unnamed subsidies were voted in aid of lines from Herbertville to St. Joseph d'Alma, 10 miles; and from Jonquieres in the direction of Ha-Ha Bay, 20 miles. These three lines are in territory in which the Quebec and Lake St. John Ry. is operating, and for which the interests connected with it hold charters.

The conditions attached to the subsidies are that work has to be commenced within two years from July, and completed within four years; that minerals are reserved in favor of the Crown, and that the company receiving the grant shall sell to actual settlers land at not exceeding $2.50 an acre.

Railway Legislation of the Dominion of Canada from 1867 to 1905.—In 1898, J. E. W. Currier, of the Department of Railways and Canals, published an index to the acts passed by the Parliament of Canada from the date of Confederation in 1867. A second edition, bringing the information up to the end of 1905, and extending to 232 pages, has just been issued. The volume contains an alphabetical index to all acts passed affecting railways, in which is given the year and chapter of the act, with the purpose for which each act had been passed; alphabetical index to telegraph, telephone and cable companies; index of orders-in-council having the force of law affecting transportation matters; table showing the location of railways as constructed to June 30, 1904; a section devoted to subsidized railways showing the amount of subsidies paid in each year since Confederation, a table giving the land grant, a third giving the cash subsidies voted, earned and paid, another giving the subsidies paid annually or by way of loan; and some statistics relating to the Government railways, and electric railways. Added to this is a good deal of general information relating to the railway history of the world; the quantity of materials required for one mile of track or per ton of rails; information relating to the canal system of the Dominion; the rules and regulations of the Board of Railway Commissioners; together with the regulations regarding railway legislation, contracts under the subsidy act, the fair wages clause in contracts, and a model railway bill. The book is a valuable one for all interested in railway matters, and it has been adopted by the Department of Railways and Canals, and by the Board of Railway Commissioners. The edition is a limited one and the price is $3.75.

The New Brunswick Gypsum Co. has been incorporated under the New Brunswick Companies' Act, with a capital of $30,000, and offices at Hillsboro, to mine, manufacture and sell gypsum and gypsum products, and in connection therewith to construct tramways, docks, piers, wharves, telephone lines and telephones, electric lighting and power, steam and other vessels. The provisional directors are:—. —. Tomkins, Tomkins' Cove, N.Y.; C. Tomkins, New York; H. W. Ladd, Boston, Mass.; C. J. Osman, Hillsboro, N.B.

Under Sec. 122 of the Railway Act, 1903, it is provided that before the location of any railway can be approved, the company shall prepare a map, in duplicate, upon a scale of not less than six miles to the inch, or such other scale as the Minister of Railways may have approved, showing the general location of the proposed line, the termini, and the principal towns and places through which it is to pass, the railways, navigable streams and tide waters, if any, to be crossed, and such as may be within a radius of 30 miles; and the physical features of the country. This provision only applies to the main line and to branch lines over six miles long. Upon this being approved, plans, profiles and books of references shall be filed, either for the whole line, or for any section of the line. The Department of Railways has an unwritten rule in regard to these applications providing that an opportunity shall be afforded all parties having similar railway interests to be heard in the matter before the application is dealt with by the Minister.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments, Etc.

Alberta and Flathead Ry.—Application is being made at the current session of the Dominion Parliament for an act incorporating a company with this title to construct a railway from the Crow's Nest branch of the C.P.R. near Pincher Station, Alta., via the Waterton Lakes and the Flathead River valley to the source of that river, with power to construct branch lines, and pipe lines for carrying oil along the railway right-of-way. The company desires to construct telegraph and telephone lines and to operate its railway by steam or electric power. A. C. Kemmis, solicitor, Pincher Creek, Alta., is acting for the applicants.

Boundary, Kamloops and Caribou Central Ry.—The Dominion Parliament will be asked at its current session for an act authorizing the construction of a line from Grand Forks, following the north fork of the Kettle River to Franklyn Camp and Fire Valley, thence to Grand Prairie; and extending the time for the construction of the several authorized lines.

Bracebridge and Trading Lake Co.—We are advised that it is expected to begin work on the construction of this line from Bracebridge to Trading Lake, Ont., very shortly, and that the line will be completed by Aug. 1. The annual meeting of shareholders was held at Bracebridge, Mar. 12. Following are the officers for the current year:—President, F. P. Warne; Vice-President W. H. Brown; Secretary-Treasurer, R. P Perry; Solicitor, T. Johnson.

British Pacific Ry.—Application is being made at the current session of the Dominion Parliament for an act incorporating a company to construct a railway from Victoria, B.C., via Bute Inlet and Yellow Head Pass, to Edmonton, Alta.; thence to Churchill on Hudson Bay; with a branch to a port on the west coast of Vancouver Island. Hogg & Magee, solicitors, Ottawa, are acting for the applicants.

Canadian Central Ry.—Application will be made next session of the Saskatchewan Legislature for the passing of an act incorporating a company with this title with power to construct a line of railway from Regina south and south-westerly to the International boundary with a branch from near Wood Mountain westerly to the western boundary of the Province; also from Regina north-westerly to the south branch of the Saskatchewan River, thence to the western boundary of the Province; also from Regina south and south-easterly to the International boundary. Jas. Balfour, solicitor, Regina, Sask., is acting for the applicants.

Detroit Tunnel.—The Canada Southern Ry. has made application to the Railway Commission for an order to expropriate lands in Windsor, Ont., and vicinity, required for terminal purposes in connection with the tunnel now being constructed by an allied company under the Detroit River. Among the works proposed in connection with the new terminal is the diversion of certain streets, the closing up of Marias road, and the construction of a subway under Macdougall St. The present yards will be moved back for about a mile and a half. The total cost of the various improvements contemplated is about $5,000,000. The commission directed its Chief Engineer to inspect the locality and plans, and to make a report prior to any order being issued. (April, pg. 131)

Erie, London and Tillsonburg Ry.—Application will be made at the current session of the Dominion Parliament for an act incorporating a company with this title to construct a railway from Port Burwell to London, passing through or near Aylmer, and from some convenient intervening point to Tillsonburg, Ont. Power is also asked to carry on a general navigation business and other allied operations. Gibson & Harper, solicitors, London, Ont., are acting for the applicants. Local press reports state that the line is projected in the interests of the C.P.R., which during 1905 acquired the Tillsonburg, Lake Erie and Pacific Ry., extending from Port Burwell to Ingersoll.

Fort William and Port Arthur Terminal Ry. and Bridge Co.—Application will be made at the current session of the Dominion Parliament for an act incorporating a company with this title with power to construct a number of short lines of railway to connect the several lines of railway in Fort William and Port Arthur, the G.T. Pacific Ry.; terminals under construction; the various industries in the district and the navigable waters; with power to construct bridges; to charge tolls for the use of the same; to own steam and other vessels, and to act as common carriers. Dowler & Sinclair, solicitors, Tillsonburg, Ont., are acting for the promoters.

Hamilton to Guelph.—Application is being made at the current session of the Ontario Legislature for an act authorizing the construction of a railway, to be operated either by steam or electricity, from Hamilton to Guelph Junction, on the Ontario and Quebec Ry. (C.P.R.). Biggar & McBrayne, solicitors, Hamilton, Ont., are acting for the applicants.

Huron and Ontario Ry.—The Dominion Parliament at its current session will be asked to pass an act giving further and additional powers to issue bonds, and for the purpose of authorizing the construction of branches from Port Perry to a point on Lake Ontario, at or near Whitby or Oshawa, Ont.; from Goderich through the counties of Huron, Middlesex, Lambton, Kent and Essex, touching at Parkhill and Strathroy, to Windsor and Sarnia. Proudfoot, Duncan, Grant & Skeans, solicitors, Toronto, are acting for the company.

International Ry. Co. of New Brunswick.—The New Brunswick Legislature is being asked at its current session for an act incorporating the International Ry. Co. of N.B., and confirming the proceedings of the meettings of shareholders and directors. The company was incorporated under letters patent in New Brunswick, and acquired the charter of the Restigouche and Western Ry., which it is constructing. T. Malcolm, railway contractor, Campbellton, N.B., is the principal man interested in the project, and A. I. Trueman is solicitor to the company.

The James Bay Ry. will cross the C.P.R. main transcontinental line about two miles west of Wahnapitaé, Ont., and run north for about 2½ or three miles, when it will swing west to Sudbury, about 10 miles. From the point where the line turns west a branch is to be constructed to some iron mines in Hutton tp., about 25 miles. A contract has been let for the construction of the branch line to the Northern Construction Co., which also has contracts on the main line. Surveys have been made from two or three miles south of French River to Key Inlet, where soundings are being made of the harbor. It is expected to have the line open from Toronto into the Muskoka country in June, to French River in Sept., and to Sudbury by the end of the year. (Mar., pg. 131.)

Klondike Mines Ry.—An issue of £125,000 of 6% consolidated debentures has been offered at par, in London, Eng., by the Dawson, Grand Forks and Stewart River Ry., for construction purposes of the Klondike Mines Ry. This latter railway has powers to issue debentures to the amount of $5,520,000 upon the line it is authorized to construct from Dawson to Stewart River, Yukon. (Feb., pg. 63).

Manitoulin and North Shore Ry.—The Dominion Parliament will be asked at its current session for an act extending the time within which it may construct its authorized railway.

Midland Ry. of Manitoba.—Plans have been deposited in the Land Titles Office, Portage la Prairie, Man., of a bridge proposed to be constructed over the Assiniboine River near Portage la Prairie, and the Dominion Government will be asked, April 2, to give its approval of the same, as required by the terms of the act respecting certain works in or over navigable waters. (Feb., pg. 63).

The Nipissing and Pontiac Ry. will apply at the current session of the Dominion Parliament for an act granting an extension of time for the construction of this projected line.

Ontario Northern and Temagami Ry.—The Temagami Ry. which last session obtained parliamentary power to change its name to the O.N. and T. Ry., will apply at the current session of the Dominion Parliament for an act giving power to extend its authorized line from Sturgeon Falls, north-westerly to the Missinabi River, and extending the time for the construction of the several lines.

Ottawa, Brockville and St. Lawrence Ry.—The Dominion Parliament will be asked at its current session to grant an extension of time for the commencement and completion of this projected railway.

Pacific and Eastern Ry.—At the current session of the Dominion Parliament application will be made for the passing of an act incorporating a company with this title for the purpose of constructing a standard or narrow-gauge railway to be operated by steam, electricity or other motive power. The projected route of the line is from Victoria northerly to the northern end of Vancouver Island, thence to the mainland at or near Bute Inlet, and easterly through the Cariboo district, via the Yellowhead Pass to Edmonton, Alta., then easterly to Prince Albert, Sask., and then north-easterly by the most feasible route to Fort Churchill on Hudson Bay, and a branch line from Edmonton to Dunvegan, on the Peace River. All the usual powers are asked for, as well as authority to develop and distribute electrical power, to own and operate hotels, and to carry on a number of businesses. Belcourt & Ritchie, solicitors, Ottawa, are acting for the applicants.

Prince Albert, North Saskatchewan and Hudson Bay Ry.—Application will be made at the current session of the Dominion Parliament for an act incorporating a company with this title to construct a railway from Prince Albert, Sask., northerly by Pine Island Lake, thence by the most feasible route to Fort Churchill, on Hudson Bay, with power to construct branch lines from Goose Lake to Pas Mission, and from near Goose Lake to Burnt Wood Lake, Sask.

Quebec, Montreal Southern Ry.—Application is being made at the current session of the Dominion Parliament for an act incorporating a company with this title to acquire and operate the Quebec Southern Ry. (including the South Shore Ry., the United Counties Ry., and the East Richelieu Valley Ry.), recently sold to the Delaware and Hudson Rd., by order of the Court of the Exchequer, under the provisions of the Railway Act dealing with insolvent companies. Power is also asked to complete the lines which the South Shore Ry. was authorized to construct, and to extend the line from Noyan Jct. to

"Honesty is the **Best Policy**;" Modesty may also be **Good Policy**, but you can't make it **Sell Goods.**
—*Milwaukee Sentinel.*

What can be said of Varnish by any firm that may be termed "modest?" Do we not all have "the best?" and is not every candidate's goods better than the "other fellow's?"—at least so it is stated.

The buyer, however, after a time comes to **know** what is "best" for his particular purpose; he learns how to discriminate and finds out how to **interpret** the universal term called "best."

For all Railway purposes, that is "best" which stands the test of time and active service. Along these lines we have the **experience;** and we have a **record** which we "modestly" state to be unexcelled by any, and only equalled by some English makes, but even in this case we have superior qualities in **uniform working** and drying **all the year round.**

the International boundary line. The company also desires power to own hotels, to operate steam and other vessels, elevators, etc. Beique, Turgeon, Robertson & Beique, solicitors, Montreal, are acting for the applicants.

Quebec, Saguenay and Gulf of St. Lawrence Ry.—The Dominion Parliament is being asked at the current session of the Dominion Parliament for an act extending the time within which the company may construct its projected railway.

Quebec South-Eastern Ry.—Application will be made at the current session of the Dominion Parliament for an act incorporating a company with this title to construct a railway from near Levis, Que., to the mouth of the St. Croix River, New Brunswick. T. Paquet, solicitor, Quebec, is acting for the applicants.

Saskatchewan and Alberta Ry.—The Saskatchewan Legislature will be asked next session for an act incorporating a company with this title to construct the following lines of railway:—from Moose Jaw, southerly or south-easterly to the International boundary; from Swift Current south-easterly or easterly to a junction with the first named between Moose Jaw and the International boundary; from Swift Current north-westerly to the western boundary of the Province; a branch from the terminal point of the last named line to tp. 5, range 30, west third meridian, thence easterly and north-easterly to the second named line; a branch from the last mentioned line tp. 4, range 15, west second meridian, northerly via Indian Head to the northern boundary of the Province; and from Moose Jaw to the North Saskatchewan River. Power is also asked to operate steam and other vessels on the navigable waters touched by the lines. C. E. Armstrong, solicitor, Moose Jaw, Sask., is acting for the applicants.

Shediac and Coast Ry.—The New Brunswick Legislature is being asked at its current session to revive, re-enact and continue the corporate powers of the Shediac and Coast Ry., and to extend the time for the completion of the authorized line.

Thorold and Lake Erie Ry.—The Dominion Parliament is being asked at its current session for an act changing the provisional directors, increasing the capital stock, and extending the time within which its projected railway may be constructed.

Toronto, Hamilton and Buffalo Ry.—The Dominion Parliament will be asked at its current session for an act changing the name of the company to the Toronto, Niagara and Western Ry., and authorizing it to extend its line from some point on its line to the International boundary line at Windsor, Ont.; increasing its capital stock; authorizing it to arrange with power companies for the transmission of electric power over its right of way; confirming an agreement made with the Toronto and Niagara Power Co., and granting an extension of time for the construction of its previously authorized lines.

Vancouver, Fraser River and Southern Ry.—Application will be made at the current session of the Dominion Parliament for an act incorporating a company with this title with power to construct a standard or narrow-gauge railway, to be operated by steam, electricity or other motive power, from Vancouver to New Westminster, thence southerly to the International boundary near Blaine, Wash.; from some point south of and near the Fraser River, easterly along the Fraser River valley to Chilliwack; from about the same point westerly along the Fraser River Valley to Delta, B.C. Power is also asked to construct bridges, maintain roads, ways and ferries, operate telegraph and telephone lines, and to develop and distribute electric power. It is also proposed to ask for authority to amalgamate with other companies having similar powers, and to connect its lines, etc., with those of a similar company in the State of Wash., U.S. McPhillips, Tiffin & Laursen, solicitors, Vancouver, B.C., are acting for the applicants.

Windsor, Chatham and London Ry.—Application is being made to the Dominion Parliament at its current session for an act incorporating a company with this title to construct a railway from Windsor easterly, via Chatham to London, Ont.; power to enter into an agreement with the company constructing the tunnel between Detroit, Mich., and Windsor, Ont., for the use of the tunnel by the company's cars; to amalgamate with, lease or purchase the Windsor, Essex and Lake Shore Rapid Ry., and to declare the company's proposed line to be one for the general advantage of Canada. The proposed capital is $2,000,000; the offices are to be at Windsor, and the applicants are: W. E. McKeough, W. T. and J. Piggott, Chatham, Ont.; W. J. Mossatt, W. C. Crawford, Tilbury, Ont.; J. Brien, Essex, Ont.; T. E. Robinson, Detroit, Mich.; E. A. Tennis, Philadelphia, Pa. G. J. Leggatt, solicitor, Windsor, Ont., is acting for the applicants.

Yonge St. Bridge, Toronto.—Application is being made at the current session of the Dominion Parliament for an act validating and confirming an order of the Railway Committee of the Privy Council, dated Jan. 14, 1904, for the construction of a bridge at the foot of Yonge St. over the tracks of the G.T.R. and C.P.R., and extending the time for the construction of the same. Power is also being asked by the city for authority to build the bridge and to collect the cost from the two railway companies named, in the event of their not constructing the bridge within a reasonable time.

Taxes on Corporations in Quebec.

The Quebec Legislature at its recent session passed an act providing for the collection of taxes from the various incorporated companies doing business in the province. Following are particulars respecting the taxes to be levied on the railways and other companies allied with transportation interests:—

Upon all railways towards the construction of which the Province of Quebec, or the late Province of Canada, voted subsidies, 1-5 of 1 % upon the capital and $10 per mile of line in operation, and upon all other railways, $5 for each mile of line in operation. The lines liable for the first mentioned tax are set out in the schedule as follows:—The C.P.R. for that portion of its railway in the province, extending from Montreal to St. Jerome, Aylmer and Ottawa city, together with the St. Lin and St. Eustache branches; Montreal and Laurentian Colonization Ry.; Pontiac Pacific Junction Ry., for that portion of its railway in the province; Lake Champlain and St. Lawrence Jct. Ry.; Missisquoi Valley Ry.; Montreal, Portland and Boston Ry.; Quebec Central Ry.; Quebec and Lake St. John Ry.; Waterloo and Magog Ry.; G.T.R. of Canada, for that portion of its railway in the province; North Shore Ry.; South-Eastern Ry.; International Ry.

Tramway companies will be charged $50 for each mile of single track of railway or tramway in operation, and $100 for each mile of double track.

Companies or partnerships carrying on an express or forwarding business will be charged 5-10 of 1 % upon the gross earnings in the province provided the tax be not less than $800; a fixed sum of $800 shall be the amount of the first payment of tax exigible from such express company or partnership commencing to do business in the province; an additional tax of $50 shall be paid for every place of business in Montreal and Quebec, and $20 for each place of business elsewhere in the province; a further tax of 1-5 of 1 % upon the paid-up capital shall be collectible from any express company or partnership foreign to the Dominion doing business in the province.

Telegraph companies will be charged $1,000, but such tax shall not be charged wireless telegraph companies before July, 1906.

The tax to be charged telephone companies is based on the paid-up capital at the following rates:—1-10 of 1 % on $50,000 or less; $300 on from $50,000 to $100,000; $500 on from $100,000 to $200,000; $1,000 on from $200,000 to $300,000; and in addition a charge of 5-10 of 1 % on the gross earnings, but not to be less than $2,000, nor more than $3,000 if the capital exceeds $300,000.

Upon navigation companies a tax is to be levied at the rate of 1-10 of 1 % upon the amount of the paid-up capital to $500,000, and $50 for each $100,000 or fraction thereof above that amount; and an additional amount of $50 for the most important place of business in Montreal and Quebec, and $20 for the most important place of business in any other place.

Railway Rolling Stock Notes.

The Canada Car Co., Montreal, has about completed the order for 1,000 box cars, 30-tons capacity, for the G.T.R.

The Dominion Atlantic Ry. has placed an order for 25 flat cars and one caboose with Rhodes, Curry & Co., Amherst, N.S.

Capt. G. C. Coles of Collingwood, has been inspecting for Lloyds the fleets wintering at Hamilton, Collingwood, Owen Sound, and Midland.

The G. T. Pacific Ry. has placed an order for two 2½ yard Atlantic type steam shovels, for June delivery, with the Locomotive and Machine Co., of Montreal.

The balance sheet of the Dominion Coal Co. for the year ended Dec. 31, shows a liability of $298,559.47 on account of rolling stock debentures against an amount of $353,785.08 for the year ended Dec. 31, 1904.

The Crossen Car Manufacturing Co. has delivered 3 workmen's cars and one first-class coach to the Temiskaming and Northern Ontario Ry.; 75 box cars to the Intercolonial Ry., and is at present delivering box cars to the James Bay Ry.

The C.P.R. between Feb. 17 and Mar. 14, received the following rolling stock:—7 freight locomotives from the Locomotive and Machine Co., of Montreal; 4 freight locomotives, 450 box cars, 10 colonist cars, and 8 baggage and mail cars from its Angus, Montreal, shops.

The C.P.R. between Feb. 17 and Mar. 14, placed orders for the following rolling stock: 1,100 box cars, 70 flat cars and 20 stock cars, 20 first-class cars, 10 baggage and express cars and 10 sleeping cars at its Angus, Montreal, shops; 5 vans at its Farnham, Que., shops.

The Intercolonial Ry. has placed orders with Rhodes, Curry & Co., Amherst, N.S., for the following rolling stock:—20 conductor's vans, 25 refrigerator cars, 10 Russell wing elevator snow plows; 2 double bench snow plows; and an order for two flangers, has also been placed in Canada.

The Temiskaming and Northern Ontario Ry. has ordered 2 locomotives from the Locomotive and Machine Co., of Montreal; 4 first-class coaches and 2 baggage and express cars from the Crossen Car Manufacturing Co. of Cobourg, Ont.; 25 flat cars and 2 vans from Rhodes, Curry & Co., Amherst, N.S.

The C.P.R. is having constructed at its Angus, Montreal, shops four hand derrick cars of 15 tons capacity, the mast being of

cast iron, and the underframe of the car of I beams and channels. The length over frame is 33 ft., and the width 9 ft. 6 in., the car to be mounted on 30-ton metal freight trucks

The Winnipeg City Council received tenders for six gondola hopper dump cars Mar. 27. The cars are to have the following dimensions:—Capacity, 800 cubic ft.; load, 80,000 lbs.; size about 30 by 8 ft. The box is to be arranged so that its capacity can be increased to 1,400 cubic ft. The cars are to be strictly self-discharging of broken stone and coal, and to be fitted with air brakes complete.

Following are general dimensions of the 1,000 box cars, 30-tons capacity, which the C.P.R. is having constructed at its Angus, Montreal, shops:—length, 36 ft.; width, 8 ft. 6 in., height, 8 ft. inside; the length and width over frames being 36 ft. 8 in., and 8 ft. 9⅝ in. respectively. The bodies are to be of wood, with Simplex body and truck bolsters and brake beams. There are also being constructed 44 flat cars, 36 ft. 8 in., by 8 ft. 10 in. over frames and 10 stock cars, 36 ft. 8 in. by 9 ft. 5 in. with similar equipment.

The cut on this page illustrates one of the five locomotives built in the C.P.R. Angus, Montreal, shops, in 1905, and placed on the Rocky Mountain sections of the line. The general dimensions were published on pg. 577 of our issue of Dec., 1905. These locomotives were the first locomotives of the camel-back type to be constructed or used in Canada. The feature of this type is that two cabs are provided, one for the engineer about the middle of the engine, and the second for the fireman, in the usual place. We have been recently advised that a change is being made in the locomotive and that in future it will have only one cab similar to the company's other locomotives.

The Canadian Northern Ry. has placed orders for six 2nd-class tourist cars with Rhodes, Curry & Co., Amherst, N.S., for delivery in May and June. The cars will be 67 ft. long; they will, in external appearance, conform to the C.N.R. standard equipment, with independent belt rail, and the upper portion of the outer sash will be half elliptic and be filled with art glass in hard metal frames. The cars will be lighted by acetylene gas, and heated by the Safety Car Heating and Lighting Co.'s thorough steam heating system in conjunction with large steel double coil fireproof Baker heater. The other equipment will include Simplex brake beams, Susemihl roller side bearings, Westinghouse air brake equipment and train signals.

Following are general dimensions, etc., of the four simple 10-wheel locomotives under construction at the Intercolonial Ry. shops at Moncton, N.B.:—

WEIGHT.—On drivers, 114,204 lbs.; total, 145,440 lbs.

CYLINDERS.—Diameter, 20 in.; stroke of pistons, 26 in.

WHEELS.—Diameter of drivers, 72 in.; driving wheel, truck and tender tires, Krupp; wheel centres, cast steel.

BOILER.—Type, extended wagon top; working steam pressure, 200 lbs.; heating surface—firebox, 154.5 sq. ft.; tubes, 1,837.8 sq. ft.; total, 1,992.3 sq. ft.; tubes— number, 270; outside diameter, 2 in.; length, 13 ft.; material, charcoal iron.

FIREBOX.—Length, 9 ft.; width, 3 ft. 4⅞ in.; material, steel; grate area, 30.6 sq. ft.

TENDER.—Tank capacity, 5,000 imp. galls.; coal capacity, 10 tons.

SPECIALITIES.—Air brakes, Westinghouse; bell ringer, I.C.R. standard automatic; brake beams, Simplex.

Following are general specifications of the 20 consolidation locomotives which are being built by the Canadian Locomotive Co., Kingston, Ont., for the Intercolonial Ry.:—

WEIGHT.—On drivers, in working order, 148,300 lbs.; total, in working order, 164,850 lbs.

WHEEL BASE.—Rigid, 15 ft. 3 in.; total, 23 ft. 6 in.; engine and tender, 54 ft. 5 in.

SIZE.—Length over all, 65 ft. 1 in.; width, 10 ft. 2 in.; height, 14 ft. 6¾ in.

HEATING SURFACE.—Firebox, 162 sq. ft.; tubes, 1,934 sq. ft.; total, 2,096 sq. ft.

WHEELS.—Driving wheels, diameter, 56 in.; main wheels, cast steel centres; others, cast iron. Driving journals, 8 x 12 in.

CYLINDERS.—Diameter, 21 in.; length of stroke 28 in.

BOILER.—Type, radial stayed; working pressure, 200 lbs.; tubes—number, 236; diameter, 2¼ in.; length, 114 in.

TENDER.—Weight, loaded, 120,000 lbs.; capacity, 5,000 imp. galls. water, 10 tons coal; style of tank, U shape; wheels—34 in. diameter, wrought iron centre, steel tire; journals, 5½ by 10 in.

The three switching engines for the Intercolonial Ry. which are under construction by the Canadian Locomotive Co., Kingston, Ont., will have the following general dimensions:—

WEIGHT.—In working order, 122,600 lbs., all on drivers.

WHEEL BASE.—Rigid 11 ft.; engine and tender, 39 ft. 0 11-16 ins.

SIZE.—Length, over all, 52 ft. 7¼ in.; width, 10 ft. 2 in.; height, 14 ft. 9⅛ in.

HEATING SURFACE.—Firebox, 138 sq. ft.; tubes 1,304 sq. ft.; total, 1,442 sq. ft.

WHEELS.—Driving, diameter, 51 in.; cast iron centres; journals, 8½ by 10 in.

CYLINDERS.—Diameter, 18 in.; length of stroke, 26 in.

BOILER.—Type, radial stayed; working pressure, 200 lbs.; number of tubes, 239; diameter of tubes, 2 in.; length of tubes, 10 ft. 6 in.

TENDER.—Weight, loaded, 90,000 lbs.; capacity of tank, 3,800 imp. galls.; coal capacity, 6 tons; diameter of wheels, 33 in.; wheels, wrought iron centres, steel tire; journals, 4¼ by 8 in.

The ten 2-8-0 freight locomotives under construction for the C.P.R. at its Angus, Montreal, shops are duplicates of those received from the Canadian Locomotive Co., Kingston; the Locomotive and Machine Co of Montreal, and the American Locomotive Co.'s Schenectady works in 1904. Following are general dimensions:—

WEIGHT.—On drivers, 163,700 lbs.; total, 186,200 lbs.

CYLINDERS.—Diameter, 22½ in.; stroke of piston, 28 in.

WHEELS.—Diameter of drivers, 58 in.; tyres, Krupp crucible; tender, cast iron; wheel centres, cast steel.

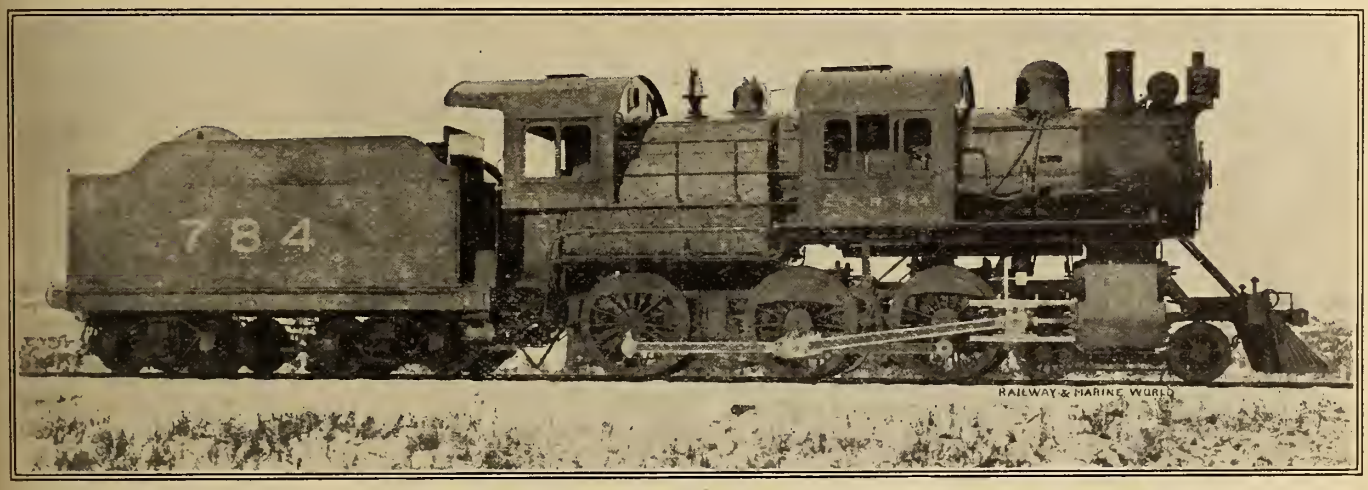
BOILER.—Type, radial stayed wagon top; working steam pressure, 180 lbs.; heating surface, 2,381 sq. ft.; tubes—number, 244 of 2 in. outside diameter, and 22 of 5 in. diameter for superheater; length, 14 ft. 1⅜ in.

FIREBOX.—Length, 96⅝ in.; width, 65¼ in., C.P.R. special; grate area, 43 sq. ft.

TENDER.—Tank capacity, 5,000 imperial gallons, coal, 12 tons.

APPLIANCES, ETC.—Simplex brake beams; C.P.R. standard brake shoes, and journal bearings.

The three straight baggage cars which the C.P.R. is having constructed at its Angus, Montreal, shops are 60 ft. by 9 ft. 10½ ins. over frames, which are to have steel I beams, though no platform is to be used. The trucks will be of 4-wheel standard passenger type with axles, etc., 5 x 9 ins. Simplex brake beams with adjustible heads, M.C.B. brake shoes and brasses, journal boxes, and with elliptic springs, and 36 in. steel tired wheels. The bodies are to be of wood with steel I beams at the ends. A heating system is to be provided, and the lighting is to be by acetylene gas. Cars are to be finished on the outside in British Columbia pine, varnished. Two baggage cars are also being constructed for carrying horses, automobiles, carriages, etc. They are similar to the above, except that they are to have folding stalls for the horses, and are to have large end doors 7 ft. 6 ins. wide, by 8 ft. 0 in. high. This size of door opening necessitates using an arched roof instead of the standard type, ventilation being secured by means of special ventilators in the roof in addition to the usual ventilators near the floor line, and at the ends of the cars. All other particulars of these cars are the same as the first named.



CANADIAN PACIFIC RAILWAY LOCOMOTIVE BUILT AT THE ANGUS SHOPS MONTREAL.

Montreal Warehousing Co.—Following are the directors elected at the annual meeting held March 7 of this subsidiary of the G.T.R.: C. M. Hays, E. H. Fitzhugh, W. M. Ramsay, J. W. Loud, W. Wainwright.

The Canadian Northern Ry. has filed with the Railway Commissioners a copy of supplement 21 to its local passenger tariff, showing fares of 3 cents a mile on its line between Learys and Somerset, Man.; between Hartney and Virden, Man.; and 3½ cents a mile between North Battleford, Sask., and Edmonton, Alta.

Victoria Rolling Stock Co.

The report of the business of the company for the year ended Feb. 15, 1906, showed that the company have sold £9,800 and $326,000 of series "S" 4% debentures, making, with the amounts previously sold, total sales of £165,400 and $1,270,000. The discount and commission on the debentures sold during the year amounted to $9,753.18, which sum has been written off, leaving the old balance of $56,000 carried forward to be dealt with in future years. This makes a total of $46,478 for discount and commission on series "S" lease written off during the last three years. As mentioned in last year's report the total amount of discount and commission on this lease might properly have been distributed over the whole term of the lease (15 years), but it was thought better to deal with it in this manner. Since the close of the company's year all deliveries of rolling stock included in this lease have been made. During the year outstanding debentures against leases have been reduced by $491,000. The final payments under the following leases have matured and were duly met by the respective railway companies, and conveyances of the rolling stock included in the leases duly executed by this company: Lease Oct. 2, 1895, to the Duluth, South Shore and Atlantic Ry. Co. Lease Feb. 3, 1896, to the C.P.R. and the Duluth, South Shore and Atlantic Ry Co. All other payments maturing during the year have been promptly met. The profit on the year's business after charging up directors' fees, expense account and the above amount ($9,753.18) for discount and commission on debentures sold, is $18,050.54; out of which a dividend of 12% per annum on the paid-up capital stock, amounting to $14,400, has been paid, leaving $3,650.54 carried forward to profit and loss account, which now stands at $107,907.82.

ASSETS.

Obligations on leases	$2,833,932.46
Debentures held by company and accrued interest	286,808.06
Discount and commission on series "S" debentures sold	56,000.00
	$3,176,740.52

LIABILITIES.

Capital stock subscribed.. $600,000.00	
Capital stock paid-up	$ 120,000.00
Debentures outstanding	2,878,000.00
Interest accrued on same	29,910.29
Coupons due and not presented	440.00
Advances against debentures	40,482.41
Balance at credit profit and loss account	107,907.82
	$3,176,740.52

PROFIT AND LOSS ACCOUNT.

Interest paid and accrued on debentures and advances	$171,786.72
Discount and commission on debentures sold Series "S"	9,753.18
Expense account	1,168.86
Directors' fees last year	1,400.00
Dividend account	14,400.00
Balance carried forward	107,907.82
	$306,416.58
Balance at credit Profit and Loss Account, Feb. 15, 1905	$104,257.28
Rents received and accrued on leases and interest on debentures held by company	202,159.30
	$306,416.58

MEMORANDUM *re* ROLLING STOCK.

Original cost of rolling stock held under existing leases	$6,232,568.03
Amount paid in on account by railway companies in addition to interest	3,358,081.42
	$2,874,486.61
Total amount of the company's debentures outstanding	$2,878,000.00

Passenger Fares on the Intercolonial Ry.—A new scale of passenger rates went into force on the Intercolonial Ry., Mar. 1, as follows:

1 mile, 5 cents First Class.
2 miles, 10 cents First Class
3 miles, 10 cents First Class.
From 4 to 200 miles inclusive, 3 cents per mile, First Class, adding to end in 0 or 5.
From 201 to 222 miles inclusive, $6.00 First Class fare.
From 223 to 300 miles inclusive, 2.7 cents per mile First Class, adding to end in 0 or 5.
From 301 to 324 miles inclusive, $8.10 First Class fare.
From 325 to 400 miles inclusive, 2.5 cents per mile, First Class, adding to end in 0 or 5.
From 401 to 417 miles inclusive, $10.00 First Class fare.
From 418 to 600 miles inclusive, 2.4 cents per mile First Class, adding to end in 0 or 5.
From 601 to 654 miles inclusive, $14.40 First Class fare.
From 655 and over inclusive, 2.2 cents per mile First Class, adding to end in 0 or 5.
(2) For Second Class fare charge two thirds (⅔) of the First Class fare, adding to end in 0 or 5.
(3) For return fare charge one and one half (1½) the First Class fare, adding to end in 0 or 5.

For commercial travellers the rate will be 2¼ cents instead of 2 cents, as now, and the 1,000-mile ticket is also advanced from 2 cents to 2¼ cents per mile. Scholars' tickets will remain as at present. Season tickets are abolished, and 10-trip and 55-trip tickets will be issued at a fixed price according to the mileage. The rates and conditions are similar to those in use on the C.P.R. and the G.T.R., viz.: 10-trip tickets valid for one year at a rate of $1.00 for a five mile trip, to $9.80 for a fifty mile trip; and 55-trip tickets available for 30 days for holder only, at $2.75 for a five mile trip, and $16.50 for a fifty mile trip.

The Minister of Railways has decided to change the system of book-keeping and audit now in use on the Intercolonial Ry. to that in use on the C.P.R., the G.T.R., and the Pennsylvania. Rd

The members of the committee to arrange for uniform action in regard to transfer service, in connection with the International Water Lines Passenger Association, are: Buffalo, N.Y., and Cleveland, Ohio—C. E. Markham, A. A. Schantz, W. M. Lowrie; Detroit, Mich.—C. E. E. Ussher, A. A. Schantz and C. F. Bielman.

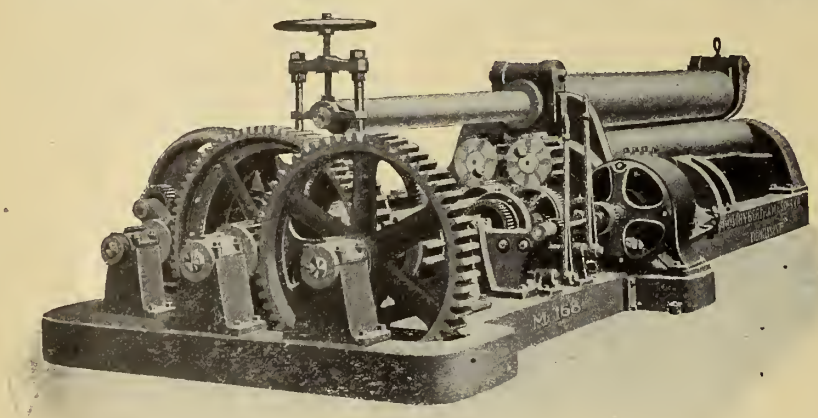
BERTRAM PLATE-BENDING ROLLS



MOTOR DRIVEN

These machines are built in four sizes for plates from 12 feet wide, 1¼ inches thick, to 16 feet wide and 1 inch thick. The rolls are arranged in pyramid form and driven by a motor with reversing mechanism. The top roll is raised and lowered by an independent motor. The rolls and hoisting mechanism are steel throughout, and the machine has strength and power to bend plate full width between the housings to a complete circle in from one to three passes.

FULL PARTICULARS AND PHOTOGRAPHS OF BERTRAM'S LINE OF MACHINE TOOLS MAY BE HAD FROM

MAINLY ABOUT PEOPLE.

Sir T. G. Shaughnessy, President C.P.R., sailed from New York, Mar. 23 for England.

Hon. A. McMillan, shipbuilder, Prince Edward Island, died at Wheatley, P.E.I., Mar. 13.

Capt. W. Augustus, Inland Lloyds' Inspector, Kingston, Ont., died there Mar. 16, aged 62.

H. B. Brown, K.C., who died in Sherbrooke, Que., March 8, was counsel for the Quebec Central Ry.

G. Richardson, of J. Richardson & Co., grain dealers, Kingston, Ont., died at Hamilton, Bermuda, Mar. 14.

W. W. Reid, of the Reid Newfoundland Co., left St. John's, Nfld., early in March, and spent some time in Montreal.

W. H. Grant, Manager of Construction, Halifax and South-Western Ry., was married to Miss A. King at Halifax, March 14.

Hon. C. S. Hyman, M.P., Minister of Public Works, has purchased the residence in Ottawa now occupied by J. R. Booth.

R. G. Reid, of the Reid Newfoundland Co., Montreal, is one of the incorporators of the Canada Radiator Co., Lachine, Que.

H. S. Hancock, late chief draughtsman, G.T. Pacific Ry., Winnipeg, has been appointed town engineer at Fort William, Ont.

J. Stewart, Ottawa, has been appointed Commissioner and Chief Engineer of Irrigation for the Provinces of Alberta and Saskatchewan.

Hon. J. S. Hendrie, Hamilton, Ont., has been re-elected Chairman of the Railway Committee of the Ontario Legislature for the current session.

A. Campbell, M.P., Toronto Junction, Ont., has been elected Chairman of the Railway Committee of the House of Commons for the current session.

Hon. A. G. Blair made his first appearance as counsel for the C.P.R. before the Railway Commission, of which he was formerly Chief Commissioner, March 6.

G. E. Major has resigned the managership of the C.P.R. hotel, Chateau Frontenac, Quebec, to take charge of the new Clifton Hotel, Niagara Falls, Ont.

C. W. Spencer, General Manager Mackenzie, Mann & Co.'s Eastern Lines, has been elected a director of the Sterling Bank, a new addition to the banks of the Dominion.

G. E. Brent, who died in Toronto, Feb. 25, aged 80, had within four months completed fifty years' service in the G.T.R. machine shops at Stratford and Toronto.

D. Thorburn, G.T.R. freight agent at Brantford, Ont., has been appointed Assessment Commissioner for the city by the council at a salary of $1,200 a year.

J. M. Egan, at one time General Superintendent of the C.P.R. at Winnipeg, is now President of the Union Depot, Bridge and Terminal Ry. Co., Kansas City, Mo.

Dr. A. G. Bell, the inventor of the telephone, has promised to present one of his early experimental telephones to the city of Brantford, Ont., where the experiments were made.

L. B. Archibald, Superintendent Dining, Sleeping and Parlor Car service, I.C.R., has been elected President of the American Association of Dining Car Superintendents for the current year.

N. J. Holden, of N. J. Holden Co., Limited, Montreal, was among the tenants who were burned out by a fire at the Chesterfield apartment house, Victoria Avenue, Westmount, Quebec, March 4.

Capt. J. B. Cottrell, U.S. Inspector of Hulls, Detroit, Mich., and who was master of the steamers Maruba, Masuba, Maritana, and Victory on their first trips, died at Detroit, Mar. 14, aged 54.

Hon. J. Domville, one of the promoters of the Canada Central Ry., fell on the deck of the Cunard liner Lucania, Mar. 7, while returning from England, and sustained a compound fracture of the leg.

W. Molson Macpherson, agent of the Dominion, Leyland and Manchester lines at Quebec, and Mrs. Macpherson, who have been visiting India, are returning to Canada by way of Colombo and Japan.

G. T. Fulton, Master Mechanic, Lake Superior Division C.P.R., North Bay, Ont., and Travelling Engineer Turner, were somewhat injured by jumping from an engine in a collision at Nairn, Ont., Mar. 12.

Jos. Wallace who resigned his position as General Agent, G.T.R., Hamilton, Ont., about a year ago, on account of ill-health, has considerably improved in health, and has decided to move to the Northwest.

J. M. Herbert, formerly in the G.T.R. service, has resigned his position as Vice-President, Colorado and Southern and Fort Worth and Denver City Rd., and it is reported will engage in business in Denver, Col.

Dr. Page, who has been appointed Chief Medical Officer in connection with immigration matters at Quebec, has also been appointed by the Dominion Government oculist to examine the eyesight of the Quebec pilots.

C. E. Perry, who was engaged in survey and construction work on the I.C.R. and the C.P.R., and who latterly was engaged as District Engineer of District E., National Transcontinental Ry. survey, died at Ottawa, Mar. 16.

A. McGill, dispatcher, Niagara, St. Catharines and Toronto Ry., has been sent for trial on a charge of manslaughter, arising out of a collision on the line between St. Catharines and Thorold, Ont., when a motorman was killed.

The arbitrators appointed to settle disputes between the G.T.R. and the lessees and owners of property expropriated for the new Union Station, Toronto, are: Judge Snider, Hamilton, Ont., Chairman; C. H. Ritchie, K.C.; and W. T. White.

A. Macgowan, who has been appointed Divisional Engineer of the Somerset Ry., Augusta, Me., was formerly engaged in the I.C.R. engineering department, and latterly was engaged in construction work on the Bangor and Aroostook Rd. under P. S. Archibald.

J. J. Smythe, for sixteen years in the office of the Comptroller, Toronto Ry. Co., has been appointed Comptroller of the Electric Ry., Power and Light Co., Rio de Janeiro, Brazil. Before leaving Toronto, he was presented with a gold watch by the staff of the Comptroller's office, Mar. 2.

Sir Wm. Van Horne spent some time during March in England, the first visit he has paid there for eight years. During his trip he was entertained at dinner at the Athenæum Club by Lord Strathcona, and is reported to have added to his collection a portrait by a famous Spanish artist of a Queen of Hungary, valued at $45,000.

W. R. Baker, Assistant to the President C.P.R., left Montreal Mar. 18, for Victoria, B.C., to take charge for the company of the arrangements for the Canadian tour of Prince Arthur of Connaught. The Royal traveller reached Victoria from Japan, Mar. 28; and will remain in Canada until May 12, when he will sail for Liverpool on the Allan Liner Virginian.

M. J. McCarthy was presented with a diamond ring by the employes of the Michigan Central Rd. locomotive shops, St. Thomas, Ont., at a dinner, Feb. 27, on the occasion of his promotion from the position of Master Mechanic at St. Thomas to a similar position at Elkhart, Mich. An address was also presented Mr. McCarthy, and a diamond ring was presented to Mrs. McCarthy.

W. Gormaly, who retired from the position of Superintendent of the Toronto Union Station recently, died in Toronto, March 13, aged 68. He was a native of Castle Douglas, Kircudbright, Scotland, but spent most of his life in Canada. For a number of years he was engaged as a baggageman on the G.T.R., running between Toronto and Detroit, subsequently becoming freight conductor, and later a passenger conductor. In 1880 he was appointed to take charge of the Union Station, and in 1896, when the Union Station Co. was formed, he was appointed its Superintendent. C. Gormaly, G.T.R. commercial agent at St. Louis, Mo., is one of his sons.

Jas. Abbott, Superintendent Canadian Northern Ry., North Battleford, Sask., was born Aug. 13, 1872, and entered railway service 1886, his record being: Sept., 1886, to May, 1887, telegraph messenger C.P.R.; May, 1887, to Aug., 1890, telegraph operator and relief agent C.P.R.; Aug., 1890, to Aug., 1896, dispatcher and relieving Chief Dispatcher, Manitoba and North-Western section C.P.R.; Aug., 1900, to June, 1901, successively operator and train dispatcher, Manitoba division, Northern Pacific Ry.; being appointed Chief Dispatcher when the lines were taken over by the Canadian Northern Ry. He remained as Chief Dispatcher until May, 1905, when he was appointed Acting Superintendent 4th district at Kamsack, Sask., being appointed to his present position when the line was opened to Edmonton, Alta.

E. J. Chamberlin, who was General Manager of the Canada Atlantic Ry. until it passed into the hands of the G.T.R., was entertained at dinner at Ottawa, March 3, by those who had been officials on the line during his managership. On behalf of the officials, M. Donaldson, Superintendent of the Ottawa Division G.T.R. (the former C. A. Ry.), presented Mr. Chamberlin with an illuminated address in book form, bound in morocco, and relieved by paintings of familiar scenes illustrating the progress of the road during the last twenty years. It also included engravings of his private car, his lodge in Algonquin Park, an autograph page, and emblematic drawings of the discovery and application of steam to motive power, and also the uses of electricity in that connection. Accompanying it was a book of photos of the former official staff.

J. H. Rogers who has been appointed Traffic Manager White Pass and Yukon Ry., began his railroad career in the engineering department of the C.P.R. in 1881, when construction was started west of Portage la Prairie, Man., in 1882-83 acting as station agent at Oak Lake and Broadview, Man.; and in 1884 had charge of the material accounts at the front, until the road reached the summit of the Rocky Mountains in 1884; from 1884 to 1887 he was Paymaster and book-keeper for Grant & Ross, contractors on the C.P.R.; and in 1888 re-entered railway service, his record to date being. 1888 to 1890, station agent Great Northern Ry., successively at Benton, Glasgow, Montana, and Minot, N.D.; 1890 to 1893 accountant during the construction of the Great Falls and Canada Ry., and subsequently agent at Great Falls, Mont., and coal distributor; 1893 to 1896, with the Great Northern Ry., as agent at Wenatchee, Wash.; 1896 to 1900, general agent same

ORDERS SOLICITED

road, Victoria, B.C.; 1900 to Dec. 31, 1905, with the White Pass and Yukon Route as agent successively at Bennett and White Horse, and latterly as General Agent at Dawson

James J. Hill never lost interest in Canada, says the Toronto Globe, and it is not surprising that despatches have just connected his name with a number of important railroad extensions from his own system, the Great Northern, into the Canadian Northwest. James J. Hill was born near Guelph, Ont., in 1838, of Scotch-Irish descent. Early in life he left the farm to enter business life in Minnesota. His career as a transportation man commenced in 1856 as agent of the Northwestern Packet Co. In 1865 he embarked in the fuel supply and transportation business, establishing in 1870 the Red River Transportation Co., which was the first to open up communication between St. Paul and Winnipeg. In turn he secured control of the St. Paul and Pacific Ry., and reorganized the St. Paul, Minneapolis and Manitoba Ry., being its General Manager from 1879 to 1882. It became part of the Great Northern system in 1890. From 1883 to 1893, Mr. Hill devoted himself to the building of the Great Northern Ry., extending from Lake Superior to Puget Sound, and he is now President of that system, and looking to Canada as the most promising field of development.

F. P. Gutelins, who has been appointed Assistant Chief Engineer, C.P.R. Eastern Lines, was born at Mifflingburg, Pa., Dec. 21, 1864, and graduated at Lafayette College, Easton, Pa., June, 1887. He has had a varied experience in engineering work, his record being: July, 1887, to Dec., 1887, engineer in charge of construction sewer system, Englewood, N.J.; Jan., 1888, to June, 1892, rodman, Assistant Supervisor and Assistant Engineer, Pennsylvania lines; June, 1892, to June, 1893, Engineer in charge Flint Creek Water Power Electric Plant, Butte, Mont.; June, 1893, to Jan., 1894, Engineer in charge of Butte City Water Works; Jan., 1894, to Nov., 1895, general practice in Butte City, Mont.; county surveyor Silver Bow County, Mont., and U.S. Deputy Mineral Surveyor; Nov., 1895, to Mar. 10, 1898, General Superintendent Columbia and Western Ry., Trail, B.C.; Mar., 1898, to Mar., 1900, Superintendent Rossland branch, C.P.R.; Mar., 1900, to Sept., 1901, Resident Engineer, Kootenay section, C.P.R.; Sept., 1901, to July, 1902, Inspecting Engineer, C.P.R.; July, 1902, to date, of present appointment, Engineer Maintenance of Way, C.P.R., Montreal.

The Louisville and Nashville Railroad has extended to the Canadian Ticket Agents' Association the courtesies of its line between Mobile, Ala., and New Orleans, La., in October next, after the holding of the Association's annual meeting in Mobile.

During the ten weeks ended Mar. 3, the G.T.R. received the following rolling stock: 538 box cars, 60,000 lbs., from the Canada Car Co., Montreal; one snow plow built at its own Montreal shops; nine Richmond compound mogul freight locomotives from the Canadian Locomotive Co., Kingston, Ont.

C. Schofield, an engineer, who is an authority on pneumatic riveting, reading a paper at Newcastle-on-Tyne, Eng., before northeast coast engineers, made the interesting prophecy that in a few years every vessel would be self-repairing by reason of a pneumatic outfit she would carry, which would only cost £200. With such an outfit a captain would be able to scale the bottom of the ship, clean the boilers, and generally do small repairs which now require a vessel to be put in the hands of repairers.

Orders by the Railway Commissioners.

The following orders have been issued by the Board of Railway Commissioners:—

917. Feb. 7.—Amending order of Jan. 16 of the Vancouver, Victoria and Eastern Ry. and Navigation Company, application under section 194.

918. Feb. 2. Approving location of the James Bay Ry. through the township of Rama, Ontario county.

919. Feb. 9.—Extending time for use of C.P.R. crossing of G.T.R. at Tottenham, Ont.

920. Feb. 13.—Granting leave to the Canadian Machine Telephone Co. to carry its wires over the tracks of the C.P.R. in Peterborough, Ont.

921. Feb. 9.—Adopting standard specifications in respect of steel bridges and viaducts authorized to be constructed under sec. 203 of the Railway Act, 1903.

922. Feb. 1.—Amending order of Dec. 13, 1905, granting leave to the Red Mountain Ry. to connect its tracks with the tracks of the Columbia and Western Ry.

923. Feb. 13.—Sanctioning location plans of the G.T. Pacific Ry. Lake Superior branch, from mileage 68.18 to mileage 80.11.

924. Feb. 13.—Approving deviation of location of line for the Brandon, Saskatchewan and Hudson's Bay Ry., between sec. 24, tp. 3, range 20 w.p.m. to sec. 18, tp. 6, range 19, w.p.m., Manitoba.

925. Feb. 14.—Authorizing the C.P.R. to divert the highway between concessions 5 and 6, Albion tp., Peel county, Ont., to a point 1-10 of a mile further north, and to carry its line across the diverted highway.

926. Feb. 14.—Sanctioning location of G. T. Pacific Ry. from sec. 21, tp. 25, range 11, west second meridian, Sask., for 49.197 miles.

927. Feb. 14.—Sanctioning location plans of the St. Maurice Valley Ry. between Shawinigan Falls and Grand Mere, Que., 5.68 miles.

928. Feb. 13.—Approving of standard mileage freight tariff no. 10 of the New Brunswick and Prince Edward Island Ry.

929. Feb. 14.—Fixing rate on grain to be charged by the C.P.R. from the company's elevators to unloading sidings within the company's terminals at Owen Sound, Ont.

930. Feb. 16.—Authorizing the C.P.R. to construct a siding to Pelham St., Toronto Junction, Ont.

931. Feb. 15.—Approving, under section 203, of certain bridges on the line of the C.P.R. in Albion tp., Peel county, Ont.

932. Feb. 15.—Approving location plan of line for the Toronto and Niagara Power Co., from the Halton-Wentworth county line to the beach road, Saltfleet tp., 3.2 miles.

933. Feb. 17.—Authorizing the Ontario Power Co. to transmit power along its line at its own risk for a period of 90 days, over the tracks of the various steam and electric railway companies, operating in Stamford tp., Welland county, Ont.

934. Feb. 16.—Authorizing the C.P.R. to construct a siding in Calgary, Alta.

935. Feb. 17—Granting leave to the C.P.R. to divert its existing tracks on Union St., West St. John, N.B.

936. Feb. 20.—Sanctioning location of the proposed railway for the Niagara-Welland Power Co., from Montrose Jct. to Brantford, Ont.

937. Feb. 20.—Granting leave to the G.T.R. to construct a branch line in Welland, Ont., to the premises of the Plymouth Cordage Co.

938. Feb. 20.—Approving location of the line of the Toronto and Niagara Power Co. from Water St. and Beach Road, to the Halton-Wentworth county line.

939. Feb. 20.—Sanctioning location of the line of the Toronto and Niagara Power Co. from Water St., Burlington, Ont., to the intersection of Water St. and Beach Road.

940. Feb. 20.—Approving location of the line of the Toronto and Niagara Power Co., near the Beach road adjoining the Halton-Wentworth county boundary.

941. Feb. 19.—Directing that the C.P.R. furnish certain facilities for transfer of traffic to T. D. Robinson & Son, of Winnipeg, Man.

942. Feb. 21.—Sanctioning location of the G.T. Pacific Ry. from tp. 28, range 19, west second meridian to the north line, tp. 31, range 26, west second meridian, Sask., mileage 49.197 to mileage 100.298.

943. Feb. 21.—Sanctioning location of G.T. Pacific Ry. from mileage 100.298 to mileage 153.60, at the Qu'Appelle, Long Lake and Saskatchewan Ry.

944. Feb. 20.—Approving plans of bridge over the Souris River, Man., for the Brandon, Saskatchewan and Hudson's Bay Ry.

945. Feb. 22.—Approving by-law of the Vancouver, Westminster and Yukon Ry., authorizing H. H. Adams, Traffic Manager, to prepare and issue tariffs of tolls.

946. Feb. 22.—Authorizing the C.P.R. to open its Lacombe branch for traffic from mileage 25 to mileage 50.

947. Feb. 21.—Shortening time within which the G.T.R. is to reply to an application of the C.P.R. to cross the former company's tracks near Utopia Station, Ont.

948. Feb. 21.—Directing the G.T.R. Co. to answer the application of the C.P.R. for an extension of time for putting in an interlocking plant and appliances at the crossing of the G.T.R. Collingwood branch at Utopia by its Sudbury branch, now under construction.

949. Feb. 21.—Making a similar order on the application of the C.P.R. to cross the G.T.R. Midland branch near Coldwater, Ont., with its Sudbury branch.

950. Feb. 21.—Making a similar order on the application of the C.P.R. to cross the G.T.R. Penetang branch with its Sudbury branch.

951. Feb. 21.—Making a similar order on the application of the C.P.R. to cross the G.T.R. line at Alliston, Ont., with its Sudbury branch.

952. Feb. 16.—Authorizing the C.P.R. to construct a branch line in Montreal.

953. Feb. 8.—Directing the C.P.R. to complete the highway bridge over the Guelph and Goderich Ry. at mileage 64.5, Hullett tp., Huron county, Ont.

954. Feb. 13.—Authorizing the C.P.R. to construct a spur line across Portland St., St. John N.B.

955. Feb. 14.—See next page.

956. Feb. 27.—Authorizing the C.P.R. to construct a bridge across the Ottawa River at St. Anne de Bellevue, Que.

957. Dec. 7.—Authorizing the council of Raleigh tp., Kent county, to carry culverts, etc., in connection with the Four Rod Drain under the tracks of the Pere Marquette Rd.

958. Dec. 7.—Authorizing the council of Raleigh tp., Kent county, to carry culverts, etc., in connection with the Miller, Fuce and Waddick drain under the tracks of the Pere Marquette Rd., and the Michigan Central Rd.

959. Feb. 27.—Authorizing the proprietors of the electric light system to carry its wires across the C.P.R. at two points in the town of St. Lin, Que.

960. Mar. 1.—Authorizing the Brandon, Saskatchewan and Hudson's Bay Ry. to

ATTENTION, MASTER CAR BUILDERS!

The M. C. B. rules of interchange provide for the use of THE STEEL BACK BRAKE SHOE on your freight equipment.

The use of OUR STEEL BACK SHOE will mean a saving in brake shoe maintenance, brake heads and brake beams.

THE STEEL BACK BRAKE SHOE is an economy on all railway equipment.

LET US PROVE IT TO YOU

carry its line across the highway at three points in the municipality of Whitehead, Man.

961. Mar. 1.—Sanctioning location of the G.T. Pacific Ry. Lake Superior branch, from the limits of Fort William to the terminals south of the Kaministikwia River, mileage 18.708 to 23.480 east of Kakabeka.

962. Mar. 1.—Approving deviation from the previously authorized line of the Brandon, Saskatchewan and Hudson Bay Ry., from sec. 17, tp. 10, range 19, w.p.m., to 34th St., Brandon, Man.

Railway Commissioners' Freight Orders.

Feb. 14. In the matter of the application of the Columbia and Western Ry. Co. and the C.P.R. Co., lessee of the Columbia and Western Ry., under sec. 257 of the Railway Act, 1903, for an order disallowing the tariff of the Red Mountain Ry. Co., filed Oct. 3, 1905, as C.R C. no. A.33, on the ground that the said tariff is unjust and unreasonable, and restoring tariff C.R.C. no. A.30 of the R.M.R. Co. in lieu thereof, or for such other order as may be proper, filed with the Board under reference 17847, file no. 5. Upon hearing counsel for the applicant companies and the R.M.R. Co., the evidence adduced, and what was alleged; and upon reading the order of the Board dated Nov. 3, 1905, made upon the said application, which, by its terms, was to come into force immediately and to remain in force until the hearing of the said application or until Nov 15, 1905, whichever should first occur, and by which order the tariff C.R.C. no. A.33 of the R.M.R. Co. was disallowed and in lieu thereof tariff C.R.C. no. A.30 of the R.M.R. Co. was prescribed for the services therein mentioned, and in which order was embodied an undertaking of the applicant companies to abide by and obey any order of the Board for the payment of such tolls or rates as the Board might fix upon the traffic to which such tariff referred, carried during the suspension of said tariff C.R.C. no. A.33; and upon reading the further order of the Board dated Nov. 14, 1905, extending until further order, the order dated Nov. 3, 1905, and embodying a similar undertaking to that above described; and upon the report of the Chief Traffic Officer of the Board—

The Board doth order that the Red Mountain Ry. Co.'s rate for switching cars containing through freight traffic to and from the present point of interchange between the R.M.R. Co.'s and the Columbia and Western Ry.Co.'s track, knownas "Transfer Junction," and from or to all points reached by the tracks of the R.M.R. Co. on the Black Bear High Line and Low Line; also points west of the junction of the main line and the Lower Black Bear Line, including the White Bear Mine, be fixed at $3.50 per carload, regardless of weight, no extra charge to be made for the haulage of the empty cars in either direction. That the Columbia and Western Ry. Co.'s, or the C.P.R. Co.'s rate for switching cars containing through freight traffic between the said junction and all points reached by the tracks of the Columbia and Western Ry. in the town of Rossland, including the War Eagle and Centre Star mines, be fixed at $3.50 per carload, regardless of weight, no extra charge to be made for the haulage of the empty cars in either direction. That the Columbia and Western Ry. Co. and the C.P.R. Co. do forthwith, jointly or severally, pay to the Red Mountain Ry. Co. the excess, if any, of the amount which would be made up by allowing to the R.M.R. Co. the rate fixed by this order for the switching by the said R.M.R. Co. of cars containing through freight between the points mentioned therefor in this order from the time at which the R.M.R. Co. put in force the said tariff C.R.C. no. A.33 until the coming into force of this order over the amount made up of the sums actually paid by the Columbia and Western Ry. Co. for such service during the said period. (955).

INTERSWITCHING AT LONDON.

Under date Mar. 17, the Commissioners issued an order granting permission to the G.T.R. to appeal to the Supreme Court of Canada against the order of the Board of July 25, 1905, fixing rates for the receipt, forwarding and delivery of traffic from and to the C.P.R., and other lines at London, Ont. The statement of facts as agreed upon between the companies is made a part of the order.

DEFINING OWNER'S RISK.

An order will shortly be issued, the Ottawa correspondent of the Toronto Globe stated Mar. 19, by the Railway Commission dealing with goods carried at owner's risk. As a result of a joint conference between the Railway Commissioners, members of the Canadian Manufacturers' Association, and representatives of the railway companies, it has been decided that "owner's risk" must be defined in each bill of lading. Owner's risk, however, will not include carelessness on the part of the railway companies or its employes. For such the company will be held responsible. Then it has been settled that some two hundred odd articles shall be removed from classification at owner's risk, and placed under "carrier's risk." If a shipper of any goods in the remaining classes desires to have them sent at "carrier's risk," he will only pay a 25 per cent. advance instead of 50 per cent. as heretofore. The beekeepers have had some of their requests to the Railway Commission granted. This means that some products will be transported under other classifications at reduced rates. Their application to have bees in hives shipped by the carload has been refused, not being considered feasible. The manufacturers of cream separators will also have their wares sent at reduced rates under the new classification.

Joint Stock Bookkeeping, by J. W. Johnson, F.C.A., Vice-President of the Chartered Accountants of Ontario, and Principal of the Ontario Business College, Belleville, Ont., has reached its 12th edition. The volume extends to 189 pages and contains a mass of matter valuable to those interested in joint stock companies, either as shareholders, officers or employes. It opens with a definition of joint stock companies, contrasts them with ordinary trading partnerships, and shows some of their advantages and disadvantages, then proceeds to show how a company is incorporated, reproduces the Dominion Acts on the subject, and an analysis of the Ontario Acts. A guide to the use of the system of bookkeeping is given, and this is followed up by an illustration showing the incorporation and transactions of a fictitious company—the Ontario Transportation Co. of Belleville, (Limited), in which the different books required to be kept are described, and the why and wherefore of the different records are explained. The book also contains sections showing the application of the system to mining and other companies; the transfer of a business from private ownership to a joint stock company; information as to bond issues; auditing; questions and answers elucidating various points submitted by company bookkeepers. The book is accepted as a standard on the subject, and is of great value to all who are in any way connected with the conduct and control of joint stock corporations. The book is published by the Ontario Business College, Belleville, Ont.; the price being $1.75.

The Canadian General Electric Co. has issued a booklet describing the Edison primary battery which it is selling.

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

F. H. Hopkins & Co., Montreal, have issued a classified list of tools and machinery for all forms of construction work, railroad, mill and contractors' supplies handled by them.

The Trussed Concrete Steel Co. has issued a booklet entitled "Tests," which gives a large number of interesting facts regarding reinforced concrete and the Kahn trussed bar.

The Locomotive and Machine Co. has received an order for a 4-wheel saddle tank locomotive, cylinders 14 by 22 in., from the Canada Car Co., Montreal, for delivery June 15.

J. F. Scott has been appointed Superintendent of the Canada Car Co.'s works at Montreal, succeeding Jas. Coleman, who has returned to his former position of Master Car Builder, Central Vermont Ry., St. Albans, Vt.

The Polson Iron Works, a company incorporated under the Dominion Companies' Act, has been registered in Ontario under the act respecting the licensing of extra-provincial corporations, F. B. Polson being appointed its attorney.

The Dominion Dump Car Co., Montreal, has issued a calendar, on which is illustrated the side and end elevations of the company's cars, together with cuts showing the car as an ordinary gondola car; the side dump and the centre dump unloading action.

A dividend of 6% was declared at the annual meeting of the shareholders of Rhodes, Curry & Co., Amherst, N.S., Feb. 28. Following are the officers and directors for the current year: President, N. Curry; Vice-President, N. A. Rhodes; other directors: J. C. Robertson, Springfield, Mass.; B. F. Pearson, Halifax, N.S.; G. T. Hillson, J. R. Douglas, V. G. Curry. The latter is a new director, replacing Hon. T. R. Black, deceased.

The Montreal Steel Works reported net earnings for 1905, after providing for all contingencies, of $120,798.37. Four quarterly dividends on the preferred stock at the rate of 7%, amounting to $56,000, had been paid at due dates. There was at the credit of profit and loss account $101,469.06, out of which a dividend at the rate of 7% has been declared for 1905 on the common stock. It is proposed to issue at once at par $100,000 additional common stock.

The plans of the Dominion Steel Car Co., so far as they have been completed, provide for the erection at Montreal of a main car shop about 150 ft. by 500 ft. The building will be divided into two bays spanned by two 75 ft. trusses, both of the same construction, and traversed by a 10-ton electric travelling crane, 71 ft. 9 in. span. At one end of this main car shop and at right angles to it will be a crane runway carrying a 10-ton electric travelling crane for handling material in steel yard. The steel work in the building will approximate 700 tons.

The Dominion Steel Car Co., Ltd., which has recently been incorporated with a capital of $500,000, is about to increase its capital to $750,000, the original amount authorized having been largely oversubscribed. The officers are:—President, W. W. Kelley, Chicago; 1st Vice President, W. W. Butler, New York; 2nd Vice President, R. P. Lamont, Chicago; 3rd Vice President, G. E. Scott,

THE PINTSCH LIGHT AWARDED THE GRAND PRIZE
ST. LOUIS, 1904

In the United States 170 railroads have equipped over 25,500 cars with Pintsch Light. In the World more than 135,000 cars, 6,000 locomotives and 1,800 buoys are using Pintsch Light, the test of experience having proven it the most economical, safe and reliable system for car lighting. Pintsch Gas Buoys adopted as standard by the United States Lighthouse Board. Highest awards taken at World's Expositions at Moscow, Vienna, St. Petersburg, London, Berlin, Paris, Chicago, Atlanta, Buffalo, and now St. Louis.

SAFETY HEATING SYSTEMS RECEIVED THE HIGHEST AWARD

Practical service for the past 18 years has demonstrated the reliability, efficiency and adaptability of the Safety Systems of Direct Steam and Hot Water Heating which are being applied in large quantities to railroad equipment. Straightport couplers. Automatic Steam Traps. 140 Railroads are using these devices, applied on 16,000 cars. Standard on Pullman cars.

MONTREAL ST. THOMAS HAMILTON

Chicago. All the foregoing are officers either of the American Steel Foundries Co., or the Simplex Railway Appliance Co. Three Canadian directors in addition will constitute the board. Treasurer, J. A. Lamont, Montreal; Secretary, A. H. Chave, Montreal. The company's works and offices will be at Blue Bonnets, a short distance west of Montreal, and will be devoted to building steel cars and steel underframing. J. A. Lamont will have charge of the construction of the works which will be gone on with at once. The construction of steel and concrete will be of the most substantial character.

TRANSPORTATION APPOINTMENTS.

Bay of Quinte Ry.—J. E. Robitaille, Chief Accountant and Travelling Auditor, has been appointed Car Service Agent of the B. of Q. Ry., and the allied companies, Thousand Islands Ry., and Oshawa Ry.

Canadian Pacific Ry.—C. B. Brown has been appointed Division Engineer, Atlantic Division, succeeding J. H. Barber, transferred.

F. P. Gutelius, heretofore Engineer of Maintenance of Way, has been appointed Assistant Chief Engineer, with immediate charge of engineering and maintenance of way on the Company's Eastern Lines. Office, Montreal.

A. L. Hertzberg, heretofore Division Engineer, Ontario Division, Toronto, has been appointed Engineer of Maintenance of Way, all lines, succeeding F. P. Gutelius, promoted. Office, Montreal.

J. H. Barber, heretofore Division Engineer, Atlantic Division, St. John, N.B., has been appointed Division Engineer, Eastern Division, succeeding J. M. R. Fairbairn, transferred. Office, Montreal.

G. J. Major, Manager of the Chateau Frontenac, Que., has resigned, and J. H Phillips is in charge temporarily, being succeeded temporarily at the Place Viger, Montreal, by A. Allerton.

J. M. R. Fairbairn, heretofore Division Engineer, Eastern Division, Montreal, has been appointed Divisional Engineer, Ontario Division, succeeding A. L. Hertzberg, promoted. Office, Toronto.

A press report stated that J. W. Nolan, assistant chief telegraph operator C.P.R., Union Station, Toronto, has been appointed road agent, Ontario Division, and had been succeeded by W. J. Blaney, but we were officially advised Mar. 26, that there had been no change whatever in the position of the two employes named.

A reorganization has been effected in the freight and passenger department representation of the C.P.R., and its U.S. subsidiaries, the Duluth, South Shore and Atlantic Ry., and the Minneapolis, St. Paul and Sault Ste. Marie Ry., at Buffalo, N.Y. R. A. Burford, heretofore city passenger and freight agent C.P.R., and passenger agent M. St. P. and S.S.M. Ry., will in future devote himself exclusively to the passenger business of the three lines.

W. S. Nevins, heretofore Travelling Freight Agent M. St. P. and S.S.M. Ry., is reported to have been appointed District Passenger Agent for the three lines with headquarters at Buffalo. He will have charge of the city business in Buffalo, previously handled by R. A. Burford; and of the outside business on the Niagara Frontier.

C. Richardson, heretofore Travelling Freight Agent C.P.R., is reported to have been appointed Travelling Passenger Agent for the three lines.

G. C. Wilson, heretofore with the Lehigh Valley Fast Freight Line is reported to have been appointed chief clerk to the District Freight Agent.

We were, however, advised Mar. 23, that it had not been decided what the titles of the various officials are to be, consequently the information given in the Buffalo papers, as above, is somewhat premature.

W. Taylor, late of the Great Western Ry. System of hotels, England, has been appointed Manager of the new C.P.R., Winnipeg.

C. A. Cotterell, heretofore train dispatcher C.P.R., Fort William, Ont., has been appointed Chief Train Dispatcher there, succeeding A. Hatton.

W. Bell has been appointed Assistant Superintendent Sleeping, Dining and Parlor Cars, and News Service, Western Lines, with headquarters at Winnipeg. He will have supervision over the Sleeping, Dining and Parlor Cars, and News Service, on Western Lines and will report to the Superintendent of Transportation at Winnipeg.

F. T. Anderson has been appointed Inspector of Agencies, Western Lines, succeeding C. Hood, transferred. He will report to the Superintendent of Transportation, sending copies of his reports to the respective superintendents for action. Office, Winnipeg.

R. J. Lydiatt has been appointed Inspector of Train Service, Western Lines. He will report to the Superintendent of Transportation sending copies of his reports to the respective superintendents for action. Headquarters, Winnipeg, Man.

Chas. Hood has been appointed Freight Claims Agent of the Central Division, vice R. E. Larmour, transferred. Office at Winnipeg, Manitoba.

J. E. Ryan, heretofore Assistant Chief Train Dispatcher, Brandon, Man., has been appointed Assistant Chief Train Dispatcher, Winnipeg, Man, succeeding E. G. Trump, assigned to other duties.

J. T. Barnes has been appointed Assistant Chief Dispatcher, at Brandon, Man., succeeding J. E. Ryan, transferred.

J. N. Brooks has been appointed Freight Claims Agent, Western Division. Office at Calgary, Alberta.

E. V. Dangerfield, heretofore baggage master, New Westminster, B.C., is reported to have been appointed travelling baggage agent with headquarters at Calgary, Alta.

S. C. Sykes has been appointed District Superintendent Sleeping, Dining and Parlor Cars and News Service, Pacific Division, with headquarters at Vancouver, B.C. He will report to Assistant Superintendent Bell, Winnipeg, Man.

J. Halstead is reported to have been appointed Freight and Passenger Agent C.P.R., at Tacoma, Wash., succeeding J. W. Draper, promoted.

Central Vermont Ry.—Jas. Coleman, who in Feb., 1905, resigned the position of Master Car Builder, to become Superintendent of the Canada Car Co.'s shops, Montreal, has been appointed to his former position; and A. Buchanan, who, during the past twelve months has been Superintendent of Motive Power and Car Department, will in future devote his entire time to the motive power department with his former title of Superintendent of Motive Power. Both these officers have their offices at St. Albans, Vt.

Dominion Steamship Line.—M. A. Overend, formerly Foreign Freight Agent Canada Atlantic Ry., has been apointed Western Freight Agent, Dominion Steamship Line, at Toronto, succeeding E. T. Boland. His territory will be Western Canada and he will only represent the Portland service.

Grand Trunk Ry.—H. M. Morgan, heretofore ticket agent at Detroit, Mich., has been appointed city passenger and ticket agent at Buffalo, N.Y., succeeding C. L. Coon, deceased.

G. J. Bishop, heretofore Master of Bridges and Buildings, Western Division, Durand, Mich., having resigned T. T. Irving, Resident Engineer, will, in addition to his other duties, assume charge of the Bridges and Buildings Department. Office, Detroit. All reports and correspondence pertaining to the Bridges and Buildings Department will, until further notice, be addressed to Durand, Michigan, as heretofore.

The following agents were appointed during Feb.: Delhi, Ont., W. D. Barnes; Fort Erie, Ont., G. R. Layher; Admaston, Ont., J. O'Leary (Caretaker).

Great Lakes and St. Lawrence Transportation Co.—Capt. D. Sullivan, Chicago, Ill., who is Lake Michigan Agent of the fleet of the United States Steel Corporation, has been appointed Manager of the G. L. and St. L. T. Co., succeeding Capt. Wolvin.

Halifax and South-Western Ry.—P. Mooney, heretofore chief clerk in the Traffic Department, Great Northern Ry. of Canada, has been appointed District Freight and Passenger Agent, H. and S.W. Ry., at Halifax, N.S.

Intercolonial Ry.—E. A. Williams, the recently appointed chief of police on the I.C.R., took charge of his new duties Mar. 1. A Moncton report states that Geo. Skeffington, the former chief, who was said to have been summarily dismissed, has been granted three months' absence without pay, when he will be retired.

Lake Ontario and Bay of Quinte Steamboat Co.—H. H. Gildersleeve has been elected President succeeding the late C. F. Gildersleeve in that capacity.

E. E. Horsey, heretofore Traffic Manager, has been appointed General Manager, succeeding the late C. F. Gildersleeve in that capacity. He will, however, retain the charge of the Passenger and Freight Departments. Office, Kingston, Ont.

National Transcontinental Ry.—C. F. Hannington has been appointed Acting District Engineer, District E., succeeding the late Capt. Perry.

Toronto Union Station.—Jas. Walch, baggage agent G.T.R., Windsor, Ont., has been appointed general baggage agent, Toronto Union Station.

National Transcontinental Railway.

The last day for receiving tenders for the three districts of the Eastern Division of this railway, which is to be constructed by the Dominion Government, acting by the Commissioners of the National Transcontinental Ry., was Mar. 12, when a number of tenders were put in. The G. T. Pacific Ry. Co., it is understood, tendered for the whole of the mileage offered; other contractors tendered for one or other of the districts, and several tenders were put in for the 3,000 ft. steel superstructure for the viaduct at Cap Rouge. The sections of line for which tenders were asked are: District B, from near the Quebec Bridge, now under construction by the Quebec Bridge and Ry. Co., to near La Tuque, Que., about 150 miles; District F., from near Winnipeg, Man., to Peninsula Crossing, Ont., near the junction point of the Lake Superior branch of the G. T. Pacific, about 245 miles. Nothing had been decided up to the time of writing, Mar. 28, as to which tender or tenders would be accepted.

GRAND TRUNK PACIFIC RAILWAY.

Under its act of incorporation the G.T. P. Ry. Co. is authorized to issue $20,000,000 of preference stock. At the current session of the Dominion Parliament application will be made for an act to amend the section dealing with the issue of preference stock and substituting therefor debenture stock to the amount of $25,000,000.

The section of the line for which the Canadian White Co., Montreal, has secured

TORONTO AND WINNIPEG

a contract from the G.T. Pacific Ry., extends from the Touchwood Hills, Man., where the McDonald, McMillen Co.'s contract ends, to about three miles west of Saskatoon, Sask., about 140 miles. The country is rolling prairie land, and the work will consist principally of grading. There will be approximately 3,000,000 cubic yards of excavating to handle. On account of the high-class road that the G.T.P. is constructing, with a maximum grade of 4-10, the grading runs heavier than in ordinary prairie country, and will average over 20,000 cubic yards per mile. There are no stream crossings of importance, and the few there are will be bridged by the contractors. At Saskatoon, however, the Saskatchewan River will be crossed at an elevation of 75 ft. above water level, and at this point the valley is 1,500 ft. wide. The work will be started as soon as possible, and it is to be completed on or before Nov. 1. Construction headquarters will be located at Saskatoon, J. W. Harris, C.E., being Engineer in charge. The General Manager, F. H. Alfred, (formerly Chief Engineer of the Pere Marquette Rd., Detroit, Mich.,) will have general charge and direction of the work. It is intended to sublet a portion of this work, but most of the work will be done by the company's own plant.

The contractors for the Saskatoon, Sask.-Edmonton, Alta., construction, 450 miles, are Foley Bros, Larson & Co., who are also constructing the Lake Superior Branch from Fort William to the junction with the Government section of the line easterly from Winnipeg. The work will be in charge of J. W. Stewart on behalf of the contractors, and his headquarters for the present will be at Kenora, Ont., where the contractors are working on the C.P.R. second track work between Fort William, Ont., and Winnipeg, Man.

Railway Legislation in Ontario.

The Ontario Government has laid before the Legislature a lengthy bill, having for its purpose the consolidation of the acts relating to steam, electric and street railways. The bill was introduced by Hon. J. S. Hendrie, who had charge of its preparation, and who has been re-elected chairman of the Sessional Committee on Applications for Railway Legislation. The bill extends to 112 pages, and has 267 sections. It provides for the repeal of the whole of nine existing acts, and sections of other acts, and incorporates sections from the various existing acts, and the Dominion Railway Act. In connection with this another bill has also been introduced by Mr. Hendrie, providing for the appointment of a Railway and Municipal Board for the Province. The consideration of these Government bills has brought about the postponement of the consideration of the annual bills dealing with fenders, and the holding up of certain clauses in a number of general railway bills. The two Government bills are to be discussed at a meeting between representatives of the municipal authorities and the Government, with a view of ascertaining the views of the city, town and township authorities on the different sections affecting them. The bills are important ones, and may be considerably amended as a result of the discussion with the municipal authorities and in passing through committee.

C.P.R. Betterments, Construction, Etc.

Atlantic Division Surveys.—We are advised that only a preliminary survey is being made between Debec, near Woodstock, N.B., and Bancroft, Me., and that nothing can at present be said as to what the company's intentions definitely are. (Mar., pg. 137).

Eastern Division Betterments.—We are advised that it is proposed to construct a second track alongside the present one between St. Annes and Vaudreuil, Que., three miles. The bridges on the line between St. Annes, Que., and Smith's Falls, Ont., 108 miles, are to be put into a condition to carry a second track when it is decided to carry one through to the latter point.

Western and Central Division Construction.—We have been advised that the new construction work to be undertaken on these divisions during the current season, includes the carrying out of some further grade reduction on the main line, on the Medicine Hat section; the completion of the branch from Reston, Man., to Wolseley, Sask.; a branch from Teulon, Man., northerly for 10 miles; a branch from Saskatoon, Sask., westerly for 34 miles, and the completion of the branch easterly from Wetaskiwin, Alta., from mileage 50 to mileage 100. The following new work has also been authorized, but it is not yet decided just how soon it will be put in hand: a branch from Winnipeg Beach to Gimli, Man.; an extension of the line westerly from Shebo, Sask., for a further 37 miles; an extension of the line northerly from Strassburg, Sask., for 40 miles; and a branch easterly from Saskatoon, Sask., for 40 miles.

Rossland Transfer Track.—The transfer track connecting the Rossland branch of the C.P.R., and the Red Mountain branch of the Great Northern Ry., N.S., is 1,106 ft. in length, and is practically laid to the grade of Third Avenue, Rossland, B.C., along which it runs. The line crosses at grade Spokane and Washington streets.

Canadian Steam Railways in 1904-05.

The number of steam railways in actual operation, including the two government roads, the I.C.R. and the Prince Edward Island Ry., at the close of the fiscal year, June 30, 1905, was 194; some of these, however, are amalgamated or leased, making the total number of controlling companies 91, not including the government railways. The number of companies absorbed by amalgamation was 56, and the number of leased lines was 39. The number of miles of completed railway was 20,601, an increase of 990 miles, besides 3,632 miles of sidings. The number of miles laid with steel rails was 20,533, of which 838 miles was double track. The number of miles in operation was 20,487. The paid-up capital amounted to $1,248,666,414, an increase of $62,119,496. The gross earnings of the year amounted to $106,467,199, an increase of $6,247,763, and the working expenses aggregated $79,977,574, an increase of $5,414,412 compared with those of the previous year; leaving the net earnings $26,489,625, an increase of $833,351. The number of passengers carried was 25,288,723, an increase of 1,647,958, and the freight traffic amounted to 50,893,957 tons, an increase of 2,796,438 tons. The total number of miles run by trains was 65,934,114, an increase of 4,622,112. The rolling stock comprised: For passenger service 2,338 cars; for freight service 86,992, including 57,229 box and cattle cars; and for operation and maintenance service 4,831, making a total of 94,161 cars. Of these, 78,178 were equipped with air-brakes, and 85,381 were fitted with automatic couplers, an increase of 4,796 over the previous year. The locomotives numbered 2,906. The accident returns show a total of 468 persons killed, 35 being passengers, 206 employes and 227 others, and, in addition, 1,357 injured, of whom 244 were passengers, 919 employes and 194 others. By train collisions and derailments 16 passengers, 31 employes and 2] others were killed, and 143 passengers, 121 employes and 9 others were injured. Through jumping on or off trains or engines in motion, 7 passengers, 10 employes, and 12 others were killed, and 52 passengers, 95 employes, and 27 others were injured. Through walking, lying or being on the track, 1 passenger, 43 employes and 135 others were killed, and 1 passenger, 52 employes, and 55 others were injured. Through falling from cars or engines, 8 passengers, 45 employes, and 13 others were killed, and 15 passengers, 138 employes, and 13 others were injured. Through being struck by engines or cars at highway crossings, 2 employes and 57 others were killed, and 3 employes and 64 others were injured. In the work of coupling cars, 27 employes were killed, and 102 employes and 1 other were injured, a total of 130, as against 178, 211, 241, 290 and 363 in the five preceding years, respectively; a very satisfactory testimony to the efficiency and value of the automatic car coupler, now, happily, growing in general use. By the Railway Act, 1903, section 211 (c), railway companies are required to provide and use in their engines and cars "couplers which couple automatically by impact, and which can be uncoupled without the necessity of men going in between the ends of the cars." They were allowed, however, until Jan. 1, 1906, for fitting with such couplers cars built prior to the passage of the act.

Railway Finance, Meetings, etc.

Canadian Northern Ry.—The Manitoba Legislature at its current session passed an act authorizing the guarantee of bonds to the extent of $10,000, under the conditions mentioned in the C.N. Ry. Act of 1904, in respect of the following lines: for 35 miles to near Deloraine; from Oakland westerly and northwesterly for 50 miles to sec. 36, tp. 17, range 10, w.p.m.; and from Oak Point northerly and northwesterly for 35 miles.

A return published in Minnesota shows that the gross earnings on the mileage of the company's main line in Minnesota, from the Ontario boundary near Rainy River, to the Manitoba boundary near Warroad, about 44 miles, was $255,142.10, against $198,039.56. The taxes paid to the State for 1905 amounted to $10,205.68, against $1,980.39 for 1904.

Canadian Pacific Ry.—A cheque for $7,000,000 was paid to the Quebec Government Mar. 1, by the company to discharge the purchase price of the Quebec, Montreal, Ottawa and Occidental Ry., which was purchased in 1882. The Quebec Legislature has authorized the use of the money to pay off various provincial loans.

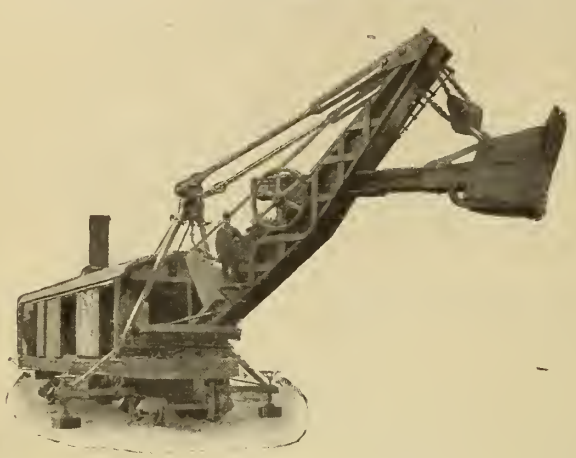
The shareholders at a special meeting authorized the issue of a further $20,000,000 of common stock to holders at the closing of the books, April 20, in the proportion of one share of new stock to five of old stock, at par.

Pere Marquette Rd.—At a meeting of shareholders held at Detroit, Feb. 27, a committee was appointed to investigate the 999-year lease to the Cincinnati, Hamilton and Dayton Rd., and report at the annual meeting to be held in May. N. Thayer, W. W. Craps, M. T. Cox, G. H. Norman, F. R. Hart, were appointed the committee.

Qu'Appelle, Long Lake and Saskatchewan Ry. and Steamboat Co.—Net earnings for Jan., $145.15, against $4,580.03 for Jan., 1905.

Temiscouata Ry.—Traffic receipts for Feb., $12,078.32, against $9,461.90 for Feb., 1905.

STEAM SHOVELS



We build shovels in sizes from 22 to 110 tons, with dipper capacity of ¾ to 4½ cubic yards. Our new design represents the accumulated experience of many years in steam shovel building. Some of the features that we would call attention to are the use of cut gears, swinging jack arms, and the heavy construction of car body. Write us and describe your work, and get our specifications and proposition on your requirements.

VULCAN IRON WORKS CO.

113 VULCAN PLACE, - TOLEDO, OHIO

ARE YOU INTERESTED?

In a light railway Motor Car that will GO when you want it, AND KEEP GOING.

A car that can be removed from the track quickly and easily by one man.

That carries three passengers and baggage.

That can be quickly taken apart and stored in a baggage car.

That can be run at any speed up to 33 miles per hour.

That is more easily operated and simpler than any other car on the market.

Then write for particulars of RUSSELL INSPECTION CAR NO. 12.

Subscription Agents Wanted.

We want an agent at each railway and shipping centre in the Dominion to secure new subscriptions to THE RAILWAY AND MARINE WORLD, for which we will pay liberal commissions.

The work is easy, the paper recommending itself, and is specially adapted for clerks in transportation offices. It can be done at odd times without interfering with other duties.

For terms and other particulars, address

THE RAILWAY AND MARINE WORLD,
Toronto

PROFESSIONAL CARDS.

THE RAILWAY AND MARINE WORLD is especially adapted for the publication of professional cards of engineers, inspectors, analysts, electrical experts, naval, grain elevator and other architects, solicitors, etc., who desire to bring themselves under the notice of the managements and officials of the various steam and electric railway, steamship, grain elevator, telegraph, telephone and power companies throughout Canada, as well as the locomotive, car and ship builders, contractors and promoters of railway enterprises. THE RAILWAY AND MARINE WORLD is the only one medium through which all these important classes can be reached.

Rates will be quoted on application.

General Offices: 43 Exchange Place, NEW YORK

Canadian Northern Railway Construction.

Additional land and buildings have been secured fronting Toronto and Court streets, Toronto, in the rear of the present office building at the corner of King and Toronto streets, for office purposes. The present office building is already overcrowded with the staffs of the C.N. Ry., and the other lines under construction for Mackenzie, Mann & Co.'s systems, and the offices of some of these will be transferred to the newly acquired property.

A large purchase of land has been made in the east end of Toronto, for railway terminals for the Mackenzie, Mann & Co.'s line, which will enter the city by the James Bay Ry., now under construction. The property acquired is in the area bounded by Front St., Eastern Ave., Cherry St. and Trinity St. Upon the site the company will erect a large freight shed with the necessary yards. Some other interests are reported to be associated with the purchase, and it is said that this company proposes to erect workmen's dwellings on its portion.

Canadian Freight Association.—At the last meeting of the Canadian Freight Association held in Montreal, Mar. 2, the rates by water and rail for the season of 1906 were discussed and practically agreed upon. There was a full attendance of members.

Canadian Car Service Bureau.—The representatives of the railways west of Port Arthur, Ont., held a meeting with representatives of the eastern railways and the Car Service Bureau, in Montreal, when it was decided to form a Car Service Bureau at Winnipeg, Man., having jurisdiction over all lines west of Port Arthur to a point west of Winnipeg, and another bureau to have jurisdiction on the Pacific Coast and in British Columbia. H. R. Patriarche was appointed to take charge of the Winnipeg Bureau, and C. K. Perry, heretofore Chief Inspector of the Montreal Bureau, of the B.C. one. The managers of the three bureaus will form a committee and will handle all matters in connection with car service business, the manager of the Montreal Bureau being Chairman. We were advised Mar. 21 that the proposed change at Winnipeg had not gone into effect, and that the arrangements heretofore existing will remain in force, with certain amendments to the constitution and by-laws. The appointment of C. K. Perry has not yet been confirmed. W. J. Collins has been appointed Inspector and located at Toronto; and D. H. Way has been appointed Inspector and located at Montreal.

H. Hall, Toronto, Parliamentary representative of the railway brotherhoods in Canada, is in communication with some of the U.S. railway companies in regard to reciprocity between trainmen in the service of Canadian and U.S. companies. If some agreement cannot be come to it is proposed to put the Alien Labor Law in force against the U.S. men coming into Canada.

The Canadian Commissioners, Capt. Gaudin, Capt. Newcombe, of the Dominion Government service, and Capt. Cox, Lloyds' agent, Vancouver, B.C., have presented an interim report respecting the loss of the U.S. str. Valencia, off Vancouver Island. They state that the available evidence is insufficient to justify a positive conclusion as to whether or not the calamity was chargeable to the inadequate lighting of Vancouver Island and coast. Basing their views upon expert testimony, the commissioners urge the immediate establishment of a number of important aids to navigation along the western and southern seaboard of Vancouver Island.

G.T.R. Betterments, Construction, Etc.

Office Building at Quebec.—The G.T.R. has recently purchased property in Quebec for the purpose of erecting a commodious building for office purposes. It is located on the corner of Ste. Anne and Du Fort streets, at the eastern end of Dufferin terrace and directly opposite the promenade. At present the G.T.R. ticket office and the I.C.R. ticket office are now occupying these premises on the ground floor, with residents living above the offices, but it is the intention of the G.T.R. to erect a six-story office building on the site. City ticket office, local freight office, and other offices of the company will be located in the new premises.

Montreal Offices.—We were officially informed Mar. 23 that the company is not in a position to give any definite information regarding the proposed new office building at Montreal. Press reports in Montreal state that a one-storey block will be erected opposite the present offices on McGill St., in the block between St. Paul St. and McGill Square, at a cost of $75,000 or $80,000. The building will be constructed so that additional storeys can be added as required by the officials of the G. T. Pacific Ry.

Falkenburg to Port Carling.—We have been officially advised that while consideration has been given to a project to construct an extension from the Northern Division of the G.T.R. near Falbenburg, to Port Carling, to open up to the rail a new section of the Muskoka country, nothing has been decided as to construction. (Mar., pg. 135).

Detroit-Durand Second Track.—We were advised Mar. 8, that at the present time it is not contemplated entering upon the construction of a second track between Detroit and Durand, Mich., for some years to come. (Mar., pg. 135).

A Watch Inspection System—The System of watch inspection for employes connected with the movement of trains on the Ottawa and New York Ry., has just been placed in operation by Webb C. Ball, Cleveland, Ohio, General Time Inspector, New York Central and Hudson River Rd., by which the O. and N.Y. Ry. is owned. The object of the inspection is to maintain a high degree of accuracy and efficiency in the time of the watches of the men, so that the train service can be operated promptly and safely. The instructions to local watch inspectors show the standard of excellence to be reached and maintained, and the standard for new watches. Standard "loaner" watches are provided to be given to the employes on leaving their own watches for cleaning, repairs or inspection, and cards are provided for recording the performance of watches from inspection to inspection. These cards in due course find their way to the General Time Inspector, who passes upon them.

The double daily transcontinental train service on the C.P.R. will be started early in May, which is about a month earlier than in 1905, when the service was started June 5. The exact date had not been definitely fixed when we received official notification of the company's plans.

The U.S. Senate has passed the shipping bill by a vote of 28 to 27. The bill, as passed, establishes 13 new contract mail lines, and increases the subvention to the Oceanic Steamship Co., for its services to Australia. The bill also grants a subvention at the rate of $5 per gross ton per year to cargo vessels engaged in the foreign trade of the United States, and $6.50 per ton to vessels engaged in the Philippine trade. A new naval force of 10,000 officers and men is also created who are to receive retainers after the British practice.

ELECTRIC RAILWAYS.

Niagara, St. Catharines and Toronto Ry.

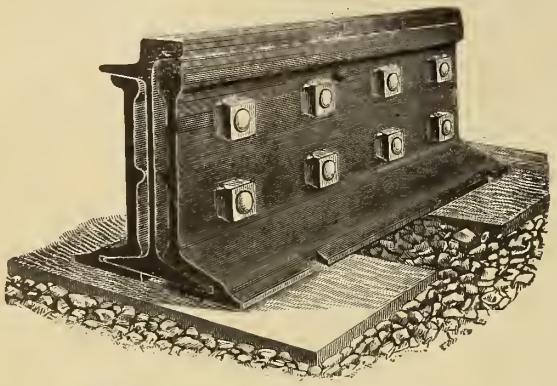
At the annual meeting in Toronto, Feb. 27, the following report for the year 1905 was presented by the President, Frederick Nicholls:

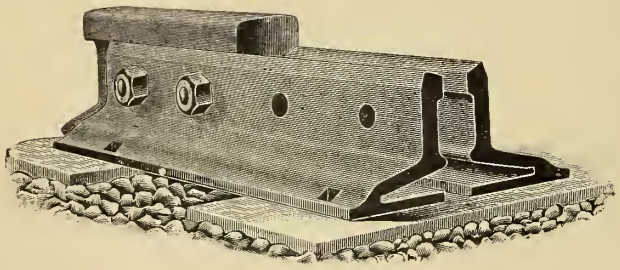
This company was incorporated by the Dominion Parliament in 1899. Some years previous a steam road was built between St. Catharines and Niagara Falls, Ont., known as the Niagara Central Ry. It, however, was not successful, and a syndicate of American and Canadian capitalists purchased it in 1899, and secured a charter from the Dominion Government under our present title, The Niagara, St. Catharines and Toronto Ry. Co., with the right to purchase the Niagara Central Ry. and all its assets and franchises. The road was reconstructed and electrified, and was ready for operation in Aug., 1900, and during the same year the line was extended from St. Catharines to Port Dalhousie, and this latter extension commenced operations in March, 1901. In 1899, a horse-car line running between Niagara Falls, Ont., to what was then Drummondville, and Niagara Falls South (all now the city of Niagara Falls), was purchased, rebuilt, and electrified, and electric cars commenced running in Aug., 1900. Another local line, operating between St. Catharines and Thorold, through Merritton, was purchased in May, 1901, and our property now consists of these various roads, which are amalgamated and operated under one management. In the winter of 1901, the Lakeside Navigation Co. was purchased, and our present Navigation Department is being operated under a separate charter, known as the Niagara, St. Catharines and Toronto Navigation Co., Ltd.

When we acquired the property we determined to adopt a vigorous policy and place the road in a thoroughly first-class condition, and a large amount of money has been spent during the present year for this purpose and charged to operating account. Amongst other improvements, we have completed an addition to our car barns in St. Catharines, which has been fitted as commodious quarters for operating offices, and as comfortable waiting-rooms for passengers. The amount we have previously paid out for office rental, if capitalized, would in five years pay for the total cost of this improvement, in addition to which we have now much better accommodation, including a large fire-proof vault. We have added to our equipment during the year, three modern, semi-convertible cars, and a freight locomotive, and our shops have also built a number of freight trucks for the navigation department. Our tracks have been overhauled throughout and maintained in a first-class condition, and 3,450 ft. of new track constructed to connect the Wesley Park Division with the Toronto and Hamilton Ry. right-of-way. A new station has been erected at Stamford, and all other stations, switches, semaphores, etc., have been repainted. In order that the road may be made first-class in every particular, the directors have authorized the necessary expenditures for filling all the trestles on the main line between St. Catharines and Niagara Falls, and for replacing all wooden bridges with steel and concrete structures. These improvements, which it is expected will be completed during the current year, will not only effect a large saving in the annual cost of maintenance, but will permit of trains being operated at a much higher rate of speed, thereby increasing the popularity of the route.

Application has been made to the Dominion Parliament for permission to extend our railway from Thorold to Welland and Port Colborne; from Port Colborne to Fort Erie, thence to the city of Niagara Falls; from Niagara Falls to Niagara-on-the-Lake; from Niagara Falls or Thorold or Welland to

Railroad Essentials.





The day has passed when men of finance are willing to place their money into bad material in railroad construction only to be compelled to replace it by renewals or reconstruction after very little use. Many of the best and most successful steam and electric railroads use the rail joints of the Continuous patent type for standard track work, insulated joints, step joints, and electric bonding joints for the reason that experience has proven it to be the best appliance of its kind ever put upon the market, as evidenced by the fact that it is used in all parts of the world on over 20,000 miles of track.

Brantford, and from St. Catharines to Niagara-on-the-Lake; also for power to amalgamate with any company having similar powers possessed by this company; to enter into arrangements with power companies for the transmission of electric power over the right-of-way of the company; to authorize the company to lease from or otherwise arrange with power companies for the use of the right-of-ways of power companies for the purposes of our railway; to extend the time for the commencement and completion of the company's lines of railways; to increase the capital stock of the company and for such other and further powers as may be deemed requisite and necessary for the purposes aforesaid. Sufficient bonds have been sold at a satisfactory price to enable the first extension from Thorold to Welland, and from thence to Port Colborne, to be proceeded with. Construction will be vigorously pushed during the summer, and when in operation it is anticipated that this additional mileage will add largely to receipts and furnish additional passenger and freight traffic for our navigation department.

The two vessels owned by the company and operated by our navigation department, have been well kept up. Two hundred new chairs and 495 new life preservers have been purchased for the Garden City, and the boilers of both the Garden City and the Lakeside were thoroughly overhauled. Encouraged by the opportunity to develop much larger excursion traffic, as well as through traffic from Toronto to St. Catharines, Niagara Falls, Buffalo, Welland and Port Colborne, the directors have decided to add to the fleet a large and fast twin-screw steamer, to be thoroughly well appointed and equipped with all modern improvements. Plans and specifications are being prepared and the steamer should be ready for service early in 1907.

It will be noticed that the proportion of operating expenses to earnings is 63%, but, inasmuch as during the year an exceptional amount has been charged to operating for a thorough overhauling of the system, it is anticipated that this percentage will be materially reduced during the present year.

Canadian Electric Railways in 1904-05.

Statistics for the year ended June 30, 1905, shows that there were 793 miles completed, of which 768 miles were laid with steel rails, 186 miles being double-tracked. The paid-up capital amounted to $61,033,321, of which the municipal aid amounted to $173,000 (including $100,000 subscription to shares, and $40,000 loan.) The number of miles in operation was 793, the actual increase being 26 miles. The gross earnings aggregated $9,357,125, an increase of $903,516, and the working expenses $5,918,194, an increase of $591,677, leaving the net earnings $3,438,931, an increase of $311,839. The number of passengers carried was 203,467,317, an increase of 22,777,319, and the freight carried amounted to 510,350 tons, an increase of 110,189 tons. The car mileage was 45,959,101, an increase of 3,892,977 miles. The accident returns show a total of 56 persons killed during the year, 30 being passengers, 3 employes and 23 others. In addition, 1,269 persons were injured. Of these, 884 were passengers, 65 employes and 347 others; 1 passenger was killed, and 103 passengers, 4 employes and 1 other were injured in collisions and derailments; 2 passengers were killed, and 362 passengers, 2 employes and 5 others injured, through jumping on or off cars in motion; 1 passenger and 19 others were killed, and 2 passengers, 2 employes and 110 others injured through walking or being on the track; 22 passengers and 2 employes were killed, and 338 passengers, 15 employes, and 140 others injured through falling from cars; 4 passengers, 1 employe and 4 others were killed, and 37 passengers, 3 employes, and 78 others injured by being struck by cars at highway crossings; 3 employes were injured by coupling cars.

The Brantford Street Ry. has purchased three closed cars for its line, thereby adding 50% to the winter service.

The Hamilton Cataract Power, Light and Traction Co. is reported to have ordered two cars of 400 h.p., geared to run at 55 miles an hour, for use on the Hamilton Radial Ry.

Projects, Construction and Betterments.

Brantford Street Ry.—The shareholders at the recent annual meeeting approved of the plans for an extension of tracks in the city. The rails and ties are on the ground for an extension to the factory district in Eagle place, which involves the construction of about ¾ of a mile. The poles are already up, and construction will proceed immediately on the frost being out of the ground.

Canada Central Ry.—Senator Domville has returned from Great Britain where he has been for some time seeking to finance the construction of this projected electric railway from Montreal to Ottawa, thence to Georgian Bay, and on to St. Thomas, Ont. At St. John N.B., he stated in an interview that he had interested a syndicate in London in the proposal. Representatives of the men belonging to it are in Canada looking into the plans, and going over the projected route.

Grand Valley Ry.—The Dominion Parliament will be asked during the current session for an act extending the time for the completion of its authorized lines, and for power to construct a line from Brantford to Woodstock, Ont. It is proposed also to ask for power to lease the Brantford Street Ry. and the Woodstock, Thames Valley and Ingersoll Electric Ry., and to make agreements with companies for the transmission of electric power over its right-of-way.

The company is considering several extensions, one from Blue Lake to St. George, a distance of about five miles. Part of this extension has already been graded and is ready for the ties and steel.

Levis County Ry.—At the recent session of the Quebec Legislature an act was passed incorporating J. Forman and his associates with this title to hold and operate the line, and conferring upon them the powers held by the former company. (Feb., pg. 89).

South Western Traction Co.—An extension of time for the construction of the projected lines and for the use of steam power during construction is being asked for at the current session of the Ontario Legislature. The confirmation of by-laws passed by the townships of Yarmouth and Westminster will also be asked for, as well as power to extend the line in the direction of Hamilton. The company has filed with the Ontario Government and with the public officials in London plans and details of the lands intended to be expropriated in London. Plans for the station and head office building on Horton St., London, have been completed, and a contract will be let for its construction at an early date. (Mar., pg. 135).

Sudbury, Copper Cliff and Creighton Electric Ry.—Application has been made to the Railway Committee of the Ontario Government for permission to run over the public highway and to expropriate some private property at Copper Cliff, Ont. The town of Sudbury and the municipality of McKim had granted franchises, but the municipality of Copper Cliff declined to grant a right to run over the highway. The Committee declined to grant the application, but suggested that the company might apply to the Legislature for special powers. The manager is Major J. R. Gordon, C.E., Sudbury, Ont.

Trans-Niagara Bridge Co.—Application has been made to the N.Y. Legislature, Albany, N.Y., for an act incorporating a company with this title to construct a bridge across the Niagara River at Niagara Falls, N.Y., and Ont., and to operate over it a double track electric railway. The names of the commissioners mentioned in the act are: G. B. Schley, New York; R. L. Fryer, H. L. Pierce, P. Norton, Buffalo, N.Y.; F. A. Dudley, Niagara Falls, N.Y.; F. Nicholls, E. R. Wood, D. E. Thomson, Toronto. A

Toronto, Ont.

number of the U.S. men named are connected with the International Ry., the President of which stated publicly in Toronto, Mar. 3, that the company was now nearly ready to construct a new electric railway over its own right-of-way from Niagara Falls to Buffalo, and that it was intended to run the trains between the two points in half an hour. The Toronto men mentioned are connected with the Toronto and Hamilton Ry., which is working out a project for a double track electric railway from Toronto to Niagara Falls; with the Niagara, St. Catharines and Toronto Ry., and other electric railways and power projects.

Western Central Ry.—The following appeared in the Interurban Railway Journal of Indianapolis, Ind, recently:

"Western Central (Canada).—This company will soon complete the construction of its line from Toronto, via Berlin to London, with a branch north from Berlin to Waterloo, Heidelburg, Mt. Clemens and Wellesley. Cars will be run from Toronto to London every hour and a half. It is proposed to supply a much better service than is now supplied by either the Canadian Pacific or Grand Trunk steam line."

The Western Central Ry. was incorporated by the Ontario Legislature in 1905; and was authorized to construct an electric railway from London to Guelph, via Embro, and New Dundee, with branches to Stratford and Woodstock. Up to the present date no construction has been done, and it is only quite recently that any definite work has been done in the way of applying for franchises from the different municipalities. So far as Toronto is concerned the Western Central Ry. Co. has no authority to construct a line any nearer to it than Guelph, but it purposes applying at the current session of the Ontario Legislature for an act giving it the necessary powers. (Feb., pg. 89).

We have been informed that grading and bridge work is in progress, W. Newman, C.E., being in charge. (Mar., pg. 153).

Windsor, Essex and Lake Shore Rapid Ry. Co.—The Dominion Parliament will be asked at its current session for an act authorizing it to construct a line of car ferries from Leamington or Kingsville, Ont., to some point on the south shore of Lake Erie, in the U.S., to enter into an agreement with the company constructing the tunnel between Detroit, Mich., and Windsor, Ont., for the use of the tunnel by the company's cars, and to declare the company's projected railway to be one for the general advantage of Canada. G. J. Leggatt, solicitor, Windsor, is acting for the company.

Electric Ry. Finance, Meetings, Etc.

British Columbia Electric Ry.—Gross earnings for Jan., $96,968, against $80,028 for Jan., 1905. Working expenses, $56,476; renewal funds, $8,500; approximate income from investments, $7,967; net income, $39,978, against $40,088 working expenses, $6,695 renewal funds, $2,750 income from investments; net income, $39,995 for Jan., 1905. Aggregate earnings for seven months ended Jan. 31, $694,541; net earnings, $318,067; against $543,949 gross and $224,917 net, for same period, 1904-05.

Cape Breton Electric Ry.—Gross earnings for year ended Dec. 31, 1905, $211,980.53; operating earnings, including taxes, $115,-262.24; interest charges, $44,295.45; net profit, $12,422.84. The figures include one-half of the earnings and expenses of the Sydney and Glace Bay Ry., a suburban electric railway which the C.B.E.Ry. owns jointly with the Dominion Coal Co.

Grand Valley Ry.—The line and franchises of the Woodstock, Thames Valley and Ingersoll Electric Ry. have been acquired by the G.V. Ry. Co., and the new owners took possession Mar. 1. The officers and directors of the G.V. Ry. for the current year are: President, A. J. Pattison; Vice-President, W. S. Dinnick; other directors, Rev. E. T. Fox, J. S. King, W. R. Turnbull, A. J. Pattison, Jr. See also Brantford Street Ry.

Montreal Street Ry.—Passenger earnings for Feb., $211,827.83; gross earnings, $213,-416.28, against $184,131.97 passenger, and $185,864.43 gross, for Feb. 1905. Net earnings, $57,376.65; fixed charges, $36,-124.16; surplus, $21,552.69. Net earnings for five months ended Feb. 28, $1,171,015.77; surplus, $259,880.61, against $1,027,214.61 net earnings; and $229,530.28 surplus for same period, 1904-05. Interest on Montreal Park and Island Ry. Co.'s bonds owned by the company not included.

Niagara, St. Catharines and Toronto Ry.—Power is being asked at the current session of the Dominion Parliament to increase the bonding powers of the company to $30,000 a mile of its railway.

St. John Ry.—The auditors, A. Seeley and I. O. Thomas, report that the gross earnings for the year ended Dec., 1905, were $116-, 110.10, as against $116,801.54 for 1904. The cash actually paid out for operating the system in 1905 was $96,231.53, which can be summarized as follows:

Operating expenses	$61,661 71
Maintenance	19,587 41
General expenses	14,982 41
Total	$96,231 53

The expense of operating and maintenance was largely in excess of last year. The principal item of expenditure causing this increase was due to the increased car service given by the company last year.

Toronto Ry.—Car earnings for Feb., $210,531.55 against $185,377.08 for Feb., 1905.

Electric Railway Notes.

E. Whittaker is reported to have been appointed Superintendent London Street Ry., succeeding J. Break, resigned after 12 years' service.

A building under course of erection in Dominion Park, Longue Pointe, Que., in which the Montreal Street Ry. is interested, collapsed during a wind storm, Mar. 3, two men being seriously injured.

The Montreal Street Ry. has ordered 100 new cars of the semi-convertible "pay-as-you-enter" type, to be 7 ft. longer in the body, and two ft. longer on the back platform, or 9 ft. in all longer than the longest car at present being operated on the company's lines. The cars will be fitted with rubber tiled flooring, side and centre lights, and electric push buttons.

The British Columbia Legislature has given consideration during the current session to an act for securing the safety of passengers travelling on, and for preventing accidents and injuries to employes on tramways and street railways. It provides for the mode of equipment of open cars; prohibits outside passageways, and provides a penalty of $100 for every offence.

The Nova Scotia Legislature at its current session passed an act amending the revised statutes so that Sections 206 to 214 of the Railway Act be made applicable to tramways. The sections authorize the making of by-laws for a number of purposes connected with the management of the companies' affairs, regulating the speed of cars, for the carrying on of freight and passenger business, for the control of officers and servants of the companies, and for the prevention of smoking in the cars.

THE GIANT BRAKE

Is constructed on sound and well-established mechanical principles as related to braking. It is not freaky nor sensational. Its balance between power and quickness is the happy medium, the result of many years' experience on thousands of cars.

If in the market for brakes, try it. Price $18.00 a pair.

The report of the Directors for the year ended Dec. 31, 1905, showed net earnings of $396,701.19, as compared with $268,266.51 in 1904. After providing for the percentage on earnings accrued to the city and interest on bonds, four quarterly dividends amounting to $200,000.00 were paid, leaving a surplus of $194,451.19, which has been transferred to the credit of Profit and Loss Account, making a total credit to this account Dec. 31, 1905, of $546,052.98. The percentage of earnings shows an increase of 34.63% compared with last year, while the operating expense shows an increase of 34.60% as compared with the same period. The net earnings show an increase of 34.67% over those of last year. The roadbed, rolling stock, buildings and other properties of the company, have been efficiently maintained. During the past year the following improvements and additions were made, viz.:—Seventeen double truck closed motor cars; 3,500 h.p. each, water-tube boilers; one cross compound 1,200 h.p. engine, direct connection to one 800 k.w. alternating generator; one air and circulating pump and condenser, with necessary piping; new coal gas plant, complete, and put in operation in July; 51,792 ft. of new gas mains put down; 639 new gas services put in; 1,532 new poles put up; 166,651 lbs. wire put up; 8,270 ft. new track in asphalt pavement; 7,920 ft. new track in Kildonan; 17,880 ft. new track in St. Charles; one new storage car barn, capacity 50 cars.

Statistics: Operating expenses per cent of earnings, 51.42, against 51.47 for 1904; passengers carried, 13,081,249, against 9,504,051 in 1904; transfers, 1,682,685, against 2,497,952 in 1904.

Hamilton Cataract Power, Light & Traction Co.

Following are extracts from the report for the year 1905:—The development at Power Glen of the generating plant is practically finished. Some additional but minor work remains to be done upon two generating units of 7,500 h.p. each, and the company now has a reserve of power that will take care of its normal growth for some time to come. The radial extension to Oakville is also nearly finished, and will be put into service on or before May 1. This extension is a notably good piece of electric railway construction. The directors have had under consideration the establishment of a new terminal station for all radial or suburban electric railways running into Hamilton, combining therewith the head offices and business premises of the company. This will probably be carried out through the instrumentality of a subsidiary company, established for the purpose and controlled by this company. The company purchased, April 1, 1905, the entire capital stock of the Lincolu Electric Light and Power Co. The year's operations have been featureless, aside from a regular and steady growth. Physical condition has been very much improved, particularly in the generating and sub-stations.

At the annual meeting, Feb. 12, the report and statement of accounts were adopted, and the directors were re-elected. Following are the officers and directors for the current year:—President, Col. J. M. Gibson; Vice-President, J. Dixon; Treasurer, J. R. Moodie; Secretary and General Manager, W. C. Hawkins; other directors, J. Dickenson, J. W. Sutherland, J. A. Kamerer.

The Intercolonial Ry. received the following additional rolling stock between Feb. 16 and Mar. 22: 53 box cars, 60,000 lbs. capacity, from the Crossen Car Manufacturing Co., Cobourg, Ont.; one first-class car and 21 box cars, 80,000 lbs. capacity, from Rhodes, Curry & Co., Amherst, N.S.; two flanger cars and 13 box cars, 60,000 lbs. capacity, also from Canadian builders.

Grain Elevator Notes.

The flour mill and elevator owned by Gibson & Co., Morrisburg, Ont., were destroyed by fire, Mar. 20.

The Manor Farmers' Elevator has been incorporated at Regina, Sask., under the Ordinances of the North-West Territories.

The Wabash Rd., it is reported, has selected a site at Fort Erie, Ont., upon which to erect a grain elevator of large capacity.

J. Linehan, Calgary, Alta., has been inspecting sites at Vancouver, B.C., recently, with the object of erecting a 100,000 bush. elevator there.

T. Long & Bro., Collingwood, Ont., have purchased a site on the harbor front there upon which it is intended to erect an elevator, general warehouse and cold storage plant.

The new elevator at Tiffin, near Midland, Ont., is now practically completed, and it is expected will be given a trial run April 15. The elevator has a capacity of 1,000,000 bush.

It is reported that the elevator at Coteau, heretofore used in the transfer of grain from the Canada Atlantic Ry. trains to barges, will not be operated this season, as the grain trains will be run through to Montreal by the G.T.R.

The John Campbell Milling Co., St. Thomas, Ont., propose erecting a grain elevator at Port Stanley, Ont., in connection with their business. It is the firm's intention to bring the wheat for the mill by water instead of by rail as formerly.

In the new Province of Alberta there are elevators at 28 points, having a total capacity of 2,052,000 bush. In the northern portions of the province there are elevators at nine different points with a capacity of 955,000 bush., and in the southern sections there are elevators at 19 points with a capacity of 1,097,000 bush.

A project is under consideration at Winnipeg, Man., for the formation of a syndicate for the insurance of grain elevators and their contents. A circular issued by the grain dealers states that in the past four years the insurance premiums paid by grain elevators has amounted to $446,000, and the losses by fire on this class of risks has been about $40,000.

In connection with the construction of the new elevator at Goderich, Ont., it may be mentioned that the marine leg will be built in a steel structure outside the elevator, the face of which will be nearly flush with the dock, thus making the machinery easy to handle, and giving the leg a far greater reach, so as to be able to unload the big steamers now building.

The Montreal Grain Elevating Co. has a claim against the Montreal Harbor Commissioners for $25,000 for damages to its floating elevator St. Lawrence, which struck an unfinished wharf and sank. The company attributes the accident to the fault and negligence of the commissioners in allowing the wharf to remain in a dangerous condition, and in not providing for the safety of the vessels navigating the harbor.

C.P.R. Lands.—We are officially advised that the company has practically sold 500,000 acres of land in the Edmonton, Alta., district to an English syndicate. These lands have been withdrawn from sale. There has been no general withdrawal of the company's lands from sale, as press reports state, but in certain sections tributary to the C.P.R. and other projected lines, the lands are held at a maximum price, which may in some cases be higher than the present value, until such time as they can be carefully examined with a view of placing them at a proper valuation.

The St. Lawrence River Pilots.

The reorganization of the pilotage system on the St. Lawrence River is being carried out under the direction of Capt. Spain of the Department of Marine. In 1905 the Department took over the duty of supervising the pilots between Montreal and Quebec, and this year has taken over the control of the pilots operating between Quebec and the Gulf of St. Lawrence. The work at present in hand is the reorganization of the pilotage system between Quebec and the Gulf, and in this connection several conferences have taken place between the Minister of Marine, the Shipping Federation of Canada and representatives of the pilots. As a result, it is understood that the age limit of the pilots is to be 65, and those above that age are to be retired on a retiring allowance, unless they can pass a medical examination showing they are physically fit, and be granted a license from year to year by the Minister as long as they are fit. The examination to include an eyesight and hearing test twice a year, once before the opening of navigation and again in Sept. The rules of examination to be amended so that all pilots are to be submitted to an eyesight, hearing, color and vision test on the same lines as are now inaugurated by the British Board of Trade and required of masters and mates; an examination in the use of the compass and charts in the same way as sea-going masters. Every apprentice pilot before he gets his branch is to hold a sea-going certificate of competency. There are 116 pilots below Quebec, 28 of whom have masters' certificates, and it is suggested that everyone should hold a certificate before they get their branches. Those who at present hold certificates to be examined in regard to the compass, charts and bearings. The number of pilots below Quebec, viz., 116, are too many, and it is proposed that they should be reduced to 75. The question of introducing a bill to abolish the powers of the Corporation of Pilots will be taken up later, should the changes suggested not have the desired effect of giving the Minister absolute control. It is also suggested that a Board of Management with powers from the Minister may be appointed later to discipline the pilots. The board will probably consist of three, one each representing the Department, the Shipping Federation, and the pilots.

Lake Freight Situation.

Our Winnipeg correspondent writes: In view of the exceptionally mild ice conditions that have prevailed on the Great Lakes, the present winter, it is expected that navigation will be in full swing on April 1, on which date the hull and cargo insurance attaches. There is still a good deal of uncertainty as to what action the mates on the U.S. side of the line will take in view of the resolution of the Lake Carriers' Association not to employ mates who are in any way connected with any labor organization, and this uncertainty is having its effect on grain chartering as shippers do not care to sell wheat which they may be unable to move, but amongst the owners the feeling is that there will be no trouble with the mates, more especially in view of the probability of trouble in the coal districts, as trouble with the miners will naturally affect the lake carrying trade to a very large degree. These conditions do not apply so strongly to the Canadian vessels, but the coal strike will more or less affect them, while a mates' strike will be of decided advantage to Canadian vessels on account of making a shortage in lake tonnage on the market.

Considerable chartering has been done for the opening from Fort William, at rate of 2¼c. per bush. to Georgian Bay and Lake Huron ports, and the same rate has been made to Buffalo by U.S. boats, although Canadian vessels are asking 2½c. for that port. Montreal rates have been held at 7c. without insurance, and ¼c. over, including insurance, but owing to the action of the lake underwriters in putting insurance rates very much higher than last season, it is not expected that the vessels will care to continue insuring cargos as in the past, but will in future allow shippers to make their own cargo insurance arrangements. In view of the possible coal strike, coal chartering has been very active all winter and quite a number of boats were loaded with coal early in Feb. at eastern ports, rates to be agreed on at the opening of navigation and therefore no rates have as yet been definitely announced so far as American tonnage is concerned, although some of the Canadian vessels have contracted for the season at 35c. per ton on soft coal, Lake Erie ports to Fort William. Some chartering has also been done for steel rails at 90c. per ton from Sault Ste. Marie, Ont., to Upper Lake ports.

Dominion Marine Association.

The annual meeting was held at Ottawa, Mar. 22, when there was a large representation of the various companies comprising the membership. The secretary, F. King, read the report of the Executive Committee, which dealt at length with the various questions considered during the year, showing the results achieved and the present position of unsettled matters. A committee on Aids to Navigation was appointed upon the recommendation of the Executive Committee. The financial report showed a balance in hand of $1,307.31. Several questions were discussed, including the bills now before Parliament affecting the marine interests, and deputations to the Ministers having charge of the same were arranged for. Following were elected members of the Executive Committee for the current year: J. A. Cuttle, A. A. Wright, A. B. MacKay, T. Donnelly, C. J. Smith, S. Crangle, H. H, Gildersleeve, J. H. Hall, D. Murphy, F. Plummer, G. T. Marks, J. P. Kavanagh. Subsequently the Executive Committee met and elected J. A. Cuttle as President; C. J. Smith as First Vice-President, and G. T. Marks as Second Vice-President.

Later in the day, deputations waited on the Minister of Marine respecting aids to navigation, the hospital tax on sick mariners, and other matters; and the Minister of Railways and Canals with respect to the advertised closing of the Cornwall canal during April; the electric traction system at the Cornwall canal; the protection of bridge piers, etc., in the Lachine canal; the opening of the Farrans' Point lock on Sundays, and also, if possible, the guard lock on the Cornwall canal. The deputation learned that instructions had been given to

The Air Brake Association of America has decided to hold its annual convention in Montreal, June 5, 6 and 7. W. I. Hatch, General Air Brake Inspector, C.P.R., and W. C. Hunter, Manager New Brunswick Coal and Ry. Co., are members of the executive committee.

A directory of officials of all steam, electric and other railways in operation in the United States, Canada and Mexico, has just been issued by Poor's Railroad Manual, 68 William St., New York. The lists are corrected to Feb. 1, and occupy 152 closely printed pages; steam railways taking up 83 pages, electric railways 53 pages, and the remaining pages special lists. There are also given statistics relating to steam railways and street railways, and a general index.

hasten the work on the canals and let in water again at the earliest possible date so that the opening of navigation would not be delayed. The other matters presented were noted and promised consideration.

A full report of the proceedings will appear in our May issue.

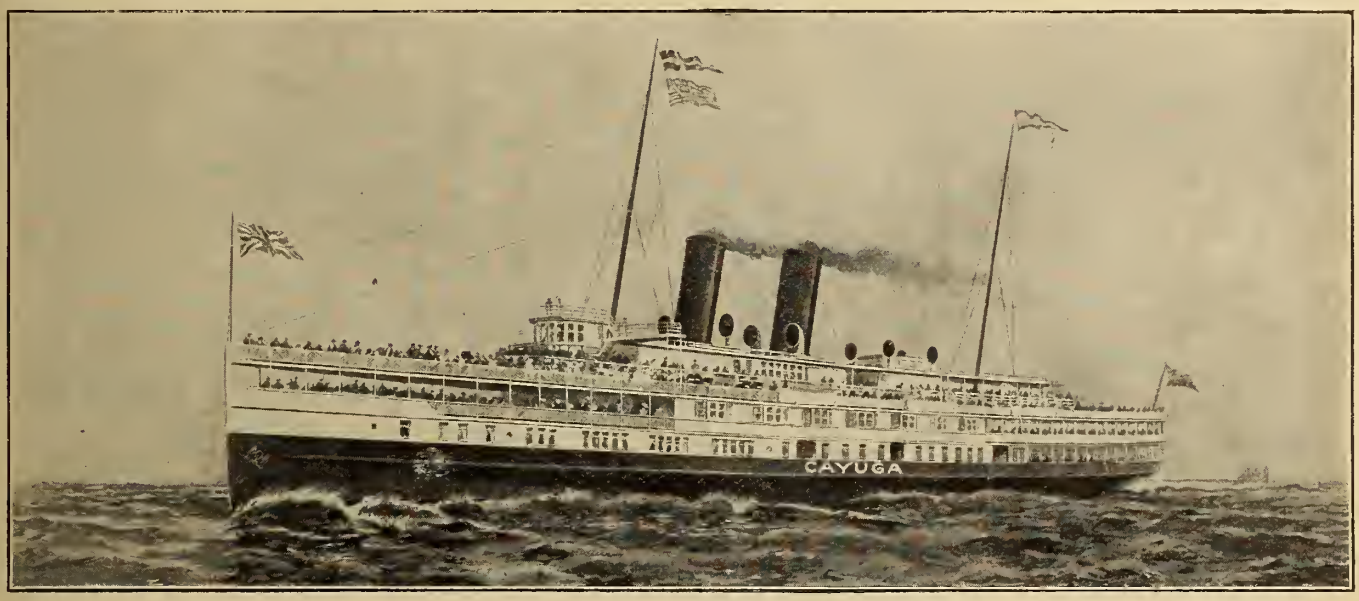
Niagara Navigation Co.'s New Steamer.

The launch of the new steamer for the Niagara Navigation Co. took place from the builder's yard in Toronto, Mar. 3. Notwithstanding the heavy rain and the strong south-east wind that was blowing during the morning, and which was particularly heavy at the time of the launch, there was a very large number of persons present. The christening ceremony was performed by Miss Mary Osler, daughter of E. B. Osler, M.P., President of the company, and the name Cayuga was given to the new steamer as she left the ways.

The vessel is planned on the lines of the day service observation type of steamers, having four principal decks, namely, main deck, promenade deck, upper promenade deck, and lower or orlop deck below the main deck. The hull is of steel, with bilge keels, to reduce rolling to a minimum, and has the following general dimensions:—length, 317 ft. 6 in. over all; beam of hull, 36 ft. 6 in.; over guards, 51 ft. 8 in.; depth, 15 ft. moulded; draught, 10 ft. Internally the hull is divided into eight watertight compartments by seven bulkheads, thus rendering her practically unsinkable. She will be driven by twin screws, power being supplied by two sets of vertical inverted, direct acting quadruple expansion engines, balanced on the most modern principle; cylinders, 17½ in., 25 in., 36 in., and 52 in. diameter by 30 in. stroke. Steam will be supplied at 210 lbs. pressure, by seven Scotch marine boilers, 11 ft. by 12 ft., fitted with two corrugated furnaces, and a system of heated draught. Two smoke stacks will be provided similar to the other steamers of the line. The steamer is to have a guaranteed speed of 22½ miles an hour. The engines are designed to develop 4,300 h.p., which is about 30% greater than that developed by the Montreal, at present the most powerful Canadian steamer, and is only exceeded by a very few passenger steamers on the U.S. side of the Great Lakes.

The interior arrangements of the steamer are primarily arranged to provide the greatest conveniences for the passengers. There will be three gangways on each side, the forward ones for passengers and express, the middle ones for passengers' baggage and the aft one for passengers only. This latter will lead directly into the entrance hall on the main deck, at the forward end of which will be found the purser's office, a parcel checking room and other offices with which passengers have to come in contact. At the aft end will be the ladies' retiring room, which will be specially fitted for the comfort and convenience of ladies, and will include a number of new features. At the forward end a staircase 7 ft. wide will connect the entrance hall with the promenade deck above. The dining-room will be forward on the main deck, and will be fitted with large observation windows on each side, so that an uninterrupted view may be had. It will have a seating capacity for 150. The main deck will be of steel covered with wood, and interlocked rubber tiling will be used as a flooring in several parts of the vessel devoted to passenger accommodation. On the promenade deck the principal feature will be the general saloon, which will extend the full width of the steamer. It will be a particularly handsome apartment, and the sides, instead of being straight, will consist of a series of bow windows, so that views may be had ahead and astern as well as straight out. At each bay seats will be provided so that small parties may keep together. Two of the bays will be finished as private parlors, which will be available for letting to parties who desire to be alone. The upper promenade deck, which will be reached by a stairway from the general saloon, as well as by stairways from outside on the promenade deck, will extend over the whole vessel, instead of ending just forward of the wheelhouse as in most vessels of this type. The rail will be inside the lifeboats, and the entire width of the deck will be available for passengers. The captain's quarters, the wheel house, and the pilot's room will be on this deck. A light shade deck amidships will give shelter over this deck. The space over the engine room, instead of being closed in with steel plates, will be surrounded with a framework in which plate glass sides will be fixed so as to enable passengers to have a view of the machinery. On the lower or orlop deck will be found quarters for the crew, kitchens, smoking room, engines and boilers, etc. The decorations will be particularly striking. The entrance hall will have a heavy beam ceiling; the main stairway will be in cathedral oak; the dining-room in mahogany, and other portions of the passenger accommodation in weathered and quartered oak. The designs show some very fine effects, and will present a rich and artistic appearance. The furnishings of the various rooms will be in harmony with the general decorative design and color scheme.

Following the launch the Canadian Shipbuilding Co. entertained a large party, including representatives of the municipal and financial interests of the city, and of the transportation interests in Canada and the United States associated with the Niagara Navigation Co., at lunch at the King Edward Hotel. The toast list was a short one, F. Nicholls, President of the Shipbuilding Company, opening the proceedings; the Mayor of Toronto proposing prosperity to the Niagara Navigation Co., and E. B. Osler replying; D. R. Wilkie proposing the shipbuilding company, A. Augstrom, its General Manager replying; the sponsor of the steamer proposed by F. W. Cumberland, Vice-President of the Niagara Navigation Co.; our Canadian allies, proposed by H. J. Pearce, President of the International Traction Co., Buffalo; and Manager of the N.N. Co., which was acknowledged by B. W. Folger.



NIAGARA NAVIGATION CO.'S NEW STEAMER CAYUGA.

The Cayuga will be completed for the current season's traffic, it being expected that she will be ready to take up the run on June 15, when in conjunction with the Chippewa and the Corona, the full service of six trips a day will be given. The Chicora will be held as a spare steamer ready for any emergencies.

Notices to Mariners.

The Dominion Department of Marine has issued the following notices to mariners:—

No. 10. Feb. 13.—Nova Scotia—27. Annapolis River, Troop point, lighthouse established. 28. South coast, Madame Island, West Arichat, change in color of back range light.

No. 11. Feb. 16.—New Brunswick—30. South coast, Bay of Fundy, Tiner point fog alarm, change in length of interval between blasts. 31. South coast, Bay of Fundy, St. John Harbor, Partridge Island, change in fog alarm.

THE BRADSTREET COMPANY gathers information that reflects the financial condition and the controlling circumstances of every seeker of mercantile credit. Its business may be defined as of the merchants, by the merchants, for the merchants. In procuring, verifying and promulgating information, no effort is spared, and no reasonable expense considered too great, that the results may justify its claim as an authority on all matters affecting commercial affairs and mercantile credit. Its offices and connections have been steadily extended, and it furnishes information concerning mercantile persons throughout the civilized world.

Subscriptions are based on the service furnished, and are available only by reputable wholesale, jobbing and manufacturing concerns, and by responsible and worthy financial, fiduciary and business corporations. Specific terms may be obtained by addressing the Company at any of its offices.

Atlantic and Pacific Ocean Marine.

The White Star line is having built at Belfast, Ireland, a new steamer to be named the Adriatic, a sister ship to the recently completed Baltic. She will be 710½ ft. in length, and have a tonnage of 23,876, or 1,124 tons less than the Baltic.

W. R. Allan has been appointed General Agent Allan Line Steamships, with office at Winnipeg, Man. His territory will include the entire Canadian Northwest from Winnipeg to the Pacific Coast. H. L. Brown, heretofore C.P.R. station agent at Winnipeg, will assist Mr. Allan.

The season of navigation at St. John, N.B., and Halifax, N.S., will be wound up at the end of the month, the last sailings of the steamers of the big lines taking place between April 21 and 28. The first passenger steamer to sail from Montreal will be the Parisian, on Mar. 4.

A bill is under consideration in the British Columbia Legislature to rectify an error in connection with the capital of the Union Steamship Co. The company was formed 16 years ago, and by an error the shares were issued at $25 each instead of $5 each, and the object of the bill is to reduce the capital accordingly.

The Canadian Government has directed the presentation of a binocular glass to Capt. F. W. Ulyatt; gold medals to Chief Officer W. Brooks, R.N.R., and A West, R.N.R.; and cash donations to several of the crew of the British S.S. Star of Australia, for saving the crew of the Canadian bark Swansea, off Cape Verde, July, 1905.

Application will be made at the current session of the Dominion Parliament for an act incorporating a company with the title of Canadian Lloyds, Limited, to carry on the business of general marine insurance and any other business incidental thereto. Ryan, Bickerdike & Gosselin, solicitors, Montreal, are acting for the promoters.

Capt. McNicholl, commodore of the Allan Line of steamers, has retired from active service, during which he has had conveyed safely across the Atlantic 150,000 passengers. He has been succeeded as commodore by Capt. Vipond, of the turbine S.S. Virginian, who retains command of that steamer, and in the command of the turbine steamer Victorian by Capt. Braes of the Tunisian.

Capt. F. Carey, of the C.P.R. str. Lake Erie, has been appointed captain of the company's new steamer Empress of Ireland, and Capt. Stewart, formerly of the company's steamer Lake Champlain, has been appointed captain of the new steamer Empress of Britain. The latter steamer will make her first voyage from Liverpool May 5, and from Montreal May 19; while the Empress of Ireland will make her first voyage from Liverpool June 23, and from Montreal July 7.

The Allan liner Parisian and the German str. Albano came into collision in Halifax harbor, Mar. 25, 1905, while they were attempting to pick up pilots, and both received considerable damage. Cross actions were brought in the Admiralty Court at Halifax, and judgment was given dismissing the action against the Parisian, and awarding damages to the Parisian as against the Albano. The nautical assessors reported that both vessels were at fault for breaking the rules of navigation. The Albano appealed against both judgments, and the Supreme Court at Ottawa has dismissed both appeals.

In 1903 the Chinese cruiser Quang Tai sank after a collision with the C.P.R. str. Empress of India, and in the litigation which ensued the courts found the C.P.R. steamer to blame and assessed the damages at £45,000 for the vessel; £18,899 9s. 7d. for the munitions of war on board; £1,110 4s. 2d. for coals, etc.; £4,756 11s. 1d. for the clothes and personal effects of the crew; and £1,163 for loss of life, a total of £70,010 3s. 0d. Recently at Shanghai, the C.P.R. asked the Supreme Court to have it declared that its total liability is £84,964 7s. 0d., and that it be at liberty to pay into court £45,314 6s. 5d., as the value of the vessel, etc., and to furnish security for £39,650 0s. 7d., in respect of other claims, and that further proceedings be stayed, except as to costs.

The S.S. Bellerophon, built at Belfast, Ireland, and the Teucer, built on the Tyne, Eng., have been completed for the Holt Line trade between Vancouver, B.C., and Japan. Neither vessel has any masts, but instead there are two pillars forward and two aft, which serve the purpose of derrick posts and are capable of lifting 36 tons. The two forward pillars are joined by a bridge which is 80 feet above the water line. In all 20 winches and derricks can be handled from the deck. The steamers have each a deadweight capacity of 13,000 tons; their dimensions being: length, 482 ft.; breadth, 58 ft.; depth, 42½ ft. They are fitted with two sets of triple expansion engines, cylinders 23, 38½ and 65 in. diameter, by 48 in. stroke; steam being supplied by three boilers at 190 lbs. pressure. Another similar steamer is under construction on the Tyne for the same owners.

A recent press report stated that the Dominion Line of Steamships, which is owned by the International Mercantile Marine Co., had placed orders on the Tyne for five or six freight steamers, and further that it was proposed to replace some of its steamers on the Montreal-Liverpool route with larger and faster ones. The officers of the company in Canada state that there is no foundation for the reports. It is probable that the first part of the story originated from the fact that the Dominion Coal Co. is having five steamers built on the Tyne, a description of which appeared on pg. 45 of our Jan. issue. That other and faster steamers will be placed on the route is not at all unlikely, as with the new steamers which the White Star Line has completed, and has still under construction, the International Mercantile Marine Co. will have the Majestic and Teutonic, which it will be able to transfer to the Dominion Line.

Maritime Provinces and Newfoundland.

Capt. B. Douglas, R.N., naval assistant to the Department of Marine, died at Halifax, N.S., Mar. 5.

The three-masted schooner Otis Miller, of St. John, N.B., has been sold to Sackville, N.B., persons for $2,800.

H. W. Harris has been appointed Government Wharfinger at L'Etete, N.B., and K. Murray Wharfinger at Main River, N.B.

F. H. Sherman, heretofore general agent of the Eastern Steamship Co., has been appointed Superintendent of the Bangor division with headquarters at Rockland, Me.

The new pier erected at Victoria Beach, N.S., by the Dominion Government is 1,350 ft. in length, and cost about $100,000. The difference between high and low water mark at the pier is 27 ft.

The Cape Breton Steamship Co.'s str. Barnes Hawkins foundered off Scattarie Island, N.S., Mar. 11, after having had her bow stove in by drift ice. She had a cargo of 770 tons of coal on board for Port Mulgrave.

At the annual meeting of the Charlottetown Steam Navigation Co., held at Charlottetown, Mar. 9, William Richards, B. Rogers, A. E. Ings, were re-elected directors. It was decided to postpone the election of a secretary in place of the late F. W. Hales.

The Maritime, Newfoundland Wreck and Salvage Co. has completed its organization, and owns the vessels Stella Maris and Bouncer. It will be in a position to undertake salvage operations early in the season. Capt. A. Manley, St. Johns, Nfld., is in charge of its operations.

Capt. A. Cameron, of Charlottetown, P.E.I., is at Walker-on-Tyne, Eng., superintending the completion of the new steamer for the Charlottetown Steam Navigation Co. He will have charge of the steamer on the voyage to Charlottetown, where she is expected to arrive in June.

W. Thomson & Sons, Halifax, N.S., have taken out papers of registration on behalf of Royal Exchange Assurance Co., London, Eng., for the purpose of doing a marine insurance business in the province. J. H. S. McClure, formerly of Montreal, will have charge of the company's business at Halifax.

The whaling companies in Newfoundland did not have very prosperous times during 1905, several of them reporting losses on the year's operations. The St. Marys Whaling Co. has decided to go into voluntary liquidation, and the Micmac Whaling Co. decided to amalgamate with the Safe Harbor Whaling Co.

The International Navigation Co. of Canada, has declared a dividend of 6% from the earnings of 1905. The company proposes to sell its str. Lady Eileen, which was built in Scotland in 1904-05, for the service and to build a larger and more commodious vessel. The run is between Campbellton, N.B., and ports in Chaleur Bay.

The operations of the Fredericton and Woodstock Steamboat Co. for 1905, resulted in a loss of several hundred dollars, and it was decided to apply to the Provincial Government for an increase of the subsidy. Following are the directors for the current year: J. S. Neill, D. Munro, Fredericton, N.B.; J. Johnson, Woodstock, N.B.; R. Scott, Dumfries; M. B. McNally, Queensburg.

The Steamship Cacouna Co., with a capital of $35,000, the Steamship Louisburg Co., with a capital of $48,000, and the Steamship Carbon Co., with a capital of $45,000, have been incorporated under the Dominion Companies' Act, to purchase the Cacouna, Louisburg and Cape Breton respectively, or other steamers, and to carry on a general

C.P.R. LANDS

THE CANADIAN PACIFIC RAILWAY COMPANY have 10,500,000 acres of choice farming lands for sale in Manitoba, Saskatchewan and Alberta. Ranching lands generally $4.00 to $5.00 per acre. Lands adapted to grain growing and mixed farming $5.00 to $15.00 per acre according to quality and location. Maps showing the lands in detail will be sent free on application.

TERMS OF PAYMENT.

An actual settler may purchase not more than 640 acres, on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal with interest in nine equal instalments annually thereafter as shewn in the following table :—

160 Acres at	$4.00	per acre,	cash payment	$95.85,	first year's interest	$32.64	and nine instalments of	$80.00
" "	4.50	"	"	107.85,	" "	"	36.73	"	"	90.00
" "	5.00	"	"	119.85,	" "	"	40.81	"	"	100.00
" "	5.50	"	"	131.80,	" "	"	44.89	"	"	110.00
" "	6.00	"	"	143.80,	" "	"	48.98	"	"	120.00
" "	6.50	"	"	155.80,	" "	"	53.05	"	"	130.00
" "	7.00	"	"	167.80,	" "	"	57.16	"	"	140.00
" "	7.50	"	"	179.75,	" "	"	61.22	"	"	150.00
" "	8.00	"	"	196.70,	" "	"	65.28	"	"	160.00

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of 6 per cent. per annum.

Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN,
Land Commissioner C.P.R. Co., Winnipeg.

CANADA NORTH-WEST LAND CO

This Company has 650,000 acres of selected lands in Manitoba and Assiniboia which offer excellent opportunities to settlers and investors who desire to secure good lands in well-settled districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

ISSUE OF NEW ORDINARY CAPITAL STOCK.

NOTICE is hereby given that pursuant to Resolutions passed at the Special General Meeting of Shareholders on 19th March instant, a new issue of the Ordinary Capital Stock of the Company to the amount of $20,280,000, in 202,800 shares of $100 each, will be offered at par to the ordinary shareholders of record at the closing of the books for the purpose, on the basis of 20%, or one share in five of their then respective holdings.

The Books of the Company will be closed for this purpose in London, New York and Montreal at 3 p.m. on Friday, April 20th, and re-opened on Monday, May 7th, 1906.

The right to subscribe will expire at 3 p.m. on May 25th, 1906.

Payments will be received at the Bank of Montreal, London, New York or Montreal, as follows:—

20% or $20 per share on subscription, on or before May 25th, 1906.

20% or $20 per share . . . July 26th, 1906.
20% or $20 per share . . . Sept. 26th, 1906.
20% or $20 per share . . . . Nov. 26th, 1906.
20% or $20 per share . . . . Jan. 25th, 1907.

The new stock upon which all payments have been duly made as called for will rank for dividend for the half-year ending December 31st, 1906.

A Circular containing the terms of subscription and enclosing warrants of subscription will be mailed to the Shareholders after the closing of the books as above stated.

Dated at Montreal this 20th day of March, 1906.

By Order of the Board,
CHARLES DRINKWATER,
Secretary.

navigation business. The provisional directors in each case are:—F. W. Warren, W. H. Covert, J. K. L. Ross, H. J. McCann, Sydney, N.S.; E. H. Russell, Glace Bay, N.S. These steamers are owned by the Dominion Coal Co., and the new companies have been incorporated with a view of operating them to greater advantage than can be done by the Coal Co. direct. The provisional directors are associated with the Coal Co., and the offices of the new companies are at Sydney. It is stated that the other steamers owned by the Coal Co. are to be similarly transferred to separate operating companies.

The fleet of steamers to be operated by the Dominion Coal Co. during the season of 1906 includes five steamers owned by the company; three steamers under construction, which will be chartered, eleven others under charter, one tug and three barges. The steamers owned are:—

	Tons.
Cape Breton (dead weight capacity)	2,500
Louisburg " " " "	2,450
Cacouna " " " "	1,950
Bona Vista " " " "	1,600

Province of Quebec Marine.

The Montreal Harbor Commissioners propose to erect a bridge from Commissioners St. to Victoria pier, at a cost of about $11,000.

S. Chapados has been appointed Government Wharfinger at Anse-aux-Gascons, Que., and O. Denis, Wharfinger at Paspebiac, Que.

The Montreal Harbor Commissioners discharged all its officers prior to a rearrangement of duties of the different departments. The proposed alterations will, it is stated, bring about a considerable saving in expenses.

The channel in Montreal harbor is to be swept as early as possible after the opening of navigation, in order to clear it of any obstructions to navigation. The work will be done by direction of the Harbor Commissioners.

The Quebec and Levis Ferry Co. has made considerable improvements to its wharf property and to its steamers during the winter. The steamers have been almost entirely rebuilt, spaces having been apportioned for passengers and for vehicles, and at the slips a sidewalk has been constructed for passengers.

The Ottawa River Navigation Co.'s str. Sovereign was burned to the water's edge at her wharf, Lachine, Mar. 17. The Sovereign was a paddle-wheel steamer with engines of 400 h.p., built at Montreal in 1889, her dimensions being: length, 162.4 ft.; breadth, 25.5 ft.; depth, 7.4 ft.; tonnage, gross, 636 tons; register, 323 tons.

The Montreal and Great Lakes Transportation Co. has been organized at Montreal, to operate a line of steamers between that port and the Upper Lakes. The officers and directors are: President, R. Bickerdike, M.P.; Vice-President, J. H. Hall, Ottawa; Managing Director, C. A. Jaques, Montreal; other director, S. S. Samuel, Toronto.

A deputation representing the Shipping Federation of Canada recently met the Minister of Marine to discuss the improvements required in the St. Lawrence River between Montreal and Farther Point. One of the principal matters discussed was sweeping the channel, and Mr. Allan suggested the purchase of a vessel for this special purpose.

The question of the height of the bridge being constructed at Quebec, above high water mark, has been discussed of late in the technical magazines, and a doubt is expressed as to its bearing on the future of the port of Montreal. A question was asked on the subject in the House of Commons, and it was stated that the height of the bridge was sufficient to give clearance to steamers of much larger size than those now in the trade or under construction. H. A. Allan, of the Allan Steamship Line, said that the height of the bridge had not caused any serious apprehension to steamship owners.

The contract for the maintenance of a wrecking plant on the St. Lawrence is held by G. T. Davie & Son, Quebec, the annual subsidy paid by the Department of Marine is $10,000. The contractors agree to keep the wrecking steamer Lord Strathcona, or other steamer equal to her in all respects, with proper and sufficient wrecking plant and up-to-date and proper pumps, attendant schooner and such skilled labor and such other plant as may be required, in constant commission at Quebec, during the entire season of navigation; the said vessel, plant, etc., to be at all times available for the purpose of affording aid to vessels in distress in the river or gulf of St. Lawrence, and shall be employed for no other purpose. After Oct. 15, the vessel shall not be obliged to go to the assistance of any vessels in distress at any point further down the gulf than Cap Chatte. The contractors must, at all times, during the performance of the contract, abide by and conform to all such orders and regulations as may be made by the Minister with regard to the business of the said steamer in the performance of the contract.

Ontario and the Great Lakes.

Capt. G. C. Coles, of Collingwood, Ont., is having a 20 h.p. gasolene launch, 33 ft. long, by 9 ft. beam, built.

Capt. T. J. Craig, of Kingston, Ont., has passed his examination as master of a passenger steamship navigating in salt water.

Capt. T. Donnelly, Kingston, Ont., has been appointed surveyor for Canada for the British Corporation of the Registry of Shipping, Glasgow, Scotland.

Capt. H. Sarvis, for the last few years a resident of Port Arthur, Ont., but formerly well known in Upper Lakes marine circles, died at Port Arthur recently.

An order has been placed in Toronto for a new steamer for the C.P.R. Upper Lakes trade. The dimensions and plans have not been finally determined upon.

An Order-in-Council has been passed authorizing the name of the tug J. K. Secor, official no. 116,313, registered at Amherstburg, Ont., to be changed to that of Winner.

The str. Ojibway (formerly known as the A. J. Tymon) was slightly damaged by a fire on board, Mar. 7. The steamer has been lying at the Yonge St. wharf during the winter.

The str. R. A. Packer, of Bay City, Mich., has been rebuilt for Gauley Bros., and will be renamed Batachawana. Her dimensions are: length, 209 ft.; breadth, 34 ft.; depth, 16 ft.; gross tonnage, 921 tons.

The str. Wherenow has been chartered by the Rathbun Co. for use as a ferry between Gananoque, Ont., and Clayton, N.Y. Heretofore she has been running during the season between Kingston and Thousand Islands Park.

Later information states that it has been arranged to have the steamer run between Charlotte, N.Y. and Toronto daily during the exhibition, and from Sept. 12 to Nov. 1 she will run between Charlotte and Ogdensberg, N.Y.

The suit entered in connection with the proposal to transfer the str. City of Windsor to the Northern Navigation Co. has not been settled, but the sum in dispute has been paid into court, and the steamer handed over to the N.N. Co.

The New Ontario Navigation Co. is seeking to recover damages from the Montreal Transportation Co., for the injury to the str. Neepawa in the Welland Canal, in 1904, caused, as alleged, by the negligence of the crew of the Westmount.

The Reid Wrecking Co.'s tug Salvor sank at her moorings, Holland, Mich., recently. The tug had been engaged in salvage operations in U.S. waters in the fall, and was laid up with the U.S. tugs engaged in the same service at Ottawa Beach for the winter.

The first vessel arriving in Toronto for the season of navigation, 1906, was the Hamilton Steamboat Co.'s Macassa, which arrived on Mar. 10. She made an attempt earlier in the week, but had to give it up, the ice in Hamilton bay being too heavy for her to break through.

Current reports in Rat Portage and Fort Francis, Ont., state that the steamers of the Rainy River Navigation Co., will probably be sold, and that it is understood that the Canadian Northern Ry. and the Duluth, Rainy River and Winnipeg Ry. will be interested in the purchase.

The Canadian Pacific Car and Passenger Transfer Co. has offered to the municipalities of Brockville, Ont., and Morristown, N.Y., one of its ferry steamers as a ferry between these two points. The financial statement showed a loss of $2,743.49 in operating the ferry during the last six years, not including interest or depreciation in value of the property. No action has been taken in the matter.

The Mathews Steamboat Co., of which J. and J. T. Mathews, Toronto, are managers, is having a steamer built in Great Britain. Unconfirmed reports state that her dimensions will be: length, 356 ft.; breadth, 47 ft. 6 in.; depth, 23 ft.; that she will have a capacity of 110,000 bush. on the Upper Lakes, or 70,000 to Montreal, and will have a speed of 12 miles an hour. As the locks on the canal system are 270 ft. by 45 ft., there must be some error in the reported dimensions.

The keel has been laid at Meaford, Ont., for a new steamer for J. Perks & Son. The dimensions of the new steamer will be: length over all, 117 ft.; breadth, 24 ft.; moulded depth, 10 ft. The engine will be constructed at Goderich, Ont., and will be of the fore and aft compound type, cylinders, 14 and 28 in., by 18 in. stroke; the boiler to have a working steam pressure of 125 lbs. Although primarily a freight carrier, accommodation will be provided for a number of passengers.

The Erie and Ontario Dredging Co. has been incorporated under the Dominion Companies' Act, with a capital of $96,000, and offices at Welland, Ont., to carry on a general contracting, dredging, towing, wrecking and salvage business in all branches on any of the rivers, harbors, lakes, bays or streams of Canada; and in connection

IDEAL RAILWAY FENCING

MADE TO LAST.

Large gauge (No. 9) hard steel wire is used throughout, decreasing cost of maintenance, insuring durability and serviceability.

IDEAL FENCE has been adopted as a standard by all the leading Railways in Canada. More IDEAL is used by Railways this year than all other makes combined.

JOHN LECKIE LIMITED

TORONTO

therewith to build or charter steam and other vessels, dredges, etc. The provisional directors are:—D'A. Scott, Ottawa; E. A. C., G. S. Pew, Toronto; E. J. Hingston, S. J. Dark, Buffalo, N.Y.

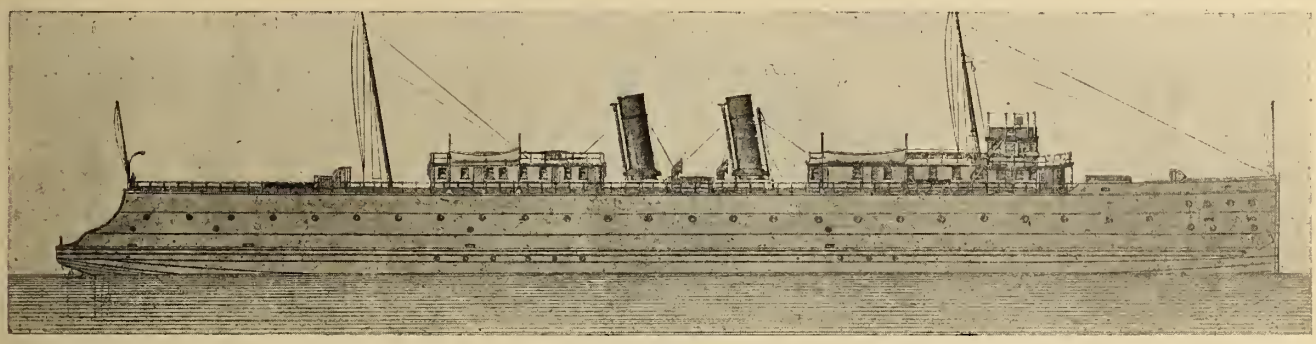
The St. Lawrence Transportation Co. has been incorporated under the Dominion Companies' Act, with a capital of $20,000 and offices at Toronto, to acquire steam and other vessels, to carry on a general navigation business and in connection therewith to construct and operate elevators. The incorporators and provisional directors named are all in the office of a Toronto legal firm. Under the provisions of the act respecting the licensing of extra provincial companies, the company has been registered in Ontario, J. S. Lovell, Toronto, being appointed its attorney.

The package freight str. Arabia has been purchased by Jaques & Co., Montreal, and is being fitted up as a passenger and freight steamer. The Arabia is an iron screw steamer, built at Buffalo, N.Y., in 1873, and classed A1½; her dimensions are: length, 222 ft.; breadth, 34 ft.; depth, 14 ft.; gross tonnage, 1,395 tons. She is fitted with engines of the double steeple compound type, 20 and 40 in. cylinders, by 36 in. stroke; steam being supplied by a fire-box boiler, 10 by 18. The steamer will be put on a run between Montreal and Upper Lake ports in conjunction with the City of Montreal, which was put on the run in 1905.

The Rainy River Navigation Co. has been incorporated under the Dominion Companies' Act, with a capital of $99,000, and offices at Mattawa, Ont., to carry on a general navigation business. The provisional directors are:—L. H. Timmins, J. Loughrin, A. Ferland, C. W. Haentschel, Mattawa; G. H. Rochester, C. A. McCool, Ottawa. The company proposes to acquire the steamers, wharves, etc., of the Lumsden Line, operated on Lake Temiskaming. The organization has been completed as follows:—President, L. H. Timmins, Mattawa, Ont.; Vice-President, J. Loughrin, Mattawa, Ont.; Managing Director, G. H. Rochester, Ottawa; Manager, J. A. Larochelle, Mattawa, Ont.; other directors, C. W. Heantschel, M.D., N. Tobias, Ville Marie, Que.; M. J. Malone, North Temiskaming, Que.

The Temiskaming Navigation Co. has been incorporated under the Dominion Companies' Act, with a capital of $99,000, and offices at Mattawa, Ont., to carry on a general navigation business. The provisional directors are:—L. H. Timmins, J. Loughrin, A. Ferland, C. W. Haentschel, Mattawa; G. H. Rochester, C. A. McCool, Ottawa. The company proposes to acquire the steamers, wharves, etc., of the Lumsden Line, operated on Lake Temiskaming. The organization has been completed as follows:—President, L. H. Timmins, Mattawa, Ont.; Vice-President, J. Loughrin, Mattawa, Ont.; Managing Director, G. H. Rochester, Ottawa; Manager, J. A. Larochelle, Mattawa, Ont.; other directors, C. W. Heantschel, M.D., N. Tobias, Ville Marie, Que.; M. J. Malone, North Temiskaming, Que.

The Rochester and Ogdensburg Navigation Co. has been organized at Ogdensburg, N.Y., E. B. Capron being elected President; G. Phillips, Secretary, and D. R. Armstrong, Treasurer. The Company has an authorized capital of $50,000 and proposes to operate a freight and passenger service on Lake Ontario and the St. Lawrence River. The company's plans provide for running into Kingston, Ont., three times a week. The str. State of New York, heretofore running on the Toledo-Cleveland line, has been purchased, and will be fitted out in Detroit, Mich., for her new run. The State of New York is an iron paddle wheel steamer, built at Wyandotte, Mich., 1883, and classed A1½. Her dimensions are: length, 203 ft.; breadth, 32 ft.; depth, 10 ft.; gross tonnage, 808 tons. She is fitted with compound beam engines, 36 x 80 and 44 x 120, steam being supplied by two fire-box boilers 12¾ x 18. The steamer is expected to be on her new route June 1. The guards will have to be removed to bring her through the Welland Canal.



C.P.R. CAR-FERRY

The Port Huron and Duluth Steamship Co. has been operating for a number of years between Port Huron, Mich., and Duluth, Minn., in connection with the G.T.R. The company operated two vessels, the Russia and the Wyoming, under charter, and has recently purchased the former. The Russia was built at Buffalo, N.Y., 1872, her dimensions being:—length, 232 ft.; breadth, 36 ft.; depth 13 ft; and her gross tonnage 1,501 tons. She is fitted with steeple compound engine, cylinders 24 and 40 in. diameter by 36 in. stroke, steam being supplied by two Scotch boilers, 10 by 11½ ft. C. O. Duncan, Port Huron, is the company's Traffic Manager.

The International Waterways Commission met at Toronto, March 6, and after discussing a number of matters, adjourned to meet at Washington, D.C., April 6. G. Gibbons, chairman of the Canadian section of the Commission, stated in an interview after adjournment: "No definite conclusion has been reached in the various items which engaged the attention of the Commission. We have practically left all the matters over until next month, when definite arrangements will be made concerning the regulation of Niagara water power, the Michigan Central tunnel construction under the Detroit River and the Soo proposition. The engineers' reports have virtually been agreed upon by all the members."

The Montreal Transportation Co. has purchased the Kingston and Montreal Forwarding Co. The barges owned by the latter company, which will be operated by the Montreal Transportation Co. are 13 in number, having a total capacity of 413,000 bush., distributed as follows:—Beauport, 26,000; Bismarck, 25,000; Cherokee, 28,000; Condor, 40,000; Dakota, 38,000; Hiawatha, 40,000; Huron, 36,000; Iroquois, 28,000; Jet, 24,000; Lapwing, 40,000; Princess, 22,000; Siren, 24,000; Thrush, 42,000. These barges will be used in the company's regular trade between Kingston and Montreal for grain, and will also be used in carrying coal from Lake Ontario points and pulpwood from the Lower St. Lawrence.

The officers and directors of the Rainy River Navigation Co., for the current year, are:—President and Manager, G. A. Graham; Vice-President, W. Ross; other directors: J. T. Horne, C. Lewis, H. Williams; Secretary-Treasurer, M. McCulloch. We have been advised that it has not been decided what steamers will be operated during the coming saeson, the reason for the delay being that nothing is known as to the improvements which may be made at the Sault rapids of the Rainy River by the Dominion Government. The question of hotel accommodation for tourists at Kenora, Ont., is another factor. At present this is limited, the project of the construction of a tourist hotel on the lake front either by the C.P.R. or a private company, which has been discussed for several years, still being in abeyance.

The car ferry which is under construction at Detroit, Mich, by the Great Lakes Engineering Co., for the C.P.R., the Pennsylvania Rd., and the J. W. Ellsworth Co., to run between Ashtabula, Ohio, and Port Burwell, Ont., will be what is known as the enclosed type for open lake service, her dimensions being:—length over all, 350 ft.; breadth, 56 ft.; depth 20½ ft. She will be provided with four tracks, having accommodation for 30 cars and capable of carrying 1,500 tons of coal on each trip. She will be equipped with two triple-expansion engines, cylinders 19½, 32 and 54 in. diameter, by 36 in. stroke, steam being supplied by four Scotch boilers, 13 ft. 2 in., by 12 ft., at 175 lbs. pressure; capable of giving a normal speed of 12 miles an hour. The hull will be of steel, and accommodation will be provided for the crew, and there will also be three staterooms for the managing owner. The staterooms and bathrooms, etc., will be equipped throughout in the most modern style.

A return has been issued by J. J. O'Connor, Port Arthur, Ont., showing the shipment of grain during the season of navigation from April 25 to Dec. 12. One table shows the names of the vessels engaging in the trade, the total quantities of wheat, oats, barley and flax carried during the season, in comparison with 1904. There were engaged 45 Canadian steamers, 4 Canadian schooners, and two Canadian barges; 65 U.S. steamers and four U.S. schooners. The Canadian vessels carried 29,371,881 bush. of wheat; 527,561.26 bush. oats; 345,392 bush. barley, and 334,966.48 bush. flax; while the U.S. vessels carried 11,653,964 bush. wheat; 195,851.16 bush. oats and 18,829.52 bush. flax. The second table gives the ports to which the shipments were made, and shows how much was shipped in Canadian and how much in U.S. vessels, as between April 25 and Aug. 31, and Sept. 1 and Dec. 12.

A motor launch building works has been started at Edmonton, Alta., and orders for half a dozen launches, fitted with motors from 2 h.p. to 5 h.p., have been received.

Revellion Freres Limited, which has been given a supplemental charter by the Dominion Government to enable it to carry on and extend its operations throughout Canada, has for some years, been running boats on the Arthabaska River and connecting waters.

The Selkirk, Man., Board of Trade has been informed that the Dominion Department of Public Works proposes undertaking extensive works of improvement at the mouth of the Red River at an early date, and that Parliament would be asked, at its current session, to vote the necessary funds.

A matter of interest and importance to Winnipeg and to those engaged in navigation on the Red River, has been under discussion at Grand Forks, N.D. The North Dakota Drainage League held a meeting Feb. 27, which was attended by Hon. Dr. McFadden, representing the Manitoba Government; the Mayor of Winnipeg, and others from Manitoba. The question under discussion was the annual overflow of the Red River, and a resolution was passed asking the Canadian and the U.S. Governments to join in having full surveys made, with a view of preventing the flooding, and of improving the navigation in the river. The suggestion is to cut a canal from Lake Traverse across the divide, to Big Stone Lake, and so divert some of the water running into the Red River into the Minnesota River; to dredge the Red Lake River for some 15 miles from the lake, and then build a dam so as to regulate the flow of water, and to construct a dam on the Pembina River. The cost of the several works is estimated at $5,000,000. A resolution approving of these proposals was adopted, Hon. Dr. McFadden stating that the Manitoba Government would give it support.

B.C. and Pacific Coast Marine.

Hon. A. Morrison has been appointed Deputy Judge in Admiralty of the Exchequer Court of Canada for the British Columbia Admiralty District.

A large barge pile driver has been launched at New Westminster, B.C., for the A.B.C. Packing Co., for use at the canneries and salmon traps on the west coast of Vancouver Island.

An Order-in-Council has been issued defining the boundaries of the harbor of Ladysmith, B.C., and declaring that the provisions of the act respecting Harbor Masters shall apply thereto.

It is proposed to tow the wrecked str. Portland from the Ketchikan beach, where she has been all winter, to Seattle, Wash., for repairs. The underwriters' surveyor reports the hull to be in good condition.

The str. Transfer has been given a general overhaul at Victoria, B.C., and she left Mar. 4, for New Westminster. She has been placed on the New Westminster-Steveston run, in place of the Rithet, which has gone to Victoria.

The Esquimalt and Nanaimo Ry. is having built at Victoria a large car barge, capable of carrying 15 cars, for use between the Island and the mainland. The barge will be 245 ft. long, 42 ft. beam, and will have a depth of 13 ft. 6 in.

The C.P.R. str. Princess May is having three new single-ended boilers installed in place of the two old double enders, and is having a number of improvements made to her upper works. The company's str. Charmer is also being given an overhaul.

H. Sproat, marine engineer, formerly with the Columbia and Kootenay Navigation Co., and latterly engaged in the Yukon trade, died recently at Victoria, B.C. His experiments with engines for stern-wheel steamers resulted in many improvements being made.

The Department of Marine has arranged for the placing of two lifeboats on the Vancouver Island coast. One will be kept on the wrecking steamer ready for use at any point where its services may be required, and the other will be stationed on Bamfield Inlet.

The Westminster Fish and Towing Co. has placed an order for a new tug at New Westminster, B.C., to have the following general dimensions:—length, 80 ft.; breadth, 16 ft.; draught, 7½ ft. She will be fitted with compound engines, cylinders 9 by 20 inches, and 15 in. stroke, and the boiler will carry 160 lbs. working pressure.

Among the Express Companies.

The Canadian Ex. Co. has opened offices at Nash's Creek and Nelson, N.B.

R. Thom, agent for the Canadian Ex. Co., Stayner, Ont., died there March 1, aged 60.

The manager of the Maritime Ex. Co. is W. Fraser, Traffic Superintendent Dominion Atlantic Ry.

The Dominion Ex. Co. has given a donation of $1,000 towards the funds for the erection of a new general hospital at Toronto.

V. G. R. Vickers, Superintendent Dominion Ex. Co., Montreal, has been proposed for membership on the Montreal Board of Trade.

The New Brunswick Government collected $250 each from the Dominion Ex. Co., and the Canadian Ex. Co., for business tax during 1905.

The Dominion Ex. Co. has opened offices at Alderside, Daysland, Exshaw, Alta.; Buxton, Dunsford, Gillies' Depot (formerly Cassidy), Glanworth, Ont.; Cardwell, Komura (formerly Togo), Oncree, Sask.

The Dominion Ex. Co., we are advised, while having acquired land for the erection of stables at Vancouver, B.C., does not intend to build at present. The purchase was made in anticipation of future needs.

The Dominion Ex. Co. and the Canadian Northern Ex. Co. has arranged terms for the interchange of business between points in the exclusive territory of each. The new arrangement came into force Mar. 10.

The Dominion Ex. Co. announces that it will now accept money and valuables for transit to Cobalt, Haileybury, Latchford and New Liskeard, Ont., on the Temiskaming and Northern Ontario Ry., but not to any other points on the line.

A bill before the New Brunswick Legislature proposes to amend the liquor license act declaring it to be an offence for any wholesale liquor dealer to send C.O.D. by express or otherwise to any place where the Canada Temperance Act is in force, and providing penalties for breaches of the act. The penalties are the cancellation of the consignor's license; a fine of from $40 to $100 against the manager or agent of the express company, or other persons guilty of the offence.

In the case of Smith against the Canadian Ex. Co., which was originally tried by the County Judge of Wentworth, Ont., the plaintiff recovered damages for the misdelivery of trees. The trees were intended for Aylmer, Que., but were wrongly sent to Aylmer, Ont. When they reached Aylmer, Que., the consignee refused to accept them, and the consignor sued the express company for the price of the trees. A division court has now set aside that judgment on the ground that the refusal of the consignee to accept delivery put an end to the transitu.

The Canadian Ex. Co. has rearranged in some respects the divisions and routes into which its territory is divided, the new boundaries, etc., being as follows:—

SUPERINTENDENTS.—J. H. Sparling, Western Division (which includes Northern and Midland divisions, except that portion of the division between Belleville and Peterboro and between Whitby and Manilla Jct.) Headquarters, Toronto.

H. C. Creighton, Atlantic Division, has charge of all details on Intercolonial Ry. east of River du Loup and of all lines operated in the Maritime Provinces. Headquarters, St. John, N.B.

R. Murphy, Assistant Superintendent, has charge of Central and Eastern Divisions (including the portions of Midland Division between Belleville and Peterboro and between Whitby and Manilla Jct.). Headquarters, Montreal.

ROUTE AGENTS.—E. Allen, Toronto, Ont., has charge of the following routes:—Nos. 4 (west of Port Union), 18 (Peterboro to Lakefield only), 19, 20, 22, 23, 24, 32, 33, 34, 72 (west of Kearney), and 99, reporting to Superintendent Sparling.

H. M. Gain, Richmond, Que., has charge of the following routes:—Nos. 1, 2 (east of Point St. Charles), 7, 8, 11, 52, 53, 54, 85, 86, 89 and 110, reporting to Assistant Superintendent Murphy.

J. P. Hetherman, Toronto, has charge of the following routes:—Nos. 5 (west of Parkdale), 13, 38 (North of Guelph), 39, 43, 45 (north of Palmerston), 46, 48 (north of Georgetown), 49, 50, 51 and 107, reporting to Superintendent Sparling.

G. W. Hickey, Hamilton, Ont., has charge of the following routes:—Nos. 12, 16, 26, 27 (Hamilton to Eastwood inclusive), 29, 30, 31, 36, 38 (Harrisburg to Hespeler inclusive), 42, 44, 47, 48 (Hamilton to Milton inclusive), 106 and 108, reporting to Superintendent Sparling.

H. N. Lingley, Truro, N.S., has charge o the following routes:—Nos. 57 (Amherst to Halifax), 60, 61, 62, 63, 64, 66, 91, 96, 97, 98, 100, 102, 111, 116, 117, 118, 119 and 120, reporting to Superintendent Creighton.

B. S. Murray, London, Ont., has charge of the following routes:—Nos. 6, 14, 15, 17, 27 (Woodstock to London), 28, 35, 37, 40, 41, 45 (Stratford to Listowel inclusive), 103 and 115, reporting to Superintendent Sparling.

F. Norman, Montreal, has charge of the following routes:—Nos. 3 (Montreal to Coteau inclusive), 9, 10, 67, 68, 69, 70, 71, 72 (Madawaska to Kearney inclusive), 73, 84, 87, 88, 112, 113 and 114, reporting to Assistant Superintendent Murphy.

A. M. Patterson, St. John, N.B., has charge of the following routes:—Nos. 55, 56, 57 (Moncton to Aulac inclusive), 58, 59, 65, 90, 92, 93, 94, 95, and 101, reporting to Superintendent Creighton.

G. H. Waterhouse, Kingston, Ont., has charge of the following routes:—Nos. 3 (River Beaudette to Kingston), 4 (Kingston to Port Union inclusive), 21, 25, 77, 78, 79, 80, 81, 82, 83, and 109, reporting to Assistant Superintendent Murphy.

At offices where route agents meet the one in charge will be as follows:—Allandale, Barrie, Manilla Jct., Peterboro, Toronto, E. Allen. River du Loup, River a Pierre, H. M. Gain. Berlin, Stratford, Palmerston, J. P. Hetherman. St. Thomas, Woodstock, B. S. Murray. Coteau, F. Norman. Agents between Belleville and Peterboro and between Whitby and Manilla Jct. will note they are now placed in Assistant Superintendent Murphy's instead of Superintendent Sparling's Division as heretofore, and report accordingly.

Telegraph and Cable Matters.

The Newfoundland Government proposes making a number of improvements in the wireless telegraph stations on the Labrador coast during the current season.

The Anglo-American Telegraph Co. is considering the possibility of removing its station at Placentia, Nfld., to the Jersey side, owing to the cables laid across the gut there being continually damaged by anchors.

The Dominion De Forest Wireless Telegraph Co. has made arrangements with the De Forest Wireless Telegraph Syndicate to build two stations, one on the Irish coast and one on the Canadian coast, for trans-Atlantic communication.

The Reid Newfoundland Co.'s str. Bruce has been equipped with Marconi wireless telegraph apparatus, and it is expected that a contract will be made for installing the apparatus on one or more of the steamers on the Labrador run.

The Department of Marine proposes to construct three Marconi wireless telegraph stations on the Pacific coast, but the localities of the stations, and the details in connection with their equipment have not been finally decided.

Marconi wireless telegraph stations have been constructed by the Department of Public Works at the Citadel, Quebec, and on the quarantine island, as a reserve in case of the breaking of the cable. The stations will also be used for reporting vessels during the season of navigation.

Commander Spain has prepared a report upon the Marconi wireless telegraph stations established by the Dominion Government. There are ten high power stations and three low power stations, a list of which appeared on pg. 79 of our Feb. issue. Six of the Government steamers have also been fitted with the apparatus. The initial cost of each high power station is $8,500, and of each low power station, $5,000, and the annual cost of maintenance is about $1,800. The cost of equipment of each vessel is about $1,550.

The Northern Commercial Telegraph Co. will apply at the current session of the Dominion Parliament for an act authorizing it to extend its operations and undertaking throughout Canada; to increase its capital stock and for other purposes. The company was incorporated by an act passed in 1898, power being given to construct land telephone and telegraph lines in British Columbia and the Yukon Territory, and to connect the same by cables. Power was given in 1899 to construct branch lines and in 1900 the capital was increased to £500,000. The offices of the company are in London, Eng., and the incorporators were: Lord Thurlow, T. Van Puten, London, Eng.; E. Friedburg, described as "of the county of Surrey, Eng."; W. Baird, W. Naismith, Vancouver, B.C.; A. Haley, Windsor, N.S.; I. Burpee, St. John, N.B.

An offer has, it is understood, been made through the G.T.R. by the trustees of the Carnegie Hero Fund to provide gold medals and other substantial awards for the men who risked their lives in the disaster at Sarnia tunnel, Oct. 9, 1904, when four men were suffocated, owing to the breakdown of a train.

The Central New York Telephone and Telegraph Co. is expending a considerable sum in improving its service in the Thousand Islands territory. One of the new cables to be laid will be for the purpose of giving a direct connection between Cape Vincent, N.Y., and Kingston, Ont., and another will be laid from Massena Point, N.Y., to Cornwall, Ont.

The Mackay Companies.

The trustees, in their annual report, state: The Mackay Companies owns the whole or part of the capital stock of 74 prosperous cable, telephone and telegraph companies in the United States, Canada and Europe, including the entire capital stock of the Commercial Cable Co., and the various companies constituting the land line system, known as the Postal Telegraph. The Mackay Companies is one of the largest stockholders in the American Telephone and Telegraph Co., commonly known as the Bell Telephone Co. During the past year the Mackay Companies has acquired the control of the North American Telegraph Co., which for 20 years has owned and operated a telegraph system in Minnesota, Wisconsin, Iowa and Illinois, the stockholders of that Co. having exchanged a portion of their stock for preferred shares in the Mackay Companies. The Mackay Companies has no debts. Its authorized capital is $50,000,000 preferred shares, and $50,000,000 common shares, of which there are outstanding $40,645,600 preferred shares and $41,380,400 common shares. During the past year the outstanding common shares have not been increased. The preferred shares have been increased by $4,676,900, issued in exchange for stock in corporations, which, in addition to strengthening the position of the Mackay Companies, pays as much or more dividends than the corresponding dividends on the Mackay Companies' preferred shares. The Mackay Companies, in its investments, confines itself to first-class cable, telephone and telegraph stocks. Quarterly dividends of 1% have been regularly paid on the preferred shares, beginning April, 1904, and semi-annual dividends of 1% have been regularly paid on the common shares, beginning Jan., 1905. Arrangements have been made so that Canadian shareholders may cash their dividend checks in Canada, and European shareholders may cash their dividend checks in London. The income of the subordinate companies of the Mackay Companies is largely in excess of the amount required to pay these dividends, but its policy is to obtain from its subordinate companies only enough money to meet the dividends on the Mackay Companies shares. All surplus earnings are left in the treasuries of the subordinate companies for extensions, and the development of the business and the increase of reserves. During the year 1905 the earnings of the Commercial Cable Co. have shown substantial gains in gross receipts and net profits on both the ocean and land systems. After paying the dividends on its stock, a large amount remaining was carried to reserve, in accordance with its long established policy. That company has, in addition, completed and put into operation a fifth submarine cable to Europe, and also established cable connections with Newfoundland, the business of which has been heretofore exclusively handled by other companies. The Commercial Pacific Cable Co. has completed arrangements for laying submarine cables to Japan from Guam, and to China from Manila, to be put into operation on or before April 1, 1906. The land line system (the Postal Telegraph) is being constantly extended, and shows increased gross receipts and net profits over the previous year. The shareholders of the Mackay Companies in meeting assembled, at Boston, Mass., on June 15, 1905, by a vote of over four-fifths in interest of each class of shareholders, amended the agreement and declaration of trust, under which the Mackay Companies was organized, so that the shareholders shall annually elect the trustees and the trustees shall annually make reports to shareholders.

General Telephone Matters.

Propositions are under consideration at Appin, Crinan and Dryden, Ont., for the formation of companies to construct local telephone lines.

Authority is being asked from the Ontario Legislature by the Port Arthur Town Council to extend the telephone system in the town at a cost of $18,000.

The telephone line connecting North Vancouver with the other portions of the B.C. Telephone Co.'s system, is expected to be completed and in operation by May 1.

The telephone line between North Bay and New Liskeard, Ont., has been completed to Temagami, and will be connected up with New Liskeard, it is expected, in May.

The Bell Telephone Co. has opened a public station at Coboconk, Ont. During the past year the company has opened a number of public pay stations in the Lindsay district.

The Haileybury and Cobalt Telephone Co. has been authorized to increase its capital from $5,000 to $40,000 by a supplemental charter, issued under the Ontario Companies' Act.

The Bell Telephone Co. proposes to install 30 new exchanges along the C.P.R main line west of Regina, Sask., and within the boundaries of the province, during the current year.

The Alberta Union of Municipalities passed a resolution Mar. 5, asking the Government to co-operate with the Government of Manitoba in obtaining power from the Dominion Government to expropriate the Bell Telephone system.

The citizens of Brantford, Ont., gave a dinner Mar. 9, in honor of A. G. Bell, the inventor of the telephone. Dr. Bell, replying to the toast of his health, gave details of the final testing of the telephone in Brantford in 1876, before the invention was given to the world.

The Quebec Executive of the Union of Canadian Municipalities has passed a resolution favoring government ownership of long distance lines and their operation either directly or by a commission; the municipal ownership of local telephone lines, and the passing of such legislation as will set at rest the authority of Quebec and the municipal authorities in regard to the expropriation of telephone lines.

The Alberta South-Eastern Telephone Co. has been formed at Medicine Hat, Alta., to construct telephone lines into the Cypress Hills country. The main line proposed will be about 50 miles in length, and several branch lines will be constructed. The provisional directors are J. Huston, S. T. Fawcett, W. Rutherford, G. Henry, W. Nicholls, and W. C. Harris, the latter of whom is acting as Secretary.

The Lansdown, Ont., Telephone Co. has been organized with the following officers and directors: President, W. J. Webster; Vice-President, C. Fredenburg; Secretary, W. McConnell; Treasurer, G. F. Deane; other directors: G. R. Webster, H. Horton, O. W. Landon, R. J. Mitchell, W. W. Shipman. There are now 38 subscribers; the construction work will be started at once, and it is hoped to have the line open by May 1.

The Burgessville, Ont., Telephone Co. showed a net profit of $79.64 for the first year of its operations. It was decided not to declare a dividend, and to make an arrangement for a long distance connection with the Bell Telephone Co. Following are the officers and directors for the current year: President, Dr. Service; Vice-President,

NOTICE.

IS hereby given that the Great Northern Railway of Canada will apply to the Parliament of Canada at its next session to extend the time in which it may construct the uncompleted portions of its line of railway between a point near St. Jerome, St. Sauveur, or Lachute, and a point on the Ottawa, Northern and Western Railway, in the County of Wright.

Z. A. LASH,
Solicitor for Applicant.

Toronto, 9th February, 1906.

J. G. Corless; Secretary-Treasurer, H. Sneath; Manager, M. Emigh; other directors: A. E. Wilson, W. T. Nutt, W. K. Newton.

Telegraphone System of Canada, is the title under which a company has been incorporated under the Dominion Companies' Act, with a capital of $50,000, and offices in Montreal. The objects of the company are to purchase the rights of the Telegraphone patents for Canada; to manufacture the instruments; to install and equip railroad trains and offices; and to lease or sell the instruments. The incorporators are:—F. C. Hirsch, T. Hanley, R. Bartholomew, Montreal; E. Adler, Lachine, Que.; G. P. Mathewman, Ottawa.

Bell Telephone Co. of Canada.

The 26th annual report of the directors submitted at the annual meeting held in Montreal, showed that 12,035 subscribers had been added during the year, the total number of sets of instruments now earning rental being 78,195. The company now owns and operates 526 exchanges and 959 agencies; 4,871 miles of wire have been added to the long distance system in 1905. The long distance lines now owned and operated by the company comprise 37,082 miles of wire on 8,645 miles of poles; $325,000 of 5% bonds were sold during the year, the net premium on which, $16,250, has been carried to the contingent account; 10,000 shares of new stock were offered to the shareholders at 25% premium, to be paid for in five quarterly instalments. Three of these instalments are included in this statement, bringing the paid-up capital to $8,604,840, and premium on stock to the amount of $182,742.50 has also been carried to the contingent account. From the balance of revenue account, amounting to $296,903.19, $45,393.97 have been carried to insurance reserve account; $56,191.22 to accident reserve account and $150,000 to the contingent account, leaving a balance of revenue account to be carried to 1906 of $45,318.00.

Telephone Legislation in Manitoba.

The committee appointed by the Manitoba Legislature to investigate the telephone problem in the Province, presented a lengthy report in which it was recommended that the telephone was such a public utility that it should be owned and operated by the Government. It was further recommended that the Government should construct long distance lines throughout the Province, operating them either directly or through a commission; that the local lines be owned and operated by the municipalities, and that the Government should enter into such a contract or arrange such a tariff of rates as would give to the municipalities of the Province satisfactory intercommunication at a low cost. The committee also suggested that the Government take powers to provide a local service in Winnipeg, Brandon and Portage la Prairie in the event of the municipalities there not desiring to undertake the work; to expropriate any telephone system in the Province, and recommended that the Government memorialize the Dominion Parliament not to increase the capital of the Bell Telephone Co. Following the report of the committee the Government introduced two bills, one dealing with a municipal telephone system, and the other respecting Government telephone and telegraph systems. The first provides for the expropriation by any municipality of any telephone system within the municipality at a price to be fixed by agreement, or by the proceedings prescribed for the purchase of real estate under the Municipal Act, authorizing the Government to guarantee any bonds that may be issued for the purpose of making any such purchase, and making the provisions of the Municipal Electric Light, Gas and Telephone Act apply to such purchases. The second provides that the Government shall have power to purchase, lease, construct, extend, maintain or operate a telephone system or systems; that it shall have power to purchase by expropriation any existing lines, by agreement or under the Manitoba Expropriation Act, and to issue debentures in payment for the same. It also gives power to operate telephone lines in Winnipeg, Brandon and Portage la Prairie, or any other place at the request of the municipality. The carrying out of the terms of the act it is proposed to place in the hands of three commissioners, one of whom shall be an engineer, to be appointed by the Government during its pleasure, and at salaries to be agreed upon. The act contains a clause to the effect that it shall have force and effect only in so far as and in relation to matters in respect of which the Legislature has authority. The bills passed through committee Mar. 9.

Old Series, No. 181. New Series, No. 99. TORONTO, CANADA, MAY, 1906, 10 Cents a Copy. $1 a Year.

Railway Commissioners' Freight Orders.

The following orders affecting freight matters have been issued by the Board of Railway Commissioners:

B.C. LUMBER SHIPMENTS.

Mar. 12. In the matter of the complaint of the Porto Rico Lumber Co , complaining that as the result of the cancellation of the joint freight tariff issued by the C.P.R. June 30, 1904, as effective July 5, 1904, numbered W. 273, and the substitution of their local rates to and beyond Nelson, British Columbia, by the Nelson and Fort Sheppard Ry. Co. and the C.P.R., respectively, they have been unjustly discriminated against in respect of shipments of lumber, laths and shingles from Ymir and Salmo, B.C., to points on the Western and Central Divisions of the C.P.R., via Nelson, and applying for an order directing the said railway companies to restore the said joint freight tariff, numbered W. 273; upon reading the said complaint, the written allegations in support thereof, and the answer of the C.P.R. filed; and upon the report of its Chief Traffic Officer—the Board orders that the said railway companies are hereby directed to restore the joint freight tariff W. no. 273, which went into force July 5, 1904, and was subsequently cancelled, and to charge only the tolls specified in said tariff for the routes and traffic therein referred to, and that, in the division of the joint rates between the companies, the Nelson & Fort Sheppard Ry. be allowed to charge 4c. per 100 lbs. as its proportion, as formerly. 2. That the said joint tariff be published and filed by the Nelson & Fort Sheppard Ry., and that the same take effect, and the tolls therein specified be charged as aforesaid, and traffic be carried by the said companies in accordance therewith on Apr. 16.

METALLIC SHINGLES—CARLOAD LOTS.

Mar 24. In the matter of the application of the Canadian Manufacturers' Association for an order directing the railway companies "to comply strictly with the terms of the order of the Board dated July 5, 1905, and establish carload rates upon metallic shingles and siding on the basis in effect prior to March, 1901, namely, seventh class rates, and minimum weight of 24,000 lbs. per car." It appearing to the Board that the provisions of its order dated July 5, 1905, in respect of the minimum carload weight, have not been complied with by the railway companies, upon reading the allegations and representations filed in support of the application, and the reply on behalf of the railway companies thereto; and upon the further report of its Chief Traffic Officer—the Board orders that the minimum carload weight for metallic shingles and metallic siding, when loaded in cars not over 36 ft. 6 in. in length, inside measurement, when shipped between points east of and including Winnipeg, shall be 30,000 lbs. per car; and when shipped between points west of and including Winnipeg, or from points east of Winnipeg to points west thereof, shall be 24,000 lbs. per car. That this order shall go into effect forthwith.

FREDERIC NICHOLLS.

Mar. 24. In the matter of the application of the Canadian Manufacturers' Association in respect of Canadian Freight Classification 13—(1) For the restoration of rule 2 of Canadian Freight Classification 11, to apply on mixed carloads of freight between points west of and including Port Arthur, and from points east of Port Arthur to points west thereof, as it now applies between points east of Port Arthur, under special ruling circular 1 of August 1, 1904, to Canadian Freight Classification 12. (2) For a revision of rule 6 so as to reduce the minimum weight for articles which require platform cars for carriage, from 6,000 lbs. a car, as now, to 4,000 lbs. a car. (3) For a reduction in the additional charge made by the railway companies, under rule 7, in the case of articles classified to be carried at owner's risk, but consigned and carried at the carrier's risk. (4) For a reduction of the minimum charge for single shipments, commonly known as the "smalls rate," as defined in rule 30, from 35c. each to 25c. each. Upon hearing representatives on behalf of the Canadian Manufacturers' Association and counsel for the railway companies interested, the evidence adduced at the sittings held in Ottawa, Winnipeg, Regina, Vancouver, Nelson, Sarnia, Chatham, Windsor, Toronto and Montreal, and what was alleged: and upon the report of its Chief Traffic Officer, the Board orders that the Canadian Freight Classification 12 be amended as follows:

1. Farm truck scales, crated or boxed, to be added to the "scales" list, at 2nd class L.C.L., and 5th class C.L., and at the same ratings, to the "agricultural implements" list.

2. Picture frames, picture mouldings and picture backing to be added to the "mouldings" list, at 3rd class in carloads.

3. Furnaces, stoves, radiators, and all articles in the "stoves" list, to be added, at the present ratings, to the "hardware" list.

4. Paper Hangers, burlaps (for interior decoration), in bales or bundles, in mixed carloads, to be added to the "paper" list at 4th class.

5. Stationary engines, to be added to the "agricultural implements" list, with portable or traction engines.

6. Fire engines, steam or hand brake, C.L. minimum 24,000 lbs., to be added to the "machinery" list.

7. Door and window screen frames, with or without wire cloth, to be added to the "furniture" list, at 1st class L.C.L. and 5th class C.L.

8. The following articles, at the present ratings, to be added to the plumbers' supplies list, viz.: ventilating and heating apparatus, consisting of furnaces, boilers, radiators, registers, steam-gauges, steam traps, and valves; a carload rating for steam traps to be provided.

9. Harness dressing, to be added to the "polishing compounds" list, at 2nd class L.C.L., 4th class C.L.

10. Butter workers, creamers, and wooden pumps, to be added, at the present ratings, to the "hardware" list.

11. Saddlery hardware, at the present ratings, to be added to the "hardware" list.

12. Stationary steam engines, at the present ratings, to be added to the "electrical goods and dynamos" list.

Galena-Signal Oil Company,

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated Galena COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

Guarantee cost per thousand miles, for from one to five years, when conditions warrant it.

Maintain Expert Department, which is an organization of skilled railway mechanics of wide and varied experience.

Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY.

Please write home office for further particulars.

CHARLES MILLER,
PRESIDENT.

13. Paraffine wax and candles, at the present ratings, to be added to the "oils" list.

That Rule 6 be amended to read as follows: "All articles, unless otherwise specified, will be taken at the actual gross weight and the class rate for each shipment; except that any article which cannot be loaded in a standard box car (36½ ft. inside length), and which is loaded on a platform car, will be charged at the classification rate (the same on a platform car as in a box car), but subject to a minimum weight and charge of 5,000 lbs. at the 1st class rate; the total charge not to exceed that for a carload of the same article in a box car. Note—Where the classification provides for any article a lower minimum weight than 5,000 lbs., such lower minimum weight will apply, instead of the minimum of 5,000 lbs. referred to above." The articles referred to in the note to this rule to be classified with the lower minimum weight than 5,000 lbs. are, for the present: boilers, smokestacks, iron or steel shafting, beams, columns and girders, feed-water heaters, foundry cupolas, each at 4,000 lbs. minimum weight.

That Rule 1, which gives the minimum carload weights for cars over 36½ ft. long, as amended by supplement 4, be amended as follows, namely: Where the minimum carload weight in the classification for cars not over 36 ft. in length:

MINIMUM WEIGHTS IN LBS. WILL BE AS UNDER

For Cars Over ft.	in.	For Cars Not Over ft.	in.	Is 10,000 lbs.	Is 12,000 lbs.	Is 14,000 lbs.	Is 16,000 lbs.	Is 18,000 lbs.	Is 20,000 lbs.	Is 24,000 lbs.	Is 30,000 lbs.
36	6	40	6	12,000	14,500	17,000	19,000	21,500	24,000	29,000	36,000
40	6	41	6	12,500	15,500	18,000	20,000	22,500	25,000	30,000	37,500
41	6	42	6	13,500	16,000	19,000	21,000	23,500	26,000	31,000	39,000
42	6	43	6	14,000	17,000	20,000	21,500	24,500	27,000	32,500	40,500
43	6	44	6	15,000	18,000	21,000	22,500	25,000	28,000	33,500	42,000
44	6	45	6	15,500	19,000	22,000	23,000	26,000	29,000	35,000	43,500
45	6	46	6	16,500	20,000	23,000	24,000	27,000	30,000	36,000	45,000
46	6	47	6	17,000	20,500	24,000	25,000	28,000	31,000	37,000	46,500
47	6	48	6	18,000	21,500	25,000	25,500	29,000	32,000	38,500	48,000
48	6	49	6	18,500	22,500	26,000	26,500	29,500	33,000	39,500	49,500
49	6	50	6	19,500	23,500	27,000	27,000	30,500	34,000	41,000	51,000

That the said Freight Classification be further amended by substituting, in lieu of the present ratings, the following, namely:

	L.C.L.	C.L.
Cream separators, knocked down and boxed	2	..
Bees' Wax	2	4
Honey, in pails with wooden covers	2	4
Comb wood, knocked down flat, or folded flat, in bundles, crates or boxes	3	5
Bees, in hives, all openings to be securely closed with wire cloth, C.L. min. 12,000 lbs.	3-1	2

That a separate group, or distinctive heading, be provided for "bee-keepers' supplies," which shall embrace the various articles properly belonging thereto, as at present classified, or as herein ordered.

That the proof of supplement 6 to Canadian Freight Classification 12, submitted to the Board by the Canadian Freight Association on Feb. 8, 1906, subject to such changes as may be necessary to make it conform with the terms of this order, is hereby approved. This order shall go into effect not later than April 17.

SWITCHING CHARGES AT NEW WESTMINSTER.

Mar. 7. In the matter of the application of the C.P.R. under the Railway Act, 1903, to vary an order of the Board, dated Sept. 19, 1905, varying an order dated Feb. 10, 1904, providing for the place and mode of junction of the Vancouver, Westminster & Yukon Ry. with the C.P.R. at Lytton Square, New Westminster, B.C. Upon hearing counsel for the applicant company and the Vancouver, Westminster, and Yukon Ry., the evidence adduced was what was alleged; and upon the report of the Chief Traffic Officer of the Board, the Board orders, That the order of Sept. 19, 1905, be varied and amended by adding the following clause:

1. That the C.P.R. Co. pay to the Vancouver, Westminster & Yukon Ry. Co. the special toll of $1 a carload, regardless of weight, for switching through freight destined to, or which has originated at, points other than New Westminster, to or from the C.P. Navigation Co.'s premises south of Front St. (between Mary St. and McKenzie St., including the cattle corral), from or to the interchange switch at Lytton Square, or any other interchange switch which may hereafter be constructed between Lytton Square and Begbie St.; no charge to be made for switching the empty car in the opposite direction.

2. That the rate mentioned in the above added clause be substituted for that fixed by the said former order, so far as the same is applicable.

INTERCHANGE OF FREIGHT AT WINNIPEG.

976. Oct. 17, 1905. In the matter of the application of the Winnipeg Builders' Exchange, under sections 23, 214, 253, 271, and 272 of the Railway Act, 1903, for an order directing the C.P.R. Co., the Canadian Northern Ry. Co., and the Manitoba Ry. Co. to interchange freight of all grades and classes at Winnipeg. Upon hearing counsel for applicants and the railway companies, the evidence adduced, and what was alleged—the Board orders that on and after Jan. 1, 1906, all freight in carloads shall, when carried over the C.P.R., or the Canadian Northern Ry. Co., to Winnipeg, or St. Boniface, or when delivered to either of the said companies at Winnipeg or St. Boniface for carriage, be transferred by the one company to the other in the original cars at some point of junction of their lines at or in the vicinity of St. Boniface or Winnipeg, when so consigned by the shippers.

May Birthdays.

Many happy returns of the day to

W. R. Baker, Assistant to President C.P.R., Montreal, born at York, Eng., May 25, 1852.

S. Barker, M.P., ex-General Manager Northern Ry., Hamilton, Ont., born at Kingston, Ont., May 25, 1839.

C. W. Burpee, Superintendent C.P.R., Brownville Jct., Me., born at Keswick, N.B., May 15, 1861.

G. S. Cantlie, Superintendent Car Service, C.P.R., Montreal, born there May 2, 1867.

M. Donaldson, General Superintendent Ottawa Division G.T.R., Ottawa, Ont., born near Edinburgh, Scotland, May 1, 1851.

G. C. Dunn, District Engineer Transcontinental Railway surveys, Fredericton, N.B., born at Quebec, May 13, 1862.

Hon. W. C. Edwards, Temiskaming Steamboat Co., Rockland, Ont., born at Clarence, Ont., May 7, 1844.

J. D. Evans, Engineer Central Ontario Ry., Trenton, Ont., born at Goderich, Ont., May 27, 1843.

T. M. Fallon, City Passenger and Ticket Agent, Rutland Rd., Montreal, born there May 26, 1875.

E. T. Galt, President Alberta Ry. and Irrigation Co., Lethbridge, Alta., born at Sherbrooke, Que., May 24, 1850.

J. R. Gilhula, Chief Dispatcher Pere Marquette Rd., St. Thomas, Ont., born at Chatham, Ont., May 27, 1865.

A. Hardy, General Freight and Passenger Agent, Quebec and Lake St. John Ry., Quebec, born there May 12, 1855.

C. M. Hays, 2nd Vice-President and General Manager G.T.R., and President G.T. Pacific Ry., Montreal, born at Rock Island, Ill, May 16, 1856.

R. B. Hepburn, President and General Manager Ontario and Quebec Navigation Co., Picton, Ont., born there May 27, 1876.

W. T. Huggan, Accountant and Auditor Prince Edward Island Ry., Charlottetown, P.E.I., born at Halifax, N.S., May 24, 1851.

J. Hunter, Chief Engineer Wellington, Colliery Co.'s Ry., Nanaimo, B.C., born at Aberdeen, Scotland, May 7, 1839.

W. T. Jennings, Consulting Engineer, Toronto, born there May 19, 1846.

W. S. Kinnear, Assistant General Manager Michigan Central Rd., and Chief Engineer Detroit River Tunnel, Detroit, Mich., born at Circleville, Ohio, May 25, 1864.

M. Neilson, C.E., Consulting Engineer Montreal Street Ry., born at Almonte, Ont., May 26, 1852.

A. L. Ogilvy, General Purchasing Agent, Transcontinental Railway Commission, Ottawa, Ont., born at Richwood, Oxford County, Ont., May 23, 1868.

G. A. Parker, Auditor Dominion Altantic Ry., Kentville, N.S., born at Walton, N.S., May 1, 1855.

N. J. Power, Auditor of Disbursements, G.T.R., Montreal, born at Rochester, N.Y., May 19, 1843.

Hayter Reed, Manager-in-Chief C.P.R. hotels, Montreal, born at L'Original, Ont., May 26, 1849.

H. B. Sherwood, Superintendent Bay of Quinte Ry., Napanee, Ont., born at Auburn, N.Y., May 25, 1847.

E. Tiffin, General Traffic Manager I.C.R., Moncton, N.B., born at Hamilton, Ont., May 5, 1849.

W. H. Underwood, Assistant General Passenger Agent Michigan Central Rd., Chicago, Ill., born at Rochester, N.Y., May 6, 1858.

Garret Vliet, Assistant Master Mechanic G.T.R., Portland Me., born at Milwaukee, Wis., May 5, 1854.

J. H. Walsh, General Manager Quebec Central Ry., Sherbrooke, Que., born at Quebec, May 12, 1860.

H. K. Wicksteed, Chief Engineer of Location Mackenzie, Mann & Co.'s Lines, Toronto, born at Quebec May 25, 1855.

James Yeo, ex-Roadmaster Intercolonial Ry., Riviere du Loup, Que., born at Bideford, Devonshire, Eng., May 1, 1830.

J. A. Yorick, Canadian Passenger Agent Chicago, Burlington and Quincy Rd. at Toronto, born at London, Ont., May 7, 1872.

The Railway Act of the Province of Quebec was amended at the last session of the Legislature by the inclusion therein of sub-sections 2, 3 and 4 of sec. 251, relating to by-laws; and sec. 252, sub-sections 1, 2, 3 and 4, relating to discrimination, from the Dominion Railway Act.

The Canadian Northern Ry. time table, which came into effect April 1, shows 2,488.5 miles in operation, against 2,406.7 miles in Dec., 1905, an increase of 81.8 miles. In district 2 there is an increase of 0.6 miles due to re-measurements. District 3 has been increased from 763.7 to 940.8 miles, the portion of the line from Gilbert Plains Jct., Man., to Kamsack, Sask., 94.8 miles, having been transferred from district 4; the extension from Melfort to Prince Albert, Sask., 62.0 miles, and 20.1 miles of the Thunderhill branch having been taken over by the operating department. District 4 includes the 548.3 miles from Kamsack, Sask., to Edmonton, Alta.

Railway Bonds Issued in 1905.

At the recent annual meeting of the Central Canada Loan and Savings Co., the Vice-President and Managing Director, E. R. Wood, who is also a director of the Grand Trunk Pacific Ry., referred at length to the various bond issues made in Canada during 1905, giving a very full list, from which are extracted the following particulars relating to issues by Canadian transportation and allied companies, and by similar companies controlled by Canadian interests:

CANADIAN NORTHERN RAILWAY CO.	
4% debenture stock, £1,840,000	$ 8,954,666
3% first mortgage bonds guaranteed by Dominion of Canada, £1,923,287	9,359,996
3½% first mortgage bonds James Bay Ry. guaranteed by Ontario Government	5,250,000
4% first mortgage bonds Great Northern Ry., guaranteed by Canadian Northern Ry	4,926,000
4% first mortgage bonds Chateauguay & Northern Ry. guaranteed by Canadian Northern Ry	1,110,000
4½% first mortgage Stock Equipment Co. bonds, guaranteed by Canadian Northern Ry	1,000,000
	$30,636,662
GRAND TRUNK PACIFIC RY. CO.	
4% Prairie Section, guaranteed by G.T. R., £1,646,000	$ 8,010,533
4% Lake Superior, guaranteed by G. T. R., £1,358,000	6,608,933
3% guaranteed by Dominion Government, £3,200,000	15,573,333
	$30,192,799

Memo. re Grand Trunk Pacific Ry. Co.:—Bonds and stocks issuable under agreement with Dominion Government:

First Mortgage Bonds	$68,133,000
Second Mortgage Bonds	20,146,000
Lake Superior Division	7,543,000
Land Grant Bonds (Ontario)	2,400,000
Equipment Bonds (say)	16,000,000
	$114,272,000
Capital Stock	$45,000,000
Canadian Pacific Ry., 4% debenture stock, £800,000	3,893,280
Mexican Light & Power Co., 5% bonds issued this year	2,000,000
5% bonds (Mexican Electric)	6,000,000
Havana Central Ry., 5% first mortgage bonds	5,000,000
New Brunswick Coal & Ry. Co., 4% guaranteed bonds	368,000
Rio de Janeiro Tramway, Light & Power Co., new underwriting	20,000,000
Bell Telephone Co., 5% first mortgage bonds	600,000
Winnipeg, Selkirk & Lake Winnipeg, Electric Ry., 5% first mortgage bonds	300,000
Niagara, St. Catharines & Toronto Ry., 5% first mortgage bonds	116,000
Canada Atlantic Ry., 4% consolidated bonds, guaranteed by G.T.R. Co., £3,292,200	16,022,040
Bonds issued in London, £1,025,000. Balance held for exchange for old bonds and in treasury.	
Winnipeg Electric Ry. Co., 5% first mortgage bonds	500,000

Intercolonial and G.T.R. Arbitration.

The arbitrators appointed to settle a number of matters in dispute between the Intercolonial Ry. and the G.T.R., arising out of the joint operation of the section of the G.T.R. between St. Rosalie, Que., and Montreal, have given their decision in regard to several of the questions submitted to them.

The arbitrators were Justice Davidson, A. C. Killam, K.C., Chief Ry. Commissioner, and G. F. Shepley, K.C.; and the evidence was heard some months ago. The decisions now given are in seven cases, and 17, of which 14 are claims by the I.C.R., have yet to be decided.

The following are the cases decided: A collision at St. Madelaine between two I.C.R. trains resulted in the death of two men whose dependents sued the G.T.R., and after the case had been carried to the Supreme Court, secured aggregate damages of about $18,000. The commission holds that as the collision was due to a fault of the train dispatcher, who was a joint employe, each company should bear its own responsibilities. The G.T.R. is therefore reimbursed to the extent of $9,000, but it will have to bear the cost of damage to its own tracks.

The Government claimed that the I.C.R. trains had not received just accommodation at Bonaventure station. The commission held that, in view of present lack of facilities there, a reasonable service had been given, but they granted an equally suitable position for the I.C.R. Ocean Limited as is given to the G.T.R. International Limited. The I.C.R. may have a separate ticket office if it wishes, and a separate blackboard to announce trains.

As a result of loss sustained through operation of a defective pontoon at Quebec city, the G.T.R. will have to pay the Government $1,085 for not having kept it in repair.

An agreement was made as to what percentage of cartage charge at Quebec each should pay, and the commission allows $3,500 more than the G.T.R. had offered to pay.

Owing to an accident at St. Basile, damages were recovered from the G.T.R. for horses killed by an I.C.R. train, but two commissioners hold that liability was primarily on the Government, as owning and operating the I.C.R., notwithstanding the Government's claim that the G.T.R. had not kept crossings in repair. Mr. Shepley dissented.

A carload of hay shipped by Jas. Scott & Company was put by mistake on an I.C.R. train, but the G.T.R. paid for the loss involved. The commissioners reimbursed the company on the ground that the mistake was made by joint employes.

An I.C.R. engine ran into a horse and damages were paid in 1898 by the G.T.R., who applied for reimbursement, but as more than five years had elapsed proscription became effective.

Changes in Per Diem Rules.

The Secretary of the American Railway Association has issued the following circular:

At the meeting of the Association at Chicago, Oct. 25, 1905, the Secretary was directed to submit to the members for a letter ballot certain proposed amendments to Per Diem Rules 1 and 3 and revised Penalty Notice (Form N), the new rules to take effect after approval by a majority of the membership of the Association, representing two-thirds of the cars owned or controlled by members of the Association, and three months after announcement by the Secretary of the requisite majority. The results of the voting on the questions submitted were as follows:

1. On an amendment to Per Diem Rule 1, increasing the rate for the use of freight cars from 20 to 25c. a day. This amendment was approved by the following vote: In favor, 221 members, representing 1,740,460 cars owned or controlled. Against, 68 members, representing 114,582 cars owned or controlled.

2. On an amendment to Per Diem Rule 3, changing the penalty rate from 80 to 75c. This amendment was approved by the following vote: In favor, 226 members, representing 1,717,064 cars owned or controlled. Against, 61 members, representing 132,761 cars owned or controlled.

3. On an amendment to Per Diem Rule 3, providing that if a car is held by a road, the aggregate mileage of which is 2,000 miles or more, the penalty rate shall commence 20 days after the date of such notice. This amendment was lost by the following vote: In favor, 147 members, representing 885,425 cars owned or controlled. Against, 135 members, representing 969,150 cars owned or controlled.

4. On the adoption of the proposed revised form of Penalty Notice (Form N). The revised form was approved by the following vote: In favor, 202 members, representing 1,416,109 cars owned or controlled. Against, 68 members, representing 366,835 cars owned or controlled.

The total membership of the Association is 304, and the cars owned or controlled by the members 1,874,100. The majority requisite for approval was 153 members and 1,249,400 cars.

In accordance with the resolution of the Association, announcement is hereby made, as of April 1, 1906, that the amendments to Per Diem Rules 1 and 3 and the revised form of Penalty Notice (Form N), respectively numbered above as 1, 2 and 4, have been approved by the requisite majority, and will accordingly take effect July 1, 1906. The amendment to Per Diem Rule 3, numbered above as 3, was not approved.

To Our Toronto Subscribers

Heretofore copies of our paper for subscribers in Toronto have been delivered by a newspaper delivery company. Many complaints have reached us about irregular and careless delivery, and as we have been unable to secure any improvement we have decided to send all papers in future by mail, which will, we believe, secure a practically perfect delivery, and give satisfaction to our subscribers. It is very seldom that we receive any complaint of irregular receipt of the paper from persons outside Toronto who get our paper by mail, and we hope that the change we are making in the Toronto delivery will remove any cause of complaint from city subscribers.

Periodicals mailed from the office of publication are carried by the Post Office Department at a bulk rate per pound, but this does not apply to the city in which the publication is issued, so that copies addressed to our subscribers in Toronto will have to be prepaid by postage stamps. This renders it necessary for us to advance our subscription price in Toronto from $1 to $1.25 a year, which we feel sure will be readily aquiesced in by our Toronto subscribers, who, under the new plan, will secure prompter delivery.

In this connection we may point to the fact that our subscription rate is a very low one, and has not been raised since the establishment of the paper. We started out with supplying 28 pages per issue at $1 a year. Now we are giving 68 pages at the same price. In addition to the cost of producing the paper having more than doubled on account of the increase in its size, the actual cost per page has also largely increased, owing to the advance in the price of labor, paper, printing, etc. We are now giving our subscribers 800 pages a year, which is certainly pretty good value for the small subscription price.

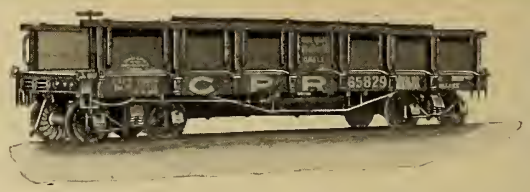
An Australian official sent a telegram from an outlying station: "Stationmaster has died. Shall I bury him?"

The reply was sent: "Yes, but please make sure he is really dead."

The report came back: "Have buried stationmaster. Made sure he was dead by hitting him twice on the head with a fish-plate."

The order-in-council relating to the payment by the Government for troops carried over the railways in Canada, has been amended by striking out the first and second paragraphs and setting forth that in future the railways will be paid at the rate of 2c. a mile for troops entitled to travel first class, and 1½c. a mile for those entitled to second class fares only, whether the railway company provides second-class accommodation or not.

"HART" CONVERTIBLE CARS



WILL ACCOMPLISH A SAVING

OF FROM

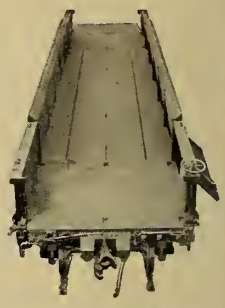
$200.00 TO $400.00

PER MILE

Hart Convertible Car
As a Centre Dump Hopper Car

THREE CARS IN ONE

Construction, Ballast and General Freight



Hart Convertible Car
As a Side Dump Level Floor Car

These Cars are built in various sizes and in relatively light weights. Thousands in daily service have proven their great economy and practicability. Built of 30 to 60 Tons Capacity and of either Wood or Steel.

"NATIONAL TYPE" BOTTOM DROP DOOR

COAL AND ORE CARS

Supplied in all Wood, Composite or all Steel

Cut of National Type Car with Doors Open

Entire bottom dropping—including over the trucks—does away with all shovelling—operated by worm and gear from end of cars by hand wheels as shown in cut.

APPLICABLE TO GONDOLA

BOX, STOCK AND COKE CARS

Cut of National Type Car with Doors Closed

SIMPLE MECHANISM—FREE FROM CHAINS

WRITE FOR ILLUSTRATED DESCRIPTIVE BOOKLET.

Recent New Brunswick Legislation.

At the last session of the New Brunswick Legislature, the following acts affecting transportation interests were passed:

Incorporating the Buctouche Telephone Co.

Providing for the better protection of the ferries and public wharves and warehouses in the City of St. John.

Amending the act granting aid for the construction and equipment of a graving dock at the port of St. John.

Respecting the Imperial Dry Dock Co. of St. John.

Authorizing the city of Moncton to convey to the King for the use of the Intercolonial Ry., certain streets in that city.

Relating to the International Ry. Co. of New Brunswick.

Incorporating the Moncton and Gulf Ry.

Amending the act relating to the prevention of fires in connection with surveys and construction of the national Transcontinental Ry. and other railways passing through forest lands in N.B.

Amending the act in aid of the construction of railways.

Amending the act authorizing the city corporation of St. John to give leave that railways may be carried along public streets and highways in the city.

Respecting the St. John Railway.

Reviving and continuing the act of incorporation of the Shediac and Coast Ry.

Conferring certain privileges and franchises upon the Washington County Ry.

The G.T.R. and its Employes

The Judicial Committee of the Imperial Privy Council has rendered judgment in the appeal in the case of Miller against the G.T.R. The case involved the question of the rights of a G.T.R. employe or his representatives, who had joined the G.T.R. Employes' Benefit Association, could recover damages for injuries or death from the company in addition to the benefit accruing from the society. It is set forth in the Association rules that in consideration of the subscription of the G.T.R. to the society no member thereof or his representatives shall have any claim against the company for compensation on account of injury or death from accident. The plaintiff's husband, who was in the company's employ, and a member of the society, was killed in a collision between two trains on the G.T.R., Jan. 10, 1900. When the case was first heard $6,000 was awarded the widow, and $4,000 for the minor children, the question of law being reserved for the Court of Review. This question was taken from one court to the other with varying results, until the matter has been finally settled by the Privy Council. The court decided that the plaintiff was not barred from recovering damages by her husband having been a member of the society, and confirmed the judgment as to damages, and made certain orders as to costs.

F. W. Bowles has been appointed route agent Canadian Northern Ex. Co., with headquarters at Winnipeg, Man., succeeding J. A. Hill.

The Ross & Harris Company, Ltd., has been incorporated under the Dominion Companies' Act, with a capital of $200,000 and offices at Montreal, to carry on a general contracting business. The provisional directors are: J. Ross, W. H. Chandler, Toronto; J. A. McRea, Niagara Falls, Ont.; J. W. Harris, W. B. Powell, Montreal, several of whom are well-known railway contractors. The company has secured the contract to construct complete 40 miles of line from Parry Sound to Byng Inlet, Ont., on the C.P.R. Toronto-Sudbury line.

Recent Manitoba Legislation.

The Manitoba Legislature, at its recent session, passed the following acts affecting steam and electric railways, telephone and telegraph companies, and allied interests:

Authorizing the guarantee of certain bonds of the Canadian Northern Ry. Co.

Amending the Manitoba Railway Act.

Amending Act of Incorporation of the Midland Ry. of Manitoba.

Amending the Municipal Electric Light, Gas and Telephone Act.

Amending the Railway Taxation Act.

Respecting municipal Telephone systems.

Respecting a government Telephone and Telegraph system.

Incorporating the Winnipeg and Northern Ry. Co.

Amending the Act incorporating the Winnipeg Grain and Produce Exchange.

G.T.R. SEMI-ANNUAL MEETING.

At the semi-annual meeting in London, Eng., April 5, the directors' report was presented for the half-year ended Dec. 31, 1905.

The following summary shows a comparison of the half-year's revenue account with that of the corresponding half-year, ended Dec. 31, 1904:

Dec. 31, 1904.		Dec. 31, 1905.
£3 129,814	Gross receipts	£3,288,993 3 4
	Deduct—	
2,205,091	Working expenses, being at the rate of 71.32% as compared with 70.45% in 1904.	2,345,715 15 2
924,723	Net traffic receipts	943,277 8 2
12,931	Amount received from the International Bridge Co.	16,012 16 7
1,677	Interest on Toledo, Saginaw, and Muskegon bonds	901 13 11
6,507	Interest on bonds of Central Vermont Ry.	6,506 14 3
61,855	Interest on securities of controlled lines and on St. Clair tunnel bonds acquired by the issue of Grand Trunk 4% debenture stock	61,855 16 0
23,760	Balance of general interest account	15,044 5 2
£1,031,453	Net revenue receipts	£1,043,598 14 1

Following are the net revenue charges for the half-year, compared with the corresponding period:

Dec. 31, 1904.		Dec. 31, 1905.
£ 77,603	Rents (leased lines)	£ 77,603 0 9
488,733	Interest on debenture stocks and bonds of the Co	488,745 19 10
47,590	Interest on debenture stock and bonds of lines consolidated with the G.T.R. Co.	47,815 15 0
	Canada Atlantic Ry. deficit for the year 1905	18,037 10 6
613,926		632,202 6 1
14,576	Deduct— Detroit, Grand Haven, and Milwaukee Surplus	17,381 13 11
599,350		614,820 12 2
432,103	Leaving a surplus of	428,778 1 11
£1,031,453		£1,043,598 14 1

Adding the balance of £7,423 8s. 3d. at the credit of net revenue account June 30, 1905, to the above surplus for the past half-year of £428,778 1s. 11d., the total amount available for dividend is £436,201 10s. 2d., from which the directors recommend the payment of the following dividends, viz.:

For the half-year on the 4% guaranteed stock	£139,760 16 10
For the half-year on the first preference stock	85,420 15 0
For the half-year on the second preference stock	63,210 0 4
2% on the third preference stock	143,292 14 4
	£431,684 6 6

leaving a balance of £4,517 3s. 8d. to be carried forward to next half-year's account.

Following table exhibits a comparison of the receipts for the half-years ending Dec. 31, 1905 and 1904:

TRAFFIC STATISTICS.

Description of Receipts.	1905.	1904.	Increase.	Decrease.
	£	£	£	£
Passengers	1,023,981	991,484	32,497	....
Mails and express	161,616	155,777	5,839	....
Freight and live stock	2,027,180	1,906,145	121,035	....
Miscellaneous	76,216	76,408	....	192
	£3,288,993	£3,129,814	£159,179	....
Passengers carried	5,755,671	5,298,686	456,991	....
Average fare per passenger	3s.6¼d.	3s.9d.	....	2¼d.
Tons of freight and live stock	7,579,878	7,043,376	536,502	....
Average rate per ton	5s.4¼d.	5s.5d.	....	¾d.
Tons carried one mile	1,393,513,496	1,329,229,304	64,284,192	....
Earnings per train mile	81.60d.	78.75d.	2.85d.	....

The average rate per ton per mile on the entire freight business was 0.71c. compared with 0.70c., in the corresponding half-year.

The working expenses, excluding taxes, amounted in the half-year to £2,294,201 or 69.75% of the gross receipts, as compared with £2,154,379, or 68.83% in the corresponding half-year; an increase in amount of £139,822, and in the proportion to the gross receipts of 0.92%.

The following table exhibits a comparison of the revenue expenditure, including taxes, for the half-years ended Dec. 31, 1905 and 1904:

Description of Expenditure.	1905.	1904.	Increase.	Decrease.
	£	£	£	£
Maintenance of way, and structures	625,060	581,046	44,014	....
Maintenance of equipment	476,790	359,189	117,601	....
Conducting transportation	1,123,155	1,146,567	....	23,412
General expenses	69,196	67,577	1,619	....
Taxes	51,515	50,712	803	....
Total	£2,345,716	£2,205,091	£140,625	....
Percentage of gross receipts	71.32	70.45	0.87	....
Expenditure per train-mile	58.10d.	55.48d.	2.71d.	....

The train mileage of the half-year compares with that for the half-year ending Dec. 31, 1904, as follows:

Description of Mileage.	1905.	1904.	Increase.	Decrease.
Passenger	4,275,345	4,187,985	87,360	....
Freight	5,084,625	5,028,243	56,382	....
Mixed trains	314,196	322,257	....	8,061
Total	9,674,166	9,538,485	135,681	....

From the foregoing statements it will be observed that the G.T.R. gross receipts for the half-year show an increase of £159,179, or 5.08%; the working expenses, including taxes, an increase of £140,625, or 6.38%; and the train mileage an increase of 135,681, or 1.42%.

The total charges to the capital account amounted for the half-year to £199,614 5s. 0d. Of this sum, £544 6s. 11d. was discount and commission on 4% guaranteed stock issued during the half-year.

The Locomotive and Machine Company of Montreal, Limited

IMPERIAL BANK BUILDING, VICTORIA SQUARE, MONTREAL, CANADA

Builders of Locomotives for all Classes of Service

Structural Steel

—FOR—

BRIDGES, BUILDINGS, ROOF TRUSSES, ETC.

NEW YORK OFFICE:
American Locomotive Company,
111 Broadway

LONDON OFFICE:
Alfred Davis, 26 Victoria Street,
Westminster, S.W.

The actual expenditure on capital account was as follows:

New works	£ 66,135 4 9
Double track	78,820 16 3
Land purchased	54,113 17 1
	£199,069 18 1

One engine has been sold, 7 mogul freight engines have been purchased, and 4 baggage cars were built in the company's shops during the half-year on revenue account. Since 1898 considerable amounts have been specially appropriated out of revenue to the reconstruction of the bridges over the main lines. The whole of this extraordinary expenditure has now been provided for, and the work is nearly completed. Revenue being thus relieved from this special charge, the directors propose to apply the same principle to the renewal of locomotives, which has become a matter of urgency, but which has necessarily, to some extent, been postponed pending the strengthening of the bridges.

Owing to delay in obtaining the necessary legislation, the control and operation of the Canada Atlantic Ry. was not transferred to the company until Oct. 1, although under the terms of the agreement the company became responsible for the interest on the bonds from Jan. 1, 1905. The deficiency of £18,037 10s. 6d. in the working for the year cannot, therefore, be taken as indicative of what may be expected now that the line is in full charge of the officers of the G.T.R., and the Board anticipates a very considerable improvement in the net earnings in the future.

The gross receipts of the Grand Trunk Western Ry. for the half-year amounted to £580,490, against £522,280 in 1904, an increase of £58,210, and the working expenses were £477,568, against £444,173, an increase of £33,395, leaving a net profit of £102,922, against £78,107, an increase of £24,815, compared with the corresponding period of 1904. The net revenue charges for the half-year were £84,678 against £82,744, so that there was, on Dec. 31, a net revenue credit of £18,244, which amount is carried forward, as compared with a net revenue debit of £4,637 for the corresponding half-year of 1904. The number of passengers carried during the half-year was 876,296, against 868,989, an increase of 7,307, or 0.84%; and the passenger train receipts, including mails and express receipts, were £181,897, against £181,987, a decrease of £90. The quantity of freight moved during the half-year was 1,569,898 against 1,353,515 tons, an increase of 216,383 tons, or 15.99%, and the receipts from this traffic were £397,874, against £339,531, an increase of £58,343, or 17.18%.

The gross receipts of the Detroit, Grand Haven, and Milwaukee Ry. for the half-year were £169,524 against £160,915 in 1904, an increase of £8,609; the working expenses were £115,061, against £109,364, an increase of £5,697; thus leaving a balance of £54,463, against £51,551, and showing an increase in net revenue of £2,912 compared with the corresponding half-year of 1904. The net revenue charges for the half-year were £37,081, against £36,975 in 1904, so that there was a net revenue surplus of £17,382, as compared with £14,576 for the corresponding period of 1904. The number of passengers carried during the half-year was 377,747, against 415,333, a decrease of 37,586, or 9.05%; and the passenger receipts, including mails and express receipts, were £62,669, against £62,070, an increase of £599 or 0.96%. The quantity of freight moved was 706,448 tons, against 669,853 tons in 1904, an increase of 36,595 tons, or 5.46%; and the receipts from freight traffic were £103,616, against £95,970 in 1904, an increase of £7,646, or 7.97%.

Contracts for the construction of the Lake Superior Branch and for the main line of the G.T. Pacific Ry. from Portage la Prairie to Edmonton, a total distance of about 1,000 miles, have been let to leading Canadian firms of contractors, and work is already in progress on certain sections. With the opening of spring, work will be pushed forward vigorously, and it is anticipated that the lines in question will be completed in the early part of the autumn of 1907, in time for handling the harvest of that year. The Government has also in hand the contract for construction of the line from Lake Superior Junction to Winnipeg, which it is intended shall be completed in time to commence operations simultaneously with the sections in charge of the G.T. Pacific Co. Arrangements for construction of rolling stock required under the contracts with the Government are now in process of completion.

The directors have to report, with much regret, the death of Lewis James Seargeant, who had been associated with the company for upwards of thirty years; twenty years as Traffic Manager or General Manager, and for the last ten years as Director. They have elected the Hon. Nathaniel Charles Rothschild to fill the vacancy. The retiring directors are A. W. Smithers, G. von Chauvin, Col. F. Firebrace, and Sir W. L. Young, Bart., all of whom are eligible and offer themselves for re-election. F. Whinney, one of the auditors in London, and C. Percy, one of the auditors in Canada, also retire and offer themselves for re-election.

REPORTS OF OFFICIALS.

The Chief Engineer stated that the length of the G.T.R. maintained and operated during the year 1905 was 3,535 miles, or one mile less than it was in 1904, due to trifling re-adjustments on several parts of the system. A second main track has been completed between Hyde Park and Kingscourt on the 17th District, its length being 33 miles. The expenditure during 1905, on the permanent way and structures, was $4,349,459.13, or $321,700.53 over that of the year 1904. The outlay on the track or permanent way, together with repairs of roadway, ballast and ballasting, clearing snow, renewals of rails and ties, including their proportion of the cost of superintendence, was $2,572,061.18 in 1904, or at the rate of $727.39 per mile; in 1905 the amount was $2,598,904.11, or at the rate of $735.19 per mile. New stations have been built at Yarmouth, Beaurepaire, Millbrook, Acton, Harriston, Mount Forest, Wingham, Simcoe and Renton. The materials used for renewals and repairs of main tracks and sidings were:

New steel rails laid in track	25,199 tons
Re-rolled steel rails laid in track	6,800 "
Partially worn steel rails laid in branch lines and sidings	24,088 "
New ties placed in track	1,456,830
Ballast (cubic yards)	656,426

The Superintendent of Motive Power reported expenditure, mileage, etc., as follows:

Half-year ended.	Total Expenditure.	Train Mileage.	Rate of Expenses per Mile. Train	Engine	Car.
	Dollars.		Cents	Cents	Cents
Dec., 1905	3,967,857	9,674,166	41.02	31.96	2.54
" 1904	3,707,044	9,538,485	38.86	30.04	2.44

An increase in expenditure of $260,813.00, or 7.04%, compared with an increase in train miles of 135,681, or 1.42%.

	Passenger Trains	Freight Trains	Mixed Trains.
The average number of cars moved per train was	4.6	26.4	8.0
And for the corresponding period	4.6	25.9	8.2

The comparative cost of repairs per train, engine and car mile was:

Cost per Mile.	Repairs and renewals of Locomotives. 1905.	1904.	All repairing charges, including shop machinery, tools, and marine equipment, etc. 1905.	1904.
	Cents.	Cents	Cents.	Cents.
Train	11.95	7.51	13.31	10.13
Engine	8.61	5.80	10.37	7.83
Car	0.67	0.47	0.82	0.63

The Superintendent of the Car Department reported expenditure, mileage, etc., as follows:

Half-year ended.	Total Cost of repairs and renewals.	Total Miles run by Cars. Passenger.	Freight.	Total.	Cost per Mile. Car.	Train.
	Dollars.				Cents.	Cents.
Dec., 1905.	1,033,148	20,595,259	135,850,006	156,445,265	0.660	10.68
" 1904.	781,779	20,067,215	132,159,481	152,226,696	0.514	8.20

An increase in expenditure of $251,369, or 32.15%, with an increase in car miles of 4,218,569, or 2.77%.

The car statistics shows 4 baggage cars built new, and 1 tank and 3 coal cars rebuilt at company's shops, at cost of revenue.

The revenue account for the half-year follows:

RECEIPTS.

	£ s. d.	£ s. d.	£ s. d.

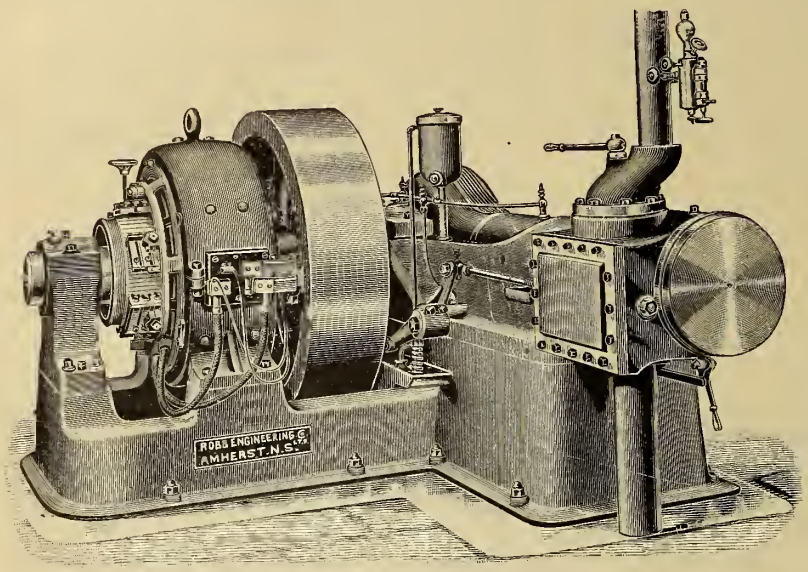
The President, Sir C. Rivers Wilson, was in the chair, and in moving the adoption of the report, and the declaration of the divi-

NOT ONE CENT FOR REPAIRS



An experienced engineer has written us as follows:—"After eighteen months of hard service, the "Robb" engines are in excellent shape, running very smooth and without a bit of vibration. Up to this time they have not cost one cent for repairs, the only expense being steam, oil and packing and this below the average. Perfect alignment, parts well machined and good design make the "Robb" the most economical and labor saving engine that has ever come to my notice."

dends recommended therein, referred to the change in the directorate by the death of L. J. Seargeant, and the election of the Hon. C. Rothschild, and analyzed at considerable length the figures respecting the operations for the half year. The period was a prosperous one, but although the revenue had increased there had also been a considerable increase in the expenditure. Of the increase of 536,502 tons of freight moved no less than 435,822 tons was in local traffic. The increase in working expenses is more than accounted for by the increased expenditure under the heads of maintenance of way and structures, and maintenance of equipment, there being a reduction under the head of conducting transportation. The increase in the maintenance charges was principally accounted for by the fact that the expenditure in 1904 was largely curtailed owing to the severe winter, and the consequent loss of revenue, and considerable leeway had to be made up. The expenditure under the head of conducting transportation showed a decrease of £23,412, the principal item of which was £21,785 in the payment on account of car mileage—the balance against the company in respect of the exchange of cars with other companies—due largely to increased facilities for the prompt handling of traffic. He next referred to the satisfactory operations of the subsidiary companies; the probable increase of taxation on the lines in Michigan, and in alluding to the dividends, stated that in 1895 the gross revenue was £4,417,000, while in 1905 it was £7,415,000; the net revenue in 1895 was £1,067,000, while in 1905 it was £2,016,000; in 1895 the company was not paying its fixed charges; at present dividends were being paid on all stocks with the exception of the ordinary shares, and the value of the company's securities had increased by £25,000,000. He mentioned this to show that the increased prosperity of the company went hand in hand with the improvement in the material condition of the railway, and that this successful financial consummation could not have been arrived at, and these dividends earned, if money had not been spent freely and continuously in the improvement of the property.

In connection with the reconstruction and re-equipment of the road there was a great deal to be done, and he desired to direct attention to the necessity of at once proceeding to a larger measure of renewal of locomotives. The official stock of locomotives paid for out of capital and maintained out of revenue, was 1,000, exclusive of the Central Vermont Ry., and under ordinary conditions they should be replaced at the rate of 50 a year. During the last eight years the company had replaced 265 locomotives, or at the rate of 33 a year, representing an expenditure of a little over £100,000. What it was now proposed to do was to build immediately or purchase 150 new locomotives, spreading the charge over five years. At the same time it was proposed to charge the cost of an annual addition of 30; that will make during the five years an addition to stock of 300 altogether, representing a total expenditure of £900,000 or £180,000 a year. This would involve an additional charge of £80,000 a year out of revenue. As regarded cars, although the company had been for some years replacing old cars by others of a larger capacity, there was still much to be done. The matter, however, did not immediately press, because arrangements had been made for the commencement of a supply of the equipment of the G.T. Pacific Ry. A contract had been made between the G.T. Pacific Ry. and the Canada Car Co. for the supply of 12,000 cars at the rate of 2,400 a year, and pending the completion of that railway, the G.T.R. would have the use of them, paying a mileage to the G.T.P. Ry. There will therefore be no immediate pressure on the company to build new cars on its own account.

The electrification of the St. Clair tunnel was in progress. The cost would be about £90,000, payable in instalments extending over five years; but it was estimated that there would be a saving of $60,000 a year, The company had acquired a steam ferry for its Detroit company to operate between Grand Haven, Mich., and Milwaukee, Wis., and had entered into an arrangement with the Buffalo, Rochester and Pittsburg Rd., for the construction of a steam ferry to operate on Lake Ontario between Port Charlotte, N.Y., and Port Hope, Ont. The operation of this ferry was expected to relieve the congestion at the International bridge, and on the long haulage by Buffalo of the 600,000 or 700,000 tons of coal which the company purchased in the U.S. during the year for its locomotives. In conclusion he referred to the successful issue of £1,000,000 4% debenture stock, for which application for £9,000,000 were received in 24 hours; and to the letting of contracts for 932 miles of construction on the G.T. Pacific Ry.

The resolution was seconded by A. W. Smithers and passed. Resolutions were also passed re-electing A. W. Smithers, Col. F. Firebrace, G. Von Chauvin, and Sir W. L. Young, as directors; re-electing F. Whinney, London, Eng., and C. Percy, Montreal, auditors; and thanking the chairman, directors and executive officers for their services.

Orders by the Railway Commissioners.

The following orders have been issued by the Board of Railway Commissioners:

963. Mar. 1.—Authorizing the C.P.R. to construct a branch line in the Nipissing District to the premises of the Temagami Lumber Co.

964. Mar. 5.—Approving deviation of the G.T. Pacific Ry. east of Kakabeka to the city limits of Fort William.

965. Mar. 5.—Sanctioning location plans of the Toronto and Niagara Power Co.'s right of way from Beach Road Station to a point in Saltfleet tp., Ont., mileage 39.8 to mileage 40.6.

966. Mar. 2.—Authorizing the G.T.R. to construct a branch line in Lakefield village, Ont., to the premises of the Dickson Lumber Co.

967. Mar. 2.—Sanctioning location plans for the Canadian Northern Ry., Battleford branch, from the main line at sec. 35, tp. 44, range 17, w. 3rd m., to Battleford, Sask., 8 miles.

968. Mar. 8.—Extending time fixed in the Board's order of Aug. 29, 1905, for the use of a crossing of the G.T.R. near Utopia, Ont., by the C.P.R. Toronto-Sudbury line.

969. Mar. 8.—Extending time for the use of the crossing of the G.T.R. line near Coldwater, Ont., by the C.P.R. Toronto-Sudbury line.

970. Mar. 8.—Extending time for the use of the crossing of the tracks of the G.T.R. Penetang Branch by the C.P.R. Toronto-Sudbury line.

971. Mar. 8.—Extending time for the use of the crossing of the G.T.R. tracks at Alliston, Ont., by the C.P.R. Toronto-Sudbury line.

972. Mar. 8.—Extending time for the use of the crossing of the G.T.R. tracks at Tottenham by the C.P.R. Toronto-Sudbury branch.

973. Mar. 7.—Approving location plans of a branch from the C.P.R. transcontinental line at Moose Jaw, Sask., to the west boundary of sec. 30, tp. 20, range 29, w. 2nd m., 36.3 miles.

974. Mar. 6.—Authorizing the G.T.R. Co. to construct a branch line in Palmerston, Ont., to the electric light premises.

975. Mar. 3.—Amending the Board's order no. 956, by striking out the words "by the applicant company." This was an order authorizing the reconstruction of the C.P.R. bridge across the Ottawa River at Ste. Anne de Belleville, and the original order provided for a swing span to be put in by the company should the construction of the proposed ship canal to the Georgian Bay render it necessary.

976. Oct. 17, 1905.—Interchange of freight at Winnipeg. See pg. 243.

977. Oct. 9.—Authorizing the Canadian Northern Ry. to divert the Pembina highway and to acquire certain lands in the parish of St. Boniface, Man.

978. Oct. 1.—Providing for the protection of Albert St. at the C.P.R. crossing, and the opening of Hamilton St. across the C.P.R., Regina, Sask., on the application of the city council.

979. Mar. 12.—Authorizing a diversion of the James Bay Ry. where the line crosses the Orillia Island, Rama Island, and Snake Island, Muskoka, Ont.

980. Mar. 12.—Authorizing the G.T.P. Ry. to construct a wharf on the Kaministikwia River, West Fort William, Ont.

981. Mar. 12.—Authorizing a diversion of the Guelph and Goderich Ry. line near the 40th mile.

982. Mar. 13.—Sanctioning change in location of the C.P.R. Toronto-Sudbury line between mileage 114 and mileage 119.6 in Conger tp., Ont.

983. Mar. 6.—Granting permission to the Brandon, Saskatchewan and Hudson Bay Ry. to construct its railway at rail level across a number of highways in Greenwood municipality, Man.

984. Mar. 12.—Amending the order authorizing the Canadian Northern Ry. to lay its tracks at rail level across the C.P.R. at Hartney, Man., and providing for the installation of interlocking plants on both lines, and the maintenance of a watchman at the crossing at the cost of the Canadian Northern Ry.

985. Mar. 14.—Authorizing the Dominion Natural Gas Co., Dunnville, Ont., to lay its mains under the G.T.R. tracks at four points near Jarvis, Ont., on specified conditions.

986. Mar. 14.—Authorizing the Niagara, St. Catharines and Toronto Ry. to construct a branch line in Thorold, Ont.

987. Mar. 13.—Granting permission to the Sandwich West municipal council to construct a culvert under the Michigan Central Rd. tracks in connection with the Sullivan Creek drain.

988. Mar. 12.—Directing that the C.P.R. and the Nelson and Fort Shepherd Ry. restore joint tariff W, no. 273. See pg. 241.

989. Feb. 13.—Authorizing the Canada Southern Ry. to take certain lands in Sandwich West township, Ont., for the purpose of the railway.

990. Mar. 16.—Approving of standard specifications of the Bell Telephone Co. of Canada for railway crossings.

991. Mar. 12.—Authorizing the Brantford Electric and Operating Co., Ltd., to carry electric wires over the tracks of the G.T.R. in Brantford, Ont.

992. Mar. 19.—Authorizing the General Manager of the White Pass and Yukon Ry. to prepare tariffs of tolls.

993. Mar. 17.—Interswitching at London, Ont. See April, pg. 205.

994. Mar. 16.—Approving location of the proposed line of railway of the Niagara-Welland Power Co., from Brantford to London, Ont., 51 miles.

995. Mar. 16.—Approving location of the Niagara-Welland Power Co.'s proposed line of railway from near Preston to Guelph, Ont., 11.91 miles.

996. Mar. 16.—Approving location of the Niagara-Welland Power Co.'s proposed line of railway from Galt to Berlin, Ont., 13.72 miles.

997. Mar. 20.—Approving standard plans for 150 ft. through truss span, and general specifications for bridges for the C.P.R.

998. Mar. 16.—Approving location plan of the Niagara-Welland Power Co.'s proposed line of railway from Stamford tp. to the International boundary, Niagara River, 6.78 miles.

999. Mar. 19.—Sanctioning detail plans of bridges at mileage 31.98 Fort William section, and mileage 74.5 on the Ignace section, C.P.R., to provide for a second track.

1000. Mar. 23.—Authorizing the C.P.R. to construct a bridge across the Black River on the Toronto-Sudbury branch, and approving detail plans for the same.

1001. Mar. 19.—Sanctioning plans for the construction of two bridges over the Don River, about 4.80 miles from Toronto, for the James Bay Ry.

1002. Mar. 27.—Authorizing the G.T.R. to construct a branch line from the company's Lachine Canal bank branch to the Ogilvie Flour Milling Co.'s siding.

1003. Mar. 23.—Sanctioning location plans for the Walkerton and Lucknow Ry. from Proton station, on the C.P.R. Toronto, Grey and Bruce branch, to Walkerton, Ont., 36.44 miles.

1004. Mar. 24.—Minimum carload weights of metallic shingles. See pg. 241.

1005. Mar. 24.—Amending Canadian Freight Classification no. 12. See pg. 241.

1006. Mar. 22.—Authorizing the G.T. Pacific Ry. to construct a branch line in Fort William, Ont.

1007. Mar. 23.—Authorizing the C.P.R. to construct a branch line at Liberty St., Toronto.

1008. Mar. 22.—Authorizing the Brandon, Saskatchewan and Hudson Bay Ry. to carry its telegraph lines across the Canadian Northern Ry. tracks at Wakopa, Man., upon terms and conditions named.

1009. Mar. 22.—Approving location of the Tillsonburg, Lake Erie and Pacific Ry., Zorra tp., Ont.

1010. Mar. 7.—See pg. 243.

1011. Mar. 23.—Directing the C.P.R. to provide a farm crossing on lot 8, con. 10, Morris tp., on the Guelph and Goderich Ry.

1012. March 23.—Authorizing the Berlin, Ont., water commission to carry its water mains under the G.T.R. tracks at four street crossings in the town.

1013. Mar. 19.—Sanctioning plans for a 20 ft. concrete arch over Peter's Lane, one mile west of London, Ont., by the C.P.R.

1014. Mar. 30.—Approving plans and specifications for a wharf in the Kaministikwia River, Fort William, Ont., for the G.T. Pacific Ry.

1015. Mar. 27.—Authorizing the C.P.R. to take certain lands in Toronto for railway purposes.

1016. Mar. 30.—Approving location plans for the Ridgeville branch of the Canadian Northern Ry., between sec. 30, and sec. 27, p. 1, range 6, e.p.m., Man., 6.60 miles.

1017. Mar. 30.—Approving deviation from previously located line of the G.T. Pacific Ry., for about six miles, between sec. 6, tp. 14, range 26, w.p.m., to sec. 27, tp. 14, range 27, w. p.m.

1018. Mar. 30.—Sanctioning plans for deviation from the constructed line of the C.P.R. between Gull Lake and Carmichael, Sask., mileage 36 to mileage 42.6.

1019. Mar. 30.—Sanctioning plans for deviation from constructed line of the C.P.R. between Seward and Antelope, Sask., mileage 15 to mileage 26.

1020. Mar. 30.—Approving location plans for the Canadian Northern Ry Ridgeville branch from mileage 25.18 to mileage 72.7.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments, Etc.

Alaska Central Rd.—The first 14 miles of this line from Seward, Alaska, have been reconstructed, the grade being reduced, and the line is in operation to mileage 45. Considerable work has been done between mileage 45 and mileage 105, including the partial construction of tunnels at mileage 52. The grade from mileage 75 to mileage 105 includes some of the heaviest work on the line. P. Welch & Co., Spokane, Wash., have the contract for this section of the line, and Rich & Harris are working at the tunnels. The contractors have great difficulty in keeping a sufficient force of men at work, as they go off prospecting or to the mines. Arrangements are being made to let further contracts for construction between mileage 105 and mileage 150. A contract has been let for the delivery of 5,000 tons of rails and fittings for delivery during the summer.

Application is being made for aid from Congress, and representatives of this and two other companies building railways in Alaska are at Washington negotiating with that object in view. (Sept., 1905, pg. 405.)

Algoma Central and Hudson Bay Ry.—Application is being made at the current session of the Dominion Parliament for an act authorizing the A.C. and H.B. Ry. to sell or lease its line in whole or in part to the Canada Central Ry., or to amalgamate with it, and to enter into agreements with the Manitoulin and North Shore Ry., the Ontario and Hudson Bay Ry., or the Canada Central Ry., for acquiring either or all of the lines in whole or in part. The Manitoulin and North Shore Ry. Co. is also applying for an act granting an extension of time within which it may construct its authorized lines, and authorizing it to sell its line to the Canada Central Ry., and to make agreements with the C. C. Ry., the A. C. and H.B. Ry., and the O. and H.B. Ry. (Mar., pg. 131.)

Burk's Falls and French River Ry.—Application will be made at the current session of the Dominion Parliament for an act incorporating a company with this title with all the usual powers to construct a railway, and to make arrangements with other railways and companies. D. R. McLean, Burk's Falls, Ont., is solicitor for the applicants.

Cape Breton Coal, Iron and Ry. Co.—Application has been made to the Dominion Government for a subsidy in aid of the construction of the company's projected line from its collieries at Broughton to Sydney and Louisburg, N.S. (Feb., pg. 63.)

The Central Ry. Co. of Canada is applying at the current session of the Dominion Parliament for an act increasing its capital stock and borrowing powers, to ratify and confirm agreements for the purchase of other railways, and to authorize the purchase of connecting lines of railway. (Feb., pg. 63.)

Chicago, Milwaukee and St. Paul Ry.—In connection with the extension of this line to Seattle, Wash., for which a contract has been let, it is reported that it is intended to further extend the line to Vancouver, B.C. Recent press reports from that city state that agents of the C.M. and St. P. Ry. had been in the city negotiating for the purchase of land on the water front, and two blocks for yards. It is also reported that land has been secured at Everett, Wash.

Cobalt Range Ry.—Application is being made at the current session of the Dominion Parliament by L. H. Timmins, J. J. Heney, C. A. McCool, M. J. Gorman, and J. McMartin, for an act incorporating a company with this title to construct a railway from Haileybury to the shore of Lake Temiskaming, to operate a steam ferry across the river to Fort Temiscamingue, Que.; to construct a line of railway from the ferry landing to Ville Marie, thence easterly and southerly either to a junction with the proposed Interprovincial and James Bay Ry., or the Lake Temiskaming Colonization Ry. near Kippewa station, Que. It is also desired to connect its lines with the Temiskaming and Northern Ontario Ry.; to construct telephone and telegraph lines, and to acquire the property, franchises and assets of the Temiskaming Navigation Co. L. H. Timmins and C. A. McCool are directors of the T.N. Co. which was recently organized to take over the Lumsden Line of steamers, operating on Lake Temiskaming.

Duluth, Rainy Lake and Winnipeg Ry.—A contract has been let to P. McDonnell, Duluth, Minn., for the extension of this line from Ashawa to Rainy Lake, Minn., 65 miles. A portion of the grading between Ashawa and Pelican Lake, 15 miles, has been completed, and work is in progress between Pelican Lake and Ash Lake. At Rainy Lake, the line will connect with a bridge to be constructed jointly by the company and the Canadian Northern Ry., and the D.R.L. and W.R. Co. will be enabled to run its trains into Fort Frances, over the C.N. Ry. (See Duluth, Virginia and Rainy Lake Ry., Dec., 1905, pg. 561. See also Canadian Northern Ry.)

Erie, London and Tillsonburg Ry.—The applicants to the Dominion Parliament for the incorporation of a company with this title are: E. V. Tillson, E. J. Jackson, Tillsonburg, Ont.; G. W. Teall, Vienna, Ont.; W. Thomson, London, Ont.; and W. Warnock, Aylmer, Ont. (April, pg. 193.)

Halifax and Eastern Ry.—H. A. Allan, A. A. Allan, of Montreal, and C. J. Coll, Manager Acadia Coal Co., Stellarton, N.S., are applying at the current session of the Nova Scotia Legislature for an act incorporating a company with this title for the purpose of constructing a railway from Halifax, along the eastern shore to Guysboro, about 250 miles, with a branch from Stellarton to Country Harbor, N.S. The company will have a capital of $2,000,000, and the Government will grant assistance in the form of a loan, secured by a first mortgage with interest at 3½%, of $12,000 a mile. Sir H. M. Allan is President of the Acadia Coal Co., which owns 10.25 miles of railway in the vicinity of New Glasgow, N.S., connecting with the Intercolonial Ry. at Lourdes Jct.

Hamilton Terminal Ry.—A large number of amendments were introduced into the bill in its passage through committee of the Ontario Legislature, and on April 11 the application was withdrawn. The bill was promoted by the Hamilton Steel and Iron Co., which now operates railway lines in connection with its blast furnaces, etc., and had for its object the obtaining of power to operate these as a separate company, and to construct extensions. A similar application made in 1905 was also withdrawn.

Hillcrest Ry. Coal and Coke Co.—The Dominion Parliament is being asked at its current session to pass an act incorporating a company with this title to construct a rail-

"Honesty is the **Best Policy**;" **Modesty** may also be **Good Policy**, but you can't make it **Sell Goods.**
—*Milwaukee Sentinel.*

What can be said of Varnish by any firm that may be termed "modest?" Do we not all have "the best?" and is not every candidate's goods better than the "other fellow's?"—at least so it is stated.

The buyer, however, after a time comes to **know** what is "best" for his particular purpose; he learns how to discriminate and finds out how to **interpret** the universal term called "best."

For all Railway purposes, that is "best" which stands the test of time and active service. Along these lines we have the **experience**; and we have a **record** which we "modestly" state to be unexcelled by any, and only equalled by some English makes, but even in this case we have superior qualities in **uniform working** and drying **all the year round.**

way from Morrissey, B.C., through the Crow's Nest Pass to Hillcrest Jct., Alta., thence to Cardston, with branch lines to Pincher Creek, and to the coal deposits in tp. 5, range 1, w. 5th p.m.; and also from some point of the proposed line to Little Kootenay Lakes. The notice is dated at Ottawa, and is signed by C. P. Hill, agent for the company.

Intercolonial Ry.—A deputation from Moncton, N.B., waited on the Minister of Railways respecting the rebuilding of the I.C.R. shops at that point. The Minister has stated all along that the shops would be rebuilt at Moncton, and it is understood that he informed the deputation that the interest of the line would be best served by erecting the new shops on a fresh site which will be found within the limits of Moncton. It is stated that the buildings contemplated and their equipment will cost over $1,000,000, for which there is about $500,000 at present available. The plans for the new works are in course of preparation. W. A. Bowden, formerly with the Locomotive and Machine Co. of Montreal, has been appointed Designing Engineer to the Department of Railways, and his work will include the new shops at Moncton. (Dec., 1905, pg. 565.)

The James Bay Ry. is applying at the current session of the Dominion Parliament for an act authorizing it to construct branch lines from points on its line to Key Inlet, and to a point in Hutton township, thence northerly to a junction with the Eastern Division of the G.T. Pacific Ry. (April, pg. 193.)

Kettle Valley Lines.—A by-law has been passed granting a free right of way through Grand Forks, B.C., and providing for the starting of construction in June. The company agrees to build a passenger station in Grand Forks at a cost of $3,000. H. W. Warrington, General Superintendent, stated that construction would be started at once. In order to enter the city a bridge about 1,000 ft. long, which is estimated to cost $30,000, will have to be constructed. (Mar., pg. 131.)

Klondike Mines Ry.—The title of the English company which is constructing this line of railway is the Dawson, Grand Forks and Stewart River Corporation, and its offices are at 2 Suffolk Lane, Canon St., London, E.C., and not as given in our Feb. issue. J. Carlisle, one of the directors named, is associated with the Blue Star Line of steamers, and not as mentioned with the Red Star Line, which is a part of the International Mercantile Marine Co. The corporation, we were advised recently, has no Canadian directors, the other gentlemen referred to being directors of the K.M. Ry. Co. (April, pg. 193.)

London and Port Stanley Ry.—The City Engineer, of London, Ont., has completed an inspection of the line. He found the line between London and St. Thomas to be in a very bad state, but in a good condition between St. Thomas and Port Stanley. The report will be considered both by the City Council and the directors of the railway. The latter met April 24 and discussed the matter with General Manager Cotter, of the Pere Marquette Rd., who stated that the work of relaying the rails between London and St. Thomas was in progress, and other work would be done.

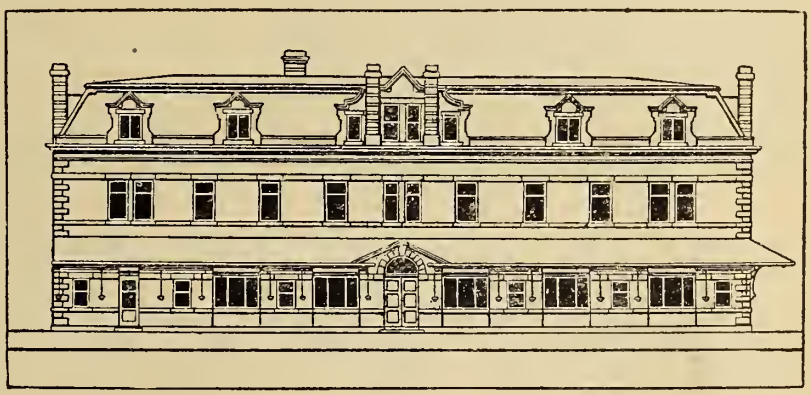
Manitoulin and North Shore Ry.—See Algoma Central and Hudson's Bay Ry.

Michigan Central Rd.—Work is in progress grading for a second track on the main line between Tilbury and Ridgetown, Ont. about 30 miles. W. E. Tench & Co., Detroit, Mich., are the general contractors, and the work has been sublet, the names and addresses of the sub-contractors, with the mileages in order from Tilbury, being: W. Boug, Essex, five miles; F. Gilhuly, Merlin, two miles; Wellwood and Graham, one mile; D. Murphy, Fletcher, five miles; Jos. Mitchell, Toronto, three miles; Wellwood and Graham, five miles; Wallace and Ryan, Merlin, four miles; W. Barton, Detroit, one mile; A. A. Hargrove, Detroit, three miles. The track will be graded 20 ft. from the present rails and the work involves the moving of 200,000 cubic yards of earth. The contract calls for the completion of the work by July 1. This will give the line a double track between Windsor and St. Thomas, Ont. (Dec., 1905, pg. 565.)

Midway and Vernon Ry.—A decision favorable to the company has been given in the B.C. courts, in the dispute with the Provincial Government respecting the subsidy. The Chief Justice held that work did actually commence before the expiration of the charter, and that the Subsidy Act therefore was in full force and effect. The owners of the M. and V. Ry. charter state that work will be started up again as soon as survey parties and construction gangs can be got together. A contract was signed with the Dominion Government July 28, 1905, for the construction of 150 miles of line, upon the usual terms and conditions as to a subsidy. (See British Columbia, Feb., pg. 61.)

Quebec Midland Ry.—The names of the provisional directors mentioned in the act for the incorporation of a company with this title, which has been approved by the House of Commons railway committee, are: J. E. Hardman, A. W. G. Wilson, R. B. Owens, H. C. Mitchell, Montreal, and F. H. Chrysler, Ottawa. The company seeks power to construct a railway from the northern shore of Lake Abbitibi to the west shore of Lake Metagami, Que. The company's offices are fixed at Ottawa; the capital is put at $500,000, and the bonding powers at $25,000 a mile. (Feb., pg. 65.)

Quebec Southern Ry.—We are advised that it is the intention of the company to extend the line from Pierreville east to Chaudiere, Que , as soon as possible, using the new Quebec Bridge and Ry. Co.'s line from that point into Quebec city. It is proposed to construct 50 miles during the present season to a point near St. Jean Deschaillons, or to a junction with the Lotbiniere and Megantic Ry. Orders have already been placed for part of the material for this line, and two engineering parties are engaged in making the permanent location. It is expected that tenders will be asked for this work during May. The line contractor expects to have the line completed and ready for operation by Oct. 1. (Dec., 1905, pg. 287.)



FRONT ELEVATOR, NEW STATION BEING ERECTED AT CHARLOTTETOWN, P.E.I.

Nicola, Kamloops and Similkameen Ry.—Tracklaying had been completed and work trains were being run for 15 miles from Spence's Bridge, Mar. 31, the tunnel having been completed some days previously. Work on the bridges is well forward and it is expected that the track will be laid to Coulter, and to the crossing at the forks early in May. It is hoped to put on a regular passenger and freight service in June. (Feb. pg. 63.)

Prince Edward Island Ry.—Work has been started on the construction of the new station at Charlottetown, a description of which has already been published. The contractor is E. A. Wallberg.

Tenders are under consideration for the construction of two cribwork rest piers for the Hillsborough River bridge. (Dec., 1905, pg. 567.)

The Pembroke Southern Ry. is applying at the current session of the Ontario Legislature for an Act authorizing it to extend its line from Pembroke, through Pembroke, Stafford, Alice and Petawawa townships.

Quebec and Lake St. John Ry.—The Minister of Public Works and other Quebec Government officials recently completed a trip of inspection over the new lines under construction by the company. The most important of these is the La Tuque branch, 33 miles long. On this 13 miles of track have been laid from the point of junction with the main line, and the grade for another 10 miles of track is practically completed. The steam shovel is at work at La Tuque, and grading is in progress at that end of the line. The will be laid with 80 lb. steel, and the specifications will provide for concrete or masonry culverts and steel bridges of the highest standard. In connection with the existing line, it has been decided to reconstruct it so as to bring it up to the standard of the best lines in Canada. (See Quebec, Montreal and Southern Ry., April, pg. 193.)

Salisbury and Harvey Ry.—The New Brunswick Legislature at its last session voted a subsidy to aid in the construction of the projected extension from Baltimore to Moncton, N.B., about 4 miles, and if a subsidy can be secured from the Dominion Parliament, construction will, it is said, be gone on with at an early date. A proposition has been made for the construction of a steel railway and general traffic bridge over the Petitcodiac River, and an arrangement is expected to be made with the Provincial and Dominion Governments about it.

Southern Central Pacific Ry.—In connection with the application being made for the revival of the act of 1903, incorporating the S.C.P. Ry. Co., with power to construct a railway from Vancouver through Kootenay Pass to Fort Churchill on Hudson Bay, it is proposed to ask the Dominion Parliament to authorize the construction of a branch line from near Skaist River, B.C., northeasterly, through the Yellowhead Pass to a junction with the main line at Cold Lake, Sask. F. H. Honeywell, Ottawa, is solicitor for the applicants. (Mar., pg. 131.)

Temagami, Cobalt and Temiskaming Ry.—The Dominion Parliament is being asked at

its current session to pass an act incorporating a company with this title to construct a railway from Lake Temagami, by the most feasible route to the Ontario-Quebec boundary near North Temiskaming, thence to the Ottawa River, near Quinze Rapids; with power to construct branch lines and tramways. Latchford, McDougall & Daly, Ottawa, are solicitors for the applicants.

Temiskaming and Northern Ontario Ry.—Tenders were received to April 24, for all the work except ballasting and tracklaying, for an extension of the line at North Bay, to Nipissing Jct., about three miles, and from the junction with the C.P.R. in North Bay to Regina St., North Bay. The object of the first extension is to give a direct connection with the G.T.R. terminals at Nipissing Jct., and the second in order to provide terminals for local freight traffic. On the section of the line between North Bay and New Liskeard a new station is being built at Temagami, where a large tourist traffic has developed, the original station building being converted into a restaurant. (Dec., 1905, pg. 569.)

Toronto, Hamilton and Buffalo Ry.—An announcement has been made that the T., H. and B. Ry. proposed to spend $10,000 during the summer in extending the Brantford station and otherwise improving the property surrounding it. (April, pg. 195.)

Railway Rolling Stock Notes.

The Intercolonial Coal Mines Co., Westville, N.S., has received five coal hopper cars from Rhodes, Curry & Co., Amherst, N.S.

The Dominion Iron and Steel Co. is reported to have placed an order with Rhodes, Curry & Co. for 65 three-ton limestone cars.

The 10 baggage and express cars which the C.P.R. has under construction at its Angus shops, Montreal, are 60 ft. long, 9 ft. 10½ ins. wide over frames, without platforms.

The C.P.R. is building five conductors' vans at its Farnham, Que., shops, which will be 29 ft. long by 9 ft. wide over frames; body and underframe, wood; axles, 3¾ by 7 in., M.C.B.; brasses, 3¾ by 7 in.; cast iron wheels.

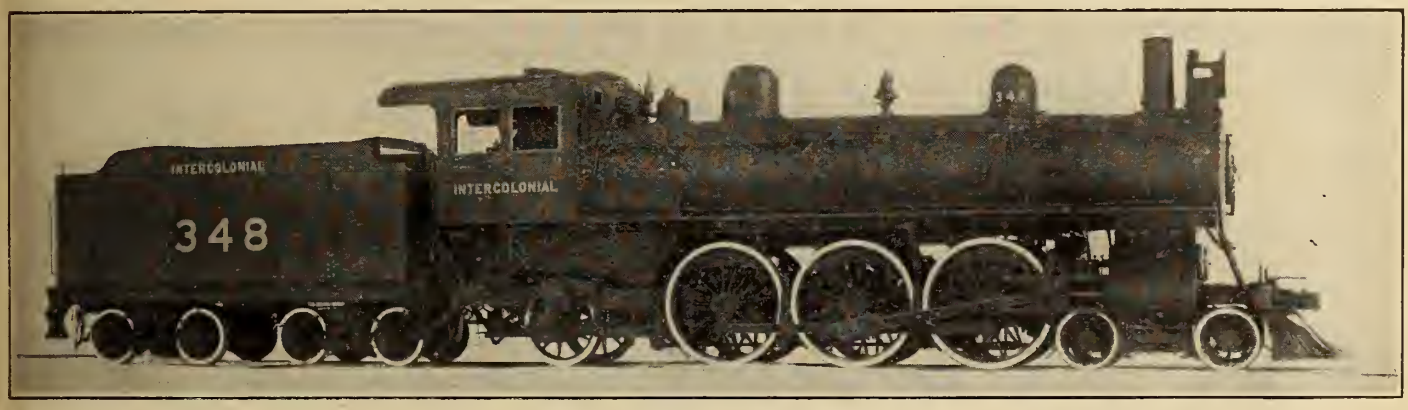
The C.P.R. received between Mar. 16 and April 19 the following rolling stock: 12 locomotives from the Locomotive and Machine Co. of Montreal; four locomotives, 170 box cars and 400 ballast cars from its Angus shops, Montreal.

The Intercolonial Ry. received between Mar. 22 and April 12 the following rolling stock: 12 refrigerator cars and four cabooses from Rhodes, Curry & Co., Amherst, N.S., and seven box cars, 60,000 lbs. capacity, from another Canadian builder.

and 9 ft. 10½ in. wide over frames, to have a capacity of 12 sections with smoking room and state room. The body and underframe is of wood, mounted on 6-wheel 5 by 9 in. trucks, 38 in. quadruple elliptic springs, and 36¼ in. steel-tired wheels, with 5 by 9 in. brasses. Simplex brake beams with adjustable heads, and Westinghouse air brakes are to be fitted.

The box cars under construction at the C.P.R. Angus shops, Montreal, will be 36 ft. 8 in. long by 9 ft. 0⅝ in. wide over frames, the inside measurements being 36 ft. long, 8 ft. 6 in. wide, and 8 ft. high. The body and underframes will be of wood, and they will be mounted on all steel diamond pattern trucks; wheels will be cast iron, and the axles will be 4½ by 8 in. M.C.B. The special fittings include Simplex bolsters and brake beams, Susemihl side bearings, and Westinghouse air brakes.

The C.P.R. is building 20 first-class cars at its Angus shops, Montreal, which will be 65 ft. long and 9 ft. 10½ in. wide over frames, and will have a seating capacity of 56 in the main room and 8 in the smoking compartment. The body and underframes will be of wood, mounted on 4-wheel passenger trucks, 38 in. quadruple elliptic springs, 36¼ in. steel-tired wheels, with 5 by 9 in. brasses. The special fittings include



PACIFIC TYPE PASSENGER LOCOMOTIVE BUILT FOR INTERCOLONIAL RY. BY LOCOMOTIVE AND MACHINE CO., OF MONTREAL

Toronto Union Station.—The bill asking for the incorporation of the Toronto Union Station Co. is under consideration by the House of Commons railway committee. The incorporators are: C. M. Hays, E. H. Fitzhugh, F. H. McGuigan, of the G.T.R.; Sir T. G. Shaughnessy, D. McNicoll, J. W. Leonard, of the C.P.R. The company will take over the present Union Station property in Toronto, in connection with the new station to be erected, and the works proposed to be carried out are declared to be for the general advantage of Canada. The G.T.R. had some actions in the Ontario courts, April 17, when orders were obtained giving it possession of the site for the new station, with the exception of such portions about which the arbitrators are to fix prices. The work of clearing the site preparatory to a start being made with construction will be gone on with at once. (Mar., pg. 131.)

The Canadian Northern Ry. issued a handsomely got up, annotated time table, entitled "Through a Thousand Miles of Wheatfields," in connection with the trip of Prince Arthur of Connaught in a special train over the line, April 7 to 9. The time table portion gives in addition to the time of arrival and departure of the special train, a well-written description of the country, and to this is appended a history of the growth of the system, a description of the country between Winnipeg and Port Arthur, Ont., and a number of illustrations.

The Locomotive and Machine Co. of Montreal has received an order for two 2½ yard Atlantic type steam shovels for the G.T. Pacific Ry. for June delivery. It has delivered four similar type shovels of 3½ yds. capacity to the C.P.R., and 35 10-wheel locomotives; and made the first delivery of 10-wheel locomotives to the Canadian Northern Ry. April 20, and will complete the delivery of the 10 on order early in May.

The C.P.R. is building a number of 30-ton flat cars at its Angus shops, Montreal, which will be 36 ft. 8 in. long by 8 ft. 10 in. wide. The body and underframes are of wood, mounted on all steel diamond pattern trucks, on cast iron wheels, with axles 4¼ by 8 in., M.C.B. standard. The special fittings include Simplex bolsters and brake beams, Susemihl side bearings and Westinghouse air brake.

The stock cars now under construction at the C.P.R. Angus shops will have wood body and underframes 36 ft. 8 in. long by 9 ft. 5 in. wide, the inside dimensions being 36 ft. long, 8 ft. 9¾ in. wide, and 7 ft. 1¼ in. high. Trucks are all steel diamond frame, with cast iron wheels, and 4¼ by 8 in. axles, M.C.B. standard. Simplex bolsters, Susemihl side bearings and Westinghouse air brakes are included in the special fittings.

The C.P.R. is building 10 sleeping cars at its Angus shops, Montreal, to be 72 ft. long Simplex brake beams with adjustable heads, and Westinghouse air brakes.

Mackenzie, Mann & Co. have placed an order with the American Palace Car Co. for the construction of four palace cars for the James Bay Ry. and the Halifax and South-Western Ry. The cars, which will be built in the U.S., are to be of the combined sleeping, parlor and dining car type similar to the Columbia, which recently completed an exhibition trip through Canada. The cars are to be 72 ft. 6 in. over end sills, and will be operated by the railway company. They are to be delivered Aug. 1.

The principal dimensions of the switching locomotive under construction for the Dominion Iron and Steel Co., Sydney, N.S., by the Locomotive and Machine Co. of Montreal, include the following: Cylinders, 18 by 24 in., wheel base of engine and tender, 38 ft.; of which the driving wheel base is 11 ft.; weight of engine and tender in working order, 170,000 lbs., the engine alone being 100,000 lbs.; heating surface, 1,188.2 sq. ft.; 1,074.4 being the tubes and 113.8 the firebox; grate area, 22.6 sq. ft.; boiler, straight top, radial stayed; working pressure, 160 lbs.; tubes, 188 of 2 in. diameter and 11 ft. long; driving journals, main 7½ by 8½ in.; tender, 4¼ by 8 in.; tender, wood frame; tank, U shape sloping back, 3,000 gals. capacity; coal capacity, 5 tons; wheels, cast iron, 44 in. centres, 51 in. outside diameter; tender wheels, 33 in. diameter.

Transportation by the Company's Steamers, brigades of boats and canoes throughout the Territories not traversed by railways.

Full information at the Company's Offices, Winnipeg, or 1 Lime St., London, E.C.

The simple cylinder locomotive which the Canada Car Co. is having built by the Locomotive and Machine Co. of Montreal, will have a wheel base of 7 ft., a tractive power of 12,495 lbs., and its total weight will be 60,500. Other dimensions are: Cylinders, 14 by 22 in.; boiler, straight top, 42¾ in. outside diameter, 150 lbs. working pressure; tubes, 92 of 2 in. diameter and 10 ft. 6 in. long; heating surface, 553.9 sq. ft., of which 501.8 sq. ft. represents the tubes and 52.1 sq. ft. the firebox, which is 43 3-16 by 34¾ in.; driving wheels, 44 in. outside diameter; round top saddle tank, having a capacity of 1,075 gals.; fuel capacity of one ton.

The general dimensions of the compound consolidation freight locomotives which the G.T.R. has ordered from the Locomotive and Machine Co. of Montreal, are: cylinders, 22½ and 35 in. diameter, by 32 in. stroke; driving wheels, 63 in. diameter; boilers, 63⅜ in. diameter; firebox, 96⅛ by 75¼ in.; 353 tubes, 15 ft. long by 2 in. diameter; wheel base, on drivers, 17 ft.; total wheel base of engine 25 ft., 6 in., total wheel base of engine and tender 56 ft., 2½ in.; total length over all 66 ft., 11 in.; weight in working order: on drivers, 174,000 lbs.; on engine truck, 26,000 lbs.; weight of tender, 143,300 lbs.,; total weight of engine and tender, 200,000 lbs.; working pressure, 210 lbs. per square inch; maximum height of engine 15 ft., 1¾ in.; width, 9 ft., 10 in.; capacity of tender, 7,000 gals. of water, 28,000 lbs. of coal.

Following are general dimensions of the 4-4-0 class locomotive which the Brockville, Westport and North-Western Ry. is having constructed by the Locomotive and Machine Co. of Montreal: Cylinder, 17 by 24 in.; tractive power, 15,220 lbs; wheel base, 8 ft. 6 in. rigid, 22 ft. 11 in. total; and 44 ft. 7 in. total of engine and tender; weight on drivers, in working order, 55,000 lbs., and of engine and tender, 149,000 lbs.; heating surface, 1,231.2 sq. ft., of which 1,111.8 sq. ft. is in the tubes and 119.4 in the firebox, which is 72 3-16 by 34⅜ in.; boiler, wagon top, crown bar stayed, 50 in. outside diameter, working pressure, 160 lbs.; journals, 7 by 8 in.; engine truck journals, 5 by 9 in.; tender, wood frame, U shaped level top, to have a capacity of 3,600 gals. of water and 6 tons coal; driving wheels, 56 in. centres, 62 in. outside diameter; tender wheels, 33 in. diameter.

The Intercolonial Ry. is having 16 locomotives of the 4-6-0 class built by the Locomotive and Machine Co. of Montreal, of which the principal dimensions follow:

CYLINDER.—Diameter, 21 in.; stroke 28 in.
WHEEL BASE.—Driving and rigid, 12 ft. 7 in.; total, 31 ft. 6 in.; total engine and tender, 57 ft. 10¼ in.
WEIGHT.—On drivers, 132,190 lbs.; in working order, 194,530 lbs.; engine and tender, 288,970 lbs.
HEATING SURFACE.—Tubes, 2,596 sq. ft.; firebox, 162 sq. ft.; total, 2,758 sq. ft.; grate area, 46 sq. ft.
AXLES.—Driving journals, 9 by 12 in.; engine truck journals, 5½ by 10¼ in.; trailing, 7 by 14 in.; tender, 5½ by 10 in.
BOILER.—Type, wagon top, radial stayed; outside diameter first ring, 63½ in.; working pressure, 200 lbs.
TUBES.—Number, 232 of 2¼ in. diameter by 19 ft. long.
TENDER.—Style of tank, water bottom; capacity 5,000 gallons water and 10 tons coal.
WHEELS.—Main, cast steel, 66 in. centres, 72 in. outside tire; engine truck, 33 in.; trailing, 48 in.; tender, 36 in.
SPECIAL FITTINGS.—Westinghouse air brakes and signals.

Following are general dimensions of the 10 passenger locomotives of the 4-6-0-155 type for which the G.T.R. has placed an order with the Locomotive and Machine Co. of Montreal:

CYLINDERS.—Type, simple; diameter, 19 in.; stroke, 26 in.
TRACTIVE POWER.—23,270 lbs.
WHEEL BASE.—Driving and rigid, 14 ft.; total, 24 ft. 4 in.; engine and tender, 51 ft. 8 in.
WEIGHT.—In working order, 156,000 lbs.; on drivers, 118,000 lbs.; engine and tender, 286,000 lbs.
HEATING SURFACE.—Tubes, 1,896.8 sq. ft.; firebox, 166 sq. ft.; total 2,062.8 sq. ft.; grate area, 30.5 sq. ft.
AXLES.—Driving journals, main, 9 by 10 in.; others, 9 by 10 in.; engine truck journals, 6½ by 10¼ in.; tender journals, 5½ by 10 in.
BOILER.—Type, extended wagon top, radial stayed, outside diameter first ring, 60¼ in.; firebox, 108⅛ by 40¾ in.; tubes, 270 of 2 in. diameter, and 13 ft. 6 in. long; working pressure 210 lbs. per sq. in.
TENDER.—Frame, 13 in. channel, style of tank, U shaped, level top; water capacity, 6,000 gallons; coal, 12 tons.
WHEELS.—Driving, 72 in. outside tire, 66 in. centres; material, cast steel; tender, 34 in. double plate cast iron G.T.R. print 4547.
BRAKES, ETC.—Westinghouse brakes to drivers and tender, and Westinghouse air signal.

Following are the principal dimensions of the 15 locomotives of the 2-8-0-C-203 type for which an order has been placed with the Locomotive and Machine Co. of Montreal by the G.T.R.:

CYLINDER.—Type, Richmond compound; diameter, 22½ and 35 in.; stroke, 32 in.
TRACTIVE POWER.—34,000 lbs.
WHEEL BASE.—Driving and rigid, 17 ft.; total, 25 ft. 9 in.; total engine and tender, 56 ft. 5½ in.
WEIGHT.—In working order, 203,000 lbs.; on drivers, 177,000 lbs.; engine and tender, 343,000 lbs.
HEATING SURFACE.—Tubes, 2,756.9 sq. ft.; firebox, 156 sq. ft.; total, 2,912.9 sq. ft.; grate area, 50.2 sq. ft.
AXLES.—Driving journals, main 9½ by 12 in.; others, 9 by 12 in.; engine truck journals, 6½ by 12 in.; tender, 5½ by 10 in.
BOILER.—Type, extended wagon top, radial stayed, working pressure, 210 lbs.; firebox, 96¼ by 75¼ in.; tubes, 353 of 2 in. diameter, and 15 ft. long.
TENDER.—Frame, 13 in. channel iron; style of tank, U shaped, level top; capacity, 7,000 gals. of water and 12 tons of coal.
WHEELS.—Driving, 56 in. centres, 63 in. outside diameter; materials, cast steel for main and cast iron for others; engine truck wheels, 31 in. diameter, cast iron centres, with 3 by 5½ in. steel tires; tender wheels, 34 in. double plate cast iron G.T.R. print 4547.
BRAKE, ETC.—Westinghouse brakes to drivers and tender, and Westinghouse air signal.

The Temiskaming and Northern Ontario Ry. is having two locomotives of the 4-6-0 class built by the Locomotive and Machine Co. of Montreal, of which the following are the principal dimensions:

CYLINDER.—Type, simple; diameter, 19 in.; stroke, 24 in.
TRACTIVE POWER.—21,380 lbs.
WHEEL BASE.—Driving and rigid, 13 ft. 6 in.; total, 23 ft. 8 in.; engine and tender, 50 ft. 7 in.
WEIGHT.—In working order, 106,000 lbs.; engine and tender, 242,000 lbs.
HEATING SURFACE.—Tubes, 1,640 sq. ft.; firebox, 140 sq. ft.; arch tubes, 22 sq. ft.; total, 1,802 sq. ft.; grate area, 30 sq. ft.
AXLES.—Driving journals, main, 8½ by 10 in.; others 8½ by 10 in.; engine truck journals, 5½ by 10 in.; tender, 5 by 9 in.
BOILER.—Type, extended wagon top, radial stayed; outside diameter first ring, 58¼ in.; working pressure 200 sq. ft.; firebox, 104 by 42 in.; tubes, 245 of 2 in. diameter and 13 ft. 2 5-16 in. long.
TENDER.—Frame, steel; tank, U shape gravity slides; capacity, 5,000 gallons water.
WHEELS.—Driving, 56 in. centres, 62 in. outside diameter; engine truck, cast iron, of 28 in. diameter; tender, cast iron, of 33 in. diameter.
SPECIAL FITTINGS.—Westinghouse American brakes to drivers, truck and tender, and Westinghouse air signals.

Canadian Car Service Bureau, etc.—Referring to the item on this subject in our April issue, pg. 231, we understand that the jurisdiction of the Canadian Freight Association's Western Lines Freight Inspection and Car Rental Department will embrace between Fort William, Ont., and Laggan, B.C., on the C.P.R. main line and to a point on the Crow's Nest Pass branch of the C.P.R. to be decided on. H. R. Patriarche is Manager, with office at Winnipeg. A car service bureau has been established for British Columbia embracing the lines in that Province east to Laggan, and to the point on the Crow's Nest Pass branch to which the Winnipeg office's jurisdiction extends. E. J. Travers has been appointed Manager with office at Nelson.

An issue of $1,000,000 of 4% first mortgage bonds of the Montreal Warehousing Co. has been authorized and is being offered in denominations of $1,000 or its equivalent in sterling. The bonds will run for 30 years, and they are unconditionally guaranteed, both as to principal and interest by the G.T.R.

Railway Finance, Meetings, etc.

Bruce Mines and Algoma Ry.—The line and property of this company is in charge of H. D. L. Gordon, Toronto, the receiver appointed by the Court of Exchequer. The line is not being operated at present, but as soon as the spring opens traffic will be resumed. The question of the future of the line has not been decided, but it may not be necessary to have a sale of the property by order of the court.

Canada Atlantic Ry.—Application is being made at the current session of the Dominion Parliament for an act authorizing the company to acquire, hold or dispose of the capital stock and debentures of the Pembroke Southern Ry., or to guarantee the principal and interest of the bonds, debentures or other securities of the line to an amount not exceeding $150,000.

Canadian Northern Ry.—Following are the directors for the current year: W. Mackenzie, President; D. D. Mann, Vice-President; Z. A. Lash, Chief Solicitor; and F. Nicholls, of Toronto; R. M. Horne-Payne, one of the partners in the financial firm of Sperling & Co., of London, Eng.

Canadian Pacific Ry.—The Alberta Government has asked the Provincial Legislature to pass legislation providing that a fee be charged for all titles to patents registered on lands. Homesteaders are exempted from the payment of the fees, thus leaving it to be paid by the C.P.R. and the Hudson's Bay Co. The fixing of the fee has been left to the Governor-in-Council.

Central Ontario Ry.—W. Mackenzie, of Mackenzie, Mann & Co., stated April 6 that his firm had purchased a block of the bonds of the C.O. Ry., and it is expected that an arrangement will be made with the conflicting interests to secure the other bonds and securities of the company, so that the litigation may be ended and the line pass completely under the control of Mackenzie, Mann & Co. The line extends from Picton to Bancroft, Ont., 104 miles; and a short extension is under construction from Bancroft northerly. The line was originally projected by S. J. Ritchie, of Akron, Ohio, to tap the iron ore deposits of Hastings county, but the expected traffic did not materialize owing to the difficulties in the treatment of the ore, it containing a very large percentage of sulphur. For a time the line was controlled by the late Judge S. Burke of Cleveland, Ohio. The railway has been in the hands of a receiver for some years, on account of the litigation between the bondholders and shareholders, and sections of both.

Columbia and Western Ry.—An act respecting the subsidy voted this railway, now owned by the C.P.R., was passed at the current session of the British Columbia Legislature. The act authorizes the Government to grant a subsidy of not more than 808,872 acres of land in full satisfaction of the aid earned by the company under its subsidy act, and in respect of sections one or two of the lines such lands to be designated and surveyed within a year from the passage of the act. Under the original subsidy act the company was granted 10,840 acres of land for each mile of railway constructed.

Crow's Nest Southern Ry.—Following are the officers and directors for the current year: President, Hon. G. A. Cox; Vice-President, Hon. R. Jaffray; Treasurer, E. Sawyer, St. Paul, Minn.; Managing Director and Secretary, G. G. S. Lindsey, K.C.; other directors: Sir H. M. Pellatt, E. R. Wood. The company does not publish an annual report.

Dominion Atlantic Ry.—At the annual meeting of shareholders held in London, Eng., Mar. 30, President C. Fitch Kemp expressed the regret of the directors that they were unable to propose a dividend on the pref-

THE WIRE AND CABLE COMPANY, - MONTREAL

erence stock. The severe winter of 1904-5 was a very expensive one for the company, and the year generally had not been satisfactory. The current year so far had been satisfactory, the increase of income over last year amounting to about $38,000. The acquisition of the Midland Ry. was referred to, and Vice-President Roland, who had made a trip of inspection over the line, said it would undoubtedly prove very advantageous to the company. P. Gifkins, General Manager, spoke of the operations of 1905, and of the present and future of the line, in which he had every confidence. The directors and officers were thanked for their past services.

Great Northern Ry. of Canada.—Application will be made to the Board of Railway Commissioners, May 30, to recommend the Governor-in-Council to sanction an agreement amalgamating the G.N. Ry. and the Quebec, New Brunswick and Nova Scotia Ry., also for a similar recommendation to amalgamate the G.N. Ry. and the Chateauguay and Northern Ry.

Hampton and St. Martin's Ry.—An order for the sale of this railway has been made in the New Brunswick Equity Court, to satisfy a judgment for a claim for $514,000, principal and interest of a mortgage.

London and Port Stanley Ry.—The report of the audit of the books of the Pere Marquette Rd., operating the L. and P.S. Ry. under lease from the London, Ont., City Council, shows that the percentage on the earnings over $80,000 for 1905 will amount to about $8,000, so that the income for the year will be $18,000, the flat rental under the lease being $10,000 a year. The percentage in 1904 was $5,000.

Morrisey, Fernie and Michel Ry.—Following are the officers and directors for the current year: President, Hon. G. A. Cox; Vice-President, Hon. R. Jaffray; Managing Director and Secretary, G. G. S. Lindsey, K.C.; Treasurer, E. R. Wood, other directors: Sir H. M. Pellatt, Col. Jas. Mason, T. Walmsley and C. C. Dalton. This line, as well as the Crow's Nest Southern Ry., is operated in connection with the Crow's Nest Pass Coal Co.

New Brunswick Coal and Ry. Co.—An offer to lease this line for a period of 99 years, at a rental of $21,000 a year, has been made through Messrs. Greenshields, solicitors, Montreal, to the New Brunswick Government. The line is at present being put in repair and operated by a Commission appointed under an act of the Provincial Legislature.

Pembroke Southern Ry.—At a meeting held April 2, a resolution was passed confirming an agreement dated Feb. 10, with S. R. Poulin and the Canada Atlantic Ry., and authorizing the directors to issue bonds not exceeding $150,000, to be secured by a mortgage upon the company's property. The Pembroke Southern Ry. extends from Pembroke on the C.P.R. transcontinental line, to near Golden Lake on the Canada Atlantic Ry., and is operated under an agreement by the latter railway. The issue of bonds is made in connection with the recent transfer of the Canada Atlantic Ry. to the G.T.R. See also Canada Atlantic Ry.

Pere Marquette Rd.—The report for the year ended June 30, 1905, has been issued, and will be considered by the shareholders at the annual meeting in May. The company operates 2,377.35 miles of line, of which it owns 1,836.36, controls 244.11, and has trackage rights over 246.88 miles. The lines controlled include the Lake Erie and Detroit River Ry., with its leased line, the London and Port Stanley Ry. in Ontario, and the trackage rights include 154.51 miles on the Michigan Central Rd. between St. Thomas, Ont., and Suspension Bridge, N.Y., which did not come into the mileage for 1904. The gross earnings were $12,667,420.34, operating expenses and taxes $10,330,439.78, leaving net earnings of $2,336,980.56; other sources of income brought in $441,036.02, making altogether $2,778,016.58; interest and rentals required $2,800,447.06, which left a deficit of $22,430.48. The through freight line from Chicago to Buffalo was put in operation July 14, 1904, but a passenger service was not put in operation during the year. There was expended on additions and improvements during the year $1,254,192.51, and there was added to equipment 20 locomotives, 2,350 freight cars, two boarding cars and 22 passenger cars. The general balance sheet showed a debit balance of $504,498.24.

Qu'Appelle, Long Lake and Saskatchewan Ry. and Navigation Co.—A consultative committee representing this company's 6% first mortgage bonds has been appointed to act with the trustee for the protection of the bondholders generally. The secretary of the committee is F. Roche, 6 Princes St., London, E.C., England.

Quebec Bridge and Ry. Co.—A return ordered by the House of Commons shows that the Quebec Bridge and Ry. Co. has issued 2,637 shares, of which a large number are held by persons holding one share each. The names of those holding 50 shares or over are: M. P. Davis, 949; Hon. John Sharples, 500; H. A. Allan, 250; C. M. Hays, (in trust), 250; S. N. Parent, 80; H. M. Price, 52.

Quebec Central Ry.—After the annual meeting, which will be held in London, Eng., May 2, the holders of 4% debenture stock will hold a special meeting for the purpose of authorizing the directors to issue additional debenture stock or bonds, or both, authorized by the company's acts, provided that the total amount to be issued does not exceed $15,000 a mile of the present line and branches constructed or to be constructed.

Gross earnings for Feb., $61,478.84; net earnings, $19,255.66, against $47,899.98 gross and $9,499.93 net for Feb., 1904. Net earnings for two months ended Feb. 28, $37,481.24, against $16,822.61 for same period 1905.

Quebec and Lake St. John Ry.—The prior lien bondholders, at a meeting held in London, Eng., recently, authorized the issue of a further amount of £150,000, making a total issue of £500,000 of such bonds. This issue is for the completion of the La Tuque branch, the acquisition of new stock and the improvement of the line generally.

Reid Newfoundland Co.—A. B. Morine, St. John's, Nfld., has instituted an action against R. G. Reid to recover $62,500 for costs in connection with the following matters in which he acted as Mr. Reid's solicitor: The formation of the Reid Newfoundland Co., $5,000; as counsel before the Arbitration Court, 1902 (balance), $25,000; services in connection with W. G. Reid estate, $2,500; services as counsel before the Telegraph Arbitration Court, 1904, $30,000.

Temiscouata Ry.—At a meeting of certificates of first mortgage debentures held in London, Eng., recently the committee was given power to deal with any offers for the purchase of the line that might be made; and it was decided to exchange the present bonds of the railway for consolidated mortgage income bonds. The holders of the St. Francis branch bonds passed similar resolutions at a meeting subsequently held.

Traffic receipts for Mar. $16,043.87, against $13,249.02 for Mar., 1905.

Toronto, Hamilton and Buffalo Ry.—Earnings for Mar., $69,615.61, against $59,856.21 for Mar., 1905.

Railway Students at McGill University.

A circular issued by C. M. Hays, Second Vice-President and General Manager G.T.R., April 2, respecting the offer of free scholarships at McGill University, Montreal, by the company, sets forth that: Two free scholarships covering four years' tuition in the Faculty of Applied Science of McGill University, Montreal, are offered, subject to competitive examinations, to apprentices and other employes of the company under 21 years of age, and to minor sons of employes. The competitive examinations, which will be the regular entrance matriculation examination provided for in the annual calendar of the University, will be held under the supervision of the faculty of Applied Science at the University, beginning June 12. The two candidates making the highest average and complying with the requirements of admission will be awarded the scholarships and have the option of taking a course in any department of the Faculty of Applied Science. Scholarships will be renewed from year to year only upon the holders thereof passing, satisfactorily, the sessional and other examinations prescribed by the Faculty. In consideration of the free scholarships, students will be required to enter the service of the company as student apprentices, and serve during vacation periods while in attendance at the University, and at the option of the company, for two years after completing the college course. Successful candidates will, before entering the University, be required to execute the company's regular form of student apprentice contract, copies of which can be obtained upon application to R. S. Logan, Assistant to Second Vice-President, Montreal, to whom, also, applications for certificates entitling eligible persons to enter the competition should be addressed.

Canadian Northern Ry. Earnings, etc.

Gross earnings, working expenses, net profits, increases or decreases over 1904-05, from July 1, 1905:

	Earnings.	Expenses.	Net Earnings.	Increase or Decrease.
July..	$395,100	$ 252,600	$ 142,500	$ 51,400+
Aug..	357,900	246,200	111,700	12,200+
Sept..	378,500	268,300	110,200	14,000+

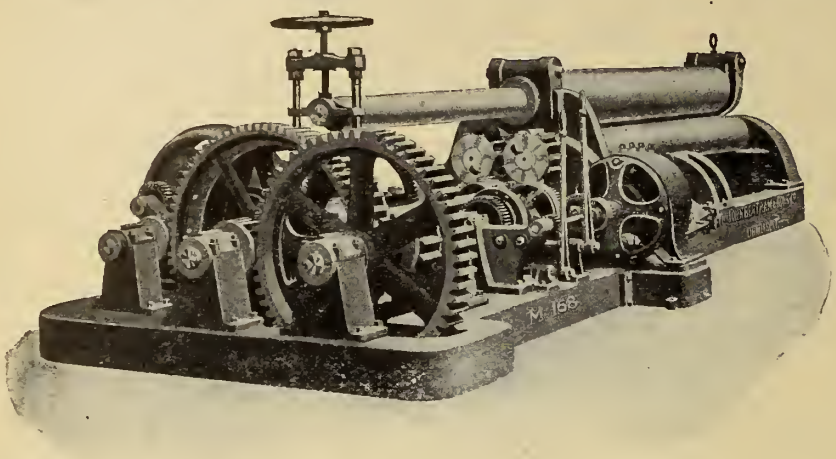
DULUTH, SOUTH SHORE AND ATLANTIC RY.—Gross earnings for Feb., $204,559.27; net earnings $40,491.03, against $188,422.40 gross and $45,635.30 net for Feb., 1905. Net earnings for eight months ended Feb. 28, $679,943.82 against $574,803.39 for same period 1904-05. Approximate earnings for Mar., $251,688 against $236,836 for Mar., 1905.

MINERAL RANGE RY.—Approximate earnings for Mar., $66,362, against $66,072 for Mar., 1905.

MINNEAPOLIS, ST. PAUL AND SAULT STE. MARIE RY.—Gross earnings for Feb., $764,745.35; net earnings, $322,409.08, against $523,872.75 gross and $179,063.93 net for Feb., 1905. Net earnings for eight months ended Feb. 28, $4,174,575.69 against $2,950,827.44 for same period 1904-05. Approximate earnings for Mar., $911,288 against $705,046 for Mar., 1905.

BERTRAM PLATE-BENDING ROLLS



MOTOR DRIVEN

These machines are built in four sizes for plates from 12 feet wide, 1¼ inches thick, to 16 feet wide and 1 inch thick. The rolls are arranged in pyramid form and driven by a motor with reversing mechanism. The top roll is raised and lowered by an independent motor. The rolls and hoisting mechanism are steel throughout, and the machine has strength and power to bend plate full width between the housings to a complete circle in from one to three passes.

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The Marconi-Wireless Telegraph Co. has placed an order with the Robb Engineering Co., Amherst, N.S., for two 150 h.p. boilers for its station near Glace Bay, N.S.

B. J. Coghlin & Co., Montreal, have issued a catalogue of crowbars of various kinds, track wrenches, tamping bars, rail tongs, track gauges, etc., which they manufacture.

The Robb Engineering Co., Amherst, N.S., has received an order through E. A. Wallberg, of Montreal, for two 200 h.p. Robb-Mumford boilers for the I.C.R. new round house at Truro, N.S.

The Canadian Westinghouse Co., Hamilton, Ont., has issued booklets, etc., describing its fan motors, direct current ceiling type fans, direct current multiple arc lamps and small power motors.

Steam Shovel News, issued by the Vulcan Iron Works, Toledo, Ohio, contains some interesting information about the construction of the new canal between Lake Erie and the seaboard, through the State of New York.

The Alberta Ry. and Irrigation Co., Lethbridge, Alta., has ordered two 175 h.p. Robb-Mumford boilers from the Robb Engineering Co., Amherst, N.S. When these are installed, this company will have nine of these boilers in use.

The Canadian Westinghouse Company is furnishing the T. Eaton Company, Toronto, a 300 k.w. direct current, 550 volt, engine type generator, to be used as part of its present large power plant, which is considered one of the most up-to-date direct current plants in Canada, and is equipped throughout with Westinghouse apparatus.

The annual report submitted to the shareholders of the Canadian Westinghouse Co., at Hamilton, Ont., showed that the past year had been a prosperous one. After paying a dividend of 6%, there remained a balance of $232,041.35 to be carried forward. Application is being made to have the capital increased from $2,500,000 to $5,000,000. Following are the officers and directors for the current year: President, G. Westinghouse; Vice-President, H. H. Westinghouse; Vice-President and General Manager, P. J. Myler; Secretary, J. H. Kerr; other directors: L. A. Osborne, G. C. Smith, T. Ahearn, W. Y. Soper, C. F. Sise, J. M. Gibson, K.C.

C.P.R. Betterments, Construction, Etc.

Eastern Lines Generally.—During the current year a quantity of 80-lb. rails will be laid on the various divisions, replacing lighter rails; a number of bridges will be renewed, strengthened or filled and a large amount of ballasting, fencing and ditching will be done.

Eastern Division.—The more important works to be carried out during the year on this division include the following: The double track which now extends to Ste. Annes will be extended to Vaudreuil, Que., necessitating the rebuilding of the large bridges over the Ottawa River at Ste. Annes and Vaudreuil and a smaller bridge between those points. The bridges between Vaudreuil, Que., and Smith's Falls, Ont., will be rebuilt and made suitable for double track. At Montreal the extensive terminal enlargements in progress last year will be continued. The New Glen yard roundhouse, storage tracks, etc., will be occupied in May, and the new branch alongside the south side of the Lachine Canal from Highlands will be completed. To accommodate the additional clerical staff, consequent upon the increase in traffic, another story will be added to the recently built Osborne St. extension of the Windsor St. station.

St. Phillippe Northerly.—A contract has been entered into with the Dominion Government for the construction of a line of about three miles extending from St. Phillippe d'Argenteuil station, or between there and Grenville, Que., northerly.

Ontario Division.—The construction of the branch lines and extensions now in progress in Western Ontario is being actively proceeded with, and to accommodate the additional rolling stock which will be required for the operation of these lines, and to handle the rapidly increasing business, the roundhouse and repair shops at Toronto Junction and John St., Toronto, will be enlarged. The car ferry now being built at Detroit, Mich., to transport coal for the company from Ashtabula, Ohio, to Port Burwell, Ont., will be completed and in service early in the season. In connection with this, heavy expenditures will be made for additional terminal facilities at Port Burwell, and the Port Burwell-Tillsonburg branch will be brought up to the C.P.R. standard.

Improvements at Lambton.—Track has been laid on the new piece of line between Lambton station and the Humber River, which was graded in 1905. The new piece of line crosses Lambton Park and cuts out the big curve near the Lambton golf grounds, at which point the Toronto-Niagara Power transmission wires cross the line.

Toronto-Sudbury Line.—A contract has been let to the Ross & Harris Co., Limited, Montreal, for the construction of 40 miles of line between Parry Sound and Byng Inlet, Ont. This section will complete the line from Bolton, on the Toronto, Grey and Bruce branch, to Romford, on the transcontinental line of the C.P.R., connecting the section under construction from Bolton with that being constructed southerly from Romford. The contract covers everything in connection with a completed railway. The headquarters of the contractors for the present will be at Parry Sound, Ont. They will sublet all the work except tracklaying and ballasting. The company's engineer locally in charge of the work is F. G. Mackie.

Lake Superior Division.—Owing to the increasing number of trains handled by the heavy locomotives now being placed in service, a number of additional crossing sidings will be put in on this division, and others extended. A large additional yard will be installed at Sudbury, Ont., to accommodate the trains of the new Toronto-Sudbury line, and take care of increasing business. A brick station is also in course of erection. An enlargement will also be made of the yard at Webbwood, Ont., to accommodate the increasing business of the Sault Ste. Marie branch.

Western Lines Generally.—In addition to special works mentioned under the several divisions, the appropriations for the current year's betterments provide for a large amount of work to be done in the repair of locomotive houses; the erection of a number of 40,000 gal. water tanks; the erection of a number of no. 5 stations; alterations and additions to coaling plants; the provision of better water supply and purifying plants for treating water at a number of points; enlarging old buildings and constructing new stock yards, etc., and the fencing of 369 miles of line. There will also be a considerable amount of bridge filling, and ballasting done, and a number of steel bridges will be erected replacing lighter steel or wooden structures.

Central Division.—The betterments which it is proposed to carry out during the current year include the enlargement and extension of the coal shed, and freight shed at Fort William, Ont.; the completion of the hotel at Winnipeg; putting in 903,000 new ties, and laying 80 miles of second track with 80-lb. steel; and the construction of overhead bridges at West Fort William (footbridge) and Kenora (general traffic bridge).

Western Division.—During the current season 472,000 new ties will be put in the lines on this division, and 104 miles of 80-lb. steel will be laid, replacing lighter rails. The other works to be undertaken include the provision of terminal facilities at Emerson, Broadview, and Souris, Man.; Red Deer, Sask.; Lethbridge, Alta.; yard alterations

at Portage La Prairie, Man.; Medicine Hat, Sask.; Calgary, Alta.; new station and dining hall at Swift Current, Sask.; a six-stall addition to roundhouse at Medicine Hat, and a 30 foot extension to the boiler-house at Calgary.

Calgary and Edmonton Ry.—The Dominion Parliament will be asked at its current session for an act authorizing an extension of the Lacombe branch from its present authorized terminal at 100 miles east of Lacombe, to a point in range 27 or 28, west of the third meridian, between townships 35 and 42.

Western Lines Bridgework.—The steel bridge work provided for in the appropriations for the current year includes a number of small spans, and the following of 100 ft. or over: 100 ft. through lattice span at mileage 28.6, Nakusp and Slocan branch; 150 ft. deck lattice span at mileage 51.9, Laggan section; three 150 ft. through lattice spans at mileage 53.1, Laggan section; four 130 ft. through lattice truss spans, one 125 ft. through lattice truss span, one 80 ft. deck plate girder, and one 200 ft. through swing span at mileage 199.8, Cascade section.

New Tunnel near Palliser, B.C.—When the line was first built a tunnel, known as Mud Tunnel, was made through a high clay bluff, which projected out into the Kicking Horse River, which made a sharp bend at this point. This tunnel was lined with heavy timbers, but signs of crushing soon manifested themselves, and the timbers began to split and break. It was soon evident that the tunnel would have to be abandoned, and in 1887 a line was accordingly graded around the bluff along the edge of the river, it being necessary to use a very sharp curve—22°—having a radius of 260 ft., and turning around a total angle of 180°. Shortly after the new line was graded the tunnel completely crushed in, and the sharp curve has been successfully operated ever since. In the autumn of 1905 it was decided to build a new tunnel a little further into the hill than the site of the old tunnel, and a contract was accordingly let to O. Olson, an experienced contractor, who had previously made a success of difficult tunnel work. The new tunnel will be 690 ft. long, and is built according to the latest Government requirements, having a height of 22 ft. 6 in. above the rail. It is lined throughout with concrete 3 ft. thick, strengthened by Kahn steel bars. The work is now about half completed, and should be finished during the coming summer.

Pacific Division.—The appropriations for the current year provide for the putting in of 357,000 new ties, and the laying of 76.71 miles of 80-lb. steel rails; the provision of terminal facilities at Crow's Nest; yard alterations and extensions at Revelstoke and Vancouver; the erection of a new station at Fernie, B.C ; a new freight shed at Victoria; and the completion of the hotel there. There will also be considerable alterations and improvements at the company's hotels in the mountains at Field, Glacier, Banff, Lake Louise, Laggan, Sicamous, Emerald Lake, and North Bend, B.C.

The Board of Railway Commissioners spent some days in Toronto recently, commencing their sittings April 18. There were 30 applications on the list to be dealt with, but some delay was experienced in getting the parties interested present. An agreement was reached between the C.P.R. and the city of Toronto in reference to a question of land. An important question dealt with was that affecting the carrying of the Toronto and Niagara Power Co.'s lines across the G.T.R. at six points between Toronto and Niagara Falls, in regard to which an agreement was also effected.

MAINLY ABOUT PEOPLE.

Mrs. Ryan, widow of the late John Ryan, contractor, died in Toronto, April 24.

Sir Wm. Van Horne, Chairman of the Board, C.P.R., returned to Montreal from England, April 11.

E. E. Delaney, general agent Freight Department, Northern Pacific Ry. at Buffalo, N.Y., died there from pneumonia, April 7.

Jos. Stovel, who died at Winnipeg, Man., April 7, aged 78, was father of C. R. Stovel, Canadian Northern Ry. Right of Way Agent.

G. Swain, who was conductor on the Royal train in 1862, when the King visited Canada, celebrated his 80th birthday at Winnipeg, Man., Mar. 28.

E. A. James, Manager Canadian Northern Ry., returned to Winnipeg, Man., from Los Angeles, Cal., early in April, very much improved in health.

T. Harvey, C.P.R. city ticket agent at Sault Ste. Marie, Mich., was drowned near Thunder Bay light, Lake Huron, by falling overboard from the str. Goodyear, April 23.

John Bertram, founder and head of the firm of The John Bertram Sons Co., Ltd., Dundas, Ont., died somewhat suddenly at his residence there, April 12, aged 77.

J. N. Brooks was presented with a dress suit case by the Winnipeg office staff, on leaving to take up his new duties as C.P.R. claims agent, Calgary, Alta., Mar. 27.

W. Hendrie, railway contractor, and President of the Hendrie Co., cartage contractors G.T.R., Hamilton, Ont., has been made an honorary member of the English Jockey Club.

J. P. Rogers, formerly Superintendent, White Pass and Yukon Route, Skagway, Alaska, was presented with a gold watch by the employes of the company on leaving the service.

Sir T. G. Shaughnessy, President C.P.R., who was on board the Empress of Britain on her trial trip round Ireland, will be a passenger on her initial trip from Liverpool to Quebec.

S. McGarvah, who was Superintendent of Bridges, Southern Division G.T.R., until his resignation about three years ago, owing to ill-health, died at Windsor, Ont., April 17, aged 68.

P. G. Freeman, Chief Engineer of the Halifax Electric Tramway Co., read a paper on the company's plant at the recent meeting of the Mining Society of Nova Scotia, Halifax, N.S.

The Montreal Star, on April 2, published a portrait of W. Wainwright, Comptroller and General Assistant, G.T.R., as a captain in the G.T.R. Rifle Brigade, from its issue of April 2, 1876.

Major Jas. Tattersall, who committed suicide by shooting himself with a revolver at Niagara Falls, Ont., Mar. 27, was an official of the Great Western Ry., and its successor the G.T.R.

Capt. C. R. Kingsmill, who has been appointed to the command of H.M. battleship Dominion, is a nephew of N. Kingsmill, Toronto, director Canada Southern Ry. and associated lines.

W. W. Pope, who was managing clerk to the late John Bell, G.T.R. solicitor, has been granted permission to practise law on passing an examination to be set by the Law Society of Ontario.

G. H. Pick, weighing inspector, I.C.R., completed his 42nd year in railway service, April 5, having started as freight checker with the European and North American Ry. at St. John, N.B., 1864.

H. G. Coykendall, railway contractor, who died in the Rochester, Minn., hospital, recently, aged 66, at one time resided in Winnipeg, Man., and was engaged in construction work on the C.P.R.

F. R. Clarke, who died at Montreal, April 14, aged 68, had been for about 50 years in the service of the G.T.R., and for many years had been chief clerk in the Mechanical Superintendent's Department.

W. H. Taylor, who has been appointed manager Royal Alexandra Hotel, Winnipeg, Man., arrived there from England, April 4, and entered upon his duties in connection with the fitting out of the building.

The engagement is announced of Miss Marjorie Baker, daughter of the Assistant to the President of the C.P.R., to Howard, son of Jno. Turnbull, agent for Lord Mountstephen, and financial agent, Montreal.

A. Cameron, General Traffic Agent, C.P.R., London, Eng., was present at a dinner given by the Canada Club in London, recently, to the Canadians who have been elected to seats in the British House of Commons.

Capt. A. Clark was killed by the explosion of an acetylene gas buoy near Parry Sound, Ont., April 23. The tug Pilot, which was engaged in the service of recharging the buoys, was so badly injured that she sank, the crew escaping.

W. E. Fowler, Master Car Builder, C.P.R., returned to his office at Montreal, April 3, after having been absent for some weeks. During his absence he underwent an operation in Detroit, Mich., from the effects of which he has recovered.

R. H. Bell, Travelling Freight and Passenger Agent Canadian Northern Ry., was given a suit case by his Montreal colleagues, on moving from that city to Pittsburg, Pa., where he will in future represent the company as Commercial Agent.

A. E. Jones, of Buffalo, N.Y., who was private secretary to F. W. Cumberland, managing director of the Northern Ry. of Canada, at Toronto, in the early seventies, has been elected an honorary member of St. George's Society, of London, Eng.

B. W. Chipman, President Nova Scotia Telephone Co., died at Halifax, N.S., April 24, aged 70. He was father of H. L. Chipman, Manager of the Canada Atlantic and Plant Steamship Co., and of J. D. Chipman, C.P.R. city passenger agent, Halifax, N.S.

Major D. MacInnes has been retained as Deputy-Assistant Quartermaster-General at Halifax, N.S., by the Dominion Government, to which position he was originally appointed by the Imperial Government. He is a brother of W. R. MacInnes, Freight Traffic Manager, C.P.R., Montreal.

A. L. Hertzberg, C.P.R. Engineer of Maintenance of Way, Montreal, was the principal guest at a dinner in Toronto, April 21. Those present included nearly all the C.P.R. officials who had been associated with Mr. Hertzburg during the years he had been Division Engineer at Toronto.

M. H. McLeod, Chief Engineer Canadian Northern Ry., was presented with a scarf pin composed of the initials of Prince Arthur of Connaught, surmounted with the royal crown in gold and enamel, as a souvenir of the recent royal trip over the line. Mr. McLeod accompanied the royal party in the special train.

A telegram received in Brantford, Ont., April 25, from Seattle, Wash., stated that Dr. S. Ritter Ickes had died there suddenly. He was until recently in control of the Brantford St. Ry., the Woodstock, Thames Valley and Ingersoll Ry., and the Grand Valley Electric Ry. His widow and two children are in Brantford.

Mrs. Thos. Tait, wife of the Chairman of the Victorian State Railway Commission, the industrial development of the country.

Avoid Infringements by Ordering Direct

with her daughter, Miss Winnifred, sailed from Melbourne, April 16, for Vancouver, B.C. They will travel from thence to Toronto, where they will visit Mrs. Tait's parents, G. R. R. and Mrs. Cockburn, and will subsequently go to Great Britain.

P. F. McCabe, station agent at Bolton Mills, Vt., who was arrested in Montreal, was removed to St. Albans, Vt., April 8, to answer a charge of wrecking the New England express, Feb. 6, by leaving a switch open on a siding, and a charge of perjury in connection with the investigation before the Central Vermont Railway Commission.

The partnership as insurance agents, heretofore carried on in Toronto by Arthur White, ex-Division Freight Agent of the G.T.R., and J. Earls, ex-Secretary of the Canadian Freight Association, has been dissolved by mutual consent. Mr. Earls has been appointed special agent of the Phœnix Assurance Co., and of the London & Lancashire Life Assurance Co.

K. Sutherland, who died at Kentville, N.S., Mar. 27, aged 72, as a member of the firm of Sutherland & Sons, had to do with the construction of the Intercolonial Ry. between Halifax and Truro, N.S.; subsequently he became associated with the Windsor and Annapolis Ry., and was Manager for some years. He has been living in retirement for a number of years.

J. H. Barber, who has been appointed Division Engineer, C.P.R., Montreal, was born in Hamilton tp., near Cobourg, Ont., Dec. 20, 1856, and was educated in Toronto. He was an articled pupil of James Ross, C.E., 1875 to 1878, and was engaged as Assistant Engineer and Division Engineer on various sections of location and construction on the C.P.R., up to 1891. In the fall of that year he entered the maintenance of way department as Resident Engineer at Toronto, and was transferred to St. John, N.B., as Division Engineer, Atlantic Division, which position he held until his present appointment.

C. E. McPherson, General Passenger Agent C.P.R. Western Lines, Winnipeg, Man., was married at St. John's, N.B., April 11, to Miss J. S. Troop. A number of presentations were made to Mr. McPherson in connection with the event, including a case of silver from the C.P.R. staffs on the Western Lines; a cut glass pitcher and glasses from the staff of the general passenger office, Winnipeg; a bronze ornament from the ticket staff at Winnipeg; a cut glass salad bowl and servers from the company's Toronto passenger staff, and a silver service from a number of personal friends in Winnipeg.

M. A. Overend, who has been appointed Western Freight Agent, Dominion Steamship Line, Portland service, at Toronto, was born in England and came to Canada in 1872, entering the service of the Great Western Ry., Hamilton, Ont., in the mechanical department, and continuing until the absorption of that road by the G.T.R. in 1884, since which time his record has been as follows: Oct., 1884, to June, 1885, clerk in G.F.A. office, Hamilton; June ,1885, to June, 1892, clerk in D.G.F.A. office, Toronto; June, 1892, to Nov., 1893, clerk in same office, Toronto; Nov., 1893, to May, 1895, Ontario Agent Canada Atlantic Fast Freight Line, Toronto; May, 1895, to Sept., 1896, city freight agent, G.T.R., Toronto; Sept., 1896, to April, 1898, Ontario Agent C.A.F.F. Line; April, 1898, to Oct., 1905, Foreign Freight Agent, Canada Atlantic Ry., Montreal; Oct., 1905, to April, 1906, with a private firm.

Frederic Nicholls, whose portrait appears on the first page of this issue, was born in England, Nov. 23, 1856, and was educated at Stuttgart, Wurtemberg, Germany. He came to Canada in 1874, and has been actively associated with the promotion of He was one of the original promoters of the Toronto Incandescent Electric Light Co., which undertook to light Toronto by electricity distributed by underground conduits. For a number of years he was Secretary of the Canadian Manufacturers' Association, and was connected with journalism, becoming Vice-President of the Toronto Press Club in 1890. He was actively connected with the organization of the Canadian General Electric Co., the factories of which are at Peterborough, Ont., and within the last few years has been the moving spirit in the formation of the Canada Foundry Co., and the Canadian Shipbuilding Co., Toronto. He is also associated with the Electrical Development Co. of Canada, which is developing the hydro-electric power plant at Niagara Falls, and the associated companies for the distribution of the power throughout Western Ontario, and the construction of electric railways. In addition to being a director of the Canadian Northern Ry., he is associated as President, Vice-President or director with the Toronto Ry., Niagara, St. Catharines and Toronto Ry., Toronto and Hamilton Ry., Canadian Lakes and Ocean Navigation Co., Niagara, St. Catharines and Toronto Navigation Co., as well as a number of financial and industrial corporations.

A notice has been issued by D. Pottinger, General Manager Intercolonial Ry., stating that the Minister of Railways has decided that it is not in the interest of the railway that the employes should become candidates for municipal offices.

The Ontario Government has reaffirmed its decision not to grant licenses to hotels erected in Algonquin Park. This application was made by the G.T.R., which proposes to erect one or more tourist hotels in this Provincial park.

The Intercolonial Ry. will put its Ocean Limited train in service about June 28, between Montreal, St. John, N.B., and Halifax, N.S., to continue until September. It is expected the time will be about the same as last year, leaving Montreal at 7.30 p.m., and Halifax at 8 a.m.

Replying to a question in the House of Commons, April 3, the Premier said there was no truth in the rumor that the G.T. Pacific Ry. had applied to the Government to reduce the Chinese poll tax from $500 to $50 in order that Chinese labor might be imported to assist in the work of constructing the line.

A bill is being discussed by the Imperial Parliament the object of which is to amend the Merchants Shipping Acts in such a way as to place foreign vessels using British ports on the same footing as British vessels in regard to inspection, overloading, the provision of life-saving appliances, the control of emigration and passenger traffic, etc.

The arbitrators selected in the dispute regarding wages between the G.T.R. and its engineers are: Wallace Nesbitt, Toronto, representing the company; P. H. Morrissey, Cleveland, Ohio, an official of the Brotherhood of Locomotive Engineers, representing the men, and the third arbitrator is J. F. Wallace, of New York, formerly Chief Engineer of the Panama Canal.

The Ontario Railway bill, as introduced by Hon. J. S. Hendrie, has been discussed at considerable length at a meeting of the Government and representatives of the municipalities, and the points of difference are under the consideration of the Government. The Premier announced after the meeting that it was probable that considerable changes would be made in the bill, but he was not in a position to state just exactly what they would be. The nature or extent of the changes have not yet been laid before the Legislature.

TRANSPORTATION APPOINTMENTS.

Canadian Pacific Ry.—R. F. Struthers, in addition to his duties as Chief Inspector of Time Service, will act as Chief Examiner for Vision, Color-sense and Hearing Tests, Western Lines. He will report to the Superintendent of Transportation, sending copies of his reports to the respective Superintendents for action.

J. E. Proctor, heretofore City Ticket Agent Nelson, B.C., is reported to have been appointed Travelling Passenger Agent Western Division. Headquarters, Calgary, Alta.

E. V. Dangerfield, heretofore baggage master New Westminster, B.C., has been appointed Travelling Baggage Agent Western Lines. He will report to the Assistant General Baggage Agent at Winnipeg. Office, Calgary, Alta.

A. Hatton, heretofore Chief Train Dispatcher at Fort William, Ont., has been appointed Chief Train Dispatcher, 2nd district, Central Division, at Cranbrook, B.C. C. E. Marsfield, who has been acting Chief Train Dispatcher, has returned to his position as trick dispatcher.

F. W. Sterling has been appointed chief clerk to General Freight Agent Pacific Division, Vancouver, vice J. Halstead, promoted.

In connection with the reorganization of the freight and passenger departments of the C.P.R. and its U.S. subsidiaries—the Duluth, South Shore and Atlantic Ry., and the Minneapolis, St. Paul and Sault Ste. Marie Ry.,—in Buffalo, N.Y., referred to in our last issue, the title of R. A. Burford is City Passenger Agent, and that of W. S. Nevins is City Freight Agent.

T. G. Orr has been appointed Travelling Passenger Agent, with headquarters at Pittsburg, Pa.

J. W. Draper has been appointed General Agent Freight and Passenger Departments at Seattle, Wash.

J. Halstead, heretofore chief clerk to General Freight Agent Pacific Division, Vancouver, has been appointed Agent Freight and Passenger Departments at Tacoma, Wash., vice J. W. Draper, promoted.

Canadian Northern Ry.—F. A. Shaw, heretofore contracting freight agent, has been appointed City Freight Agent at Montreal.

H. Logan, heretofore soliciting freight agent Lehigh Valley Rd., has been appointed Travelling Freight Agent C.N.R. Headquarters, Toronto.

G. L. Fairhead, heretofore Contracting Freight Agent, has been appointed City Freight Agent, Toronto.

R. H. Bell, heretofore Travelling Freight and Passenger Agent at Montreal, has been appointed Commercial Agent at Pittsburg, Pa.

The following changes have been made in the dispatching staffs: F. T. Peebles, heretofore at Port Arthur, Ont., has been transferred to Dauphin, Man.; W. I. Munro, heretofore at Winnipeg, has been transferred to Dauphin; W. Inglis, heretofore at Dauphin, has been transferred to Battleford, Sask. The names of T. Davis, Dauphin, and W. Kirkpatrick, Battleford, do not now appear on the list of dispatchers.

Department of Railways and Canals.—W. A. Bowden, heretofore connected with the Locomotive and Machine Co. of Montreal, has been appointed Designing Engineer of the Department. His duties will include the work in connection with the new shops for the Intercolonial Ry. at Moncton, N.B.

Grand Trunk Ry.—W. R. Vair, heretofore clerk in the station ticket office Detroit, Mich., has been appointed ticket agent there, succeeding H. M. Morgan, promoted.

Walter White having been assigned to other duties, the position of assistant trainmaster, districts 22, 23 and 24, with office at Palmerston, Ont., has been abolished.

Walter White, heretofore assistant-trainmaster at Palmerston, Ont., has been appointed agent at Black Rock, N.Y., succeeding J. J. Beck, appointed superintendent Toronto Union Station.

The following Agents have been appointed: Richmond, Que., W. Harrison; Whites, Que., J. L. O'Colomb; Brockville, pass., Ont., W. J. Gillerlain; Goodwood, Ont., T. A. Weir; Unionville, Ont., C. H. Flumerfelt; Thornhill, Ont., W. I. Wilson; King, Ont., W. J. Buchanan; Emsdale, Ont., V. McIlhargey; Callander, Ont., C. L. Bowles; Huntsville, Ont., P. Meyer; Stayner, Ont., T. Kennedy; Bronte, Ont., C. E. Diltz; Clarkson's, Ont., L. G. Hord; Dorchester, Ont., W. E. Cusson; Eastwood, Ont., D. C. Anderson; Hyde Park, Ont., G. H. Barnes; Welland, Ont., W. R. White; Britton, Ont., J. Wadge; Hawkesbury, Ont., H. B. Patridge; Maxville, Ont., W. H. Harris; Pembroke, Ont., J. R. Pilson; Kinburn, Ont., W. A. Ellis.

Great Northern Ry. (U.S.)—R. W. Bryan, heretofore Superintendent at Melrose, Minn., has been appointed Master of Transportation, a new office. Office, St. Paul, Minn.

F. Bell, heretofore Superintendent of Car Service, has been appointed Superintendent at Melrose, succeeding R. W. Bryan.

Intercolonial Ry.—The circular appointing E. A. Williams Special Agent was issued April 6. Policemen, constables and watchmen are directed to report to him direct, and to continue to report, at as present, to local and other officers.

The following changes in the dispatching staffs at Moncton and Newcastle, N.B., were announced in the local papers April 17: W. P. Hutchinson, of Moncton, has been transferred to Newcastle; T. A. Scribner, of Newcastle, has been moved to Moncton to relieve P. M. McMahon, who has been transferred to the yard office there.

J. J. McConniff, at one time in the union ticket office, Windsor Hotel, Montreal, has been appointed city passenger and ticket agent, I.C.R. and Prince Edward Island Ry., Montreal, succeeding J. W. Bryson. The ticket office will be located at 141, instead of 143 St. James St., after May 1.

Montreal and Lake Superior Line.—F. Lumsden has been appointed agent at Port Arthur.

New York Central and Hudson River Rd.—F. E. Williamson has been appointed Car Accountant, and will have charge of the car records, car service, mileage and per diem accounts. Correspondents and reports relating to these matters should hereafter be addressed to the Car Accountant. Offices, Grand Central Station, New York.

Toronto Union Station.—Jas. Walch, who was appointed general baggage agent and took over the duties April 1, resigned a few days later, and returned to his former position as G.T.R. baggage agent, Windsor, Ont.

White Pass and Yukon Route.—H. J. Hutchinson is reported to have been appointed Superintendent Engineer of the company's steamers, succeeding A. G. Sproat, deceased. Headquarters, Whitehorse, Yukon.

The Royal Alexandra is the name selected by the C.P.R. for its new hotel at Winnipeg, Man., which it is expected will be opened for business early in June.

H. D. Lumsden, President Canadian Society Civil Engineers, and Chief Engineer National Transcontinental Ry. Commission, headed a deputation of engineers, including Professor McLeod, McGill University, and G. C. Mountain, Chief Engineer Board of Railway Commissioners, which waited upon the Premier at Ottawa, April 6, to urge that the Government should authorize the carrying out of a geodetic survey of the Dominion.

National Transcontinental Railway.

The Commissioners had the tenders submitted by various contractors for the two portions of the Eastern Division examined by their engineers, and made a report thereon to the Government, April 3. The matter was discussed on several occasions, and a decision was reached April 12, when it was announced that tenders had been accepted as follows:

DISTRICT B.—From the north end of the Quebec Bridge and Ry. Co.'s bridge, Quebec, to near La Tuque, Que., about 150 miles; Hogan and Macdonnell, Montreal.

DISTRICT F.—From Winnipeg, Man., to Peninsula Crossing, Ont., near the junction point of the Fort William branch of the G.T. Pacific Ry., about 245 miles; J. D. MacArthur, Winnipeg, Man.

BRIDGE AT CAP ROUGE.—A steel viaduct of about 3,000 ft. long near Cap Rouge, Que., in District B, to be constructed in accordance with the general specifications of the Commissioners, and of the Department of Railways, Dominion Bridge Co., Montreal, at an approximate cost of $320,000.

The length of time taken in awarding the contracts was due, apparently, to a difference of opinion between the Commissioners as to which tenders should be accepted. The majority of the Commissioners were of opinion that the contracts should go to the lowest tenderers, but the Chairman thought that these were too low, as they were considerably below the estimated cost as figured out by the Chief Engineer and his staff, and recommended the acceptance for the two divisions of the tenders of the G.T. Pacific Ry. Co. This view was over-ruled by the Government and the lowest tenders accepted. The amount at which the different tenders work out are:

DISTRICT B—	
Hogan and Macdonald (accepted)	$ 5,296,000
O'Brien and Mullarkey	5,550,000
G.T. Pacific Ry. Co.	6,459,000
M. P. and J. T. Davis	6,667,000
M. Connolly, Desjardins & Wilson	7,081,000
McArthur Construction Co.	7,940,000
DISTRICT F—	
J. D. MacArthur	$13,010,000
Pacific Construction Co.	13,028,000
G.T. Pacific Ry. Co.	13,991,000
McArthur Construction Co.	17,048,000
STEEL VIADUCT—	
Dominion Bridge Co. (No. 2) accepted	$ 318,000
Dominion Bridge Co (No. 1)	329,000
Locomotive and Machine Co. of Montreal	331,000
Canadian Bridge Co.	343,000
G.T. Pacific Ry. Co.	347,000
Phœnix Bridge Co.	348,000

The contracts cover the grading and all other work, except the steel rails and ties, which are to be supplied by the Commissioners, and for the completion of the work by Oct. 1, 1907. Tenders for about 50,000 tons of 80-lb. steel rails, and 2,500 tons of angle irons, etc., will shortly be asked for by the Commissioners for these sections of the line, for delivery this season. As the contractors have to purchase their materials and supplies as far as possible in Canada, it is expected that the order for the steel rails, etc., will be placed in Canada if the mills can supply them at the time they will be required.

In connection with the Winnipeg-Peninsula Crossing section of the work, it has been announced in Winnipeg that work will be started at four points—five miles east of Winnipeg, the second at Molson, the third north of Kenora on the Winnipeg River, and the fourth north of Dinorwic—immediately, and at other points which can be reached from the C.P.R. line, as speedily as they can be arranged for. Work at the Quebec end will also be started at once.

A return presented to the House of Commons, April 6, contained a report from H. D. Lumsden, Chief Engineer of the Commission, in reference to the two routes suggested for the line through New Brunswick. Mr. Lumsden recommends the adoption of what is known as the back route, which is about 28 miles shorter, and will cost about $1,500,000 less to construct than what is known as the river route. The back route opens up a country well adapted for settlement and at present without transportation facilities, while there are lines of railway tapping and traversing the valley of the St. John River, through which the river route has been surveyed.

GRAND TRUNK PACIFIC RAILWAY.

In a report to the Minister of Railways, C. Schrieber, Consulting Engineer to the Department, reviews the progress made in survey work and construction on the line west of Winnipeg, Man. The route between Winnipeg and Portage la Prairie, 58 miles, had been approved and location surveys were in progress. Of the line under contract between Portage la Prairie and the Touchwood Hills, 275 miles, the contractors had graded 55 miles, and put in a number of culverts. The line from Touchwood Hills to Edmonton, Alta., 490 miles, was under contract, but the Government had withheld approval of the plans for the last 45 miles. The reason for this was that it showed a line crossing the Saskatchewan River at Clover Hill bar, 12 miles east of Edmonton, while the Government desired, if possible, to have a line through Strathcona, crossing the Saskatchewan at that point, and so into Edmonton. Further surveys were being made to ascertain if a sufficiently favorable line could be obtained to allow of this change to be made. Preliminary surveys had been made from Edmonton to the end of the prairie section, but no route map had been submitted for approval pending a decision as to what pass through the Rocky Mountains would be adopted. Exploration had been made of several passes, but sufficient data had not been obtained to enable a decision to be reached.

So far as the portions of the lines under contract are concerned, the McDonald-McMillan Co. have got a number of gangs of men at work between Portage la Prairie and the Touchwood Hills. The Canadian White Co. have got their outfit on their contract between the Touchwood Hills to west of Saskatoon, Sask., and active work was expected to be started by the end of April. On the section from Saskatoon to Edmonton, contractors Foley Bros., Larson & Co., 29 cars of grading outfit were on the way to Saskatoon April 25, from which point it is proposed to start grading westerly. Superintendent of Construction Fetters stated that there would be 1,000 teams at work by the end of April, and by the end of May it was hoped to have 3,000 teams and 5,000 men on the line. As soon as the work from Saskatoon to Battle River was got in hand, the section between Battle River and Edmonton would be started, operations being gone on with from the Edmonton end. The Saskatoon-Battleford River section, about 200 miles, comprises some heavy work, particularly in the Eagle Hills country, almost due south of Battleford. There will be one large steel bridge across the Saskatchewan River at Saskatoon, and a wooden bridge across the Battle River, the other bridge work being light.

F. W. Morse, Vice-President and General Manager G. T. P. Ry., said in an interview at Montreal, April 17, that a satisfactory route had been surveyed from Edmonton to the foothills of the Rocky Mountains, about 200 miles, and that contracts would be let for its construction at an early date. Referring to the work in the mountains, he said that 12 survey parties were at work in the passes, and that until their reports had been received and considered, it would be impossible to say anything as to the further location of the line.

STORES BUILDING

C.P.R. NEW SHOPS WINNIPEG

SHOWING METAL SKYLIGHT 162 x 12 FT.

Made and erected by

TORONTO AND WINNIPEG

STEAM SHOVELS

We build shovels in sizes from 22 to 110 tons, with dipper capacity of ¾ to 4½ cubic yards. Our new design represents the accumulated experience of many years in steam shovel building. Some of the features that we would call attention to are the use of cut gears, swinging jack arms, and the heavy construction of car body. Write us and describe your work, and get our specifications and proposition on your requirements.

VULCAN IRON WORKS CO.

113 VULCAN PLACE, - TOLEDO, OHIO

RUSSELL INSPECTION CAR NO. 12

"THE CAR THAT GOES"

Has four wheels of equal size with engine midway between the rails.
Can be turned or removed from the track easily and quickly by one man, handling from the rear.
Weighs only 300 lbs. yet is strong and durable.
Can be readily lifted and carried by two men.
Can be run at any speed required up to 30 miles per hour.
Can be quickly taken apart for storage in baggage car.
Carries comfortably three passengers and luggage.
Is guaranteed to take any railway grade with ease.
It is just the simple and easily operated car that RAILWAY MEN have been looking for.

TORONTO JUNCTION

Canadian Branches—WINNIPEG and VANCOUVER

A despatch from Vancouver states that the British Columbia Pine Timber Co. is erecting a big saw mill on Kaien Island, for the purpose of cutting ties, for which it has secured a big order from the company. The ties are to be delivered at Prince Rupert, B.C.

An unconfirmed press dispatch from Winnipeg says a contract for the construction of the section of the line between Winnipeg and Portage la Prairie has been let to the McDonald, McMillan Co.

G.T.R. Betterments, Construction, Etc.

C. M. Hays, Second Vice-President and General Manager, on his return to Montreal, April 1, from England, stated that the company had purchased several lots near Trafalgar Square, London, upon which it was proposed to erect an office building for the G.T.R. and the G.T. Pacific Ry.

As a result of a conference between G.T.R. officers and the Ottawa city officials an arrangement for the erection of a central station and hotel building has practically been reached, and it is expected to be ratified at an early date. The plans prepared show a large modern building to cost about $1,500,000.

The G.T.R. is working out plans for the improvement of its lines in the vicinity of Lindsay, Ont., and its facilities for handling traffic in that town. The plans, it is said, show a short line from the main line to the old Midland line, west of the town; a line from Reaboro southerly to the line to Port Hope, to do away with gradients on the existing line; some double tracking; the relaying of the line between Lindsay and Port Hope with 80 lb. rails, and the building of a roundhouse of large capacity in Lindsay. At Port Hope, there will be considerable alterations and additions to the accommodation in the yard, to enable the additional traffic to be handled which will be brought in by the Charlotte-Port Hope steam ferry.

The plans submitted for the grade reduction, track elevation, and other improvements in London, Ont., were placed before W. T. Jennings, Toronto, Consulting Engineer, by the City Council. He reported that the scheme proposed was a good one, and should be gone into and worked out in detail, both as to the mode of elevating the tracks, and also with regard to the width and height of openings for streets now open across the tracks. He suggested that William St. be closed, or that at the most a subway be provided for pedestrians only; that the city should accept an earth embankment instead of steel trestles. A meeting of the sub-committee of the Council's railway committee was held April 15, for the purpose of drafting the agreement, which on approval by the Council will be submitted to the G.T.R. solicitors for acceptance.

Canadian Freight Association.

At the annual meeting in Montreal, Apr. 12, the following officers and committees were elected: President, F. J. Watson, G.T.R., Montreal; 1st Vice-President, S. P. Howard, C.P.R., Montreal; 2nd Vice-President, J. F. Chapman, B. of Q.R., Deseronto; Advisory Committee, J. W. Loud, W. R. McInnes, C. Howe; Executive Committee, W. B. Bulling, J. Pullen, C. Howe.

Classification Committee—W. B. Bulling, S. P. Howard, J. E. Dalrymple, F. J. Watson, C. E. Dewey, E. R. Bremner, W. Phillips, F. F. Backus, R. N. Collyer, M. H. Brown.

Inspection Committee—G. Collins, L. Macdonald, F. F. Backus, A. Cowan, F. Conway, M. H. Brown, John Paul, Guy Tombs, S. P. Howard, J. F. Chapman.

Canadian Northern Railway Construction.

Two railway projects in the State of Minnesota are being prosecuted, having for their object a connection with the C.N. Ry. The first of these, the Duluth, Rainy Lake and Winnipeg Ry., is under contract to the shores of Rainy River, at Koochiching, Minn., from which point it is proposed to construct a railway and general traffic bridge to connect with Fort Frances, Ont. A charter for this bridge has been obtained in Minnesota, and the Dominion Parliament is being asked for a charter for the construction of the half of the bridge and connections north of the International boundary. The title of the proposed bridge company is the Minnesota-Canadian Bridge Co., and the incorporators are representatives of the C.N. Ry., and the D., R.L. and W. Ry. The Canadian end of the bridge will be at Pither's Point, Ont., and it will be connected by a short line with the C.N. Ry. station and yards in Fort Frances, where the terminals will be located. Tenders have been invited for the bridge construction, and it is hoped to have it and the connecting lines completed by Dec. 31. It is proposed to run two trains a day between Duluth, Minn., and Fort Frances, through sleepers being run to Winnipeg and Port Arthur in connection with the C.N. Ry. through trains.

R. H. Hall, a Hudson's Bay Co.'s factor, who returned to Winnipeg April 11 from Fort Churchill, reported that he met a C.N.R. survey party engaged in location work near the watershed of the Churchill River. At that time the survey party had travelled over 400 miles by dog train. Reports from Winnipeg state that construction has been started from the line near Erwood, Sask., northerly, by Jas. Cowan, who has a large outfit on the ground.

Dominion Subsidy Contracts 1905-06.

The Dominion Government has entered into agreements during the current financial year to pay subsidies under the usual terms as to amount, for the construction of the following lines of railway:

MIDWAY AND VERNON RY.—From Midway to Vernon, B.C., 150 miles.

CENTRAL ONTARIO RY.—From the present terminus near Bancroft to a point on the Canada Atlantic Ry. near Whitney, Ont., 41 miles.

CANADIAN PACIFIC RY.—From St. Philippe d'Argenteuil station, or a point between three and Grenville, Que., northerly for there miles.

Railway Taxation in Ontario.—The question of railway taxation in Ontario has been before the Legislature for some years. In 1904, H. J. Pettypiece introduced a bill having for its object the increase of the taxes levied on railways in the province, but its discussion was shelved by the appointment of a commission with Mr. Pettypiece as Chairman, to investigate the whole question. The commission presented a lengthy report, but in the meantime Mr. Pettypiece was defeated at the general election of 1905, which resulted in a change of Government, and nothing was done. The new Government has now taken up the matter, and has laid before the Legislature a bill levying a mileage tax upon all railways in the province, and providing that of the amount realized $30,000 a year shall be utilized towards meeting the expenses of the Provincial Railway and Municipal Commission, and the balance distributed pro-rata among the municipalities, less a per capita charge for the maintenance of the inmates of the various provincial institutions belonging to each municipality.

Temiskaming and Northern Ontario Railway Finances.

The fourth annual report of the Commissioners contains details of the operation of the line from Jan. 16, 1905, when the 113 miles between North Bay and New Liskeard, Ont., were taken over from the contractors, to Dec. 31, 1905. The figures show:

REVENUE AND EXPENDITURE.

Passenger earnings	$108,681 76	
Mails and express	7,804 85	
Freight earnings	121,530 46	
Telegraph earnings	4,697 07	
Miscellaneous earnings	11,006 41	
Gross earnings		$253,720 55
Maintenance of way and structures	$25,072 89	
Maintenance of equipment	12,533 68	
Conducting transportation	88,342 41	
General expenses	13,823 52	
Total operating expenses		139,772 50
Net earnings from operation		$113,948 05

Percentage of operating expenses to gross earnings, 55%

Of the net earnings $100,000 was paid to the Treasurer of Ontario and $13,948.05 has been carried forward to the credit of profit and loss. The general balance sheet shows liabilities, accounts payable, $48,434.36; car mileage balances, $2,866.62; unclaimed wages, $49.80; profit and loss, $13,948.05. Assets—Agents' and conductors' balances, $8,351.63; accounts collectable, $24,313.00; foreign ticket balance, $5,233.38; fuel and supplies on hand, $13,587.45; Superintendents' petty account, $700; H. W. Pearson, $13,113.37; total $65,298.83. The capital account contained the following items:

LIABILITIES.

Loan from Province	$5,840,004 00
Advances from Province	1,636,164 27
Unclaimed wages	273 08
	$7,476,441 35

ASSETS.

Cost of road and equipm't,	$7,465,676 29	
Less proceeds from sale of wood	38,870 45	
		$7,426,805 84
Expended on townsites		6,321 58
Expended on prospecting townsites		3,475 97
Expended on James Bay appropriation.		4,461 25
Chief Engineer's petty account		2,771 00
Cash in bank	$41,872 10	
Less cheques outstanding.	9,266 39	
		32,605 71
		$7,476,441 35

The report contains statistics of train mileage showing: passenger trains, 45,538 miles; freight trains, 21,080 miles; mixed trains, 52,197 miles; total, 118,815 miles; passenger car mileage, 258,715 miles; freight car mileage, 873,689 miles; total, 1,132,404 miles. Passengers carried, 86,648; average distance travelled, 55 miles; average fare per passenger, $1.25; average per passenger per mile, .023c. Freight carried, 99,192 tons; average haul, 67 miles; average received per ton, $1.22; average received per mile per ton, .018c.

The gross earnings for Jan. and Feb. amounted to $56,520, and the expenditure to $37,111; net earnings $19.408.

For the purpose of retiring the Treasury loan Provincial bonds have been sold in London, Eng., and a bill has been introduced in the Legislature for the purpose of providing for the issue of $3,000,000 inscribed stock or bonds in Canada. The proceeds of this will be utilized to pay off $1,900,000 which has been advanced from the consolidated funds.

Jas. Alexander, Limited, has been incorporated under the Dominion Companies' Act, with a capital of $100,000, and offices at Montreal, to carry on a general business, and in connection therewith to own refrigerator and other freight cars, steam and other vessels, or to acquire stock in companies owning the same. The provisional directors are: D. C. Alexander, Steamship Agent; C. N. Powell, D. McNeill, F. G. Bush, M. J. O'Brien, all of Montreal.

Subscription Agents Wanted.

We want an agent at each railway and shipping centre in the Dominion to secure new subscriptions to THE RAILWAY AND MARINE WORLD, for which we will pay liberal commissions.

The work is easy, the paper recommending itself, and is specially adapted for clerks in transportation offices. It can be done at odd times without interfering with other duties.

For terms and other particulars, address

THE RAILWAY AND MARINE WORLD,
Toronto

PROFESSIONAL CARDS.

THE RAILWAY AND MARINE WORLD is especially adapted for the publication of professional cards of engineers, inspectors, analysts, electrical experts, naval, grain elevator and other architects, solicitors, etc., who desire to bring themselves under the notice of the managements and officials of the various steam and electric railway, steamship, grain elevator, telegraph, telephone and power companies throughout Canada, as well as the locomotive, car and ship builders, contractors and promoters of railway enterprises. THE RAILWAY AND MARINE WORLD is the only one medium through which all these important classes can be reached.

Rates will be quoted on application.

ELECTRIC RAILWAYS.

Projects, Construction and Betterments.

Brandon, Man.—At a meeting of the City Council, April 2, a proposition was received from the Kensington-Brandon Land and Development Co., respecting the construction of an electric railway in the city. The company desire to construct 10 miles of line, which it is estimated will cost with equipment about $200,000. It was proposed to give a 10 minute service between 7 a.m. and 11 p.m. The consideration of the matter was held over until the next meeting of the council. (Mar., pg. 153.)

Brantford Street Ry.—It is proposed to proceed with the construction of a loop line round the north section of Brantford, Ont., to serve Terrace Hill, and to run to Mount Hope cemetery. (April, pg. 215.)

Calgary, Alta.—An application has been made to the civic commissioners for a franchise for a street railway in the city. The matter is being considered, and a report will be prepared and submitted to the council. R. P. Inglis, Montreal, who is interested in the Edmonton Street Ry. charter, is the principal promoter of the proposed line. The agreement which the applicants ask be adopted, provides for a 30 years' franchise; the laying of about eight miles of railway with a basis of fares the same as at Winnipeg; in return the company proposes to pay the city 10 per cent. of the stock at the expiration of the franchise, and the city to have the right to purchase the plant at a price to be fixed by valuation.

In 1893 an act was passed by the Dominion Parliament incorporating a company with the title of the Calgary St. Ry. Co., with power to construct an electric railway. No construction could be done until after an agreement with the council, and the company was to be subject to any ordinance of the Northwest Territories relating to electric railways.

Central Ry. of Canada.—In connection with the recent visit of Senator Domville to Great Britain it is stated that a strong financial syndicate in London, Eng., has taken the project up. An indication that new interests have become associated with the company is apparent from the fact that Sir A. P. Caron and Senator Edwards have been elected directors. The company has practically completed arrangements for the purchase of the stock, franchises and charters of the Ottawa River Navigation Co., and the Carillon and Grenville Ry. These two companies are under the control of the same interests, the railway—the only broad gauge one remaining in Canada—being operated in connection with the steamships running on the upper and lower stretches of the Ottawa River. The line is 13 miles long, and its train is hauled by one of the old Birkenhead locomotives imported into Canada by the G.T.R. It is rumored that the company has also purchased the Irondale, Bancroft and Ottawa Ry., extending from Kinmount Jct., on the G.T.R. Toronto-Lindsay line, to Bancroft, about 50 miles.

The company's charter does not specifically state that the railway is to be operated by electricity, but when the line from Montreal to the Ottawa River was first projected as the Ottawa River Ry., the promoters stated that it would be an electric line. In the charter, power is given to utilize water powers for generating electricity for the use of its railway and undertaking. (April, pg. 215.)

Charlottetown Electric and Transit Power Co.—Application is being made at the current session of the Prince Edward Island Legislature for the passing of an act incorporating a company with this title for the purpose of operating trolley cars in Charlottetown and vicinity. It is proposed to give a franchise for 15 years, with exemption from civic taxation for the first five years; a tax of 1% on the net earnings for the second five years, and 2% for the third five years. The promoters of the project are associated with the American Trackless Trolley Co., of Boston, and the negotiations with the city have been carried on by F. G. Tilton, Treasurer of the company, and R. S. Johnson, attorney, Boston, Mass.

East Toronto and Danforth Electric Ry.—The Ontario Legislature is being asked this session to pass an act incorporating a company with this title to construct a railway to be operated partly by electricity and partly by steam, or entirely by either of them, from the eastern boundary of Toronto to East Toronto, with a branch through Todmorden to Yonge St.; power is also asked to construct lines on such streets of Toronto as may be agreed upon with the city council. D. O. Cameron, Toronto, is solicitor for the applicants who are interested in a building estate in East Toronto.

Egerton Tramway Co.—This company operates a line through Westville, Stellarton, New Glasgow and Trenton, N.S., about eight miles in all, the terminals being at Westville and Trenton, and the power house at Stellarton, midway between the terminal points. The power house is equipped with two 150 h.p. Robb-Armstrong engines, three 125 h.p. return tubular boilers, two Canadian General Electric 100 k.w. generators, induced draft system and fuel economizer. The car equipment consists of five vestibule cars 38 ft. 6 in. long.

Fernie, B.C.—A proposition is under consideration for the construction of an electric line to connect Fernie with Frank, Blairmore, Coleman and other places in the vicinity. E. Tuttle, Fernie, B.C., is interested in the proposal.

Fredericton, N.B.—We have been advised by a city officer that a Mr. Mitchell had been interesting himself in connection with a project to construct an electric railway from Fredericton to Marysville, N.B., but that nothing had been heard from him for some time. A charter to incorporate a company, he stated, was granted in 1893, and in 1899 the charter was renewed for a further period of five years. (Feb., pg. 89.)

The Hamilton, Caledonia and Lake Erie Ry. is at present developing gas wells, and laying a pipe line along its route between Hamilton and Dunnville, Ont. The railway committee of the Ontario Legislature has granted an extension of time for the construction of the line, for two years to Caledonia; three years to Cayuga and four years to Dunnville. (Mar., pg. 153.)

Hamilton Terminal Co.—A provisional agreement has been entered into between the Hamilton Street Ry., the Hamilton Radial Electric Ry., the Hamilton Terminal Co., and the City Council, respecting the construction of a union terminal station in Hamilton. The City Council has not yet finally approved of the agreement. (Mar., pg. 153.)

Hamilton, Waterloo and Guelph Ry.—John Patterson has made application to the Hamilton City Council for a right of way through the city from James St. to the city boundary near Dundurn Park, the city to pay one-half of the cost of purchasing the property. The object of the company is to connect Hamilton with Galt by the shortest possible route, connecting there with the Galt, Preston and Hespeler Ry., and the Preston, Berlin and Waterloo Ry.; a line to Guelph; and connecting with C.P.R. at Schaw and Guelph stations. It is also proposed to extend the lines to Elmira on the C.P.R., and to Fergus and Elora. The line would be constructed of the same standard as the Hamilton Radial Ry., and would acquire its power from the Cataract Light, Power and Traction Co. The company had not been incorporated, Mr. Patterson stated, but all arrangements had been made for financing the construction when the act of incorporation was passed.

An application has been made to the Dominion Parliament at its current session, for the passing of an act incorporating a company with this title, to construct a railway from Hamilton to Elmira, passing through Galt, Preston, Berlin and Waterloo, and from Hamilton to Elora and Fergus, passing through Guelph; the lines to be operated by electricity or other motive power. Gibson, Osborne, O'Reilly and Levy, Hamilton, are solicitors for the applicants.

The Inland Empire Ry. Co. has been organized at Spokane, Wash., with a capital of $20,000,000, for the purpose of obtaining the necessary powers and constructing an electric railway from Spokane, Wash., to the Okanagan country and to Phoenix, B.C. J. P. Greaves is interested in the promotion, and it is reported that A. L. White, Secretary of the Granby Smelter, and C. Zimmerman, Consulting Engineer, New York, went over the territory between Spokane and Phoenix recently with a view of reporting on the prospects of traffic. The company owns a number of electric railways in and around Spokane, Wash., which it is proposed to extend towards the B.C. boundary.

Montreal and Southern Counties Ry.—An unconfirmed statement in Montreal is to the effect that an agreement has been entered into between the G.T.R. and the M. and S. C. Ry., whereby the latter company secures running rights for electric cars over the Victoria Bridge; and between the Dominion Government and the company for rights in the roads under the jurisdiction of the Montreal Harbor Commissioners. (Aug., 1905, pg. 371.)

Montreal Park and Island Ry.—Application is being made this session of the Dominion Parliament for an act extending the time for the completion of the lines authorized to be constructed. (Aug., 1905, pg. 371).

Montreal Street Ry.—A purchase of 5,000 tons of 86½ lb. T rails has been made, it being the intention of the company to make considerable extensions and improvement to the system.

Moose Jaw and Suburban Rapid Transit Co.—An act to incorporate a company with this title is under consideration at the current session of the Saskatchewan Legislature, for the purpose of constructing a railway to be operated by steam or electricity or both, from Moose Jaw northerly to Buffalo Lake; from Moose Jaw southerly to Dirt Hills; with branches east and west. W. E. Knowles, Moose Jaw, is solicitor for the applicants.

New Liskeard to Cobalt.—Consideration is being given to a project to construct an electric railway from New Liskeard to Cobalt, via Haileybury, Ont.

Niagara, Queenston and St. Catharines Ry.—The Dominion Parliament is being asked at the current session to pass an act extending the time for the commencement and completion of the authorized line of electric railway, and increasing the capital stock from $250,000 to $500,000. (Dec., 1904, pg. 429.)

Niagara, St. Catharines and Toronto Ry.—A contract has been let to Jos. Battle, Thorold, Ont., for the construction of the extension from St. Catharines to Welland, Ont. Work is to be started at once, and it is hoped to have the line completed by the fall. (Feb., pg. 89.)

Ontario West Shore Electric Ry.—The Ontario Legislature is being asked to pass an act extending the time for the completion of the projected lines in Huron County; giving power to expropriate the lands necessary for the right-of-way. etc. (July, 1903, pg. 235.)

Petrolea Rapid Ry.—The Ontario Legislature is being asked at its current session for an act extending the time within which the projected railway may be constructed. The secretary of the company is T. J. Gordon.

Port Arthur Electric Ry.—The Town Council of Port Arthur, Ont., is applying at the current session of the Ontario Legislature for an act authorizing an extension of its electric street railway. (Feb., pg. 89.)

Port Credit, Brampton and Guelph Ry.—R. J. Copeland, Toronto; J. H. Boulter, B. F. Justin, J. R. Fallis, J. Clarke, Brampton, Ont.; J. Sykes, Esquesing tp., Ont.; G. E. Ellis, Winnipeg, Man., are the provisional directors named in the act, before the Ontario Legislature, proposing to incorporate a company with this title to construct a railway from Port Credit, via Brampton, Huttonville, Georgetown, Acton, Norval and Glen Williams, to Guelph, Ont. While the company asks power to operate its line by electricity or other motive power, it proposes to utilize motor cars. The head office is to be at Brampton, Ont., the capital is fixed at $100,000, and the bonding power has been fixed at $25,000 a mile. (Feb., pg. 89.)

Sandwich, Windsor and Amherstburg Ry.—Application is being made at the current session of the Ontario Legislature by the S., W. and A. Ry. Co. as assignees of the South Essex Electric Ry. Co., for an act extending the time within which the authorized lines of that company may be constructed. The South Essex Electric Ry. Co. was incorporated in 1896, and amending acts giving additional powers were passed in 1897 and 1901. It is authorized to construct an electric railway along the southern shore of Essex county to Leamington, and from thence to Pelee Point.

South Essex Electric Ry.—See Sandwich, Windsor and Amherstburg Ry.

South-Western Traction Co.—A. E. Welch recently stated that the line between London and St. Thomas, Ont., would be opened for traffic early in May. (April, pg. 215.)

St. Catharines, Pelham and Welland Electric Ry.—The Ontario Legislature is being asked at its current session for an act extending the time within which its projected railway may be constructed.

Superior Portland Cement Co.—Application will be made to the Provincial Secretary of Ontario early in May for a charter under th Ontario Companies' Act, to enable the S.P.C. Co. to construct and operate a street railway from the factory in Orangeville to the lake near Caledon, about 1½ miles from the Orangeville municipal boundary; from the C.P.R. at lot 20, con. 3, Amaranth tp., to lot 20, con. 2, same township. G. McIntyre is provisional Secretary of the company.

Toronto.—Application is being made at the current session of the Ontario Legislature for an act authorizing the city to construct standard gauge railways upon independent routes within the city for the use of radial electric railways, upon vote of the taxpayers; and to make agreements for the operation of the same.

Toronto to Port Perry, Ont.—The Ontario Legislature will be asked this session for an act incorporating a company with power to construct an electric railway from or near Toronto to Port Perry, Ont., passing through the townships of York, Scarborough, Markham, Whitchurch, Pickering, Uxbridge and Reach, Ont., and with all powers necessary or incidental thereto. J. F. Lennox, Toronto, is solicitor for the applicants.

Toronto and York Radial Ry.—The rails on the extension of the Metropolitan Division from Newmarket to Jackson's Point, on Lake Simcoe, have been laid, and ballasting is being gone on with. It is expected to have the extension in operation in July. With the extension the division will be 55 miles long, and it is expected that cars will be run between Toronto and Jackson's Point in two hours. (Feb., pg. 89.)

Trans-Niagara Bridge Co.—Application is being made at the current session of the Dominion Parliament for an act incorporating a company to construct and maintain a railway and general traffic bridge across the Niagara River at Niagara Falls, Ont., together with spur lines to connect the bridge with adjacent lines of railway. It is proposed to unite with a similar company formed in the U.S. to construct the bridge. Royce and Henderson, Toronto, are solicitors for the applicants. (April, pg. 217.)

Windsor, Essex and Lake Shore Rapid Ry.—We are advised the following are the directors: Dr. Jas. Brien, Essex, Ont.; W. T. Piggott, Chatham, Ont.; W. C. Crawford, Tilbury, Ont.; W. L. Wilson, Port Huron, Mich.; T. L. Robinson, Detroit, Mich. Two other directors, of whose names we have not been advised, were elected subsequently. The line, which is under construction, will run between Windsor and Chatham, taking a generally southeasterly course from Windsor, passing through Essex to Kingsville, on the shore of Lake Erie, thence northeasterly to Chatham, about 90 miles. The grading is reported completed between Windsor and Kingsville, and tracklaying is in progress. The country through which the line will run is extremely level, with few engineering features of any importance. The power house is to be located at Kingsville. Orders have been placed for rolling stock, etc., for the line. (April, pg. 217, and Mar. pg. 153.)

Winnipeg Electric Ry.—An order-in-council has been passed granting to the W.E. Ry. Co., certain lands along the banks of the Winnipeg River, at the Pinawa or Lee channel, for power development purposes, in all about 2,360 acres, at a maximum price of $10 an acre. It is set forth in the order that the company or its predecessor in title has already expended $700,000 on the development plant, and that a further sum of $1,500,000 will have to be expended to complete the plant. It is proposed to develop from 20,000 to 30,000 h.p. and to deliver the same in Winnipeg.

Winnipeg to East Selkirk.—An application was made at the recent session of the Manitoba Legislature for an act incorporating a company to construct a railway to be operated by electricity or other power from Winnipeg to East Selkirk, thence to Fort Alexander, with branches to any point on Lake Winnipeg; also to construct telegraph and telephone lines in connection therewith. but it was not proceeded with.

Electric Ry. Finance, Meetings, Etc.

Brantford Street Ry.—Following are the officers and directors for the current year: President, A. J. Pattison; Vice-President, J. Firstbrook; other directors, Rev. E. T. Fox, W. S. Dinnick, J. S. King, W. R. Turnbull, A. J. Pattison, Jr. The same interests also own the Grand Valley Ry. and the Woodstock, Thames Valley and Ingersoll Electric Ry.

British Columbia Electric Ry.—Gross earnings for Feb., $87,284, against $73,038 for Feb., 1905. Working expenses, $51,408; renewal funds, $8,500; approximate income from investments, $7,967; net income, $35,347, against $41,295 working expenses; $6,695 renewal funds; $2,750 income from investments, and $27,798 net income for Feb., 1905. Gross earnings for eight months ended Feb. 28, $781,825; net earnings $353,410, against $616,987 gross, and $252,715 net for same period 1904-05.

Halifax Electric Tramway.—Railway earnings for Mar., $11,651.54, against $9,321.56 for Mar., 1905.

Kingston, Portsmouth and Cataraqui Electric Ry.—The railway committee of the Ontario Legislature has approved of the act confirming agreements between the company on the one hand, and the city of Kingston and the village of Portsmouth on the other, and re-arranging the finances of the company. The capital is reduced from $200,000 to $90,000, of which $50,000 is preferred stock and $40,000 common stock. The common stock is to be issued to holders of the common stock in the proportion of $1 of new for every $5 of old; and the preferred stock, which is non-cumulative 3%, is to be issued to unsecured creditors in the proportion of $1 for every $4 of indebtedness due by the old company. The company is authorized to issue $100,000 of 4% 20 year first mortgage bonds. The agreements with the Kingston and Portsmouth councils provide that if the line does not pay expenses within a year the company shall have power to discontinue its operations, take up the tracks, and remove the plant, in the event of the councils not desiring to purchase the lines.

Montreal Street Ry.—Passenger earnings for Mar., $232,858.70; total earnings $235,306.62, against $206,725.81 and $209,231.38 respectively for Mar., 1905. Net earnings, $78,843.21, against $50,227.02; fixed charges, $39,662.90, against $22,645.77; surplus, $39,185.31, against $27,581.25 for Mar., 1905. Net earnings for six months ended Mar. 31, $477,690.83, against $375,562.61; surplus, $299,065.92, against $257,111.53 for same period 1904-05.

Niagara, St. Catharines and Toronto Ry.—The St. Catharines City Council will apply at the current session of the Ontario Legislature for authority to issue debentures to meet an indebtedness incurred under a by-law of 1886, granting aid to the St. Catharines, Niagara Central Ry., by means of a guarantee of bonds. These bonds will mature June 1906.

Port Arthur Electric Ry.—The accounts for the operation of this municipal electric railway system for the period from Jan. 1 to Dec. 15, 1905, show earnings of $42,178.52, of which $464 was from advertising in cars, $1,649.57 from sale of power, and $3.50 miscellaneous; in addition there were accounts due for power amounting to $154.13, and the value of stock on hand was $603.61, making the total income $42,936.26. The expenses included $2,752.50, Superintendent's salary and office expenses; $184, proportion of rental town office; power house (proportion of expenses), $1,187.41; fuel, $156.50; car barn and cars, $12,742.31; track and line, $4,836.79; rent, real estate, insurance, etc., $6,069.77; proportion of principal and interest on debentures etc., $4,767.47; total, $32,757.75, leaving a balance of profit of $10,179.51. The statement of debt issued by the corporation shows a total of $142,493.88 as being due on the electric railway account, and the line is carried as an asset as being of the value of $153,487.67.

Sandwich, Windsor and Amherstburg Ry.—Following are the officers and directors for the current year: President, H. A. Everett, Cleveland, Ohio; Vice-President and Treasurer, J. C. Hutchins, Detroit, Mich.; Secretary, A. E. Peters, Detroit, Mich.; other directors, A. Pack, F. W. Brooks, Jos. Bampton, Detroit, Mich.; E. W. Moore, Cleveland, Ohio; R. B. Van Courtlandt, New York; Manager, Jas. Anderson.

The earnings and operating expenses of this line are included in the figures given in the report of the Detroit United Rys., by which the line is owned. Gross earnings, $5,125,563.01; operating expenses, including taxes, $3,041,522.90; net earnings, $2,084,040.11; income from other sources, $44,076.40; total income $2,128,116.51 against

$1,821,490.39. The interest on the funded and floating debt of the different lines was $1,113,293.25, of which $17,871.25 was in respect of the S., W. and A. Ry., which now has a mileage of 25.184 against 25.073 miles in 1904. During the year the line carried 1,961,876 revenue passengers, 148,926 transfer passengers, and 26,361 employes, a total of 2,092,163; the receipts per revenue passenger being .0547, and per passenger .0501c. Its cars ran 529,778 miles; the earnings per car mile being .2030c.; the expenses per car mile being .1107c., and the net earnings per car mile .0923c. During the year there was expended $25,097.43 on new paving in Windsor, the installation of machinery in the lighting plant, and building 686 ft. of track in Amherstburg. The balance sheet of the line given the following figures:

Capital stock		$297,000.00
Mortgage bonds		400,000.00
Accident fund		1,080.43

St. Thomas Electric Ry.—The receipts for Mar., as reported to the St. Thomas, Ont., City Council, amounted to $1,108.21, against $852.19 for Mar., 1905.

Toronto Ry.—Car earnings for Mar., $233,813.77, against $207,013.73 for Mar., 1905.

At a meeting of shareholders held April 17, a resolution was passed authorizing an increase of the capital stock to $8,000,000 by the issue of 10,000 new shares of $100 each.

Woodstock, Thames Valley and Ingersoll Electric Ry.—This line together with its franchises has been purchased by the Grand Valley Ry. The new officers and directors are: President, A. J. Pattison, Jr.; Vice-President, J. Firstbrook; other directors, W. S. Dinnick, J. G. Wallace, Rev. E. T. Fox See also Brantford Street Ry.

Electric Railway Notes.

The Grand Valley Ry. has appointed P. Nelson, formerly in the G.T.R. service, to be Track Superintendent.

F. H. Glover, local manager at New Westminster for the British Columbia Electric Ry., has resigned, and proposes to engage in a ranching enterprise at Vernon, B.C.

The employes of the Ottawa, Hamilton and London, Ont., street railway companies have been looking over the wages schedules recently, and have put in demands for higher rates of pay.

The St. Thomas, Ont., Street Railway Commissioners have granted an increase of pay to the employes of the municipal street railway. The new rate gives the older hands an increase of a cent an hour.

The annual convention of the American Street and Interurban Railway Association, and of the allied Accountants, Engineering and Claims Agents' associations will be held at Columbus, Ohio, opening Oct. 15.

The Grand Valley Ry. has nearly completed its telephone line from Brantford to Galt, Ont. A telephone is provided on each car, and connection can be made at every switch, so that the conductors can communicate with the head office and receive orders.

The British Columbia Electric Ry. has filed its standard passenger tariff, C.R.C., no. 2, for its Lulu Island branch, with the Board of Railway Commissioners. The tariff shows a fare of 20c. for a five mile trip, 40c. for from 5 to 10 miles, and 60c. for from 10 to 15 miles.

A case against one of the motormen in the employ of the Egerton Tramway Co., for working on Sunday, is under the consideration of the County Court judge of Pictou, N.S. The information was laid under the Ante-Confederation statute forbidding the performance of servile work on Sunday.

The Windsor, Essex and Lake Shore Rapid Ry., which expects to have a portion of its line in operation early in July, proposes to run its cars on Sundays in order to obtain a legal decision in regard to the refusal of the Government to permit electric railways chartered within the last five years to be operated on Sundays.

The Supreme Court at Ottawa has dismissed the application of the Ottawa Electric Ry. to be relieved from bearing a share of the cost of the proposed subway at the G.T.R. crossing, Bank St., Ottawa. The Board of Railway Commissioners in directing the construction of the subway ordered that the cost should be borne by the G.T.R. and the Ottawa Electric Ry.

The employes of the Winnipeg Electric Ry. went on strike Mar. 29, and returned to work on April 7, a settlement having been effected through the intervention of the Ministerial Association. The agreement provides for an increase of wages, promotion by seniority and merit, semi-monthly pay days, and some other small concessions, but does not recognize the union. The agreement is to remain in force for a year.

The Montreal Street Ry. Co. has ordered a large quantity of apparatus from the Canadian Westinghouse Company. The order includes 20 quadruple equipments of 101-B railway motors complete with controllers and details; also a 1,000 k.w. 600 volt, direct current engine type generator for installation in the main power house, and three 500 k.w., three-bearing, motor-generator sets, consisting of type C motors and 550 volt direct current generators. These latter are similar in capacity to those now installed in the railway company's various substations, which feed directly into the trolley circuits.

Ottawa Electric Railway Co.

The director's report for the year ended Dec. 31, 1905, presented at the annual meeting, showed that the gross receipts for the year were $449,633.97, compared with $384,939.64 in 1904, an increase of $63,694.33. The net earnings have been disposed of as follows:—Interest paid on bonds, $20,000.00; four quarterly dividends of 2%, and a bonus of 2%, $99,320.00; mileage payments, $9,817.14; placed to credit of contingent account to be applied to reduction of track renewal, car equipment accounts, etc., $23,000.00; carried to credit of profit and loss account, $21,556.40; total, $173,693.54. The balance at credit of profit and loss account is now $169,280.20. During the year 80-lb. rails, 60 ft. and 62 ft. long, were laid on Nicholas St., between Rideau St. and Laurier Avenue, and on a portion of St. Patrick St. Next spring it is proposed to continue the latter work to the terminus in Rideau ward. Sufficient rails and ties to make the change are now in stock and paid for. The expenditure for track renewals during the season was $12,734. Entertainments were given in the Auditorium at Britannia-on-the-Bay from May 29 to Sept. 9 to crowded houses. In order to add to the attractiveness of the resort and give more accommodation, it has been decided to enlarge the Auditorium, also to extend the promenade pier 350 ft. to deep water and build a commodious yacht club house, all at a cost of about $20,000.

ASSETS.

Roadbed, equipment, water power, property, plant, real estate and buildings	$1,795,757.25

	$1,811,046.65

Passengers carried, 9,891,311, against 8,717,205 for 1904; percentage of operating expenses to receipts, 59.4%, against 62% for 1904.

The President, T. Ahearn, in moving the adoption of the report and statement of accounts, stated that the receipts at the present were ahead of those of 1905, notwithstanding the fact that the parliamentary session, which was always a large source of revenue, had not yet opened, as was the case at the time of the annual meeting in 1905.

The report was adopted, and the directors re-elected. Following are officers and directors for the current year:—President, T. Ahearn; Vice-President, P. Whalen; other directors: W. Y. Soper, G. P. Brophy, T. Workman, Hon. G. W. Cox; Secretary-Treasurer, J. D. Fraser.

Grain Elevator Notes.

The Lowe Farm Elevator Co. Lowe Farm, Man., has sold its elevator to the Western Flour Mills Co.

The Alberta Legislature is being asked to pass an act incorporating the Alberta Pacific Elevator Co.

The Buffalo Lake Farmers' Elevator and Trading Co. has been incorporated under the Manitoba Companies' Act, for the purpose of constructing an elevator at Tuxford, Man.

The Lake of the Woods Milling Co. has decided to extend its chain of elevators in the west, and it is expected to have an additional 30 completed in time to handle the current year's harvest.

The Brackman-Ker Milling Co. has completed a cement elevator and steel tower at Strathcona, Alta. The elevator has a capacity for 100,000 bush., and the machinery is capable of discharging 2,000 bush. an hour.

The G.T.R. elevator at Tiffin, near Midland, Ont., will be able to receive grain from the biggest vessels navigating the Upper Lakes this season, as considerable dredging work will be done alongside it and in the channel. A contract for the work has been let to the Owen Sound Dredging Co.

Dominion Government Private Cars.—A return presented to the House of Commons recently showed that the Government owned nine private cars, of which three were used exclusively by officers of the Intercolonial Ry. The General Manager's car was burned in the fire at the shops at Moncton, and is not included. Following are some particulars of the original cost, and cost of operating the several cars as given in the return:

	Original Cost.	Cost of Operation.

Wreck Commissioner's Report for 1905.

Commander O. G. V. Spain, Wreck Commissioner, has instructions from the Dominion Government to investigate every casualty of importance and to deal promptly with any carelessness or want of judgment shown by pilots or shipmasters in the navigation of Canadian waters. The instructions issued to him during 1905 also covered casualties occurring on the Great Lakes and in his report to the Department of Marine upon the work of the year, he says:

"I found on inquiring into matters in different localities of the lakes, that it was necessary that strict investigation should be held as far as possible, as in some instances the lack of even moderate attention to the safe navigation of vessels was deplorable. The masters, officers and seamen who man Canadian vessels on the Great Lakes are, as a rule, skilful and intelligent, and compare most favorably with their confreres on salt water, but there is no doubt that inquiries into casualties should be held in the same manner as on the sea coast." During the year investigations were held into casualties occurring to the following vessels:

ATLANTIC COAST—Parisian-Albano collision; Christian Knudsen-Thrift collision; Turbin, ship struck and all hands lost; Lunenburg, 11 lives lost; Skidley, Pro Patria, Salerno.

RIVER AND GULF OF ST. LAWRENCE—Hosanna-Empire collision; Euphemia-Tordenskjold collision; Universe-Bay State collision; Agnar, Victorian, Virginian, Aranmore, Wastwater, Bavarian.

GREAT LAKES—Argyle; Turbinia-Primrose collision.

In reference to casualties on the St. Lawrence route during the last season, there has not been a single loss of life and only in one case is there the possible loss of an ocean liner. This compares most favorably with casualties that have occurred in other parts of the world. There were three cases of vessels grounding when leaving their wharves and three cases of collision. The ship channel cannot be held, in the remotest degree, responsible for any of these. In the case of the Victorian, the court of inquiry which was held found that the casualty was an unavoidable accident, which might have occurred in any narrow channel, and to avoid a repetition of a disaster of the same nature, it is proposed to establish telegraphic communication along the route, so that vessels may be held, at gares, in the event of fog shutting down without warning. The Agnar, the Virginian and Bavarian disasters are attributable to careless navigation on the part of the pilots. The collision between the Tordenskjold and the Euphemia would have occurred on the open ocean, if one of the vessels had been navigated in the same careless manner. This remark also applies to the Hosanna-Empire collision. In the Wastwater case, the casualty happened outside the ship channel altogether, and is again entirely attributable to careless navigation. The Bay State-Universe case is before the civil court. It must be acknowledged that there are difficulties on the St. Lawrence route, but these difficulties are well known and only have to be guarded against. The officers responsible for the navigation of the different vessels should know the tidal conditions, draught of water of their vessels and the depth and breadth of the channel at the various points, and they should, also, recognize the fact that aids to navigation, such as gas buoys, are simply aids, and that in most cases (at any rate, below Quebec), the good old stand-by, the compass, assisted by the chart, if properly cared for and looked after, will help them out.

The Department of Marine, Ottawa, has prepared an index to the notices of mariners issued in Canada during 1905, copies of which may be obtained by those interested in navigation on application.

Dominion Marine Association.

The annual meeting was held in Ottawa, Mar. 22, the following being present: J. A. Cuttle, L. Henderson, Montreal Transportation Co.; H. C. Hammond, C. H. Nicholson, Northern Navigation Co.; A. A. Wright, Waldie & Wright, Toronto; F. Plummer, Canadian Lake and Ocean Nav. Co.; G. T. Marks, Canadian Northwest SS. Co.; R. O. MacKay, Hamilton and Fort William Nav. Co., New Ontario SS. Co., Union SS. Co., and Hamilton and Montreal Nav. Co.; C. J. Smith and G. Johnson, Richelieu and Ontario Nav. Co.; G. B. Greene, Upper Ottawa Improvement Co.; D. Murphy and G. P. Murphy, Ottawa Transportation Co.; D. J. McIntosh, Niagara, St. Catharines and Toronto Ry. and Nav. Co.; R. W. Shepherd and F. Elliott, Ottawa River Nav. Co.; C. A. Jaques, Montreal and Chicago SS. Co., Lake Erie SS. Co., and Montreal and Great Lakes SS. Co.; J. H. G. Hagarty, St. Lawrence and Chicago Steam Nav. Co.; T. Donnelly, Donnelly Salvage and Wrecking Co.; E. Horsey, Lake Ontario and Bay of Quinte Nav. Co.; J. H. Hall, Ottawa Forwarding Co.; D. Noonan, Rideau Lakes Nav. Co.; B. W. Folger, Niagara Nav. Co.; E. A. Hall, F. E. Hall & Co., L'Orignal; R. T. Holcomb, str. Hebron; J. P. Kavanagh, J. Hannan, and C. E. Loomis, Ogdensburg Coal and Towing Co.; the Secretary, Francis King; E. Adams, Chairman of the Board of Steamboat Inspectors, and Capt. L. A. Demers, Chief Examiner of Masters and Mates.

A deputation from St. Catharines, Ont., Mayor Riddell and Capt. McMaugh, were introduced by E. A. Lancaster, M.P., and asked the support of the Association for a largely signed petition which they carried, addressed to the Minister of Railways and Canals, praying for an annual subsidy for the continued maintenance of gas pipes and gas supply along the Welland Canal. The deputation having been heard the president announced the decision of the executive committee, embodied in the annual report,

that no action be taken by the Association as a body, though members be left free to act individually as they might desire.

The report of the executive committee was read and adopted as follows:

RAPIDE PLAT CANAL—At the last annual meeting your committee reported having asked the Government to defer action upon the proposal to grant the town of Morrisburg a lease of water power from this canal, and the meeting adopted the recommendation. Subsequently a deputation from the Association met the Minister of Railways and Canals, and presented a memorial, praying that the interests of navigation might be watched and safeguarded. This petition was favorably considered, and later, by appointment, representatives of this Association met Mr. Douglas, Hydraulic Engineer from the Department, at the canal, and arrangements were made for such permanent works and structures to protect the channel and such limitation of the withdrawal of water from the canal as would effectually prevent any chance of vessel interests being prejudiced in any way by the development of the water power desired.

CARILLON AND GRENVILLE CANALS.—An appropriation having been made by Parliament for the purpose of lighting these canals, a petition was presented last summer by your committee praying that the work might be promptly commenced. Tenders were advertised for, and although the work was deferred until the close of the season your committee is pleased to report that it has now been undertaken.

CORNWALL CANAL, ELECTRIC TRACTION.—By Order-in-Council of March, 1905, vessels were prohibited from entering or passing through the locks of this canal under their own steam, and were compelled to accept haulage by electric cables operated by motors adjoining each lock. The system met with protests from all mariners on account of its many difficulties and the great delays and dangers involved in its adoption. and a deputation from the Association forthwith interviewed the Minister and Deputy Minister, presenting a memorial praying for relief. Your Secretary interviewed many parties, and personally inspected the system in operation, and considerable correspondence with the Department ensued. The Minister finally inspected the canal towards the close of the summer, and in response to further enquiries has stated that the matter will have further consideration before the coming season. Your committee has arranged for an interview with the Minister and recommends a further urgent protest.

CORNWALL CANAL CLOSING.—Notice has been given that the canal will be unwatered on April 1, and will remain unwatered till April 30. Your committee has realized the serious delay this will entail in the opening of through navigation and has asked for a reconsideration of the proposal and that in no event should the canal be allowed to remain closed more than five days at most after the opening of the Welland. The matter is only promised consideration, and your committee urge the necessity for further strong representations on the subject to the Minister.

FARRAN'S POINT CANAL.—The request made upon resolution of the last annual meeting to have this lock open on Sunday in the same manner as the lock at Cardinal, was not granted, the Department not being prepared in this instance to entrench further upon the principle that the canals remain closed during daylight on Sunday.

OPENING OF ALL CANALS ON SUNDAY FOR Fall Traffic.—Upon the request of the Association this general relaxation of the rule was again allowed in the last season to accommodate the heavy movement of freight before the season closed.

LACHINE CANAL.—A request has been presented by your committee that protecting booms be placed at bridge piers and other necessary points in this canal, just as in the Welland, and the matter has been promised consideration.

LIGHTING OF WELLAND CANAL.—The City Council of St. Catharines asked the co-operation of this Association in an effort to induce the Government to retain the old gas pipes and services along this canal and to assume the obligation to pay for their maintenance, and for the continuance of a gas supply in case of emergencies. A deputation from St. Catharines waited upon your committee at its last session and pressed their request. $4,000 was named as the annual sum they would request the Government to pay for maintenance and gas supply. Your committee advises no action on the part of the Association in support of the request.

RECIPROCAL ARRANGEMENTS BETWEEN THE U.S. and Canada.—It was very shortly after the last annual meeting that the reciprocal abolition of the inspection fees in the U.S. and Canada was finally accomplished. Not long after, and just in time for the season's inspection, further reciprocal arrangements were concluded at the instance of the Association, whereby vessels are now only required to comply with the inspection regulations of their own country. Had this arrangement not been brought about, great hardship would have been entailed, as immediate compliance with the absolute letter of certain new rules referred to in your committee's last report was physically impossible. The thanks of the Association are due to the heads of the departments interested, both at Ottawa and at Washington, for facilitating the arrangements, and the courtesies extended to your secretary by the authorities at Washington deserve special recognition.

HARBOR MASTER'S DUES; SICK MARINERS or Hospital Dues; and Tonnage Tax in U.S. Ports.—The question of relieving U.S. vessels from harbor master's dues said to be charged upon them in Canadian ports has lent impetus to renewed effort to abolish the other taxes above named. Your Secretary has called the attention of the Department of Marine to the terms of the U.S. statute, whereby the tonnage tax of 3c. a ton for the first five trips is imposed on vessels entering U.S. ports, the statute providing expressly that the President shall by proclamation exempt from its operation the vessels of any country in whose ports U.S. vessels are entered free, and shall also exempt such foreign vessels in any event to the extent of the excess of the U.S. tax over the amount of the tax that may be levied on U.S. vessels in the foreign country, provided no discrimination is made against U.S. vessels in the matter of taxation in the ports of such country. This exemption was granted vessels from Ontario by proclamation of President Arthur in 1885, because of the free entry of U.S. vessels in Ontario ports, and similar proclamations have since been made effecting many other countries. In Quebec, the Maritime Provinces and British Columbia, however, the hospital tax is imposed by R.S.C., cap. 76, and amounts to 6c. a ton. It is argued that vessels from Quebec Province should, in any event, enjoy the exemption from the U.S. tax as to the extent at least of the difference between the 15c. and the 6c. charged in the two countries, and further, that in accordance with the many previous requests of the Association and of the Shipping Federation of Canada, the hospital tax should be abolished and complete freedom from taxation be thus gained for Quebec vessels in U.S. ports. It is learned that the Bureau of Navigation at Washington is recommending the repeal of the provisions requiring the President of the U.S. to grant reciprocal exemption, and it is therefore proposed to urge immediate action by our Government, by means of a deputation to the Minister of Marine, with whom an appointment has been arranged.

PORT ARTHUR AND FORT WILLIAM HARBORS.—In response to a request from the Department of Marine for suggestions with reference to the opening of these harbors, your committee in April, 1905, recommended that the harbors be opened in the spring contemporaneously with the opening of the Sault Ste. Marie canal and St. Mary's River, and that they be kept open in the fall of the year up to December 12.

OPERATION OF LIGHTS, FOGHORNS, ETC., in Late Fall.—Correspondence on this subject took place with the Department, and an agreement was finally arranged to keep lights and foghorns in operation on Lake Superior, Lake Huron, and Georgian Bay, up to Dec. 16, and on lower waters up to Dec. 20, excepting a certain few named points where automatic gas lights were to be installed, and excepting the foghorns on Caribou and Western Islands. At the same time a cordial correspondence took place with the Lake Carriers' Association regarding the lights in U.S. waters.

EDDY BROS. RANGE LIGHTS AT BLIND River.—The owners of these private lights having discontinued their operation, the Department undertook at the request of this Association to take over and continue the operation of the range.

COLLINGWOOD LIGHTS.—The petitions of this Association and of the Collingwood Board of Trade, and of the Masters and Mates Association, were granted, and the desired work upon these lights was promptly undertaken.

PELEE ISLAND LIGHT.—Upon request from the Department for advice as to the proposed discontinuance of this light on account of the new light upon the Middle Ground, your committee, after full investigation, countenanced its discontinuance so far as the interests of through navigation were concerned, but without prejudice in any way to the rights of local parties and local traffic.

FOGHORN AT PRESQUE ISLE LIGHT NEAR Brighton.—A petition was presented by your committee for the erection of a foghorn at this point, the surroundings being dangerous and the traffic extensive, as the Murray canal here connects thd Bay of Qninte with Lake Ontario.

GODERICH HARBOR.—Upon urgent representations to the Minister of Public Works, certain necessary dredging in the channel entering this harbor was promptly undertaken and prompt notice of an alteration of the range lights leading to the harbor was subsequently received and circulated by your Secretary.

TORONTO HARBOR.—The Association petitioned for the improvement of the channel at the eastern entrance of this harbor last summer, and later joined the Toronto Harbor Commission in pressing the request. The work asked for has now been undertaken.

GALOPS RAPIDS.—Having notice of improvement works here in the summer season, and consequent blockade of the channel, your committee was successful in arranging for notice to all vessels to use the canal and for permission for rafts to pass down the rapids upon telegraphing the time of their arrival in advance.

SHOALS NEAR CARDINAL CANAL.—Your committee's request for improvement at this point was not acted upon, on the ground that a sufficient width of navigable water existed clear of the shoals

BELLEVILLE BRIDGE ACROSS BAY OF QUINTE.—Your committee's request for protecting booms at the base of the piers of this bridge was referred by the Minister of Public Works to the engineer in charge of the district, and the latter has now asked for a meeting with representatives of the Association and an appointment is being arranged.

SPEED OF VESSELS IN NARROW CHANNELS.—A proposal for regulations governing the speed of vessels in narrow channels was referred to your committee, and the Secretary was instructed to communicate with the Lake Carriers' Association on the subject, as joint action would be required to assist matters in such channels as the St. Mary's, St. Clair, and Detroit Rivers. Correspondence with H. D. Goulder, counsel for the Lake Carriers' Association, developed the view, however, that the proposal was impracticable, and that parties should be left to their common law rights, which would depend in each case upon the special facts involved, such as the proximity of the vessels, the sufficiency of mooring lines, etc. Your committee therefore took no further action in the matter.

SPEED OF VESSELS IN TORONTO HARBOR.—Upon noting that the speed limit for vessels in Toronto Harbor was four miles an hour, your committee considered the advisability of having the limit increased, and correspondence ensued with the Harbor Commissioners. That body has now adopted regulations increasing the limit to seven miles an hour.

INTERNATIONAL WATERWAYS COMMISSION.—Your committee arranged for a hearing by the Commission, and after investigation and correspondence with the Montreal Board of Trade and other bodies, prepared a memorial protesting against any action which might possibly tend to decrease the St. Lawrence levels. Your President and other members attended on behalf of this Association at Montreal, and your Secretary and others at a subsequent session at Kingston, presenting in each case the views of the Association. An assurance was received that no interference with the St. Lawrence would be tolerated for a moment.

It is important to note that another question of international importance is arising for the consideration of this Commission, namely, the encroachment of power companies upon the water supply at Sault Ste. Marie. The Lake Carriers' Association of the U.S. is interesting itself in the matter, and your committee recommends that a memorial be presented to the Commission on behalf of this Association urging that no interference with navigation interests be permitted.

CLEARANCES AT PORT ARTHUR AND FORT WILLIAM.—The memorial on this subject presented to the Minister of Customs last year by this Association was favorably considered, and after a short correspondence orders were issued permitting a vessel to obtain one final clearance before leaving the twin ports, instead of, as heretofore, having to clear repeatedly from one port and then the other in the course of picking up her cargo at the various elevators.

GRAIN ELEVATORS; SHORTAGES IN WEIGHTS; Loading and Unloading; Methods; Demurrage.—These subjects received consideration at several meetings and in general correspondence extending throughout the year. Agreements were entered into by vessel owners carrying grain, with a view to improving conditions and preventing unfair loading advantages to any individuals, and the authorities of the C.P.R. and C.N.R. were interviewed by deputations who asked assistance in remedying existing evils. A special deputation also interviewed the Minister of Trade and Commerce, and his assistants, regarding the loading methods at Lake Superior elevators, and undoubtedly these efforts resulted in a marked improvement in many respects at Port Arthur and Fort William. During the last months of the past season, however, serious difficulties developed in Georgian Bay ports, a car famine existing, and vessels being compelled to lie unloaded for days at a time waiting for discharge. Correspondence took place with the railways, and a deputation waited upon G.T.R. officials in Montreal, urging a better car supply. Later a complaint was lodged with the Railway Commission by an individual member of the Association, but the Association has not yet taken that action as a body, and it is hoped that the requirements of the situation will have been sufficiently realized and met by the railways before the coming season opens.

In this connection attention should be called to the new car service rules promulgated by the Commission, whereby a new tariff by way of demurrage is fixed, to govern in all cases of delay in loading or unloading cars. The Commission refers incidentally to the request from many quarters for what they call "reciprocal demurrage" to protect the public against default and delay on the part of the railways, but they state that the subject requires investigation and consideration. They promise careful attention to any material representations, however, and your committee recommend that the subject should have consideration.

The past season also provided fresh cause of complaint against the constantly recurring shortages in the weights of grain discharged from vessels. The Department of Trade and Commerce had deferred action in the matter last summer to ascertain the result of the efforts for improvements instituted by the C.P.R. at the upper ports. Your committee was, however, compelled to renew its requests for Government assistance, and a memorial has been presented praying that the principle adhered to in certifying the weight loaded into vessels at the upper ports be logically extended, and that the unloading and weighing out at lower ports be also supervised and certified by Government officials, and that the vessels be relieved of responsibility for shortages, the cost of which is now deducted from their freight. The Department has asked for statements of the shortages occurring, and your Secretary has compiled a statement from the returns received, showing a total net shortage for the season, in the case of the companies reporting, amounting to almost 10,000 bush. The matter is under consideration by the Department.

GRAIN CLEARING HOUSE AT PORT ARTHUR and Fort William.—A plan is being gradually evolved for the establishment of this clearing house to facilitate loading of cargoes by obviating the necessity for visiting a number of elevators, the intention being to load each vessel at one point and arrange a system of accounting among the elevators, shippers and carriers, to keep track of the grain. The plan has been laid before the Grain Exchange at Winnipeg, and has received its endorsement, while the railways are also interesting themselves in the development of the scheme. A committee of the grain section of this Association has the matter in charge and hopes to bring it soon to a successful issue.

PORT WARDENS AND INSPECTION OF Loading.—The Department of Marine has consulted the Association regarding proposed legislation providing for port wardens with supervising powers on inland waters in like manner as at ocean ports. A request has been made on behalf of the Association for opportunity to examine and report upon any bill that may be introduced.

BILLS OF LADING.—Attention has been called to the faulty and inaccurate character of certain bills of lading in use at Port Arthur and Fort William. In some the dangers of navigation are "accepted" where the clear intention is to "except" them; there is no express provision for demurrage such as is necessary to give a right against a consignee, and the clauses casting responsibility on the vessel for shortages are objectionable. Your committee believe the provisions of the Harter Act (U.S.A.) relieving the owner from negligence of his navigators should be incorporated in the bills. Correspondence on the subject is now pending with the Winnipeg Grain Exchange.

DUTY ON METALLIC LIFE BOATS.—The request of this Association presented to the Minister of Customs by deputation and by memorial asking for removal of this duty, as no Canadian manufacturer would be prejudiced, was referred by the Department to the Tariff Commission. Recent enquiries lead to the conclusion that no report in the matter can be expected for some time to come. The Department does not acknowledge that it has any jurisdiction in the matter and claims that the remedy can only be granted by legislation, and that a report must be awaited.

DUTY ON FUEL.—Upon consideration your committee decided not to endorse the petition of the Western Coal Association for the removal of duty on vessel fuel, believing that the subject was debatable from many points of view, and that the Association should not interfere at present.

COMMITTEES.—A special committee of the Association has been formed comprising all members engaged in the carrying of grain down the lakes, and this "grain section," as it has been designated, has held many meetings throughout the past year, taking action in matters specially affecting the grain trade. By resolution of the section a special levy was made upon its members on account of expenses incurred in its special work and $329.23 resulting from this appears as an item of revenue in your Treasurer's financial statement. The appointment of a committee on aids to navigation is suggested, in addition to the executive and the grain section.

MEMBERSHIP AND EXPENSE.—The tonnage represented in the Association is now 107,414 net registered tons, of which 77,230 is steam and 30,184 is barge and sailing property. The Association continues to represent all the leading passenger and freight lines on the inland waters of Canada, the only noticeable exceptions being the vessels owned by the G.T.R. and C.P.R., and the Algoma Central boats at Sault Ste. Marie. Your committee recommends an assessment for the coming year at the same rates as those fixed at the last general meeting.

CONDOLENCES.—Your committee desires to record the universal feeling of deep and sincere regret experienced upon the loss of one of its most active and efficient members, the late C. F. Gildersleeve, who had taken a very prominent part in the formation of the Association, and as its first elected President assisted to a great extent in giving the Association the assured position of usefulness it now occupies. In the absence from Canada of the present President, J. A. Cuttle, one of the Vice-Presidents, A. A. Wright, with your Secretary, represented the Association at Mr. Gildersleeve's funeral, and an anchor of flowers from this Association was among the great number of tokens that testified to the loving esteem in which Mr. Gildersleeve was held.

In the late Minister of Marine, Hon. Raymond Prefontaine, the Association has suffered a further loss, shared by the navigation interests of the whole country. A reso-

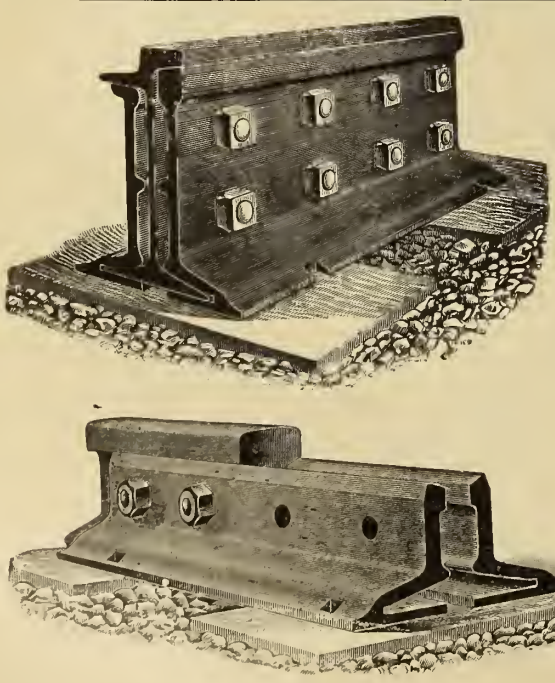
Railroad Essentials.



The day has passed when men of finance are willing to place their money into bad material in railroad construction only to be compelled to replace it by renewals or reconstruction after very little use. Many of the best and most successful steam and electric railroads use the rail joints of the Continuous patent type for standard track work, insulated joints, step joints, and electric bonding joints for the reason that experience has proven it to be the best appliance of its kind ever put upon the market, as evidenced by the fact that it is used in all parts of the world on over 20,000 miles of track.

Richard Southam Manager

An order-in-council has been passed re scinding the regulations hitherto in force under the act for the preservation of health on public works, and establishing a new set of regulations in lieu thereof.

lution of condolence, referring to the late Minister's valuable services, was duly prepared and officially forwarded to Madame Prefontaine.

Following is the Secretary-Treasurer's financial statement:

Balance from last report	$1,128.62
Interest	21.56
Membership dues	1,695.35
Receipts from special extra assessment upon the grain section	329.23
	$3,174.76
Disbursements, including special disbursements made on account of grain section	$1,867.45
Balance on hand	$1,307.31

The following were appointed a committee on aids to navigation: A. A. Wright, C. J. Smith, D. Noonan, R. W. Shepherd, L. Henderson, T. Donnelly, S. Crangle, H. H. Gildersleeve, and the President. To this committee were referred a number of petitions for lights, buoys and harbor improvements, and the committee was instructed to prepare and present a memorial setting out the improvements considered advisable.

It was resolved that hereafter the report of the executive committee be printed and distributed at least 10 days prior to the annual meeting.

C. H. Nicholson introduced the subject of the proposed legislation regarding the observance of the Lord's Day, and asked for careful supervision of the matter by the Association in the interests of navigation. The question was referred to the executive committee with instructions to take such action as might be deemed proper.

The qualifications of second-class engineers were discussed by several members, and on request E. Adams addressed the meeting, making the statement that while the rules apparently excluded time spent in fitting out and laying up for counting in the period of service required in the engine room, due regard would always be given to the special circumstances of each case and the rules would not be permitted to work hardship by the exclusion of time spent in gaining experience in actual bona fide service whether the vessel was then actually running or not.

The bill to amend the act respecting the certificates of masters and mates was also discussed, and Capt. Demers addressed the meeting on the subject, promising consideration for the views enunciated by various members in the course of the discussion.

It was resolved that the thanks of the Association be tendered to the Government for the efforts in keeping open the harbors of Fort William and Port Arthur until the close of navigation, and that in accordance with the resolution already presented a further request be made that these harbors be opened in the spring as soon as the opening of the Sault Canal and St. Mary's River.

The following executive committee was elected: J. A. Cuttle, A. A. Wright, A. B. MacKay, T. Donnelly, C. J. Smith, S. Crangle, H. H. Gildersleeve, J. H. Hall, D. Murphy, F. Plummer, G. T. Marks, and J. P. Kavanagh.

At a subsequent meeting of the executive committee the following officers were elected: President, J. A. Cuttle; 1st Vice-President, C. J. Smith; 2nd Vice-President, G. T. Marks.

In the afternoon a large deputation of members, accompanied by W. Harty, M.P., and R. Bickerdike, M.P., interviewed the Minister and Deputy Minister of Marine, and asked for favorable consideration for the memorial which would be presented for new aids to navigation. They also renewed the request for the abolition of the hospital tax or sick mariners' dues, pointing out as well the terms of the U.S. statute, which imposes a tonnage tax in U.S. ports, and petitioning for action in accordance with the clause in the report of the executive committee where the matter is referred to in detail. Memorials already presented by the Association and by the Shipping Federation were also referred to and the Minister promised all his consideration.

The Deputy Minister of Railways and Canals was also waited upon by the same deputation and interviewed regarding the advertised closing of Cornwall canal during April, the electric traction system at Cornwall canal, the protection of bridge piers, etc., in Lachine canal, and the opening of Farran's Point lock on Sunday, and also, if possible, the guard lock of the Cornwall canal. The deputation learned that upon the memorial of the Association already presented instructions had been given to hasten the work upon the canals and let in water again at the earliest possible date, and that the opening of navigation would not be delayed. It also appeared that the electric traction question was already before the Privy Council as a result of the Association's request, and that modification of the order might be expected shortly. The other matters presented were noted and promised consideration.

The Minister of Marine directed the ice-breaking str. Montcalm recently to proceed to the Gulf of St. Lawrence to locate ice and warn incoming steamers in regard thereto by means of wireless telegraphy.

Application is being made at the current session of the Dominion Parliament for an act incorporating the Canadian Lloyds, with a capital of $250,000 and offices at Montreal, to carry on a general insurance business. The provisional directors are: R. Bickerdike, J. H. B. Christie, F. A. C. Bickerdike, D. A. Campbell and J. Gowan, Montreal.

Two bills affecting marine interests, which have been before the Dominion Parliament in almost identical terms for several years past, have again been put forward by their sponsors, L. McCarthy and E. A. Lancaster. The first is a proposed amendment to the Steamboat Inspection Act, respecting certificated engineers, and the second is in respect to the examination of masters and mates. Both have been given a second reading and have been referred to a special committee of which A. K. Maclean, M.P. for Lunenburg, N.S., has been elected chairman.

The chairman of the Board of Steamboat Inspection, of the Department of Marine, has given instructions to the various inspectors in regard to the exemption of vessels arriving in Canada from the application of hydraulic pressure in the annual examination made under the Canadian inspection rules. The instructions are to the effect that in cases where they had the assurance that the cold water test had been applied by competent authorities to the boilers of any vessels during the previous eight months, if in their opinion, after examination, they thought it advisable to dispense with the cold water test, they could do so.

E. N. Lewis, M.P. for West Huron, delivered a lengthy speech in the House of Commons, April 4, on marine matters. He called attention to the need of the proper inspection of barges and similar craft, not only on the Great Lakes, but upon the Atlantic coast. There was great need for the adoption of a load line for all classes of vessels; for providing for the prevention of undermanning vessels, and for putting a stop to overloading. The Minister of Marine pointed out that if the suggestions made by Mr. Lewis were carried out it would entail large additional charges on the transportation companies, which, in the face of the heavy competition of railways, it might not be advisable to impose. The questions, however, were of considerable importance.

River and Lake Officers for 1906.

The following appointments have been made by the principal navigation companies engaging in the St. Lawrence River, Great Lakes and other vessel routes for their various steam and sailing vessels, tugs and barges for the season of 1906. In the first column is given the name of the vessel, in the second that of the captain, and in the third that of the chief engineer:

C.P.R. LANDS

THE CANADIAN PACIFIC RAILWAY COMPANY have 10,500,000 acres of choice farming lands for sale in Manitoba, Saskatchewan and Alberta. Ranching lands generally $4.00 to $5.00 per acre. Lands adapted to grain growing and mixed farming $5.00 to $15.00 per acre according to quality and location. Maps showing the lands in detail will be sent free on application.

TERMS OF PAYMENT.

An actual settler may purchase not more than 640 acres, on the ten instalment plan by paying a cash instalment at time of purchase, interest at six per cent. on the unpaid purchase money at the end of the first year, and the balance of the principal with interest in nine equal instalments annually thereafter as shewn in the following table:—

160	Acres at	$4.00	per acre,	cash payment	$95.85,	first year's interest	$32.64	and nine instalments of	$80.00
"	"	4.50	"	"	107.85,	" "	36.73	" "	90.00
"	"	5.00	"	"	119.85,	" "	40.81	" "	100.00
"	"	5.50	"	"	131.80,	" "	44.89	" "	110.00
"	"	6.00	"	"	143.80,	" "	48.98	" "	120.00
"	"	6.50	"	"	155.80,	" "	53.05	" "	130.00
"	"	7.00	"	"	167.80,	" "	57.16	" "	140.00
"	"	7.50	"	"	179.75,	" "	61.22	" "	150.00
"	"	8.00	"	"	196.70,	" "	65.28	" "	160.00

Purchasers who do not undertake to go into residence on the land are required to pay one-sixth of the purchase money down, balance in five equal annual instalments with interest at the rate of 6 per cent. per annum.

Interest at six per cent. will be charged on overdue instalments.

F. T. GRIFFIN,
Land Commissioner C.P.R. Co., Winnipeg.

CANADA NORTH-WEST LAND CO

This Company has 650,000 acres of selected lands in Manitoba and Assiniboia which offer excellent opportunities to settlers and investors who desire to secure good lands in well-settled districts. These lands are on sale at the Company's Office at Winnipeg, and at the various land agencies of the Canadian Pacific Railway Company.

Notices to Mariners.

The Department of Marine has issued the following notices to mariners:

No. 18. Mar. 6.—Ontario—52. Lake Ontario, Simcoe Island, Nine Mile Point, change in character of light.

No. 19. Mar. 10.—New Brunswick—53. South Coast, Bay of Fundy, Lepreau Bay, off Stay Point, change in character of buoy. Nova Scotia—54. West coast, Yarmouth fairway whistling buoy to be replaced by gas and whistling buoy.

No. 20. Mar. 13.—British Columbia—55. Vancouver Island, west coast, Clayoquot Sound, Templar channel, Leonard Island, fog alarm established.

No. 21. Mar. 14.—Nova Scotia—58. South coast, St. Mary River, the Budget (Horse shoal), lighthouse established. 59. South coast, Fisherman harbor, lighthouse established.

No. 22. Mar. 19.—Ontario—60. Lake Ontario, Toronto harbor eastern entrance, tower provided for inner range light. 61. Lake Ontario, Toronto, speed of vessels in harbor.

No. 23. Mar. 23.—New Brunswick—62. South coast Bay of Fundy, Passamaquoddy Bay, St. Andrew's bar, Navy Island, lighthouse placed on cribwork foundation. Nova Scotia—63. South-east coast, Chedabucto bay, Guysborough harbor, lighthouse rebuilt.

No. 24. Mar. 26.—British Columbia—64. Hero Strait, Discovery Island, intended change in character of light. 65. Vancouver Island, east coast, Stuart channel, Crofton, Osborn bay, Shoal Islands, light established.

No. 25. Mar. 29.—Labrador—66. Strait of Belle Isle, Amour point, change in fog alarm.

The following has been issued by the U.S. Hydrographic Department:

No. 13. Mar. 31.—463. Lake Superior, Apostle Islands, rock shoal, wreck disappeared.

The Lake Freight Situation.

Our Winnipeg correspondent writes as follows: The backward weather of the past month has somewhat upset the calculations of the various bulk freight carriers on the lakes as to an early opening of navigation, Sault Ste. Marie being the most backward, and instead of everything being in full swing on April 1, it was not until the 14th that the Sault opened, although the twin ports of Fort William and Port Arthur had been opened for a week prior to that date, owing to the excellent work of the ice breaker, Jas. Whalen, now located there, and whose work has put at rest all doubts as to her ability to open the ports early and keep them open as late as necessary.

Opening rates on wheat were 2¼c. to Georgian Bay and Lake Huron ports, 2c. to Buffalo, and from 6½ to 7c. Montreal, but in the Buffalo case the rates were made by United States boats, Canadian vessel owners asking 2½c. for that port, and the difference of ¼c. between Georgian Bay ports and Buffalo has aroused some feeling on the part of grain shippers who claim that it is a decided discrimination in favor of Buffalo as against the Montreal gateway, as the St. Lawrence is already burdened with much higher insurance rates than the port of New York.

The Steel Trust, which is the largest shipper of iron ore on the Great Lakes, has been very backward in chartering outside tonnage for the movement of its ore for the coming season, and this has had its effect on the general rate situation by forcing vessel owners who have in the past depended altogether on the ore business to keep their vessels engaged in the grain trade, which accounts for the opening rate of 2c, to Buffalo named by United States vessels, and the outlook now is that rates on wheat will go considerably lower if no improvement shows in the ore trade.

Georgian Bay Ship Canal Survey.

The interim report of A. St. Laurent, Chief Engineer of the Georgian Bay Ship Canal surveys, has been presented to the Government. It covers the work of the preliminary survey from the mouth of the French River, through Lake Nipissing, across the height of land to the Mattawa River, and along the Ottawa River to Montreal, a distance of 425 miles. The proposed route was divided into three districts, Nipissing, Ottawa, Montreal. On the western end the survey has proceeded on the assumption of a summit level at or about Trout Lake elevation. This was done because the raising of Lake Nipissing 16 or 20 feet, as proposed in the old surveys, is considered altogether impracticable in view of the settlement around the lake, involving as it would the flooding of a portion of North Bay and also the main line of the C.P.R. On the other hand the cutting down of the whole summit level to Lake Nipissing level would entail a very large expenditure to give a first-class canal for large vessels. It is mentioned that the water supply at the height of land has been studied for a possible traffic of from 10,000,000 to 20,000,000 tons. The investigation so far, though not complete, seems to indicate that the supply from the immediate watershed of Trout, Turtle and Talon Lakes at the height of land will not be sufficient for the amount of traffic assumed, but the possibility of getting an extra supply of water from an adjacent watershed and by impounding water is now being looked into with every chance of meeting with favorable conditions. The engineers have completed their field work, and are at work on the plans, profiles and estimates of cost.

Atlantic and Pacific Ocean Marine.

The derelict British steamship Dunmore, which was reported drifting in the route of the trans-Atlantic steamships in Feb., is reported to be a danger to navigation.

The C.P.R. SS. Empress of Britain was given a trial trip at Glasgow, Scotland, April 17, when a speed of 19¾ knots an hour was developed. She will sail from Liverpool on the first trip May 5.

Following are the directors of the Quebec Steamship Co. elected at the annual meeting held April 3: W. Price, J. C. Thomson, A. F. Hunt, W. Simons, G. T. Davie, J. T. Ross, Hon. J. Sharples, Quebec; E. H. Botterell, M. N. DeLisle, Montreal.

It has been announced in London, Eng., that the accommodation on the C.P.R. steamers Empress of Britain and Empress of Ireland has been nearly all taken up for the initial trips. The first named is due in Quebec May 11.

The London, Eng., Salvage Co. has undertaken the task of floating the Allan Line str. Bavarian, which stranded on Wye Rock, near Grosse Isle quarantine station, Nov. 3, 1905. Preliminary operations have been commenced.

PAGE FENCES OUTWEAR ALL OTHERS

BECAUSE—They are made of HIGH CARBON STEEL, nearly 50% stronger than other wire, our No. 9 gauge testing 2,400 lbs., against 1,700 lbs. in others. Hence, our wire will not stretch and show sags or bags where stock has run into it, or where people have climbed over it.

Fencing of all No. 9 wire supplied when desired.

JOHN LECKIE LIMITED

TORONTO

The Allan Line turbine steamer Virginian made a record run from Moville, Ireland, to Halifax on her last trip, and also cut down the time for the eastern run on the return voyage. The time to Halifax was 6 days, 6 hours, and for the run to Moville, 6 days, 4 hours.

A London, Eng., cable dated April 6 states that the admiralty subsidy to the C.P.R. steamers Empress of India, Empress of China, and Empress of Japan as armed cruisers has expired. The amount of the subsidy was $300,000 a year. Negotiations for its renewal are said to be in progress.

The Secretary for the Colonies, a London, Eng., cable states, has called a conference with New Zealand and Australia regarding shipping legislation. He declines to include in the scope of the conference the service between Canada and Australia, although the shipowners are said to be anxious to have it discussed.

Judgment was delivered in the Admiralty Court at Quebec, April 2, in the case of the cross actions arising out of the collision between the Norwegian SS. Tordenskjold and the German SS. Euphemia in the St. Lawrence River in the summer of 1905. The court found the Tordenskjold to blame and directed the registrar and assessors to fix the amount of damages which her owners will have to pay.

T. Harling of the Quebec Transportation Co. states that he has secured the necessary tonnage for the carrying out of the agreement with the Quebec Harbor Commissioners to establish a direct line of steamers between Quebec and British ports. It is proposed to give a fortnightly service, and to give out the names of the steamers and times of sailing at an early date. The service is to be inaugurated early in May.

Another steamer was added at Glasgow, Mar. 23, to the fleet of the Ocean Steamship Co., trading between Liverpool and Vancouver, B.C., and between Vancouver and the Orient, when the hull of the Cyclops was launched. The principal dimensions of the Cyclops are: length, 500 ft.; breadth, 58 ft.; depth, moulded 42.6 ft. She will be of about 9,000 gross tons, and is built on the same general lines as the Bellerophon and Teucer, described in our April issue.

The following appointments of captains of the C.P.R. trans-Atlantic steamers have been announced: Capt. Forester, heretofore of the Mount Temple, to the Lake Champlain, succeeding Capt. Stewart, appointed to the Empress of Britain; Capt. McNeill, heretofore of the Montrose, to the Mount Temple; Capt. Moore, heretofore of the Milwaukee, to the Montrose. It is expected that Capt. Evans of the Montfort will be appointed to the Lake Erie in succession to Capt. Carey, appointed to the Empress of Ireland.

The contract for the carriage of the mails between Canada and Great Britain for five years, the terms of which have already been published, has been signed by the Dominion Government and the Allan Steamship Co. Under the terms of the contract the company has to provide two additional 18 knot steamers for the service. On April 11 it was announced in Montreal that an arrangement had been reached between the Allan Steamship Co. and the C.P.R., under which the mail contract will be divided, the fastest steamers of each company being utilized so that an even service may be assured.

W. Power, M.P., of W. J. Sharples & Co., Quebec, who recently returned from Great Britain, stated in an interview that the Canadian lumber trade with the mother country in the future will be much diminished. England could obtain her supplies of lumber cheaper in Switzerland and Norway than in Canada, whilst the United States dealers were offering higher prices for Canadian lumber than could be obtained in England. The marine interests of Canada, he said, would now have to depend for cargoes and shipments to European markets on the products of the country, grain, cheese, butter, etc. The heretofore great lumber trade of the St. Lawrence to the mother country was a thing of the past.

A settlement of the action of Petersen against the Armstrong-Whitworth Co., arising out of a contract for a steamship service between Canada and European ports, has been arrived at. W. Peterson secured a contract with the Canadian Government to operate a line of steamers and an agreement was made between him and the Armstrong Co., of Elswick-on-Tyne, Eng., for construction and financing of the line. The Armstrongs subsequently withdrew from the agreement, and the contract with the Canadian Government was never carried out. An action was entered by Wm. Petersen, Limited, for damages, which action was continued by the Official Receiver when the company failed.

Maritime Provinces and Newfoundland.

F. G. R. Bradbury has been appointed Wharfinger of the Government wharf at Sheguiandah, N.S.

The Department of Public Works for Prince Edward Island reports that the str. Elfin has been rebuilt at a cost of $4,000.

The North Sydney Fishing Co. has sold its gasoline motor-driven vessel to C. Darlington, Halifax, N.S., who will use it as a cruising yacht.

W. Snow has been appointed Harbor Master for the port of Marie Joseph, N.S.; M. A. McIsaac, Harbor Master of Big Pond, N.S., and G. J. Locke, Harbor Master of Lockeport, N.S.

We were advised April 13 that nothing definite had been decided in reference to the proposal to sell the Interprovincial Navigation Co.'s str. Lady Eileen and replace her with a larger vessel.

The owners of the schooner Alexander R. have libelled the str. Aranmore for damages owing to the sinking of the schooner in Halifax harbor, April 2. The Alexander R. was built in 1905, and was valued at $3,500.

We have been officially informed that the str. Princess has been sold by the Charlottetown Steam Navigation Co. to the Dominion Government for the fishery protection service in the Gulf of St. Lawrence, and in Labrador waters.

The Plant Line str. Beverley is undergoing an overhaul at Halifax, N.S., prior to taking up her run between that port and Boston, Mass. The company's str. Halifax has returned from Havana, Cuba, where she has been running during the winter

The new str. St. Pierre Miquelon has arrived at the French port and island off the Newfoundland coast, from which she takes her name, and has taken up her run between St. Pierre and North Sydney, Halifax and other ports in N.S. This steamer replaces the Pro Patria, which was lost in 1905.

The Shepody Navigation Co. has elected J. W. Y. Smith a director, and has appointed W. H. Edgett Manager. The directors are completing arrangements for the provision of additional wharfage accommodation at Albert and other points in New Brunswick where the company's str. Wilfred C. calls.

Capt. T. Densmore and Capt. J. Ellis have been appointed pilotage commissioners to succeed A. K. Moore and D. P. Soley, deceased; Capt. S. Wadman and Capt. N. Wadman have been appointed pilotage commissioners to succeed J. F. McKenzie and J. W. Broderick, removed, for the pilotage district of Economy, N.S.

Five Nova Scotian schooners were reported sold in North Sydney to Newfoundland owners recently, and two other schooners are under option of sale also to Newfoundland people. This demand has served to stimulate shipbuilding at home, and it is stated that 97 vessels, ranging from 40 to 250 tons register, are now building or ready for launching in various parts of Newfoundland.

Job Bros., St. Johns, Nfld., owners of the str. Neptune, which was chartered for patrol duty in the Arctic Ocean by the Dominion Government, have a claim of $5,000 against the Government in connection therewith. The matter is being settled by arbitration, W. F. Schmidt, representing the Government; W. R. Warren, the owners of the steamer, and D. M. Browning, K.C., is the third arbitrator.

The Crystal Stream Steamship Co. has been incorporated under the New Brunswick Companies' Act, with offices at St. John, N.B., and a capital of $24,000 to acquire the steamer Crystal Stream, or other steamer, and to carry on a general navigation business on St. John River. The provisional directors are Mrs. S. A. Purdy, Miss M. Beverley, Miss A. M. Purdy, D. J., J. C. and W. G. Purdy, St. John.

The new steamer for the Charlottetown Steam Navigation Co., Charlottetown, P.E.I., was launched at Newcastle-on-Tyne, Eng., Mar. 26, and was christened Empress by Miss Martin, of Abingdon. The owners were represented at the launch by Capt. Cameron and J. A. Rowe, the master and chief engineer of the new steamer; and R. Anderson, Renfrew, superintendent of construction. W. Richards, one of the directors, was to leave Charlottetown, April 21, for Newcastle, to take over the steamer.

The investigation into the loss of the barge Rembrandt has been concluded and the finding of the court was filed April 2. The barge belonged to the Dominion Coal Co., and was being towed along the Nova Scotian coast by the tug Douglas H. Thomas in Nov., 1905, when she was lost in a gale. The court found that there was no Government inspection or supervision of barges on the eastern coast; that they were usually old vessels cut down as to sails and without self-propelling power, and provided with a crew just sufficient to steer, keep things snug and do the pumping with the donkey engine. The crew of a drifting barge in a storm or on a lee shore, said the court, is the most utterly helpless of our seafaring population. The court recommended that Capt. W. P. Cann, of the tug, be censured for not cutting the tow line and keeping his vessel in touch with the barge, and for not informing the Dominion Government str. Lady Laurier of the circumstances the day after the barge got adrift. The court also recommended that the Government provide for an adequate inspection of seagoing barges in future.

Province of Quebec Marine.

P. Desjardins has been appointed Government wharfinger at Desjardins, Que.

The Quebec Harbor Commissioners have had a consultation with the Dominion Government in connection with improvements at the harbor.

Navigation was opened at Montreal on Mar. 31 in 1898, and on Mar. 30 in 1878, which are the earliest dates recorded during the last 56 years. The earliest first arrival from the sea in the same period was April 17 in 1902, and the latest was May 20, in 1854.

The Lake St. John and Saguenay Navigation Co. is the title under which the new navigation company, to which reference was made on pg. 101 of our Feb. issue, has been incorporated under the Quebec Companies' Act. The capital is fixed at $25,000, and the chief offices are at Quebec.

A Quebec report states that the Richelieu and Ontario Navigation Co. has decided to enlarge the str. Quebec, now on the Montreal-Quebec run for the season of 1907. The steamer will be cut in two amidships and a new section of 50 ft. added. The work will be done at the company's works at Sorel, Que.

Permission has been granted to the steamship companies to use the lower floors of the six new steel sheds at present under construction in Montreal harbor during the current season of navigation. The contractors, P. Lyall & Sons, will proceed with the completion of the upper floors during the summer.

The str. Bickerdike, which was formerly known as the Arabian, is owned by the Montreal and Great Lakes Steamship Co., and will be operated during the current season of navigation in the Merchants Line between Montreal and Lake Superior ports, G. E. Jaques & Co. being the managers at Montreal. She has a cargo capacity of about 1,500 tons.

The Montreal and Great Lakes Steamship Co. has been incorporated under the Dominion Companies' Act with a capital of $90,000 and offices at Montreal, to carry on a general navigation business. The provisional directors are: R. Bickerdike, H. Munderloh, A. Lefebvre, C. A. and M. Jaques, Montreal; J. H. Hall, Ottawa; S. Samuel, G. Somerville, Toronto.

The Quebec Transportation and Forwarding Co. has been incorporated under the Dominion Companies' Act with a capital of $40,000 and offices at Quebec, to carry on a general forwarding and carrying business, and in connection therewith to own or lease wharves, warehouses, steam and other vessels. M. J. and W. J. Hackett, J. S. and H. L. Thom, Quebec; C. E. Brodie, Levis, Que., are the provisional directors.

The C.P.R. put a large gang of men at work, April 4, upon the improvements necessary at the Louise docks, Quebec, for the accommodation of its steamship traffic there. Railway tracks are being laid on the north embankment wall of the dock, and a trestle connection is being constructed to Prince Edward St. Pending the completion of the work the company will have accommodation at the Carey wharf, and at the breakwater landing and sheds.

Six actions are pending before the Admiralty Court in connection with a collision in Montreal harbor in the fall of 1905, in which a dredge belonging to the Harbor Commissioners was sunk and another badly damaged. The total amount of the damages claimed in the several actions is $300,000. The Harbor Commissioners seek to recover damages from the owners of the str. Universe, the tug Bay State and the barges Bath and Berkshire; the owners of the barges seek to recover damages from the owners of the Universe; and owners of the Universe against the owners of the Bay State and the barges. Justice Dunlop has adjourned the case to consider certain questions raised, and it will be resumed at Quebec at a future date.

The Montreal Harbor Commission appears to be in a moribund condition. One of the commissioners is reported to have stated Mar. 30 that the life of the body was then only of such a short duration that it did not matter what they did. R. Bickerdike, one of the Government appointees, resigned office April 3, while A. Racine and E. H. Lemay, two other Government appointees, were reported to have sent their resignations to Ottawa April 6 and 8 respectively. The Montreal harbor reorganization bill was laid before the House of Commons, April 19, by the Minister of Marine. The reorganization, he said, was another step towards giving effect to the idea that Montreal should be made more and more a national port. There are now 11 commissioners, of whom six are appointed by the Government, but the new bill provides for three commissioners only to be appointed by the Government, who are to be paid a salary out of the revenues of the harbor and who will be required to give nearly all, if not all, their time to the duties. The old board will continue in office until the proclamation putting the new constitution into force is issued.

Ontario and the Great Lakes.

J. D. Hall has been appointed Harbor Master at Parry Sound, Ont.

H. A. Hawgood, President of the Hawgood Transit Co., died suddenly at Cleveland, Ohio, April 3, aged 60.

The Ontario Government has decided to sell its fisheries protection cruiser Gilphie, and replace it with a faster and more modern vessel.

The town of Fort Frances is applying for power from the Ontario Legislature authorizing it to construct a dock in the Rainy River at that point.

The repairs to the Rideau Canal have been completed and it was announced that navigation between Kingston and Ottawa would be opened for the season, May 1.

The str. Turbinia left Kingston, Jamaica, Mar. 29, and was expected to reach Hamilton Ont., at the end of April, to begin her summer run between that port and Toronto.

The twin screw steamer now under construction for the Muskoka Lakes Navigation and Hotel Co. will be named Sagamo, and is expected to be running by June 15.

A steamer named the Kathleen has been built at Rideout Bay, Kenora, Ont., for Dowsett and Robinson, and is intended for freight and passenger trade on Winnipeg River.

The Dominion cruiser Vigilant was given an overhaul at a Detroit, Mich., shipbuilding yard, prior to starting out on her season's work in the fisheries protection service on Lake Erie.

The tug James Whalen was employed at the beginning of April to break up the ice in the harbor at Port Arthur, Ont. She broke through ice varying in thickness from 25 to 32 inches.

The str. Kaministiqwia was burned to the water's edge at her dock Port Arthur, Ont., April 2. She was valued at $12,000 and was insured for $5,000. It is proposed to rebuild at once.

The str. Resolute and barge Recruit of the Deseronto Navigation Co.'s fleet have been sold to Haney and Miller, Toronto. It is not the intention of the company to replace them at present.

The Canadian Lake and Ocean Navigation Co. has leased the west side of the wharf at Block D, Harbor Square, Toronto, and the freight shed thereon, at $3,500 for the current year from the city council.

The Detroit-Cleveland Navigation Co. has given orders for the construction of a side-wheel steamer 402 ft. long, with 350 staterooms, a carrying capacity for 4,500 passengers and 1,000 tons of cargo.

J. C. T. Cochrane, who died at Brockville, Ont., April 8, aged 88, was appointed Lloyds' agent at Quebec in 1853, and was subsequently departmental agent for Crown Lands. He retired from active life in 1872.

The Toronto Harbor Commissioners have amended the by-law affecting the speed of vessels entering the harbor so as to permit them to enter at the rate of seven miles an hour instead of four as formerly.

A freight and passenger steamer for J. Perks & Sons was launched at Meaford, Ont., April 16, and was named City of Meaford. It is expected the new steamer will make her first trip early in May.

The contracts for the harbor works at Port Burwell and Rondeau, Ont., which were let to the Pacific Construction Co. at $72,500 and $110,000 respectively, have been transferred to Haney & Miller, Toronto.

The Sarnia Transportation Co. has purchased the str. Lake Michigan from the Hamilton and Montreal Navigation Co. (R. O. and A. B. Mackay, Hamilton, Ont., Managers), by which she was operated during 1905.

A. Kirby, engineer of the str. Juno, was badly scalded by steam owing to the bursting of a defective joint. The accident took place April 14 on board the steamer at Windsor, Ont., where she was being fitted out for the season.

The Lake Seamen's Union has made an agreement with the Lake Carriers' Association respecting the wages schedule for 1906. The rate will be the same as last year, but there will be some increases in the pay for overtime.

Navigation was opened between Toronto and Port Dalhousie Mar. 28; on the St. Lawrence at Brockville, Ont., April 2; Fort William and Port Arthur, April 11; through the Welland Canal, April 15; and on Georgian Bay, April 16.

The winter marine school at Kingston, Ont., was closed April 3. Over 100 mariners were in regular attendance during the winter, and at the closing lecture an address of appreciation was presented to Capt. T. Donnelly, who had been in charge.

The Admiralty Court sitting at Toronto recently found that the steamers J. H. Plummer and Dorothy were both at fault, and that the damages resulting from their collision in the Soulanges Canal must be equally divided and each party must bear its own costs.

The Deseronto Navigation Co. has chartered the Jessie Bain from the St. Lawrence River Steamboat Co., for the Deseronto-Picton run. It has also chartered the Where Now, to take the run between Gananoque, Ont., and Clayton, N.Y., which the Valeria had last season.

J. J. O'Connor has been appointed General Agent at Port Arthur and Fort William, Ont., for all the vessels owned by members of the Dominion Marine Association, and which run to those ports. He will look specially after the loading, quick despatch, etc., of the vessels.

The Dominion Government has had surveys for the proposed canal from Newmarket to the Holland River completed, and an estimate of the cost has been prepared. The Government, it was stated in the House of Commons, did not propose to make the figures public at present.

The Windsor Fish Co. has been incorporated under the Ontario Companies' Act, with a capital of $40,000 and offices at Windsor, Ont., to own and operate boats and vessels of all kinds in connection with its business. A. M. Hungerford, Detroit, Mich., is one of the principal promoters.

The Port Arthur Insurance and Vessel Agency has been incorporated under the Manitoba Companies' Act, with a capital of $25,000 and offices at Winnipeg, to carry on a general insurance and vessel agency business. The provisional directors are T.

Orders-in-Council have been passed renaming vessels as follows: paddle wheel steamer Richelieu, official number 33,746, registered at Ottawa, renamed Beauharnois; screw steamer Arabia, official number 121,784, registered at Ottawa, renamed Bickerdike; screw steamer Myles, official number 77,698, registered at Hamilton, renamed Cataract.

A number of the owners of steamers trading on the Great Lakes have agreed to the proposal of the marine engineers that a third engineer be employed on steamers of 3,000 tons and over. The engineers of the Rutland Transit Co.'s Ogdensburg-Chicago fleet went on strike April 5, refusing to fit out the vessels pending an adjustment of the matter.

The Ottawa River Navigation Co., which besides a number of steamers owns the Carillon and Grenville Ry., has been acquired by the Central Ry. of Canada, and a meeting of the shareholders has been called to ratify the sale. R. W. Shepherd, Managing Director of the O.R.N. Co., will remain with the new owners as general manager of the two companies taken over.

The new ferry steamer for the Toronto Ferry Co. was launched at the yards of the Polson Iron Works, Toronto, April 16, and was named Bluebell by Miss Ruth Smith, daughter of R. A. Smith, one of the directors of the company. A description of the ferry was given in our December, 1905, issue. She is expected to be ready to take her place on the service, May 24.

The Ontario Legislature has passed an act dealing with the sale of intoxicating liquors. A clause providing for the issue of licenses for the sale of liquors on board steamers was withdrawn. In the course of the debate, reference was made to the present selling of liquors on steamers, and an opinion expressed that this sale should be put down altogether, or regulated under the act.

The Minister of Public Works informed a deputation from the municipalities in the Trent Canal valley, Mar. 29, that the plans and estimates for the completion of the Trent Valley Canal would be presented to Parliament next session, and that a vote would be asked for the work. The Government had a fixed policy in regard to the canal and would push it forward to completion.

The Canadian Lakes and Ocean Navigation Co.'s str. Scottish Hero will be engaged carrying coal from Port Hawkesbury, N.S., to Montreal, probably to the end of May, when she will be cut in two at Levis, Que., and towed to Lake Erie, where she will be put together again. She will then be put in the regular freight trade on the Upper Lakes with the company's other vessels.

Some children found, April 11, a bottle off Port Robinson, Ont., containing the following words: "On board the Bannockburn; shaft broken; going down. Capt. Woods." Those who knew Capt. Woods well, say the writing is not that of the captain of the Bannockburn, which was lost in a storm towards the end of Nov., 1902, with her crew of 20, and of which no recognizable wreckage has been recovered.

The International Waterways Commission (U.S. section) has given its approval of the plans for the construction of a tunnel under the Detroit River between Detroit, Mich., and Windsor, Ont. A meeting of the Canadian and U.S. sections of the commission was arranged to be held in Buffalo, N.Y., April 26, for the purpose of agreeing upon a joint report relative to the use of water at Niagara Falls for power purposes.

It is reported from Sault Ste. Marie, Mich. that all the land required for widening the ship canal and the construction of larger locks between Lake Superior and Lake Huron, has been secured by the U.S. Government, and that contracts for the work will be let during May. The total cost of the works is estimated at about $8,000,000, but at present it is only contemplated to undertake certain improvements at an estimated cost of $1,020,000.

A reorganization of the Turbine Steamship Co., Hamilton, Ont., has taken place owing to the purchase of a large proportion of the company's stock by shareholders of the T. Eaton Co., Toronto. J. Moodie, jr., who has been President since the organization of the company, is now Vice-President, and the new officers and directors are: President, J. C. Eaton; Secretary-Treasurer, J. Vaughan, director, H. Magee. A by-law changing the head offices of the company from Hamilton to Toronto has been passed.

The following appointments have been made to the engineering staff of the Trent Valley Canal: A. J. Grant, heretofore Resident Engineer Port Colborne harbor works, to be Superintending Engineer, T.V. Canal at Ottawa; L. Linn to be Assistant Engineer at Kirkfield, succeeding R. R. A. Davey, resigned; E. Malone to be assistant to Mr. Linn, succeeding A. Sawers, resigned. E. J. Walsh will remain in charge of the surveys and —. Spence will be retained on the engineering staff in the Peterborough district.

The Ontario Public Works Department reports that the lockages on provincial locks and canals in the Ontario smaller lakes district for the season of navigation of 1905, were:

	Steamers	Small Boats	Scows and Rafts
Port Carling	3,960	821	809
Marys and Fairy Lakes	754	52	261
Magnetawan	907	53	280
Lindsay Lock	144	468	241
Young's Point	1,306	149	497
Balsam River	391	174	151
Totals	7,462	1,717	2,239

A steel steamer for the Dominion Government quarantine service at Grosse Isle, Que., was launched in Toronto, April 7, and was christened Alice by Miss Nicholls, daughter of the President of the Canadian Shipbuilding Co. The steamer has a length of 128 ft. over all, with an extreme breadth of 26 ft. 11 in., and is provided with engines capable of giving a speed of 12 knots an hour. Ample accommodation is provided for the officers and crew, and the special fittings for the quarantine officers are on the most modern lines, and include a complete disinfecting plant. The steamer is expected to be ready to take up her station by the middle of June.

A deputation from Port Hope, Ont., waited on G.T.R. officials at Montreal, April 7, in connection with the proposal to establish a car ferry service on Lake Ontario. The deputation was told that it was the intention to operate the ferry service between Port Hope, Ont., and Charlotte, N.Y., about 60 miles, and it was hoped to have it in operation by Aug. 1. The idea is to avoid the long haul by Niagara Falls, and to relieve the congestion of traffic at the bridge. The Rochester and Pittsburg Ry. is co-operating with the G.T.R. in the project, and it is intended to make daily trips. The G.T.R. proposes to spend $100,000 on yards, etc., at Port Hope in connection with the project. The ferry steamer will be 350 ft. long, 54 ft. wide, and will have a capacity of 28 cars and 1,000 passengers.

Manitoba, Saskatchewan, Alberta, Etc.

Reports from Athabasca Landing, Alta., state that orders for over 50 York boats have been given to be constructed during the current season.

The number of steam and other vessels and boats engaged in the fisheries on Lake Winnipeg during 1905 was 924, of which 24 were tugs or other vessels. The total value of the fleet was $262,700, and the total number of men employed was 2,111.

A side-wheel steamer is under construction at Athabasca Landing, Alta., for Capt. Barber. The hull is 85 ft. over all, 23 ft. beam and of light draught. The engines and boilers have been built in Ontario, and will be carried to Edmonton by rail, and hauled by horses thence to the Landing. The steamer when completed will be taken to Lesser Slave Lake, and will go on a route between Moose Portage on the Lesser Slave River and the Hudson's Bay Co.'s post at Salt Creek.

The Winnipeg, Winnipegosis and Cumberland Steamship Co. operates steamers on Lake Winnipeg between Selkirk and Warren's Landing, 277 miles; between Winnipegosis and High Portage on Lake Winnipegosis; and between High Portage and Sturgeon River on the Saskatchewan River; a total distance of 355 miles. The steamers make connections with the C.P.R. at Selkirk, and with the Canadian Northern Ry. at Winnipegosis. The steamers employed on the service are: Cumberland—length, 85 ft.; breadth, 18 ft.; allowed to carry 30 passengers. Wolverine—length, 125 ft.; breadth 32 ft.; allowed to carry 500 passengers. Highlander—length, 76 ft.; breadth, 18½ ft.; allowed to carry 100 passengers. Lotta S.—length, 65 ft.; breadth, 14 ft.; allowed to carry 20 passengers. The company's general offices are at Chicago, J. K. McKenzie being General Manager, and J. E. Robinson Traffic Manager.

B.C. and Pacific Coast Marine.

The Nelson Board of Trade has written the Superintendent of the C.P.R. steamships in B.C., asking that the new steamer being built for the Nelson-Kootenay Landing run, be named City of Nelson instead of Kuskonook as had been previously suggested.

The sealing schooner Beatrice, which is now undergoing a refitting at Victoria, B.C., will be renamed Duchess of Bedford, and is expected to be completed early in May. The schooner was purchased by Capt. E. Mikkelsen, for use on his intended expedition into the polar regions.

The crew engaged in salving the German steamer Mariechen, which was stranded on the Alaskan coast at False Bay, expects to be able to get her afloat and taken to Esquimalt, B.C., by the beginning of May. The hull is not very much injured, and on its delivery in Esquimalt the salvors will get $37,500.

Dawson, Yukon, Transportation Co. is the title of a new company incorporated under the Dominion Companies' Act, with a capital of $25,000 and offices at Dawson, Yukon, to carry on a trading business in the Yukon Territory, and in connection therewith to purchase or construct steam or other vessels and to carry on a general navigation business. The provisional directors are J. H. and E. Holme, D. J. and Mrs. A. H. Langstaffe, W. M. Paynter, all of Dawson.

The Minister of Marine, replying to questions in the House of Commons recently, said the Government had called for tenders for the construction of a steamer for survey purposes on the Pacific coast, and had decided to charter a small steamer to carry on the work pending the construction of the new one. It was also proposed to extend the telegraph service on the coast, and to establish a wrecking plant there. The Government had made reciprocal arrangements with the U.S. to recognize each country's inspection of boilers and hulls, but he would seriously consider whether it would not be wise to require more rigid inspection of the U.S. vessels in Canadian waters. He

would look into the question of the fitness of the Government inspector of boilers and hulls on the Pacific coast.

The United States investigation into the loss of the str. Valencia off the coast of Vancouver Island, found that Capt. Johnson, the master, was responsible for the loss through faulty navigation, and he is censured for error in calculating the over-running of the log, and with failure to take soundings either soon enough or with sufficient frequency. The concluding paragraph of the report says: "The commission desires to emphasize as the primary and greatest cause of the loss of life the defective state of the aids to navigation and preservation of life in the shape of lighthouses, fog signals, life saving equipment and means of communication in the vicinity of the wreck." The Canadian Government has already taken steps to provide additional aids to navigation, telegraph lines, etc., on the coast, as a result of an independent inquiry its marine officers made into the loss of the vessel.

Among the Express Companies.

R. Helme, heretofore route agent at Nelson, B.C., has been appointed Superintendent of the Dominion Ex. Co.'s Pacific Division with headquarters at Vancouver.

The Dominion Parliament has under consideration a bill the object of which is to place express companies under the jurisdiction of the Board of Railway Commissioners.

H. B. White, formerly cashier Dominion Ex. Co., St. John, N.B., was placed under arrest April 4, to answer charges of forgery. According to the evidence of the acting agent, White is credited with having stolen in various ways $3,671.45 in 15 days.

R. B. Colwell, heretofore agent Dominion Ex. Co., Halifax N.S., has been appointed acting route agent for the territory east of Megantic, Que., with headquarters at Halifax. He is succeeded as agent there by W. A. Hart, heretofore in the company's Montreal office.

Representatives of the Canadian, Dominion, Maritime and American express companies which do business in Halifax, wait on the Laws and Privileges Committee of the City Council to protest against the proposed increase of the tax on express companies. After hearing the statement of the companies, the committee decided to recommend the fixing of a license of $100 for companies whose head office is in Nova Scotia, and $300 for companies with head offices elsewhere.

The Canadian Ex. Co. operates over the Intercolonial Ry., and its business is handled by the I.C.R. station agents. They are paid a commission on all the business handled, but they recently asked for an increase through a committee of the Order of Railroad Telegraphers. The company refused to treat with this committee, and an order was given that the agents would cease handling express matter for the company April 14. In accordance with notice previously given the Dominion Government railway station agents ceased handling Canadian Ex. business at midnight, Saturday, April 21, at such points as they represent the company. There are altogether 117 points on the I.C.R. and the Prince Edward Island Ry. affected by the strike, but the company's business on the Government railways has not been suspended as a result. H. C. Creighton, Superintendent Atlantic Division, stated that the company has its own agents, independent of station agents, in the larger places and at the smaller stations the agencies can be closed without material loss. It is proposed to close up a number of these agencies, but the company will open up independent agencies in all places where the business warrants it

Telegraph and Cable Matters.

The C.P.R. telegraph offices will now accept messages at night rates until 2 a.m., instead of midnight as heretofore.

The C.P.R. Telegraph Department has equipped its Montreal-North Bay line with a Phantoplex, by means of which as many as six messages may be sent over the same wire simultaneously.

The Marconi Wireless Telegraph Co. installed a telegraph apparatus on board the Dominion str. Montcalm before she left on a trip to give warning to incoming steamers as to the location of ice in the gulf of St. Lawrence.

The sale of the freehold of Fanning Island was announced to be made in the High Commissioner's Court, Fiji, April 17. Fanning Island is the mid-ocean station of the British Trans-Pacific cable between Vancouver Island, B.C., and New Zealand.

The C.P.R. Telegraph Department put into effect April 1 a regulation to the effect that the rate for all commercial news, stock reports, etc., will be $2.50 per week for 250 words or less, and ½c. for each additional word. This rate will not apply to customers heretofore taking C.N.D. reports. Should they discontinue the service at any time the above rates must be applied when they wish to resume.

The Dominion De Forest Wireless Telegraph Co. states that it successfully sent messages from its Manhattan Beach station to a station on the Irish Coast, 3,200 miles, Mar. 28. Of the 1,000 words sent out in various keys, 572 were said to have been received and recorded. On April 6, representatives of the company stated that messages were being regularly sent to Ireland, but that as the station was only equipped for sending, messages could not be received from Ireland. The company says its trans-Atlantic stations will be ready for public business in Nov.

The Anglo-American Telegraph Co. will, the St. John, Nfld., papers state, at an early date lift the cables at Placentia and "re-lay them to Come-by-Chance, at the head of Placentia Bay, whence they will be connected with the cables at Bull Arm, Trinity Bay, the repeating instruments at Placentia being located at St. Pierre in the future. Electrician Scotland removed these instruments and proceeded to St. Pierre in the tug St. Pierre; and the Placentia cable office, after having been open day and night for almost 40 years, is now reduced to the status of a local telegraph office, open from 9 to 9 only. The five operators working there will be removed to Heart's Content and St. Pierre."

The C.P.R. Telegraph Department, it is reported, will construct 610 miles of new pole lines and string 4,068 miles of wire along its railway system. Of the wire mileage 1,966 miles will be of copper wire. The new lines include the following: A copper wire from Montreal to Winnipeg, which will be worked duplex (two circuits). This will make four double circuits in use between these points. A copper wire from Montreal to Toronto, worked quadruplex (four circuits), will make four quadruplex wires (sixteen operators at each end) between these cities, in addition to railway and way wire. An iron wire from Montreal to Ottawa will be worked quadruplex, in addition to the one now in use, and a cable will be laid between Prescott, Ont., and Ogdensburg, N.Y., for the railway service.

The new arrangement of the C.P.R. and G.T.R. with the Canadian Transfer Co. for checking baggage to residences, hotels, etc., which has been in operation for some months at Montreal, Toronto and Hamilton, has been extended to Ottawa.

Relation of the Telegraph to the Railway.

In connection with the relation of the telegraph to the operating department, the telegraph may be said to constitute the great actuating and vital force in the operation of the railway. The great essentials for successful telegraph service are adequate wire and instrument equipment efficiently maintained and properly utilized. To provide adequate wire and instrument equipment, and to maintain the same efficiently, is the chief service performed by the telegraph for the operating department, but in this connection, I would observe that the telegraph department is directly responsible and accountable for such service only to the extent of the control by the telegraph department of the agencies necessary to secure such service. The agencies beyond the control of the telegraph department are to be found in the operating department itself and in the maintenance of way department, and unless there is active, intelligent co-operation on the part of these departments, the telegraph service cannot be efficient. Particular agencies in the operating department, whose services are indispensable in securing efficient telegraph service, are the train dispatchers, agents and operators. Interruptions occur from various causes, fire, flood, lightning, rock, snow and landslides, wind and sleet storms, train accidents, and from interference by workmen along the line by derricks, steam shovels, pile drivers, bridge gangs, etc. The first duty of the circuit managers (wire testers) when such interruptions occur is to provide a wire for the train dispatcher. Usually at such times, the train dispatcher will bestir himself to give assistance, but very often when he secures a wire he is no longer interested. Dispatchers, therefore, should lend every assistance when called upon by circuit managers. In cases where there may be trouble at more than one point covered by a lineman's beat during severe weather, and when night is likely to overtake the lineman before he can cover the ground, dispatchers should give orders to trains when at all possible to stop for linemen to make temporary repairs, which usually will only occupy a few minutes, and be the means of restoring communication quickly.

Again, in cases of severe trouble and when no trains may run for hours, a light engine is required and train dispatchers should be authorized to act promptly on request of the circuit managers to furnish same. In such case, the telegraph department would become responsible for any unnecessary use of light engines. There are dispatchers and dispatchers. I have known a dispatcher working one of the heaviest train sections, who could find the means, apparently with no delay to train movement, to render such assistance in the recovery of wires. Another dispatcher, working a different trick on the same train section, will curtly order the circuit manager off the wire if he endeavors to do business. In some instances dispatchers have undertaken to help themselves to wires, to order ground wires on and patches made at offices, without notification to the circuit managers, thus putting in more trouble which the circuit manager has to clear up, in addition to the original trouble. The telegraph department is responsible in this connection and the circuit managers should control the circuits. Agents and operators in many cases fail to do the needful. They fail to answer circuit manager's call for "wire," and when reported to their superintendent for such failure, they excuse themselves to their superintendent on the ground of attention to other work, and nothing is done. In very many cases agents and operators are unable to do switchboard work required by the circuit manager, notwithstanding a leaflet issued over a year ago giving full instructions with diagrams, and notwithstanding the fact that our inspectors are continuously travelling

inspecting offices and are available to post agents and operators on any points that may trouble them. With these diagrams and instructions, however, any intelligent operator, if he gives suitable attention to the subject, can qualify in a very short time, and I think, that such qualification should be made compulsory, and a time limit given within which they must qualify, evidence of such qualification to be a certificate from the inspector of telegraph, that they have been fully tested and found qualified. Telegraph service for the railway, exclusive of service in connection with the movement of trains, is also in the hands of the operating department, except at Montreal, Winnipeg, Calgary and Vancouver, where this work has been transferred to the telegraph department. It, therefore, rests very largely, if not entirely, with the operating department itself to see that this branch of the service is satisfactory.

There is urgent necessity that the use of the wires for railway service business be restricted. Many telegrams sent are entirely unnecessary, and in connection with matters that could be adjusted by train mail. Also many telegrams are sent that could be reduced in length, very often one-half. There is need of a rigorous censorship in this connection. Such censorship should be under the direction of someone in connection with the operating department or railway service, sufficiently familiar with all departments of the service to enable him to act intelligently.

I have now to direct your attention to a branch of the service where efficient service

is especially necessary, for the reason that any excuse for defective service is not accepted. I refer to telegraph service rendered by the company direct to the public, usually called "commercial business." Here again is a service which, particularly on Western lines, is largely, if not entirely, dependent upon the services of agencies controlled by the operating department, with the added difficulty that these agencies are compelled to give preference to telegraph service for the operating department in connection with the movement of trains. In other words, if we have defective service in connection with our own telegraph service, as applied to railway operation, we have increased difficulty in giving a satisfactory service to the public. Seventy-five per cent. of the business handled for the public on Western lines, is handled through the railway stations. Defective service in connection with the company's own interests is a matter of domestic concern, but service for the public is a very different proposition. The public does not discriminate between departments. The company operates a telegraph system through Canada, from ocean to ocean, connecting at each end with cable service across both oceans, and advertises the fact extensively in its various publications, so that the public have now come to consider that they should obtain better telegraph service along the line of the C.P.R. than along any other railway system. The company's transcontinental passengers look upon its telegraph service as a very great convenience, not given by other transcontinental systems which do not control the commercial telegraph service. The reputation of the company, therefore, is at stake in this matter and in the same sense as defective service in connection with freight, passenger, dining, sleeping car or other services would be criticized. I am aware that our superintendents and other operating officers very often are not impressed with the importance of this service because of their knowledge that the revenue at many stations is small in comparison with the freight and passenger receipts, but in the aggregate it affords a very important source of revenue to the company. A joint circular was issued over a year ago by the Superintendent of Transportation and myself, approved by the Second Vice-President, defining the duties of dispatchers, circuit managers, agents, operators and conductors in connection with telegraph service. These instructions, which have been closely followed up by personal and continued personal supervision by Superintendents and inspectors, have had a very salutary effect. Since these instructions were issued, there has been a noticeable improvement in the service, but nevertheless agents are disposed to regard commercial service as a side issue, the same as express, and Superintendents are not inclined to reprimand agents for neglect of commercial service especially if other station work is properly attended to. There is perhaps a feeling that the importance of public service in connection with telegrams is overestimated. I wish to say most emphatically that a telegram is an emergent communication, and the company having undertaken a public service must perform such service satisfactorily. I wish to emphasize the importance of Superintendents co-operating with the telegraph department to insure that instructions contained in the special circular are strictly observed by all employes handling commercial telegrams.

Nearly 2,000,000 paying telegrams were handled at Western Lines offices in 1905. Between 1900 and 1905, telegraph earnings increased 114%.

Present wire facilities seem adequate, and with additions to be made this year will be fully adequate. In the construction and maintenance of lines, we are fully abreast of the times. In the electrical branch and in operation, our methods are also up-to-date, our instruments and apparatus generally being of the latest and best type. The old Callaud or gravity battery, which has been a faithful friend of the telegraph, is now being largely displaced by storage battery, both for main batteries and for local batteries where suitable current from power plants is available, and with very beneficial results. The method of conducting wires into stations by means of aerial cable has been largely adopted, over 100 offices on Western Lines having been thus equipped.

[Extracted from paper read by B. S. Jenkins, General Superintendent Telegraphs, Western Lines, C.P.R., read at Officials' Conference, Field, B.C.]

General Telephone Matters.

The Bell Telephone Co. has completed a telephone line between St. Thomas and Port Stanley, Ont.

The Eastern Telephone Co. has started the construction of a new line from Sydney to Broughton, N.S.

The residents of Byron, Ont., have arranged to construct a line to connect with the Bell Telephone Co.'s lines.

A telephone line is under construction from Dinorwic, Ont., to a number of gold mining camps in the vicinity.

The Buctouche Telephone Co. has been incorporated by an act passed at the recent session of the New Brunswick Legislature.

The Bell Telephone Co. proposes to construct a line between Calgary and Lethbridge, Alta., and to lay a number of miles of underground cables in Calgary during the summer.

The Fort William, Ont., Town Council has decided to construct a building for its telephone lines. The operating room will be constructed so as to have a capacity for 17 sections of switch boards, or about 5,000 lines.

The New Brunswick Telephone Co. has decided to go ahead with the construction of the loop to St. John via Fredericton Jct., and the line to Canterbury, as well as the carrying out of some minor betterments on its lines.

The Bell Telephone Memorial Association has been incorporated by the Ontario Legislature, for the purpose of erecting a suitable memorial perpetrating the memory of A. Graham Bell, the inventor of the telephone. The association has its office at Brantford, Ont., and its Secretary is Geo. Hately.

The Yarmouth Telephone Co., which is carrying on business in Yarmouth, N.S., has been granted a charter of incorporation by the Nova Scotia Legislature. It is authorized to carry on a telephone business throughout Yarmouth county, and to connect its lines with those of other telephone systems.

The G.T.R. is arranging for the construction of telephone lines over its entire system. The central exchange will be in the general office of the company at Montreal, and the main trunk lines will extend to Portland, Me., in the east, and Chicago, Ill., in the west. The lines will be used entirely for the company's business.

The Welland County Telephone Co. has been incorporated under the Ontario Companies' Act, with a capital of $40,000 and offices at Stevensville, Ont., to carry on a general telephone business throughout the county of Welland. The provisional directors are: J. Pierson, C. E. Sauer, S. H. Tripp, P. A. Storm, T. Glenny and W. Robinson.

The Low Bank Telephone Co. has been incorporated under the Ontario Companies' Act, with offices at Lowbanks, Ont., and a capital of $40,000, to construct telephone lines and to carry on a general telephone business in Wainfleet and Humberstone tps., Welland County; and Sherbrook, Moulton and Dunn tps., in Haldimand County. The provisional directors are: A. Barrick, J. E. Furry, A. Mann, all of Moulton tp.

The Independent Long Distance Telephone Co. is applying at the current session of the Ontario Legislature, for an act of incorporation, authorizing it to construct telephone lines, make agreements with individuals,

Toronto, Canada.

municipalities, or the Provincial Government, for the construction of telephone lines, and to engage in the manufacture of telephone apparatus and materials. C. Duff Scott, solicitor, Toronto, is acting for the applicants.

The accounts of the corporation of Port Arthur, Ont., from Jan. 1 to Dec. 15, 1905, show telephone receipts of $8,571.71, of which $3,714.85 was from commercial subscribers and $4,504.51 from private subscribers, the balance being miscellaneous receipts. After meeting all charges for superintendence, operation, maintenance, rent of office, interest on debentures, etc., and $400 on account of depreciation, there remained a balance of $2,301.10. The total debt incurred for the system is $38,582.92, of which $18,000 is represented by the building which had not been handed over to the council. The system is carried as an asset of the value of $26,237.63.

The Charlottetown, P.E.I., Board of Trade sent a deputation to the Provincial Government recently to ask that in considering an application of the Telephone Co. of P.E.I., for an extension of franchise and additional powers, provision be made in the act for a direct main line from Charlottetown to Summerside, and lines to East Point and West Cape; the removal of the exchanges from country stores to more private places; a reduction of tolls and rents, and cheaper telephones for country places. The bill provides for a line to Summerside and a franchise for 10 years with freedom from taxation. An amendment reducing the franchise to five years was defeated in committee, April 12.

With the exception of the three eastern maritime provinces the question of the municipal ownership of telephone lines has been under consideration by the various legislatures during the sessions of 1905. Manitoba came first by passing the acts of which summaries were given in our April issue, and bills drawn in almost identical terms are being discussed in the legislatures of Alberta and Saskatchewan. In British Columbia an act has been passed giving persons, associations or companies operating a telephone line the right to connect with the lines of any public telephone company; providing for the reception of messages from connecting lines, and for the fixing of the rates for such services, either by the Governor-in-Council, or municipal corporations, and for the approval of the rates to be charged by public companies. In Ontario, a bill is under consideration by the Legislature, empowering municipal councils to provide for the establishment and maintenance of a local telephone system at the expense of subscribers, the system to be vested in the corporation in trust for the subscribers. The lines to be constructed and the instruments installed are to be of a standard to be fixed by the Government; municipalities will have power to agree with each other as to connections, and to arrange with the Postmaster-General to establish exchanges in post offices upon terms. This bill, while introduced by Hon. A. Beck, is not a Government measure. An amendment to the Railway Act, 1903, is under consideration by the Dominion Parliament, which will have the effect of bringing telephone companies under the jurisdiction and control of the Board of Railway Commissioners, providing for the control of rates, the interchange of business between different companies and for direct oral communication.

C.P.R. Buildings at Winnipeg.

The group of buildings now nearing completion at Winnipeg for the C.P.R., which have been under construction for somewhat less than two years, comprises three distinct buildings, all connected, covering an area of 663 x 235 ft., and varying in height from the eight story hotel to the five story office wing, and six story station.

The station occupies a site facing south on the corner of Higgins Ave. and Maple St. One enters through an open portico 55 ft. wide and 40 ft. high, supported by four herculean columns of cut Tyndall stone. The vestibule is 56 x 24 ft. opening through to the main waiting room, 96 x 103 ft., with three vestibule entrances giving access to the train shed in rear. To the west of this room is an entrance for those with baggage to be checked, which is deposited on the baggage counter near by and a ticket purchased across the passage. One can thus attend to all the details of this matter without losing sight of one's luggage. A ladies' waiting room is located at the south-west corner of the waiting room; it is 36 x 44 ft., and off it opens a retiring room and lavatory. On the south-east corner, and of similar size, is the men's smoking room, with lavatory and boot cleaning conveniences. To the east side of the waiting room and facing on Maple St. is located the cafe, lunch room and kitchen, large spacious rooms with pleasant outlooks. At the northwest corner of the main waiting room are bunched together the usual conveniences, such as a parcel and news stand, baggage transfer, telephone and telegraph offices, and a room for conductors. The waiting room is one of the most impressive of the rooms, extending through three stories in height, and being covered with a segmental glass roof, which, together with the windows to the north and south, flood the room with daylight. The floor is of mosaic, the wood-work of dark stained British Columbia fir and oak, the enriched capitals, frieze and other decorative members are treated in toned golden glazes, which with the soft, rich green on the walls and the appropriate stained oak furniture, make a most impressive and restful room. Under the waiting room, and by a separate entrance leading from the train shed, is a large waiting room and lunch room for second-class passengers, a dining room for employes and other storage rooms On the first floor are the Land Department's offices facing on Higgins Ave. and Maple St., 131 x 41 ft., with spacious fireproof vaults for documents and plans. The Second Vice-President and staff, and the officials of the various departments are given spacious accommodation on the three upper floors, and when it is mentioned that the corridors giving access to the rooms located on each side are over 2,000 ft. long, some idea of the immense magnitude of the office space required may be conceived. Every room has the best of daylight, the rooms being of a depth of from 24 x 30 ft., with male and female lavatory accommodation on each floor, and ample storage vault space. The access to the offices is by two spacious stairways and by an electric elevator opening off the main vestibule of the station. The offices extend over the baggage and express rooms, which form the connection between the station and hotel buildings. Ample provision is made for the Customs officers and a bonded baggage room for the mails, news, dining and sleeping car supply and storage rooms, porters' room, linen rooms and refrigeration and wine rooms for the dining cars.

E. H. FITZHUGH,
Third Vice-President Grand Trunk Ry.

The traveller, in approaching the hotel, obtains access by the main double entrance on Higgins Ave., or by a spacious corridor that leads directly off the station platform. By the former, protected by an artistic marquise of wrought iron and glass, extending from the street curb to the wall, one enters by two revolving doors into a spacious entry and the main rotunda, to the right of which opens a ladies' reception room, 18 x 21 ft., with a high vaulted ceiling. This room is in the Empire period, finished in white enamel with delicate and refined details of the period. The rotunda is a magnificent room, 132 x 180 ft., facing on two streets and affording a view the whole length of Main St. from the corner windows. This room has a portion divided off for a reading room and for a smoking room, luxuriously fitted up with a marble and carved oak mantel. Immediately opposite the entrance is the hotel office, where is located the cashier's box, the telephone system in communication with every room and office in the buildings, a telegraph office, manager's office, cloak and parcel office, etc. Two swift passenger elevators are between the entrance and the office, giving quick service to the basement and the six bedroom floors above. In addition there are three service elevators suitably located. The main staircase ascends near the elevators and is a spacious marble construction, 8 ft. wide.

The main dining room, 50 x 125 ft., is located at the corner of Higgins Ave. and the large square on which the station faces. It is doubtful if a more magnificent or better proportioned room will be found than this; the wealth of interesting detail lends a charm that will retain a lasting and pleasing impression on the observer. The ceiling is richly coffered with deep beams supported by panelled oak pilasters at each end, with glazed and decorated golden caps. In the centre of the east wall, on the axial line of the entrance to the room, and visible from the far side of the rotunda, is a large carved oak and marble mantelpiece. On the west wall is a similar imposing carved oak entrance doorway extending to the cornice, into which are framed three Della Robia panels. At the service, or north end of the room, is a musicians' gallery, beneath which are placed the approaches to the kitchen.

In the north of the rotunda, and facing on the large open central court of the hotel is the cafe, 46 x 70 ft., covered by a segmental vaulted ceiling. The wainscoting in quartered oak is carried 8 ft. above the floor. Above this is a richly decorated frieze extending to the main cornice from which the ceiling springs. The detail of this room is strikingly original and more liberty has been taken in its development than in the more formal rooms; the ceiling is

Galena-Signal Oil Company,

Franklin, Pa., and Toronto, Ont.

Sole manufacturers of the celebrated GALENA COACH, ENGINE and CAR OILS, and SIBLEY'S PERFECTION VALVE and SIGNAL OILS.

GUARANTEE COST per thousand miles for from one to five years, when conditions warrant it.

Maintain EXPERT DEPARTMENT, which is an organization of skilled railway mechanics of wide and varied experience. Services of Experts furnished free of charge to patrons interested in the economical use of oils.

STREET RAILWAY LUBRICATION A SPECIALTY.

GALENA RAILWAY SAFETY OIL

Made especially for use in Headlights, Cab, Classification and Tail-lights, and for Switch and Semaphore Lamps. Burns equally well with the long time as with the one day burner, with or without chimney, as the burner requires.

Is pure water white in color; high fire test; low cold test, and splendid gravity.

Please write to home office for further particulars.

CHARLES MILLER,

PRESIDENT.

filled with pale amber glass down the centre which, with the windows, provides a quiet toned light that is restful. To the north of the reading-room is located the bar room, 48 x 50 ft., a most unique and unconventional room that recalls the chateaux of the Tyrolean Alps, in its deep-toned oak, huge swinging crane, electric fixtures, the leaded glass windows of luxuriant grape vines, the dark-red waxed tile floor, and the impressionistic and beautiful mural paintings by Mr. Beau of Montreal. Off this room, a few steps down, is a large room that will be used as a grill room, and conveniently located near by are the barber shop, wine cellars, ladies' hairdressing rooms, bathrooms, lavatory, baggage room, baggage storeroom, elevator machinery, etc.

The kitchen department is most complete, the kitchen being 75 x 50 ft., and 20 ft. high, fitted in the most complete manner with all the necessary departments incidental to a hotel to accommodate 500 people. The floors are of mosaic, the walls of enamel, and all the details so perfectly arranged that service to all parts of the house is immediately at hand. A waiter, in filling an order, walks in at one door and from one department to another, covering a circular course, and walks out at another with his order filled. Everything is here simplified and systematized, under the eye of the chef or steward. A feature is the employes' accommodation, consisting of large airy bedrooms, lavatories, baths and laundry, recreation rooms, dining rooms, male and female, each separated and with separate entrances; staff and officers' dining rooms, children's and nurses' dining rooms, all served conveniently from the central kitchen and offices.

On the first floor the drawing room, 50 x 65 ft., is at the principal corner. Here is an ideal ladies' room in white enamel finish, with golden-colored Italian silk on the walls, and a dainty but imposing mantel piece. The style of the room is Louis XVI., the furniture in Italian walnut of sumptuous design. On the corresponding front corner and over the main dining room is the breakfast room, 50 x 65 ft., finished in a simple and pleasing colonial style, with warm, yellow walls and white woodwork. Placed between the drawing room and breakfast room, on the Higgins Ave. front, is a vice-regal suite, consisting of a Pompeiian salon, 16 x 29 ft., in the quiet, refined spirit of this style; next a private dining room, and ante-room, 42 x 20 ft., with service rooms off it; then two spacious bedrooms with dressing and bathrooms, ante-rooms, etc. The whole is screened off from the rest of the hotel, but so arranged that it can be thrown open and form part of it. On the opposite side of the hall is the guests' billiard room, 61 x 20 ft., with two tables, where ladies may with propriety handle the cue. The balance of the 1st, and the whole of the 2nd, 3rd, 4th, 5th, and 6th floors are given up to bedrooms, totalling over 300, and off practically every room opens a private bathroom, while a recessed porcelain basin and large clothes closet is in each room.

The finish throughout is of the best, the construction is as fireproof as steel, terra cotta, brick and concrete can make it, and the aim has been to provide an hotel where a lady, even if travelling alone, may make use of all the public rooms and still feel at home. A telephone is in each room, electric lights on the dressing table as well as besides one's bed, heat regulation is installed, the vacuum system of cleaning every room and corridor throughout is installed, and no New York or London hotel of the best class will excel the conveniences and accommodation herein provided with thoughtful care. The excellent taste displayed in the furnishings and decorations of the company's system of hotels has been here excelled. Everywhere an air of refinement, harmony in color, delicacy of treatment of detail in the style most appropriate to the room or article undertaken are everywhere evident.

The design of the buildings, and the execution of all the details, have been carried out by Edward & W. S. Maxwell, architects, Montreal. The contractors are P. Lyall & Sons, of Montreal.

CANADIAN PACIFIC RY.'S ROYAL ALEXANDRA HOTEL, AND STATION AT WINNIPEG, MAN.

Canadian Car Service Bureau, etc.—Referring to the item on this subject in our May issue, pg. 259. At a special meeting of the Canadian Freight Association Western Lines, held at Winnipeg, April 30, it was decided not to make any change in the existing organization, and the car service and freight inspection bureau will be continued as heretofore, under the management of H. R. Patriarche, with jurisdiction on the main line of the C.P.R. from Port Arthur, Ont., to Laggan, B.C., and on the Crow's Nest Pass branch west to Crow's Nest, B.C.

Free Scholarships in McGill University.

Sir Thos. G. Shaughnessy, President C.P.R., has issued the following circular: Two free scholarships covering four years' tuition in the Faculty of Applied Science of McGill University are offered, subject to competitive examinations, to apprentices and other employes of the company, under 21 years of age, and to minor sons of employes. The competitive examinations, which will be the regular entrance matriculation examination provided for in the annual calendar of the University, will be held under the supervision of the Faculty of Applied Science at the University, beginning June 12. The two candidates making the highest average and complying with the requirements of admission will be awarded the scholarships and have the option of taking a course in any Department of the Faculty of Applied Science. Scholarships will be renewed from year to year only upon the holders thereof passing satisfactorily the sessional and other examinations prescribed by the Faculty. Applications for certificates entitling eligible persons to enter the competition should be addressed to E. Alexander, office of the President, Montreal. Copies of the annual calendar containing the conditions of admission and announcement of courses may be obtained upon application to J. A. Nicholson, Registrar, McGill University, Montreal. The college will reopen for the session of 1906-07 on September 19.

Canadian Railway Club.—At the annual meeting held in Montreal, May 1, the following officers were elected for the current year: President, W. E. Fowler; Vice-President, W. D. Robb; Second Vice-President, L. R. Johnson; Executive Committee: T. McHattie, S. King, H. H. Vaughan, A. A. Maver, W. N. Dietrich, C. Manning, J. H. Callaghan. Audit Committee: A. A. Goodchild, J. F. Reynett, P. R. Diamond. The club has now a membership of over 400, and its financial condition is very satisfactory.

The Canadian Pacific Despatch has removed its offices in Boston, Mass., to 33 Broad Street.

The Rutland Road's city ticket office in Montreal has been removed from 141 to 130 St. James St., where T. M. Fallon, City Passenger Agent, will have his headquarters.

Notes to Steam Railway Statistics.

(1) The Alberta Ry. and Irrigation Co. took over the Alberta Ry. and Coal Co., and the St. Mary's River Ry. from Oct. 1, 1904. The mileage given, 113.72, includes the A. Ry. and C. Co.'s line, 66.72 miles, and the St. M. R. Ry., 47 miles, and the figures in the other columns give the combined earnings for nine months from Oct. 1, 1904, to June 30, 1905; the operations of the two companies for the three months from July 1 to Sept. 30, 1904, being given separately under the old names.

(2) The Atlantic and Lake Superior Ry. mileage of 100 is the Baie des Chaleurs Ry. which is being operated by the bondholders. The Great Eastern Ry., 23 miles, and the Ottawa Valley Ry., 7 miles, are not under traffic.

(3) The Bay of Quinte Ry. includes the Kingston, Napanee and Western Ry.

(4) The Bedlington and Nelson Ry. has running powers over the C.P.R. from Creston Jct., to Sirdar Jct., B.C., 8.67 miles. It is operated in the interests of the Great Northern Ry. (U.S.).

(5) The figures given for the Beersville Coal and Ry. Co.'s line are for six months from Jan. 1, 1905.

(6) The Canada Atlantic Ry. mileage includes the Ottawa, Arnprior and Parry Sound Ry., 400.30 miles, and the leased lines: Central Counties Ry., 37.40 miles; Pembroke Southern Ry., 20.90 miles.

(7) The Canada Southern Ry. mileage includes its leased lines: Sarnia, Chatham and Erie Ry., 7.00 miles, and the Leamington and St. Clair Ry., 15.95 miles. It has 149.34 miles of double track. The C. S. Ry. is controlled by the Michigan Central Rd., one of the New York Central and Hudson River Rd. lines.

(8) The Canadian Government line, the I.C.R., includes the Canada Eastern Ry., the Fredericton and St. Mary's Ry. Bridge Co., and the Drummond County Ry., but does not include the Windsor branch, 32 miles, which is leased to the Dominion Atlantic Ry. It has also running powers over the G.T.R. from Point Levis to Hadlow, Que., 1.50 miles; from Chaudiere Curve to Chaudiere, Que., 1.18 miles; from St. Rosalie Jct. to Montreal, 37.62 miles; total 40.30 miles.

(9) The Canadian Northern Ry. mileage includes the lines leased from the Manitoba Government, viz.: Northern Pacific and Manitoba Ry., and Portage and Western Ry., 354.65 miles; together with the Winnipeg Great Northern Ry., 40 miles; Port Arthur, Duluth and Western Ry., 85 miles; Manitoba and South-Eastern Ry., 107.90 miles; Lake Manitoba Ry., and Canal Co.'s line, 125 miles; Ontario and Rainy River Ry., 164 miles. It also operates 56 miles of line in Minnesota, which connects the O. and R.R.Ry. with the M.S. Ry. The figures given refer to the operations of the Canadian lines only.

(10) The C.P.R. mileage includes lines owned, 5,095.50 miles; leased lines: Atlantic and North-west Ry. 201.40 miles; British Columbia Southern Ry., 20.40 miles; Calgary and Edmonton Ry., 296.20 miles; Cap de la Madeleine Ry., 2.30 miles; Columbia and Kootenay Ry., 59.50 miles; Columbia and Western Ry., 157.10 miles; Credit Valley Ry., 175.70 miles; Fredericton Ry., 22.10 miles; Great North-west Central Ry., 111.70 miles; Guelph Jct. Ry., 15 miles; Kootenay and Arrowhead Ry., 33.20 miles; Lindsay, Bobcaygeon and Pontypool Ry., 38.70 miles; Manitoba Southwestern Colonization Ry., 215.70 miles; Manitoba and Northwestern Ry., 294.60 miles; Montreal and Ottawa Ry., 93.50 miles; Montreal and Lake Maskinonge Ry., 11 miles; Nakusp and Slocan Ry., 36.50 miles; New Brunswick Ry., 174.60 miles; New Brunswick and Canada Ry., 117.60 miles; Northern Colonization Ry., 23.50 miles; Ontario and Quebec Ry., 473.20 miles; Ottawa, Northern and Western Ry., 158.70 miles; Shuswap and Okanagan Ry., 50.80 miles; St. John Bridge and Ry. Extension, 2 miles; St. John and Maine Ry., 91.80 miles; St. Lawrence and Ottawa, 58.30 miles; St. Stephen and Milltown Ry., 4.60 miles; Tobique Valley Ry., 27.50 miles; Toronto, Grey and Bruce Ry., 189.10 miles; Toronto, Hamilton and Buffalo Ry., 2.70 miles; West Ontario Pacific Ry., 26.60 miles; Vancouver and Lulu Island Ry., 16.90 miles. It has running rights over the G.T.R. from Toronto to Hamilton Jct., 35.80 miles; and over the Canada Atlantic Ry. from Montreal and Ottawa Jct. to Ottawa, 0.90 miles; total 36.70 miles. The Ottawa, Northern and Western Ry. has running powers over 2.50 miles of the Hull Electric Ry. The C.P.R. has 35.70 miles of double track.

(11) The Caraquet Ry. also operates the Gulf Shore Ry., 16.78 miles.

(12) The Carillon and Grenville Ry. is operated during the summer only in connection with the steamers of the Ottawa Navigation Co.

(13) The Central Ontario Ry. mileage includes the Marmora Ry. and Mining Co.'s line, formerly the Ontario, Belmont and Northern Ry., 9.60 miles.

(14) The Dominion Atlantic Ry. mileage includes the Windsor and Annapolis Ry., 87.50 miles; Cornwallis Valley Ry., 14 miles; Yarmouth and Annapolis Ry., formerly Western Counties Ry., 87 miles; Windsor branch, leased from the Intercolonial Ry., 32 miles. It has also running powers over the I.C.R. from Windsor Jct. to Halifax, 14 miles.

(15) The Edmonton, Yukon and Pacific Ry. has running rights over the Calgary and Edmonton Ry. from Strathcona Jct. to Strathcona, Alta., one mile.

(16) The G.T.R. mileage includes the following lines: G.T.R., 883.35 miles; Great Western Ry., 561.80 miles; Brantford, Norfolk and Port Burwell Ry., 34.39 miles Buffalo and Lake Huron Ry., 160.30 miles; G.T., Georgian Bay and Lake Erie Ry., 175.62 miles; Owen Sound branch, 12.40 miles; London, Huron and Bruce Ry., 68 miles; Waterloo Jct. Ry., 10.25 miles; South Norfolk Ry., 17 miles; Wellington, Grey and Bruce Ry., 168.18 miles; Northern Ry., 163.07 miles; North Simcoe Ry., 33 miles; Hamilton and Northwestern Ry., 172.23 miles; Northern Pacific Ry., 115.43 miles; Grand Jct. Ry., 85.54 miles; Toronto and Nipissing Ry., 85 miles; Lake Simcoe Jct., Ry., 26 miles; Victoria Jct. Ry., 53 miles; Whitby, Port Perry and Lindsay Ry., 46 miles; Jacques Cartier Union Ry., 6.50 miles; Montreal and Champlain Jct. Ry., 6.28 miles. It has running powers over the Chaudiere branch of the Intercolonial Ry., 5.77 miles. It also operates the Magnetawan Ry., 1.91 miles. It has 561.50 miles of double track.

(17) The Great Northern Ry. of Canada mileage includes the Lower Laurentian Ry., and Montreal and Gatineau Colonization Ry., and it also operates the Chateauguay and Northern Ry., 36.20 miles.

(18) The Halifax and South-Western Ry. includes the old Nova Scotia Central Ry.

"HART" CONVERTIBLE CARS

WILL ACCOMPLISH A SAVING OF FROM $200.00 TO $400.00 PER MILE

Hart Convertible Car
As a Centre Dump Hopper Car

THREE CARS IN ONE
Construction, Ballast and General Freight

Hart Convertible Car
As a Side Dump Level Floor Car

These Cars are built in various sizes and in relatively light weights. Thousands in daily service have proven their great economy and practicability. Built of 30 to 60 Tons Capacity and of either Wood or Steel.

"NATIONAL TYPE" BOTTOM DROP DOOR

COAL AND ORE CARS

Supplied in all Wood, Composite or all Steel

Cut of National Type Car with Doors Open

Entire bottom dropping—including over the trucks—does away with all shovelling—operated by worm and gear from end of cars by hand wheels as shown in cut.

APPLICABLE TO GONDOLA

BOX, STOCK AND COKE CARS

Cut of National Type Car with Doors Closed

National Type Car with Bottom Open

SIMPLE MECHANISM—FREE FROM CHAINS

WRITE FOR ILLUSTRATED DESCRIPTIVE BOOKLET.

the Nova Scotia Southern Ry. The earnings, etc., include also those of the Halifax and Yarmouth Ry., which was taken over May 25, 1905. The H. and Y. Ry. earnings for the period from July 1, 1904, to May 25, 1905, are given separately.

(19) The Hereford Ry. mileage includes the Dominion Lime Co.'s line. It is operated by the Maine Central Rd.

(20) The Kent Northern Ry. mileage includes the St. Louis and Richibucto Ry., 7 miles.

(21) The Lake Erie and Detroit River Ry. mileage includes the Erie and Huron Ry., 199.41 miles; and the leased line, London and Port Stanley Ry., 24 miles. The line is owned by the Pere Marquette Rd.

(22) The Massawippi Valley Ry. has running powers over the G.T.R. from Lennoxville to Sherbrooke, Que., 2.95 miles. The M.V. Ry. is leased to the Boston and Maine Rd.

(23) The Montreal and Atlantic Ry., formerly the South-Eastern Ry., mileage includes also the Lake Champlain and St. Lawrence Jct. Ry., 60.50 miles. On the old South-Eastern Ry. there are 5.50 miles of double track. It is operated by the C.P.R.

(24) The Montreal and Province Line (formerly the Montreal Province and Boston Ry.), the Montreal and Vermont Jct. and the Stanstead, Shefford and Chambly Ry., are leased to the Central Vermont Ry., which is controlled by the G.T.R.

(25) The Nelson and Fort Sheppard Ry. has running powers over the C.P.R. from Five Mile Point to Nelson, B.C., 4.76 miles. It is operated in the interests of the Great Northern Ry. (U.S.).

(26) The New Westminster Southern Ry.; The Red Mountain Ry.; Vancouver, Victoria and Eastern Ry.; Victoria Terminal Ry., and Ferry Co., and Victoria and Sidney Ry., are operated by, or in the interests of, the Great Northern Ry. (U.S.).

(27) The Ottawa and New York Ry. is owned by the New York Central and Hudson River Rd.

(28) The Quebec Central Ry. has running powers over the Intercolonial Ry. from Harlaka Jct. to Levis, Que., 5 miles.

(29) The Quebec Ry., Light and Power Co. operates what was formerly known as the Quebec, Montmorency and Charlevoix Ry. as a steam and electric railway. The returns here given are for the operation of the line by steam.

(30) The Rutland and Noyan Ry. is operated by the Rutland Rd., which is owned by the New York Central and Hudson River Rd.

(31) The earnings of the St. Clair Tunnel are from tolls on vehicles hauled through the tunnel.

(32) The St. Lawrence and Adirondack Ry. has running powers over the G.T.R. from Valleyfield to Beauharnois, Que., 13.30 miles; and over the C.P.R. from Adirondack Jct. to Montreal, 8.70 miles. It is operated by the New York Central and Hudson River Rd.

(33) The Toronto, Hamilton and Buffalo Ry. has 4.69 miles of double track. It is owned by the New York Central and Hudson River Rd., and the C.P R.

(34) The returns of the Vancouver, Westminster and Yukon Ry. are for a portion of the year only, from Aug. 22, 1904, to June 30, 1905. It is operated in the interests of the Great Northern Ry. (U.S.).

*The returns given for the B.M. and A. Ry. are for 1903-04, the line not being in operation during the whole of 1904-05. The Quebec Southern Ry. comprises the United Counties Ry., the East Richelieu Valley Ry., and the South Shore Ry. It has been operated by a Receiver, and no reports have been received by the Department since the year ended June 30, 1903. As the returns for these two lines are not for the year ended June 30, 1905, the totals are incorrect to that extent.

Quebec and Lake St. John Railway.

The annual meeting was held in Quebec, May 10. Following are extracts from the report: The number of passengers carried during the year on the whole system was 301,725, and the number of tons of freight 345,001. In the previous year the figures were 266,459 passengers, and 321,391 tons of freight. The freight consisted of the following no. of cars, 1,814 cordwood, 3,104 pulpwood, 4,101 sawn lumber, 505 square timber, 459 ties, 67 logs and poles, 1,625 pulp and paper, 128 brick and stone, 66 cheese, 264 grain, 5,166 general merchandise; total 17,299 cars, weighing 345,001 tons. One of the surest tests of the progress of the district traversed by the railway is the rapid development of the dairy industry. Last year the railway transported 3,041,011 lbs. of cheese as compared with 2,693,577 in the previous year. The value of cheese and butter manufactured in the district last year is estimated at $700,000.

The construction of the branch line to La Tuque has been carried on by contractor Paquet, with a large force, since the date of the previous annual meeting, and without any interruption during the winter. The work is proving more costly than was estimated, owing to the material in a number of the cuttings proving to be rock instead of earth and gravel. Nevertheless, it is expected that this branch will be completed by the end of Sept., or at least sufficiently near completion to carry the traffic which will then be available. It is expected that this will be considerable, because the first division of the new Transcontinental railway, which will touch La Tuque from another direction, has been placed under contract, and our new branch will be the most rapid and economical means of transportation for the men and materials required for their work. Negotiations are in progress for the development of the great water power at La Tuque, and several large industries at this point are now under consideration. The construction of the branch line from Valcartier to Gosford has been completed for 4¼ miles, to a point where a considerable traffic in timber, pulpwood and cordwood is already available. The right of way has been secured for the short branch through Roberval to the Government wharf on Lake St. John, and the line will be built as soon as a subsidy contract has been executed with the Government.

The proceeds of the issue of £150,000 of prior lien bonds are being expended—in addition to building the branches above referred to—upon betterments on the main line. The mileage between Roberval, Lake Bouchette and Chicoutimi has been entirely reballasted and embankments widened. New locomotive houses have been built at Lake Edward and Chicoutimi, the new bridge over the Rat river at Chicoutimi has been completed, and the wooden bridges at Lake Bouchette and Rondeau River have been rebuilt in steel and masonry. The dock accommodation at Quebec is proving insufficient, and we are now building a dock 700 ft. long at our Quebec terminus, suitable for canal boats and other light draught vessels.

The pulp and cardboard mills at Chicoutimi, Jonquieres, Ouiatchouan, Peribonca and St. Raymond, continue to give the railway a large business. A paper mill is being built at St. Raymond, a sulphite mill at Jonquieres, and large new sawmills at St. Raymond, and Riviere à Pierre. The Metabetchouan Pulp Co. has been reorganized and it is hoped that this industry will now be carried out.

The increased cost of the branch to La Tuque and the need of more rolling stock and other betterments have made it necessary to issue the remaining £150,000 of authorized prior lien 4% bonds rather sooner than had been intended. Consequently meetings of the bondholders were called in London in Feb. last, and after explanations by the London agents of the company, Coates Son & Co., and by the General Manager, who was sent from Canada to attend the meetings, the issue of the remaining bonds was unanimously agreed to.

The colonization movement to the Lake St. John country has continued to progress, and 2,516 new settlers and their effects were carried into the district during the year; 980 of these came from the U.S.

The directors and officers elected for the current year are: President, G. Le Moine; Vice-Presidents, W. Hanson, J. T. Ross; other directors, T. A. Piddington, Hon. J. Tessier, C. A. Hanson, E. Beaudet, F. W. Ross, H. J. Beemer, E. Hanson. The non-elective directors are the Mayor of Quebec, Judge Gagne representing Chicoutimi, and G. Tanguay representing the Quebec Government.

June Birthdays.

Many happy returns of the day to—

Harry Abbott, President Vancouver and Lulu Island Ry., ex-General Superintendent C.P.R., Vancouver, B.C., born at Abbotsford, Que., June 14, 1829.

Jas. Anderson, Manager Sandwich, Windsor and Amherstburg Ry., Windsor, Ont., born at Ayr, Ont., June 20, 1851.

F. F. Backus, General Freight and Passenger Agent Toronto, Hamilton and Buffalo Ry., Hamilton, Ont., born at Rochester, N.Y., June 4, 1860.

Archer Baker, European Manager C.P.R., London, Eng., born at York, Eng., June 21, 1845.

F. P. Brady, General Superintendent Lake Superior Division C.P.R., North Bay, Ont., born at Haverhill, N.H., June 22, 1853.

A. H. N. Bruce, C.E., Assistant Chief Engineer Toronto and Hamilton Ry., Toronto, born at Ballyscullion, County Derry, Ireland, June 18, 1854.

E. Callaghan, Agent Hamilton Steamboat Co., Toronto, born at Kingston, Ont., June 17, 1875.

J. E. Dalrymple, General Freight Agent G.T.R., Montreal, born there, June 1, 1869.

W. H. Darcy, General Claims Agent C.P.R. Western Lines, Winnipeg, Man., born at Manorhamilton, Leitrim, Ireland, June 23, 1859.

A. E. Doucet, Division Engineer Transcontinental Ry. Surveys, Quebec, born at Montreal, June 9, 1860.

G. H. Eaton, Assistant Master Car Builder, C.P.R. Western Lines, Winnipeg, born in Staffordshire, Eng., June 9, 1860.

W. F. Fitch, President and General Manager Duluth, South Shore and Atlantic Ry. and Mineral Range Rd., Marquette, Mich., born at Circleville, Ohio, June 28, 1839.

A. A. Goodchild, Auditor of Stores and Mechanical Accounts C.P.R., Montreal, born at Peckham, London, Eng., June 3, 1866.

E. J. Hebert, General Agent C.P.R. Passenger Department, Montreal, born there June 18, 1864.

Carl Howe, Assistant General Freight Agent Michigan Central Rd., Buffalo, N.Y., born at Berrien Springs, Mich., June 11, 1870.

L. R. Johnson, Assistant Superintendent of Motive Power, C.P.R. Eastern Lines, Montreal, born at Abingdon, Berks., Eng., June 22, 1855.

Jas. Stephenson, ex-Chief Superintendent G.T.R., Weston-Super-Mare, Somerset, Eng., born there June 2, 1837.

Recent Nova Scotia Legislation.

Among the acts passed at the recent session of the Nova Scotia Legislature were the following:

Acadia Coal Co.—Amending the act of incorporation passed 1865 and the acts amending the same.

Arisaig and Country Harbor Iron and Ry. Co.—Act of incorporation.

Atlantic Grindstone, Coal and Ry. Co.—Act confirming the amalgamation of the A. G. C. and Ry. Co., the Fundy Coal Co., and the Atlantic Grindstone Co.

Barrington Telephone Co.—Amending the act of incorporation pased 1885.

British Coal and Ry. Co.—Amending the act of incorporation passed 1905.

Colchester Coal and Ry. Co.—Authorizing the county of Colchester to exempt the company's property from taxation.

Davison Tramway Co.—Amending the act of incorporation passed in 1903-4.

Dominion Coal Co.'s Railway.—Act relating to the D.C. Co.'s railway between George St. and old pier at the Sydney and Louisburg Ry., Sydney.

East Pictou Telephone Co.—Act of incorporation.

Egerton Tramway Co.—Amending the act of incorporation passed in 1902.

Halifax and Eastern Ry.—Act of incorporation.

Halifax and Guysboro.—To provide for the construction of a railway between these places.

Halifax and Southwestern Ry.—To enable the company to divert a road in Halifax county.

Halifax and Yarmouth Ry.—To provide for the assessing of land damages along the railway.

Halifax Electric Tramway Co.—In respect to taxation.

Lunenburg Marine Insurance Co.—Amending the act of incorporation passed in 1903-04.

Margaree Coal and Ry. Co.—To enable the municipality of Inverness to borrow money to pay a bonus towards the construction of this railway.

Maritime Coal and Ry. Co.—Amending the act of incorporation passed in 1903-04.

Middleton and Victoria Beach Ry.—Confirming the mortgage of the line to the Crown.

New Cumberland Telephone Co.—Act of incorporation.

North Mountain Ry.—Amending the act of incorporation passed in 1902, and acts amending the same.

Railway in Inverness County.—Amending the act of 1905 providing for aid for the construction of a railway in the county.

Railway in Richmond County.—Providing for the granting of municipal aid towards the construction of a railway in the county.

Railway Land Damages in Liverpool.—To enable the town of Liverpool to borrow money to pay for land acquired for railway purposes.

Railways.—Amending Chap. 99, Revised Statutes of 1900, respecting railways; and a second amending Chap. 73, Revised Statutes of 1900, and repealing Chap. 4 of 1905, amending Chap. 99 of the Revised Statutes of 1900 respecting railways.

Shelburne.—Act authorizing the municipality to borrow money for railway damages and other charges incidental thereto.

Standard Coal and Ry. Co.—Amending the act of incorporation of 1903.

Yarmouth Telephone Co.—Act of incorporation.

Recent Ontario Legislation.

The Ontario Legislature at its recent session passed the following acts among others:

Algoma Central and Hudson Bay Ry.—Respecting aid to the same and the associated industries at Sault Ste. Marie.

Bell Telephone Memorial Association.—Granting charter of incorporation to an association to erect a memorial at Brantford to A. Graham Bell.

Dunnville, Wellandport and Beamsville Electric Ry.—Act of incorporation.

Hamilton, Caledonia and Lake Erie Ry.—Extending time for construction.

Hamilton and Guelph Jct. Ry.—Act of incorporation.

Kingston, Gananoque and Perth Electric Ry.—Extending time for construction.

Kingston, Portsmouth and Cataraqui Electric Ry.—Rearranging capital stock, etc., and confirming agreements with municipalities.

North Midland Ry.—Extending time for construction, and granting extension from previously authorized terminus.

Ontario West Shore Electric Ry.—Extending time for construction.

Pembroke Radial Ry.—Act of incorporation.

Pembroke Southern Ry.—Authorizing an extension to Petawawa.

Peterborough Radial Ry.—Extending time for construction.

Port Credit, Brampton and Guelph Ry.—Act of incorporation.

Port Elgin Spur Line.—Act of incorporation.

Railway and Municipal Board.—Providing for the appointment of a provincial board.

Rondeau, Ridgeway and Wallaceburg Ry.—Act of incorporation.

St. Catharines, Pelham and Welland Electric Ry.—Amending charter of incorporation passed 1903.

South-Western Traction Co.—Extending time for construction.

Superior and James Bay Ry.—Extending time for construction.

Telephones.—(1) Respecting the establishment of local municipal telephones. (2) Incorporating the Provincial Long Distance Telephone Co.

Toronto and North-Eastern Ry.—Act of incorporation.

Toronto and York Radial Ry.—Amending act of incorporation and acts amending the same.

Railway Finance, Meetings, etc.

Central Ontario Ry.—The annual meeting of shareholders was held May 16. Following are the officers and directors for the current year: President, S. J. Ritchie; Vice President, C. E. Ritchie; Receiver and Manager, G. Collins; other directors, T. M. Kirkwood, J. H. Stewart, W. S. Jaques, R. Fraser; Treasurer, J. D. Rowe.

Great Northern Ry. of Canada.—A meeting of shareholders was called to be held at Toronto, May 28, for the purpose of considering and approving certain agreements for the amalgamation of the company with the Quebec, New Brunswick and Nova Scotia Ry., and the Chateauguay and Northern Ry.

Joliette and Brandon Ry.—A meeting of shareholders was held at Montreal, May 22, for the purpose of leasing the company's line to the C.P.R., arranging the form of lease, and of issuing first mortgage bonds upon the security of the railway. M. S. Lonergan, 7 Place d'Armes, Montreal, is Secretary-Treasurer.

Lake Erie and Detroit River Ry.—Following are the officers and directors for the current year: President, J. Harman, Cincinnati, Ohio; Vice-President, G. W. Perkins, New York; other directors, A. Leslie, F. H. Walker, Walkerville, Ont.; A. H. Skerving, Chatham, Ont.; Secretary, T. J. Walsh, Cincinnati; Treasurer, J. E. Howard.

Montreal and Vermont Jct. Ry.—Following are the officers for the current year: President, C. M. Hays; Vice-President, E. H. Fitzhugh; Auditor, W. G. Crabb; Secretary-Treasurer, H. H. Gilmour; Assistant Secretary-Treasurer, W. H. Chaffee; Managing Directors: C. M. Hays, E. H. Fitzhugh, and G. C. Jones.

Qu'Appelle, Long Lake and Saskatchewan Ry.—Net earnings for March, $12,418.20, against $28,578.90 for March, 1905.

Quebec Central Ry.—Gross earnings for Mar., $76,414.98; net earnings $30,157.37, against $66,103.30 gross, and $25,686.30 net, for Mar., 1905. Net earnings for three months ended Mar. 31, $67,638.61, against $42,508.91 for same period, 1905.

Rutland Rd.—The report for the year ended Dec. 31, 1905, is the 39th annual report of the company, but is the first issued since the line passed under the direct control of the New York Central and Hudson River Rd. Co. The road is made up of a number of short local lines, originally independent, which were consolidated with the idea of making a through route. "The road," says the Railroad Gazette, "can be used both as part of a New York-Montreal line and as part of a Boston-Chicago or Boston-Montreal line. From a connection with the Harlem division of the New York Central at Chatham, it runs across the International boundary line south of Montreal, which city its passenger trains reach by trackage rights. From Boston, over the Boston and Maine, to Bellows Falls, thence over the Rutland to Ogdensburg on the Upper St. Lawrence Rivers, and thence by the Rutland Transit Company, a lake line owned by the Rutland Railroad to Chicago, a Boston-Chicago line is made. The weakness of the road for through traffic is that neither of these routes is the natural, shortest or cheapest way." From 1870 to 1896 the line was leased to the Central Vermont Ry., and from 1896 to 1899 the Delaware and Hudson Rd. had control. Under Dr. W. S. Webb, who got control in 1899, a policy of expansion was entered upon, several other small roads being amalgamated and the Montreal connection, the Rutland and Noyan Ry., was constructed. The plans of the President were not realized, and the line passed under the control of the N.Y.C. and H.R.Rd. The company owns

MEMO RE-MICHIGAN TAXATION.

The U.S. Supreme Court having upheld on appeal the validity of the Michigan State Law, increasing the taxation payable by the railways in that State, the amount of additional taxes and interest on the arrears payable by the G.T.R. lines in that state to Dec. 31, 1905, is about £108,000 which the board proposes to charge over a period of two years in equal monthly proportions. The amount affecting the G. T.R. accounts will be about £2,630 per month, and the amount affecting the G. T. Western accounts about £1,900 per month. In the March statement the amounts for Jan. and Feb. are included, in addition to the proportion for the month of March.

TRAFFIC RECEIPTS OF THE SYSTEM.

Aggregate from Jan. 1 to April 30:

	1906.	1905.	Increase.	Decrease.

Total	£2,454,871	£2,256,118	£198,753	....

Quebec Central Railway Meeting.

The following report for the year ended Dec. 31, 1905, was presented at the annual meeting in London, Eng., May 2:

1904.		1905.
$778,969	Gross earnings	$789,205
540,373	Working expenses	528,380
$238,596	Net earnings	$260,825
336	Interest on balances	476
$238,932	Net revenue	$261,301

This statement shows an increase in gross earnings of $10,236, a decrease in working expenses of $11,993, and an increase in net earnings of $22,229. The net revenue was $261,301. The addition of $10,679 brought forward from 1904 made the available balance $271,980. After providing $90,609 for the year's interest paid and accrued on the outstanding prior lien bonds and 4% debenture stock, $15,000 was charged against net revenue for alterations, additions, and improvements to stations, buildings, etc. There then remained a balance of $166,371, out of which was paid the interest on the 3% second debenture stock, amounting to $49,348, and interest at the rate of 5½% for the year on the 7% income bonds. These two payments absorbed $139,818, and left a surplus of $26,553, of which $15,000 has been appropriated for betterments to bridges, and $11,553 carried forward. At Dec. 31, 1905, £283,137 of the 4% debenture stock had been issued. Of this £199,500 had been used in retiring a like amount of prior lien bonds, and £83,637 had been sold to provide funds for a portion of the requisite additional capital expenditure authorized by the act of 1899. There remained £150,-500 prior lien bonds outstanding on Dec. 31, 1905.

The directors record with deep regret the loss of their old and valued colleague and friend, S. G. Sheppard, who died Oct. 3, 1905. It was in a great measure owing to his interest and support in the early days when the present board took office that the company is in the sound position it occupies to-day. The directors announce the retirement of F. Grundy from the position of General Manager, which took effect on Dec. 31. He was appointed on Jan. 1, 1889, and the invaluable services he has rendered to the company are a matter of common knowledge, and can be best appreciated by a comparison of the annual report for 1890 with that for the year just concluded. The directors will still have the benefit of Mr. Grundy's advice and sound judgment, as he retains the office of Vice-President and his seat on the Board. J. H. Walsh, whose name will be familiar as General Freight and Passenger Agent, which office he has so ably filled for many years, has been appointed General Manager in Mr. Grundy's stead, and E. O. Grundy has been appointed General Freight and Passenger Agent as successor to Mr. Walsh By the constitution of the company, the entire board, other than the Provincial Government director, has to be elected annually, and the present directors offer themselves for re-election.

The statistics showed 211.86 miles of line owned, and trackage rights on the Intercolonial Ry. between Harlaka Jct. and Levis, Que., 5 miles. The rolling stock consisted of 19 locomotives, 14 passenger cars, 614 flat, box and stock cars, and 28 miscellaneous and working cars. The total train mileage was 651,320, against 668,046 in 1904; 249,898 passengers and 485,988 tons of freight were carried against 228,951 passengers and 501,280 tons in 1904.

President E. Dent, in moving the adoption of the report, referred to the death of S. G. Sheppard, and analyzed the figures contained in the report somewhat in detail. There had been a healthy increase in the passenger traffic, but only a small increase in the freight traffic, owing to the fact that 1904 was an abnormal year owing to the dry autumn of 1903, which prevented the floating down the rivers of large quantities of lumber for handling in that year. This decrease in the lumber had been partly made up by a large increase of traffic in other goods, and also the average earnings per ton had slightly increased. Of course, last year they were fortunate in having very few accidents of any kind, and only a few washouts, to which Canada's railways were particularly liable. It would be remembered that in 1904 the company built a new iron bridge over the River Chaudiere. Last year they completed a steel bridge at Sherbrooke, and the General Manager had now told them that all the main bridges were composed of steel. He might add that all these bridges were now paid for except $6,000, which was carried over to the present year. He next referred to the proposed extensions, the changes in management, and concluded by stating that the gross earnings for the current year to the third week in April had amounted to $246,750, an increase of $47,648 over the last year. The net earn-

"Honesty is the **Best Policy**;" Modesty may also be **Good Policy**, but you can't make it **Sell Goods.**
—*Milwaukee Sentinel.*

What can be said of Varnish by any firm that may be termed "modest?" Do we not all have "the best?" and is not every candidate's goods better than the "other fellow's?"—at least so it is stated.

The buyer, however, after a time comes to **know** what is "best" for his particular purpose; he learns how to discriminate and finds out how to **interpret** the universal term called "best."

For all Railway purposes, that is "best" which stands the test of time and active service. Along these lines we have the **experience;** and we have a **record** which we "modestly" state to be unexcelled by any, and only equalled by some English makes, but even in this case we have superior qualities in **uniform working** and drying **all the year round.**

ings for the three months ending March 31 were $67,638, or an increase of $25,000. They could hardly expect that this rate of increase would continue, but it had been partly due to the mild winter. There had been enough snow to move all the lumber down, but not enough to prevent traffic upon the lines, so that they had been working in the winter at the same expenditure as in the summer.

F. Grundy, in seconding, stated that the line was doing well, and the shareholders' property in Canada was a very solid and good little concern. Regarding the current year's prospects he thought the shareholders would have every reason to be satisfied when the report was presented. Referring to the proposed extensions of the line he said: "With regard to the branch that you are about to build from St. Francis to the Famine River, I think it will very likely be completed this year—it ought to be; and I can assure you, to the very best of my knowledge, the traffic upon it will begin to pay from the very first day that we can operate it. I have referred to this extension at former meetings, but it has not been an opportune time to approach the Government until this year, but now I think the business will be satisfactorily concluded. With regard to the further extension of this portion of your line, that will be a matter for consideration hereafter. There is no hurry about it, and under the act you will see that we have ten years in which to complete as much or as little as we may think fit; but I may say that if the continuation of the branch is carried up so as to join the Temiscouata Ry., it will go through a very excellent country of virgin timber. I do not think anything has been removed except, perhaps, some of the pine, and the extension, if built, or when built, will no doubt be a very great addition to the property you already own."

The report was adopted and the directors re-elected, viz., E. Dent, F. Grundy, A. Bremner, T. Lindley, F. H. Norman. The director appointed by the Quebec Government is L. A. Carrier, M.P.

Subsequently separate meetings of the 4% debenture stock holders, and of the 3% debenture stockholders were held, at each of which a resolution was passed authorizing the company to increase the issue of debenture stock or bonds, or both, authorized by 62 Vict., chap. 74, provided that the total amount shall not exceed $15,000 a mile of the present line, and of the branches or extensions now or hereafter to be constructed, and that the provisions of the act named and the amending acts apply to such additional issue with the exception of the limitation of annual interest to be paid.

Lake Superior Branch Engineering Association.—A unique meeting was held at Fort William, Ont., May 4, when the Grand Trunk Pacific Ry. Co.'s engineering staff of the whole of the Lake Superior branch was gathered together with the Division Engineer in the chair, the Assistant Chief Engineer, H. A. Woods, being also present and speaking. It was decided to organize as the Lake Superior Branch Engineering Association, the membership to comprise those directly engaged upon the location and construction of the branch named. Meetings will be held bi-monthly, when papers on engineering subjects will be read and discussed, and it is believed that the social reunion of the engineers will be conducive to unity of opinion and purpose. G. A. Knowlton, Division Engineer, was elected Honorary Chairman; E. W. Cameron, Secretary, and C. H. E. Rounthwaite, Treasurer. The business session was followed by a dinner.

TRADE AND SUPPLY NOTES.

The matter which appears under this heading is compiled, in most cases, from information supplied by the manufacturers of, or dealers in, the articles referred to, and in publishing the same we accept no responsibility. At the same time we wish our readers to distinctly understand that we are not paid for the publication of any of this matter, and that we will not consider any proposition to insert reading matter in our columns for pay or its equivalent. Advertising contracts will not be taken with any condition that accepting them will oblige us to publish reading notices. In other words, our reading columns are not for sale, either to advertisers or others.

The Canadian Westinghouse Co. has issued circular no. 1128 dealing with small power motors.

The Canadian Fairbanks Co., Montreal, has issued a map of the townships in the vicinity of Cobalt, Ont., which will be sent free on application to any of our readers.

The officers and directors of the Canadian White Co. for the current year are: Chairman, J. G. White; directors: W. G. Ross, Sir H. M. Allan, P. G. Gossler, Sir H. M. Pellatt, E. R. Wood, S. H. Alfred.

The Canadian Westinghouse Co. offered to its shareholders of record May 21, $1,000,000 of the $2,500,000 of new stock authorized to be issued at the last annual meeting in the proportion of two shares of new stock to each five of old.

The Robb Engineering Co., Amherst, N.S., has received an order through the Canadian Westinghouse Co.'s Vancouver, B.C., office for two 20 h.p. engines to be used for lighting purposes on the C.P.R. steamer "Princess Royal," now building.

The Dominion Engineering and Construction Co., Ltd., Montreal, has taken a contract from the Canadian Copper Co. for the erection of extensive buildings at Copper Cliff, Ont., in connection with the opening of new mines. This contract is on the cost-plus-a-fixed sum principle.

The Dominion Wire Rope Co., Ltd., held its annual meeting of shareholders recently at its head office, Imperial Bank Building, Montreal, when the following officers were elected for the current year: F. W. Fairman, President; F. H. Hopkins, Vice-President and Managing Director; J. J. Rosevear, Secretary Treasurer.

The Canadian Iron and Foundry Co., Ltd., has been incorporated under the Dominion Companies' Act, with a capital of $2,000,000 and offices at Montreal, to buy and sell steel, iron and its products, to own and operate mines, furnaces, etc., to manufacture car wheels and railway supplies generally, and particularly to carry on the business of the Canadian Iron and Foundry Co. The provisional directors are: T. J. and G. P. Drummond, T. Brosseau, K.C.; F. G. O'Grady, R. J. Mercur, of Montreal,; J. A. Kilpatrick, St. Thomas, Ont.

The American Palace Car Co. reports that it has arranged with the Ann Arbor Railroad to place the demonstration car Columbia on that line, June 15, for one month, to make both day and night runs between Toledo and Frankfort, pending the delivery of the cars contracted for operation on this line, now being constructed. It is also announced that the first delivery of cars for the Mackenzie & Mann Ry. system, now under construction, will be made on Sept. 1, and further, that the company has under negotiation contracts with railways operating in China and Japan, which will represent a cash investment of between $500,000 and $1,000,000, the cars to be constructed in the United States, under the company's disappearing berth system.

The American Locomotive Co. has issued a pamphlet describing Pacific type passenger locomotives built for various railways. It opens with a description of the Pacific type and an outline of the special advantages claimed for it for very heavy and fast passenger service. These are very briefly stated and are followed by a description of two forms of trailing trucks which have been used with great success on this type of locomotive. The description is followed by two pages of tables containing in condensed form the leading dimensions of the locomotives illustrated in the pamphlet, the tables being arranged in the order of the total weight of the locomotives. By use of side elevation and sectional drawings a typical Pacific type locomotive is illustrated and engravings of outside and inside bearing trailing trucks are included. The remainder of the pamphlet is devoted to photographic reproductions of locomotives, the opposite pages containing tabular information concerning each design. The locomotives are placed in the order of their weights.

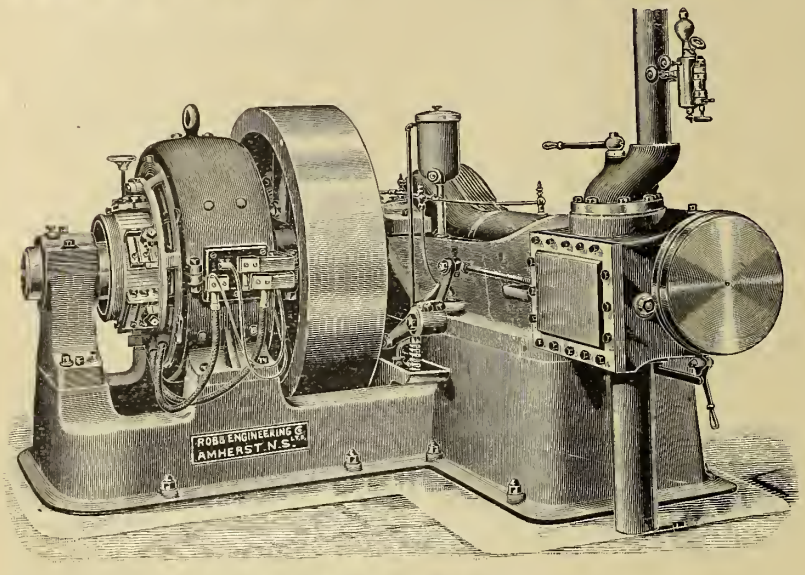
The Canadian Westinghouse Co. has received several important contracts recently, among which the more interesting are as follows: One for supplying the Provincial Light, Heat and Power Co. with apparatus to be used in the development of another large water power plant near Montreal. The initial installation will consist of three 3,750 k.w., revolving field, alternating current, water wheel driven generators of 4,000 volts, three phase, 7,200 alternations; also twelve 2,500 k.w., 44,000 volts, oil insulated, water cooled transformers. This new power station will be used for supplying additional power to the Montreal Light, Heat and Power Co. at Montreal. The step-up transformers will be wound for 4,000 to 44,000 volts, and the lowering from 40,000 to 12,500 volts. The transmission line is about 40 miles long. Another is for the Northern Electric Mfg. Company, of Montreal, for a 300 k.w., Westinghouse-Parsons turbo-generator unit, to be installed alongside of one of the same capacity now in service. The generator is a 220 volt, three phase, 7,200 alternation machine, operating at 3,600 r. p. m., and will be of the latest enclosed type, while the turbine will operate at 150 lbs. steam pressure with 100 degrees superheat. The Yukon Consolidated Co. has placed a contract for the following: Three 100 h.p. 3-phase, 60 cycle, 400 volt, type F motors; three 15 h.p., 3-phase, 60 cycle, 400 volt, type F. motors; three 50 h.p., 850 r.p.m., 3-phase, 60 cycles, 400 volt, constant speed induction motors; three 30 h.p. motors; three 20 h.p., 1,120 r.p.m. motors; three 15 h.p., 850 r.p.m. motors; three 7½ h.p., 1,700 r.p.m. motors; nine 75 k.w., oil insulated, self-cooling transformers; two 625 k.w., 3-phase, 60 cycle, 2,200 volts, 415 r.p.m., A.C. generators, and two 17 k.w., type S exciters for same; one 4 panel switch board for controlling the above; four 250 k.w., oil insulated, oil cooled transformers, and four 200 k.w. transformers, same type.

The Winnipeg Jobbers' Union has decided to form a transportation bureau with a permanent Manager and Secretary. The duties of the bureau will be to take up and push all claims and complaints by members of the bureau against the railways.

The C.P.R. placed a donation of $10,000 at the disposal of the Red Cross Society for the relief of the sufferers from the earthquake and fire at San Francisco, Cal., in addition to granting the free use of the str. Amur to carry supplies from Vancouver, B.C.

Following are the officers and directors of Ross & Harris Co. (Ltd.) for the current year: President, J. Ross; Vice-President, J. W. Harris; Secretary-Treasurer, W. B. Powell; other directors: J. A. McRae, Niagara Falls, Ont.; W. H. Chandler, Toronto. The three first named reside at Montreal.

NOT ONE CENT FOR REPAIRS



An experienced engineer has written us as follows:—"After eighteen months of hard service, the "Robb" engines are in excellent shape, running very smooth and without a bit of vibration. Up to this time they have not cost one cent for repairs, the only expense being steam, oil and packing and this below the average. Perfect alignment, parts well machined and good design make the "Robb" the most economical and labor saving engine that has ever come to my notice."

TRANSPORTATION APPOINTMENTS.

Canadian Northern Ry.—W. E. Dunn, formerly in the C.N.R. service at Winnipeg, and latterly in another company's service at St. Paul, Minn., has been appointed city ticket agent, C.N. Ry., at Edmonton, Alta.

Canadian Pacific Ry.—A. C. Morton, heretofore chief clerk in the General Passenger Department, Halifax, N.S., has been appointed ticket clerk on the SS. Empress of Britain. His duties are to attend to the ticketing of passengers holding orders for rail tickets and to adjust anything that may be wrong in connection with rail transportation; to give full information to passengers on the ship with regard to routes, rates, points of interest, etc. Also to arrange for sleeping car accommodation, and to be, generally speaking, a bureau of information concerning railway travel.

H. F. Matthews, heretofore Sleeping and Dining Car Agent, Calgary, Alta., has been appointed Assistant Superintendent Sleeping, Dining and Parlor Cars and News Service. Office, Montreal.

E. Myers has been appointed acting roadmaster, Smith's Falls, section, Ontario Division, for some three or four months, while Roadmaster J. Drinkwater will be engaged in connection with the laying of the second track between the Anne de Bellevue and Vaudreuil.

S. Wertheim has been appointed Sleeping and Dining Car Agent, Toronto, succeeding H. R. Bain, transferred to Calgary.

P. E. Barry, heretofore Roadmaster, Winnipeg terminals, has been appointed General Yardmaster, Winnipeg terminals, succeeding H. J. Hunt, resigned.

W. Cooper has been appointed Roadmaster Winnipeg terminals, succeeding P. E. Barry, promoted.

W. E. Woodhouse, heretofore road foreman of engines, 4th district, Central Division, has been appointed District Master Mechanic, same district, Moose Jaw, Sask. The position of road foreman of locomotives has been abolished.

H. R. Bain, heretofore Sleeping and Dining Car Agent, Toronto, has been appointed Sleeping and Dining Car Agent at Calgary, Alta., succeeding H. F. Matthews, promoted.

J. E. Proctor, heretofore city ticket agent at Nelson, B.C., has been appointed Travelling Passenger Agent, with headquarters at Calgary, Alta., being succeeded by J. A. M. Faulds.

J. W. Draper has been appointed General Agent of the Freight Department at Seattle, Wash., succeeding H. W. Roberts.

Delaware and Hudson Rd.—A. E. A. Deguire has been appointed soliciting passenger agent at Montreal.

Department of Railways and Canals.—J. Murphy, heretofore with the Ottawa Electric Co., has been appointed Superintending Electrician to the Department and to the Board of Railway Commissioners.

Grand Trunk Pacific Ry.—W. LeB. Ross, formerly cashier Canada Atlantic Ry., and Canada Atlantic Transit Co., has been appointed local Treasurer at Winnipeg, Man.

M. C. Sturtevant, heretofore Car Service Agent, G.T.R., has been appointed General Assistant G.T. Pacific Ry. at Winnipeg.

H. B. R. Craig, heretofore City Engineer, Kingston, Ont., has been appointed to the company's engineering staff west of Fort William, Ont.

Grand Trunk Ry.—F. Price, heretofore Master of Transportation at London, Ont., has been appointed Superintendent of Car Service, with headquarters at Montreal. He assumes the duties of, and will receive all the reports heretofore made to the Car Service Agent, which position has been abolished, M. C. Sturtevant, who held that position, having been appointed to a position on the G. T. Pacific Ry.

S. Hewitt has been appointed joint travelling agent G.T.R. and Northern Navigation Co. for the territory from Montreal to Detroit and St. Clair Rivers. His headquarters will be in the G.T.R. District Passenger Agent's office, Union Station, Toronto.

The following agents have been appointed: Beaconsfield, Que., V. Daoust; Anson, Ont., W. Burns; Trout Creek, Ont., A. S. Quinlan; Powassan, Ont., T. Barlow; Toronto, Ont., J. J. Beck, Supt. Union Stn.; Toronto Exchange, Ont., J. E. Cather (Pass.); Paisley, Ont., W. F. Briggs; Elmwood, Ont., F. Pope; Dobbington, Ont., J. S. Marshall (Pass.); Johnson's, Que., Jas. Robertson; Kinburn, Ont., A. E. Campbell; Brule Lake, Ont., L. A. Coulombe. Outside Ticket Agents: Ottawa, Ont., P. M. Buttler; Renfrew, Ont., Wm. A. Cameron.

S. Ennes, heretofore Trainmaster districts 25, 27, 28 and 29, Western Division, Durand, Mich., has been appointed Master of Transportation, London, Ont., succeeding F. Price, promoted.

J. Ehrke, heretofore Trainmaster district 26, Western Division, Battle Creek, Mich., has been appointed Trainmaster districts 25, 27, 28 and 29, Durand, Mich., succeeding S. Ennes, promoted. The office of Trainmaster, district 26, has been abolished, and all reports heretofore sent to the Trainmaster at Battle Creek, are to be sent to the Assistent Superintendent there.

W. O. Johnson, G.T.R. agent at San Francisco, Cal., has opened a temporary office at 968 Broadway, Oakland, Cal., the building in which the offices at San Francisco were situated having been destroyed by the earthquake and fire.

Lehigh Valley Rd.—J. S. Wood, heretofore Travelling Freight Agent at Buffalo, N.Y., has been appointed Assistant General Freight Agent in New York city, and is succeeded at Buffallo by H. C. Hamilton.

Michigan Central Rd.—L. B. Thomson has been appointed general yardmaster at Bridgeburg, Ont.

Pere Marquette Rd.—F. W. Goldie, contracting freight agent at Buffalo, N.Y., has been appointed Travelling Freight Agent for Illinois, with headquarters at Chicago. He is succeeded at Buffalo by E. T. Reynolds, chief clerk to the General Agent at that point. A. E. Patriarche has been appointed chief clerk in succession to E. T. Reynolds.

Northern Pacific Rd.—M. O. Barnard has been appointed General Agent Freight Department at Buffalo, N.Y., vice E. E. Delaney, deceased.

W. P. Hinton, General Agent G.T.R. Passenger Department, writing May 16, in reference to the press reports that he was removing from Ottawa to Montreal immediately, said: "You may be sure that if I change my address I will let you know, as I do not wish to run the risk of missing even one copy of your paper."

The Board of Railway Commissioners held sittings at Paris, Ont., May 1 and 2; Strathroy, Ont., May 3; Chatham, Ont., May 4; Windsor, Ont., May 5; Hamilton, Ont., May 8; and for several days subsequently in Toronto. The Commissioners propose to hold sittings in the Maritime provinces before thew estern trip is arranged.

Under the provisions of the Government Railway Act, an order-in-council has been passed directing that the regulations of the G.T.R. adopted Feb. 19, 1906, governing the transportation of gunpowder and other explosives be adopted for the I.C.R. and the P.E.I. Ry., subject to such verbal changes as may be necessary to adapt them to the Government railways.

Great Northern Ry. (U.S.) in Canada.

The daily newspapers in Canada, and a number in the United States have, for some time past, been discussing the extensive railway building and chartering in Western Canada—and more particularly along the International boundary—and have been constructing on paper, not only a large number of branch lines destined to divert the produce of the west from Canadian to U.S. lines, but another transcontinental line in Canada, for the Great Northern Ry. (U.S.). Much of this activity of construction and chartering of new lines is said to be due to the competition of the C.P.R. and the G.N. Ry., and to be a measure of retaliation by the G.N. Ry. for the recent extension of the Minneapolis, St. Paul and Sault Ste. Marie Ry.—a C.P.R. controlled line—in the Dakotas, and the persistent opposition of the C.P.R. to the construction of the Vancouver, Victoria and Eastern Ry.—a G.N. Ry. subsidiary—in British Columbia.

The Great Northern Ry., which has its eastern terminii at St. Paul and Duluth, Minn., extends to the Pacific coast at Spokane, Wash., and, including branches, has a length of about 6,000 miles. The main line for the greater portion of the distance is almost parallel with the International boundary, but from 50 to 100 miles south, and is connected at Emerson and Gretna, Man., with Canadian lines. There are also branch lines running northerly, terminating at Rosseau, Minn.; Walhalla, Hannah, Sarles, north of Starkweather, St. John, Dunseith, Antler, Maxbass and Sherwood, N.D. The Great Falls and Canada Ry., extending from Great Falls to the International boundary at Sweet Grass, Alta., was acquired from the Alberta Ry. and Coal Co., in 1902, and was made a standard gauge line the same year, as was also the A. Ry. and Coal Co.'s line from Sweet Grass to Lethbridge, Alta., thus giving another connection at the border. In B.C., however, the G.N. Ry., through subsidiary companies, has a large interest in the following mileages:

	Miles.
CROW'S NEST SOUTHERN RY.—Swinton to International boundary, where it connects with the G.N.R. system	43.80
BEDLINGTON AND NELSON RY.—From Kuskonook to International boundary, where connection is made with G.N.R. line to Bonnar's Ferry, Wash	15.30
KASLO AND SLOCAN RY.—This is connected by the International Navigation and Trading Co.'s steamers on a 45 mile run with the B. and N. Ry. at Kuskonook	31.80
NELSON AND FORT SHEPHERD RY.—From Five Mile Point to International boundary	55.42
RED MOUNTAIN RY.—From Rossland to International boundary	9.59
VANCOUVER, VICTORIA AND EASTERN RY.—Laurier to Grand Forks, Grand Forks Jct. to Danville, Grand Forks to Phœnix	50.10
These three lines are being operated by the Spokane Falls and Northern Ry., a G.N. Ry. subsidiary.	
NEW WESTMINSTER SOUTHERN RY.—South Westminster to Douglas, on International boundary, where connection is made with G. N.R. line to Seattle, Wash	24.10
VANCOUVER, WESTMINSTER AND YUKON RY.—New Westminster to Vancouver	14.00
VICTORIA TERMINAL RY. AND FERRY CO.—Cloverdale to Port Guichon, and 1.14 miles in Victoria	18.40
VICTORIA AND SYDNEY RY.	16.26
	278.77

These four lines give the company a direct line between Seattle and Victoria, through New Westminster, and over the leased Fraser River Bridge to Vancouver.

The company at the present time makes connection with Canadian lines at three points of the International boundary, and through its own subsidiary lines runs its trains across the boundary at six other points, operating in connection therewith 278.77 miles of track, and 45 miles of steamer routes. It is engaged in constructing, as the Van-

couver, Victoria and Eastern Ry., in B.C., and as the Washington and Great Falls Ry. in Washington, a line between Grand Forks and Vancouver. It was over this line that the great fight with the C.P.R. as owners of the British Columbia and Southern Ry. took place in the House of Commons in 1905. In the end Parliament granted permission to the V., V. and E. Ry., at such points as the contour of the country made it necessary, to connect its lines with those of a U.S. company, and directed that the plans be subject to the approval of the Board of Railway Commissioners. The other piece of construction work in which the company is engaged in Canada, is under the charter of the Brandon, Saskatchewan and Hudson's Bay Ry., the section under construction extending from Brandon southerly to the International boundary, with the object of making a connection with the branch line from Church's Ferry, now terminating at St. John, N.D. The surveys for this line have also been prosecuted from Brandon northerly

The press reports referred to credit the G.N. Ry. with having completed surveys for connecting its lines in British Columbia with Lethbridge, Alta., and constructing a new line thence to Winnipeg, running its line from Brandon to Hudson Bay, and finally extending its line from Winnipeg easterly to an unnamed port on the Atlantic coast. One paper, however, stated that it was intended to run the line from Winnipeg north of any existing or projected line and make the Atlantic port on Hamilton Inlet. In regard to these projects, L. W. Hill, Vice-President G.N. Ry., is reported to have said in an interview at St. Paul, recently, that the new transcontinental line would be entirely independent of the Canadian Northern Ry., and that it would probably be completed some time before the G.T. Pacific Ry. is built through to the coast. "Our line," he added, "includes only 800 or 900 miles that are still to be constructed west of Winnipeg. We have already secured our own terminals in Winnipeg, and will soon construct an independent line into the city instead of having to run over the Canadian Northern Ry. from Emerson under lease." A letter has been addressed to the Board of Trade by J. J. Hill, President G.N. Ry., in which he promised to visit Winnipeg as soon as possible after May 1, and gave some details of the company's plans. In regard to this letter, A. Strang, President, recently said: "The G.N.Ry. will come into Winnipeg from the east and will continue on through western Canada to the Pacific coast. The Great Northern project," Mr. Hill says, "will begin at a connection from Montreal to Boston. From Montreal west, the line will parallel the Canadian Pacific." A recent despatch from St. Paul, Minn., quotes a leading contractor as saying: "That within 60 days more than 4,000 miles of J. J. Hill's Canadian road would be under contract. While the contract for the road west of Winnipeg," he said, "which we have undertaken, calls for the building of the line to the Pacific coast, there will be no less than 12 branch lines running south into the gold fields, the oil fields and the coal deposits. Of these seven lines will run into northern North Dakota, Montana, Idaho and Washington, and connect with the main line of the Great Northern. These branch lines will touch the great coal fields and the mining centres on the southern Canadian border."

Be these reports true, even in part, there is no doubt that the Great Northern Ry. intends to become an active factor in the railway field in the Canadian Northwest. At present it has surveyors out all over the country; it has purchased land for right of way and terminals in Winnipeg; it is reported to have secured charters in the Dominion Parliament and in the Manitoba Legislature for a large number of lines from the original local promoters; and is interested in a number of applications for charters to construct railways now before the Legislatures of Saskatchewan and Alberta. The construction of the lines from the International boundary into Manitoba appears to be the immediate object of the company, and of these, U.S. papers report that a line from Emerson, Man., to Winnipeg has been surveyed, and that construction is in progress on the line to connect St. John, N.D., with the Brandon, Saskatchewan and Hudson's Bay Ry., now under construction southerly; and on a line from the International boundary at Neche, N.D., to Portage la Prairie, Man. In connection with the line into Winnipeg, the company is said to have secured the following properties: right of way between Ross and Pacific Avenues from Princess to Neva streets; right of way across Elgin, William and Notre Dame avenues, from Ross Avenue to block 45, St. James; right of way west of the city to the Assiniboine River, through block 45, St. James, property for yards, shops and terminals. The estimated cost of the station, offices, shops, freight sheds and yards is put at $500,000. Negotiations for land for terminals are in progress at Regina and other points in Manitoba and Saskatchewan.

Reviewing the field of railway construction in Canada, the Railway Age, recently said: "Recently the press has indicated with much positiveness the new transcontinental line which it is declared Mr. Hill has begun to build between Vancouver and Winnipeg, with connections planned as far as the Atlantic. This theory hardly seems tenable. . . What Mr. Hill doubtless intends to do is to continue the plan of pushing branches from his main line northward into Canada to tap the three trunk lines, and to extend beyond them as the development seems to warrant."

J. J. HILL'S VISIT TO WINNIPEG.

J. J. Hill visited Winnipeg May 15, and remained there until May 18. He was entertained at luncheon by the Canadian Club, at which he made a speech on general transportation topics, and deprecating the giving of bonuses. Subsequently he met a delegation from the Board of Trade, and from various parts of the province, and, in reply to the addresses, made a lengthened speech in which he reviewed the development of the west during the fifty years that had passed since he left Canada, and referred to the opening up of the river route into Manitoba, as well as to the development of railways in which he was interested in conjunction with Sir Donald Smith, now Lord Strathcona. Referring to the railway projects which his company had undertaken in Canada, he said: "We want a good road with low grades. Transportation is nothing but overcoming the laws of gravitation. The nearer the level the road is the easier to run our trains.

"We must help you to get your stuff to market and get it where you can sell it for a price that will make you happy, otherwise you would not continue in business and our investment would not be a good one.

"I hope when we come here we will find our friends east of here ready to carry anything to or from our lines. If they do not, we will try and get along without them. We have no present desire to extend east of Winnipeg. There will always be a large trade with the country south of you."

In an interview subsequently, he said: "Our line, the Great Northern Railway, will be built from the Pacific Ocean to Winnipeg as soon as both the Canadian transcontinental lines, the C.P.R. and the G.T. Pacific Ry., are ready to compete for our freight. From the determination expressed and the work already in progress on the G.T. Pacific you can estimate how long that will be. We will be in a position to forward our freight over the first trains run eastward by the G.T. Pacific. The possibilities of the Canadian west are almost without limit, and as the country makes the city, Winnipeg must be a great city. There will be as great a population west of the Red River in Canada as in all the rest of the Dominion within a comparatively short time. Our line in the far west from Vancouver will be through the Rocky Mountains to the prairies in one year from this fall. Now that there is no doubt about other railways to the east to carry freight from the west we bring here, work on our line will be proceeded with vigorously. There will be no occasion for more lines north of Lake Superior."

On subsequent days Mr. Hill was met by W. Mackenzie, President Canadian Northern Ry., and F. W. Morse, Vice-President and General Manager G.T. Pacific Ry., for the purpose of discussing the probabilities of arranging joint terminals in the city.

Chicago Eastbound Passenger Rates.

W. E. Davis, Passenger Traffic Manager G.T.R., has given out the following statement:

"A meeting of presidents and executive officers of the lines easterly from Chicago convened at the Trunk Line Association's New York rooms, May 23, in pursuance of the fact that a meeting of these officials held at New York, May 11, had failed to come to a unanimous understanding. At the former meeting a committee, consisting of W. H. Newman, President New York Central lines; F. D. Underwood, President Erie Rd.; C. M. Hays, Second Vice-President and General Manager G.T.R., were appointed to confer, and if possible report to the adjourned meeting of May 23, a recommendation of some plan that might be satisfactory to the three contending interests. The result was a report from this committee practically agreeing to ask a disinterested person to referee such differences as might exist between the separate interests. This report was unanimously adopted, and the referee decided upon was Lucius Tuttle, President Boston and Maine Rd., who accepted the duties. A further result of the meeting was that the Michigan Central, Grand Trunk and Wabash Railways filed notice with the Interstate Commerce Commission that, effective June 1, the fares in existence from Chicago eastwardly prior to the misunderstanding would be restored.

"While in a sense this may be regarded as arbitration, I believe it is the opinion of most persons that it is a much fairer way than where each of the offending parties selects one advocate, and those two advocates decide upon a third individual, the result of which naturally follows that the third person is not selected directly by the interested parties, and that the burden of responsibility is equally divided between the shoulders of three individuals instead of one."

Brockville, Westport and Northwestern Ry.—It is understood that the United States interests which purchased the Brockville, Westport and Sault Ste. Marie Ry. when it was sold by order of the courts in 1902, and obtained a charter under the above title in 1903, have sold their stock to other U.S. interests who hold control. One press report states that the purchaser is E. B. Thomas, President Lehigh Valley Rd. Representatives of the purchasers were expected to go over the line at the end of May, and to arrange for the reorganization of the company. The Canadian directors:—. Bowie, W. H. Comstock, Brockville, Ont.; J. Cumming, Lyn, Ont., and W. C. Fredenburg, Westport, Ont. it is understood, will remain on the board.

The above equipment is all in first-class condition. We invite inspection. Prices and further particulars on application.

THE JOHN BERTRAM & SONS CO., Limited

DUNDAS, ONTARIO

MAINLY ABOUT PEOPLE.

W. Whyte, 2nd Vice-President C.P.R., has been elected a director of the Imperial Bank.

The late John Bertram, of Dundas, Ont., who died there April 12, left an estate valued at $49,629.42.

W. Molson Macpherson and Mrs. Macpherson have returned to Quebec from a trip round the world.

H. Swinford, general agent Northern Pacific Rd., Winnipeg, Man., left there May 7, for a trip to Great Britain.

D. D. and Mrs. Mann, with their son and Miss Williams, returned to Toronto early in May from their European trip.

D. H. Purdon, at one time in the C.P.R. operating service at Winnipeg, died suddenly at De Laud, Florida, April 30.

Ross, the only son of Willard Kitchen, railway contractor, Fredericton, N. B., died from diphtheria there, May 1, aged 17.

The engagement is announced of Hugh A. Ryan, son of the late Jno. Ryan, contractor, Toronto, to Miss C. M. Clairmont, of Gravenhurst, Ont.

W. Sherring, who won the Marathon road race at Athens, Greece, has been employed as a brakesman on the G.T.R., running out of Hamilton.

C. L. Helliwell, father of Mrs. W. B. Bulling, wife of the Assistant Freight Traffic Manager C.P.R., died at the latter's residence in Toronto May 14.

Jas. Ross, of Montreal, has bought the Clyde-built steam yacht Sheelah, 750 tons, which he had previously chartered. The price is said to be $150,000.

W. Newman, formerly city engineer of Windsor, Ont., has moved to Regina, Sask., where he is engaged as engineer and contractor for railway and municipal works.

Mrs. A. Piers, wife of the Manager of the C.P.R. Steamship Lines, and Miss Piers, sailed on the Empress of Britain, May 19, from Quebec, for a visit to Great Britain.

Dr. J. J. Harty, Secretary-Treasurer Canadian Locomotive Co., Kingston, Ont., was married in Montreal, April 24, to Miss A. Fitzhugh, the actress and operatic singer.

Mrs. J. B. Morford, widow of the late Assistant to the General Manager, Michigan Central Rd., St. Thomas, Ont., accompanied by her daughter, is on a visit to Great Britain.

The marriage of R. B. Van Horne, son of the Chairman of the C.P.R. Board, to Miss E. Molson, daughter of Dr. W. Molson, is announced to take place in Montreal June 12.

E. H. Keating, formerly Manager of the Toronto Ry. Co., and D. J. R. Duncan have opened offices in the Home Life Building, Toronto, to carry on business as civil engineers.

C. Brydges, who was married in Winnipeg, April 25, to Miss I. Doyle, is a grandson of the late C. J. Brydges, at one time General Manager, G.T.R., and subsequently Land Commissioner, Hudson's Bay Co.

E. Beaudet, a director of the Quebec and Lake St. John Ry., was presented with an arm chair by the company's staff, upon the occasion of his recent marriage to Mrs. Hardy, widow of the late Elzear Hardy, Quebec.

J. S. Wood was presented with a sapphire and diamond scarf pin by the Buffalo, N.Y., Freight Committee April 30, on leaving to take the position of Assistant General Freight Agent, Lehigh Valley Rd., at New York city.

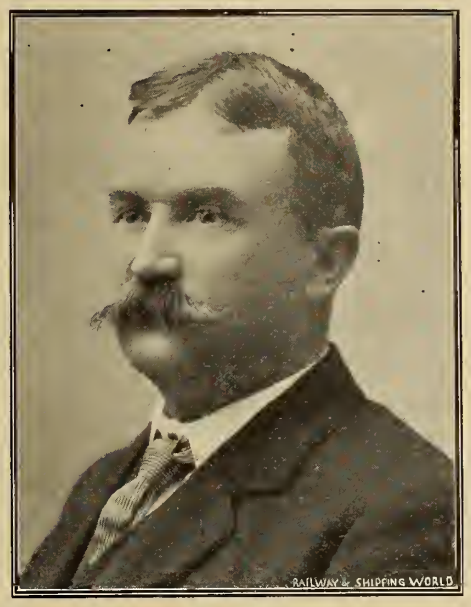
F. N. Risteen, Mechanical Superintendent Atchison, Topeka and Santa Fe Ry., Topeka, Kan., who died there recently, was a native of New Brunswick, and was in the C.P.R. service for some years before going to the United States.

Owen McKay, formerly Chief Engineer, Lake Erie and Detroit River Ry., Walkerville, Ont., and for some time with the Pere Marquette Rd., after it took over the L.E. and D. R. Ry., it is understood is likely to be appointed city engineer of Windsor, Ont.

Jos. Wallace, formerly G.T.R. freight agent at Hamilton, was presented with a purse containing $1,100 by the merchants of Hamilton, on his leaving the city for the Northwest. The members of the G.T.R. freight staff gave him a travelling bag, and Mrs. Wallace an umbrella.

W. H. Harper, C.P.R. city ticket agent, Chatham, Ont., was burned to death in a fire which destroyed his summer cottage at Erieau, Ont., May 21. He had been for some years a member, of the Canadian Ticket Agents' Association, and was 3rd Vice-President in 1903 and 1904, and Second Vice-President in 1905.

In the action of A. B. Morine against R. G. Reid, for $52,000 for professional services,



W. H. HARPER,

City Ticket Agent, C.P.R. Chatham, Ont., who was burned to death at Erieau, Ont., May 21.

the Newfoundland courts have been asked to order the plaintiff to specify items and details of the work done by him, the consultations and attendances, the time occupied on each item and the amount he charges therefor.

R. D. Pinneo, formerly Freight and Passenger Agent, White Pass and Yukon Route, Vancouver, B.C., has been appointed Northwestern Freight Agent, Pacific Coast Steamship Co., and will have direct charge of freight traffic in Washington, Oregon, British Columbia and Alaska, with headquarters at 113 James St., Seattle, Wash.

Jas. Dunsmuir, who has been appointed Lieutenant-Governor of British Columbia, is next to his mother the principal owner of the Dunsmuir estates on Vancouver Island, which owns the Wellington Collieries and Railway, and a number of steam and sailing vessels. He was President of the Esquimalt and Nanaimo Ry., owned by the estate, until its transfer in 1904 to the C.P.R.

F. Price, who has been appointed Superintendent of Car Service, G.T.R., was born at Montreal, June 11, 1864, and entered railway service in 1879 as telegraph operator on the G.T.R. He has been successively, shorthand clerk, clerk to Superintendent, secretary to General Superintendent, chief clerk to Car Service Agent, chief clerk to Manager; and from 1902 to the date of his present appointment, Master of Transportation, Middle Division; entire service with the G.T.R.

Walter White, who has been appointed joint agent G.T.R. and Wabash Rd. at Black Rock, N.Y., was born June 4, 1866. He entered the G.T.R. service in 1882 as messenger to the Superintendent, Toronto Union Station. From 1883 to 1889 he was telegraph operator, and from 1889 to 1896 secretary to assistant superintendents at London and Toronto. Subsequently he was successively chief clerk to the Superintendent at Montreal; Secretary to the Manager, F. H. McGuigan; chief clerk to the Superintendent at Toronto; Superintendent of Toronto Terminals, and Trainmaster at Palmerston, Ont.

W. LeB. Ross, who has been appointed Local Treasurer G.T. Pacific Ry. at Winnipeg, was born at Ottawa, Aug. 9, 1868, and entered railway service in 1887, his record being: Aug., 1887, to July, 1890, Audit Department Canada Atlantic Ry.; July, 1890, to 1890, in freight account office same road; 1890 to 1892, in Treasurer's department same road; 1892 to Oct., 1905, Cashier same road. In 1895 the duties of Paymaster were added to those of Cashier, and during the same period the Ottawa, Arnprior and Parry Sound Ry. was added to the C.A. Ry. From 1889 to Oct., 1905, he also acted as Cashier of the Canada Atlantic Transit Co.

M. C. Sturtevant, who has been appointed General Assistant, G.T. Pacific Ry., Winnipeg, was born at St. Albans, Vt., Aug. 28, 1866, and entered railway service in 1880, as messenger in the office of the Trainmaster, Central Vermont Ry., since which he has been consecutively to Nov. 1, 1889, clerk to General Manager and clerk to General Superintendent, same road; Nov., 1889, to Jan., 1890, clerk General Passenger Agents' Department, Chicago, Rock Island and Pacific Ry., at Chicago, Ill.; Jan. to Mar., 1890, clerk to Superintendent Illinois Central Rd., at Chicago; Mar., 1890, to Nov., 1892, clerk and agent Pullman Palace Car Co., at Chicago; Nov., 1892, to Feb., 1898, clerk and chief clerk to Superintendent of Transportation, Illinois Central Rd., at Chicago; Feb., 1898, to May 20, 1906, Car Service Agent, G.T.R., at Montreal.

E. H. Fitzhugh, whose portrait appears on the first page of this issue, was born in Montgomery County, Mo., Feb. 1, 1853, and was educated at the public schools in St. Louis, Mo. He entered railway service in 1873, as clerk in the Master Car Builder's office, St. Louis, Kansas City and Northern Ry., since which he has been consecutively in car mileage office, same road; to 1889, chief clerk to Superintendent, Western Division, Wabash, St. Louis and Pacific Ry.; 1889 to Jan., 1896, Master of Transportation, Wabash Rd., successors to the W., St.L. and P. Ry., Moberley, Mo.; Jan., 1896, to May, 1899, Superintendent Middle Division, G .T. R., Toronto; May, 1899, to Dec., 1904, Vice-President and General Manager, Central Vermont Ry., St. Albans, Vt.; Dec., 1904, to date, Third Vice-President, G.T.R., Montreal, and Vice-President Central Vermont Ry.

A. Cowan, Traffic Manager, Montreal and Lake Superior Line, died somewhat unexpectedly at his residence, Hamilton, Ont., May 10, aged 54. The cause of death was typhoid-pneumonia. On April 23, he left Sarnia on board the company's str. Arabia, for the purpose of installing a new agent at Port Arthur. He was not well before leaving, and on the trip he practically took over the duties of purser. On reaching Port Arthur, he complained of being seriously ill, and decided to return home on the company's str. Neepawah. He grew worse on the trip, and

when he reached Hamilton, May 5, he was in a very serious state with typhoid and double pneumonia. He never rallied and died May 10. He had been engaged in transportation service for over 30 years, starting in the G.T.R. freight department and working up through the various offices until he was chief clerk to the General Freight Agent at Hamilton. He was then appointed city freight agent, which position he held for about 16 years until 1901, when he became Travelling Freight Agent for the Northern Navigation Co. In 1904 the M. and L.S. Line was formed and he was appointed Traffic Manager. Two sons are in the service of the company, H., city freight agent, Toronto, and H. W., in the Traffic Manager's office, Hamilton.

RAILWAY DEVELOPMENT.

Projected Lines, Surveys, Construction, Betterments, Etc.

Fording Valley Ry.—Application is being made at the current session of the Dominion Parliament for an act incorporating a company for the purpose of constructing a railway from the British Columbia Southern Ry. near the confluence of Elk River and Michel Creek, B.C., to the Fording River, along this river valley to Henrietta Creek; and along the Henrietta Creek valley to the boundary of Alberta, thence northeasterly to Okotoks, Alta., with power to construct branch lines up Grace, Ewin, Smith, Lewis and Henrietta Creeks, in British Columbia. Smith and Johnston are solicitors for the applicants.

Grand Trunk Ry.—The proposal to carry out a large number of improvements at London, Ont., which was discussed with the City Council, and which was generally approved of, has fallen through, the council being opposed to the voting of the $300,000 bonus asked for. (May, pg. 271.)

James Bay Ry.—Tracklaying on this line between Toronto and Beaverton was completed May 17, the last spike being driven in the bridge over the Don Valley. Ballasting has been completed from Parry Sound southerly to Vandorf, which is 25 miles north of Toronto, and is now being pushed forward as fast as possible. It is expected that the line will be opened for traffic in July. On the section north from Parry Sound construction is in progress to French River, and a contract has been let to McCoy and Wilford for grading about 20 miles northerly from the proposed crossing of the C.P.R. near Wahnapitae, Ont. Plans have been filed at Ottawa showing location of the entrance from the Don Valley to the waterfront at Toronto, and for the line from Georgian Bay to Ottawa. (May, pg. 255.)

Klondike Mines Ry.—An order-in-council has been passed on the recommendation of the Minister of the Interior, approving of an extension of the line from Dawson to Grand Forks, now under construction; from Grand Forks to the Stewart River, thence to a point near the source of the Stewart River, and to a point at the confluence of the same with the Yukon River; and authorizing the grant of a right-of-way for the same. (May, pg. 255.)

Michigan Central Rd.—The second track work now in progress on the M.C.R. is really a completion of a double track between Bridgeburg and Windsor, Ont. The work is being done in three sections, viz.: Bridgeburg to Welland, Ont., about 19 miles; Hagersville to Springfield, about 47 miles; and Ridgetown to Tilbury, about 30 miles, 96 miles out of a total distance of 250 miles from Bridgeburg to Windsor. When this work is completed the company will have a double track line between Buffalo and Chicago, passing through Ontario from the Niagara River to the Detroit River. W. F. Tench and Co., Detroit, Mich., and Niagara Falls, Ont., have the train work on the sections between Bridgeburg and Welland, and between Ridgetown and Tilbury; and J. Dewhurst, South Woodslee, Ont., has the train work on the Hagersville-Springfield section. The company is doing all the steam shovel work, as well as the tracklaying and ballasting. It is expected to have the whole work finished this fall. (May, pg. 255.)

Montreal Bridge and Terminal Co.—A meeting of shareholders was called to be held at the offices, 3 Beaver Hall Square, Montreal, May 30, for the purpose of electing directors, passing by-laws, and other general business.

Pacific and Atlantic Ry.—The Dominion Parliament is being asked at its current session to pass an act declaring the railway works which the P. and A. R. Co. is authorized, by acts passed by the Ontario Legislature, to undertake, are for the general advantage of Canada, and that the P. and A.R. is authorized to construct the same within the time specified in Sec. 117 of the Railway Act. Authority is also asked to amalgamate with other companies or to enter into agreements with the same for the sale or lease of its railway, or any portion thereof. The railways specifically mentioned are the C.P.R., G.T.R., Algoma Central and Hudson Bay Ry., Manitoulin and North Shore Ry., and the Canada Central Ry.

Quebec Central Ry.—Reference to the proposed extensions of the company's lines will be found in the report of the annual meeting on pg. 317. The extension from Scott's is for the purpose of securing a connection with the Quebec River Bridge, now under construction, and the extension from Beauceville to the River Famine is the first part of a project to connect the line with the Temiscouata Ry., which is controlled by the same interests as the Q.C.Ry. This projected line will follow the Quebec-New Brunswick border for the main part of the distance. The press report that the directors had ordered the immediate construction of the Scott's-Quebec Bridge line is, we were officially informed, May 16, incorrect. (Feb., pg. 65)

St. Mary's River Bridge Co.—Application is being made at the current session of the Dominion Parliament for an act extending the time for obtaining the consent of the U.S. Government to the building of a bridge across the St. Mary River at Sault Ste. Marie, for a period of five years.

White Pass and Yukon Ry.—Reports from Skagway state that no new construction is contemplated for the current season. In regard to betterments, the most important work to be undertaken is the replacing of a number of wooden bridges with steel structures. (Feb., pg. 65.)

Latest C.P.R. Appointments.—W. B. Howard has been appointed Acting District Passenger Agent at St. John, N.B., succeeding F. R. Parry, transferred.

F. R. Parry, heretofore District Passenger Agent C.P.R. at St. John, N.B., has been appointed District Passenger Agent at Boston, Mass., succeeding the late H. J. Colvin.

W. Linson has been appointed city passenger agent at Washington, D.C., succeeding D. H. Morse, appointed cashier at New York

The title of T. G. Orr, who is sole agent of the C.P.R. in Pittsburg, Pa., is Travelling Passenger Agent, and his office is 506 Smithfield St.

W. J. Atchison, heretofore in the C.P.R. telegraph department, Montreal, has been appointed city passenger agent Sault Ste Marie, succeeding the late T. R. Harvey.

C.P.R. Betterments, Construction, Etc.

Glen Yard, Montreal.—The C.P.R. has completed the laying out of a large passenger coach yard at Westmount, near Windsor St. station, Montreal. The track capacity for passenger coaches is over three miles and the total yard trackage is over four miles. The buildings are located on the south side of the yard, and in addition to an 18-stall locomotive house with 70 ft. turntable, there is a large 400 h.p. boiler plant to supply light, heat and power to the buildings and throughout the yards. The parlor, sleeping and dining car department, including the stores, is housed in a double story building 192 x 40 ft.; at the west end of the building a cold storage plant is equipped for cold air refrigeration for the dining car supply service. Carpenters, painters, upholsterers, electricians and repair men have quarters in the general car repair shop, which is 30 x 178 ft., equipped with facilities for handling coach repairs. A thawing-out house, 40 x 250 ft., joining the general car repair shop, has two lines of tracks inside and a wheel pit from house to yard. A bunk house with 12 berths, including dining, parlor and reading accommodations, is provided in the rear of engine house for trainmen. The oil house, 20 x 30 ft., is placed conveniently to the various workshops. The oil is stored in steel tanks enclosed in concrete chamber in basement and connected with piping to the ground floor where the pumps are located. The gas house, 30 x 90 ft., is located on the south side of turntable so as to be isolated from the other buildings. It is equipped with compressors, meters, storage tanks, and mechanical apparatus for generating acetylene gas. On the east side of the yard are provided inward and outward bound engine tracks with ash pits, water and coal handling apparatus, the coal and ashes being handled by a locomotive crane with grab bucket.

Montreal-Smith's Falls Second Track.—We were advised, May 18, that the company had not let any contracts for the construction of the second track on the Eastern Division between Montreal and Smith's Falls, Ont., as stated in local press reports.

Bridge Filling, etc., Central Division.—The earth work to be done on the Central Division during the current year includes 7,500 cubic yards of bridge filling, and 109,200 cubic yards of roadbed and trackwork on district 1; 36,000 cubic yards of bridge filling; 168,990 cubic yards of roadbed and track work, and 74,700 cubic yards of new construction on district 2; 6,300 cubic yards of bridge filling; 26,550 cubic yards of roadbed and trackwork, and 428,000 cubic yards of new construction on district 3; 30,000 cubic yards of bridge filling; 340,000 cubic yards of roadbed and trackwork, and 160,000 cubic yards of new construction on district 4.

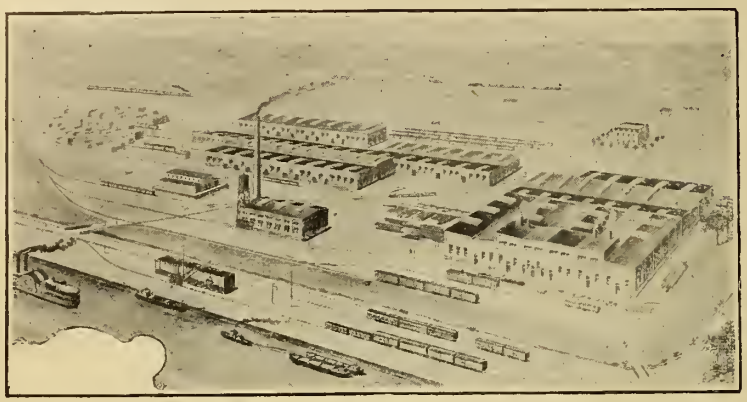
Line from Moose Jaw, Sask.—The grading for the 14 miles of the branch line from Moose Jaw northwesterly is almost completed, and it is expected that the tracklaying and ballasting will be finished this season. The line runs north from Moose Jaw to Tuxford, and is then projected northwesterly in the direction of the Elbow of the Saskatchewan River.

Western Division Steam Shovel Work.—The steam shovel work to be carried out on the Western Division during the current year includes 9,800 cubic yards of bridge filling, 279,000 cubic yards of roadbed and trackwork, and 291,000 cubic yards of new construction on district 1; 30,600 cubic yards of bridge filling, 430,000 cubic yards of roadbed and track work, and 24,000 cubic yards of new construction on district 2.

Pacific Division Steam Shovel Work.—During the current year there will be moved

Canada Car Company

MONTREAL, QUE. LIMITED



Railway Freight and Passenger cars, both wood and steel, of all descriptions and styles; street cars, car wheels, castings, forgings, and all equipment necessary for car construction.

Capacity—7500 freight cars, 150 passenger coaches per year.

ORDERS SOLICITED

ATTENTION, MASTER CAR BUILDERS!

The M. C. B. rules of interchange provide for the use of THE STEEL BACK BRAKE SHOE on your freight equipment.

The use of OUR STEEL BACK SHOE will mean a saving in brake shoe maintenance, brake heads and brake beams.

THE STEEL BACK BRAKE SHOE is an economy on all railway equipment.

LET US PROVE IT TO YOU

114,000 cubic yards of material for bridge filling, and 285,160 cubic yards for roadbed and trackwork on district 1; 47,000 cubic yards of material for bridge filling, 522,500 cubic yards for roadbed and trackwork, and 45,000 cubic yards on new construction on district 2; 744,500 cubic yards of material for bridge filling, and 21,000 cubic yards for roadbed and trackwork for district 3.

Railway Rolling Stock Notes.

The Intercolonial Ry. is in the market for 200 platform cars.

The James Bay Ry. has received 100 flat cars from the Crossen Car Manufacturing Co., Cobourg, Ont.

Two steam shovels for the G.T. Pacific Ry. have been completed by the Locomotive and Machine Co. of Montreal, and are to be delivered June 1.

The Crossen Car Manufacturing Co. has delivered five combined second-class sleeping and baggage cars to the I.C.R., and 100 flat cars to the James Bay Ry.

The C.P.R. has constructed at its Angus, Montreal, shops a motor car, which is being tested on lines in the vicinity of Montreal. The car is not yet in shape for service.

The Canada Car Co., Montreal, has delivered two 30-ton box cars for the Mooney Car Line Co., to the Mooney Car and Biscuit Co., Stratford, Ont., and is now delivering 30-ton box cars for the G.T. Pacific Ry.

The C.P.R. between April 20 and May 14 placed orders for the following rolling stock at its Angus, Montreal, shops: One sleeping car, one baggage-commissariat car, 90 box cars, 85 flat cars and 15 stock cars.

The Intercolonial Ry., between April 17 and May 15, received five combined second-class and baggage cars from the Crossen Car Manufacturing Co., Cobourg, Ont., and 40 dump cars from Rhodes, Curry & Co., Amherst, N.S.

The Temiskaming and Northern Ontario Ry. Commission has bought in the United States four second-hand passenger cars for second-class travel. An order will probably be placed in the near future for four first-class passenger cars.

The Locomotive and Machine Co., of Montreal, delivered 10 ten-wheel locomotives for Mackenzie, Mann & Co.'s lines during May. Four of these have been placed on the Canadian Northern Ry. and four on the Halifax and Southwestern Ry. The other two have not been sent out.

The C.P.R. is asking prices on 50 steel ore cars, 80,000 lbs. capacity, and is purchasing material for 1,000 box cars, 60,000 lbs. capacity, to be built at the company's Angus, Montreal, shops. These 1,000 cars are in addition to those previously mentioned as having been ordered.

The Quebec Central Ry. is building 15 stock cars and two refrigerator cars at its Sherbrooke, Que., shops. Six refrigerator cars are being delivered by Rhodes, Curry & Co., Amherst, N.S., and it recently received two locomotives from the Canadian Locomotive Co., Kingston, Ont.

A paragraph in the Railway Age, May 7, stated that the Sydney and Louisburg Ry. had ordered 15 box cars from Rhodes, Curry & Co., Amherst, N.S. We are advised that these cars were delivered in Mar., and that the S. and L. Ry. has not been placing any orders recently for similar cars.

The C.P.R. between April 20 and May 14 received the following rolling stock: Six locomotives from the Locomotive and Machine Co. of Montreal; two locomotives from the Canadian Locomotive Co., Kingston, Ont.; two locomotives, five sleeping cars, two parlor cars, 125 ballast cars and 310 flat cars from its Angus, Montreal, shops.

The Temiskaming and Northern Ontario Ry. has duplicated its order for two locomotives, general dimensions of which were given in our May issue, with the Locomotive and Machine Co. of Montreal. The locomotives were to be delivered by May 31. It has also placed an order with the Crossen Car Manufacturing Co., Cobourg, Ont., for two baggage and express cars.

The Canadian Northern Ry. has placed an order with Rhodes, Curry & Co., Amherst, N.S., for 100 flat cars, 30 tons capacity, to be built to the company's standard specifications for this type of car. They are for immediate delivery. It has just received 250 flat cars from Rhodes, Curry & Co., and two dining cars, two passenger coaches and three sleeping cars from the U.S.

Dominion Railway Legislation.

The Deputy Governor-General, May 11, assented to the acts affecting the following railways, etc., passed at the current session of the Dominion Parliament:

Atlantic, Quebec and Western Ry.—Extending time for construction.

Boundary, Kamloops and Cariboo Central Ry.—Extending time for construction, and authorizing an extension of lines.

Calgary and Fernie Ry.—Act of incorporation.

Campbellford, Lake Ontario and Western Ry.—Extending time for construction.

Canadian Pacific Ry.—Extending time for construction of various lines.

Crawford Bay and St. Mary's Ry.—Extending time for construction and authorizing an extension of the lines.

Esquimalt and Nanaimo Ry.—Extending time for construction.

Great Northwest Central Ry.—Extending time for construction.

Kingston and Pembroke Ry.—Extending time for construction.

Kootenay and Arrowhead Ry.—Extending time for construction.

Nakusp and Slocan Ry.—Extending time for construction.

St. Clair and Erie Ship Canal Co.—Extending time for construction.

South Ontario Pacific Ry.—Extending time for construction.

West Ontario Pacific Ry.—Extending time for construction.

White Horse and Alsek Ry.—Extending time for construction and authorizing an extension of lines.

Canadian Ticket Agents' Association.—The annual meeting of this association at Mobile, Ala., and trip to New Orleans, La., which had been fixed for the second week in October, has had to be postponed to early in November in consequence of the Knights of Pythias, 100,000 strong, having arranged for a 10 days' occupancy of the Crescent City, covering date selected in October. However, the party will rather gain by the change than otherwise, as it is conceded by all who are in a position to give an opinion that for pleasant weather and other advantages, the month of November in the south is preferable to October. Satisfactory terms have been made with the Bienville and Cawthon hotels at Mobile, and the St. Charles at New Orleans, for accommodation, and with the Pullman Co. for car service, particulars of which will be sent members in due course.

J. C. Darnborough, for 22 years station master at the Union Station, Toronto, has resigned, the position becoming vacant June 1 Mr. Darnborough will take a lengthened holiday before deciding on any plans for the future.

Canadian Railway Contractors in the U.S.

The Cornwall Freeholder points out that a surprising proportion of the great railway contractors of the continent are Glengarry or Stormont men. J. D. McArthur, who has recently secured the contract for building the western section of the Grand Trunk Pacific Ry., aggregating over $13,000,000, is a Lancaster man. By June 1, he will have 10,000 men on his pay-roll. A. R. Macdonald, who, with his partner, Mr. Hogan, is to build four or five million dollars' worth of the Government section, hails from Williamstown. D. D. McBean, who has just finished the Harlem tunnel at New York, an enormous work, is a Lancaster boy. James A. McIntosh and Donald McIntosh, of Milwaukee, Wis., were recently awarded a contract for building 1,500 miles of road for the Chicago, Milwaukee and St. Paul Ry., the price of which was nearly $50,000,000. This is said to be the largest contract ever given to one firm for railway building on the continent of America, or in the world for the matter of that. Their native place is St. Andrew's, Cornwall. Besides these there are the Grant brothers of California, W. A. Grant of Illinois, and the McDougalls of Milwaukee, all representatives of that Celto-Canadian element that has made so distinct a mark in the Glengarry-Stormont settlements of Ontario. There must be something in the mental equipment, as well as in the big, vigorous frame of the people of that section which fits them for this sort of work.—Toronto Globe.

National Transcontinental Railway.

The Commissioners of the Transcontinental Ry. will receive tenders to June 7, for 65,000 tons of 80-lb. steel rails, open hearth or Bessemer, at the option of the Commissioners; together with the necessary splice bars, bolts and nuts, spikes, nut locks and 1,545,000 ties. Tenders are to be accompanied by a marked cheque for 10% of the amount of the tender, and the rails, etc., are to be delivered in such quantities and at such places as the Commissioners may direct. The rails, etc., are for use on the line from near Quebec to La Tuque, Que., and from Winnipeg, Man., to Peninsula Crossing, Ont.

A report from Ottawa states that it is expected that the Commissioners will be in a position to ask for tenders for the construction of the Quebec-Moncton section of the National Transcontinental Ry, early in July,

GRAND TRUNK PACIFIC RY.

Track-laying was commenced at Portage la Prairie, Man., May 2, and a number of sidings have been put in in order to facilitate the movement of construction trains and to store steel rails and other supplies which are being delivered. Tracklaying on the main line is expected to be commenced at an early date.

A special meeting of the shareholders of the G. T. Pacific Ry. was called to be held in the company's offices at Montreal, May 29, for the purpose of ratifying and confirming a by-law providing for the issue of £3,000,000 of debenture stock and other business.

An order-in-council has been passed directing that the G. T. Pacific Ry. shall be considered the first applicant for acquiring the mining rights under any lands required for right of way, stations, station grounds, workshops, buildings, yards and appurtenances required for the construction and working of the railway.

The Belfast and Northern Counties Ry., owned by the Midland Ry. of England, in order to encourage suburban traffic gives a pass for 10 years to persons who build houses for their own occupation on its line to Lorne.

Ontario General Railway Legislation.

The Ontario Legislature at its recent session passed three important acts affecting steam and electric railway interests. The first is an act respecting Steam, Electric and Street Railways, which is referred to as the Ontario Railway Act, 1906, and comes into effect June 1. Heretofore there have been separate acts dealing with steam railways, electric railways and street railways in the province, and numerous amending acts have been passed from session to session, so that the law was in a rather complicated condition. The Act of 1906 brings into one act the whole of the acts relating to railways, steam, electric and street, incorporates numerous sections of the Dominion Railway Act, 1903, and adds several provisions necessary by the great developments being made in the direction of electric traction, and the introduction of motor cars as an adjunct to a regular train service. The act contains sections dealing fully with the organization of companies, the issue of stock and securities, the construction and operation of railways, interchange of traffic, amalgamation and running arrangements with other companies, and everything in connection with the operation of trains. Of the sections relating to electric railways, it is provided that passengers on summer cars are liable to a fine of from $2 to $10 for standing on the side steps of street cars. No electric railway, even on its own right of way, may run on Sunday. This, of course, does not apply to street railways running under federal charters. Sunday concerts in parks, if no fee be charged, are allowed. Electric railways, not street railways, running on highways, are restricted to the 25-year franchise, unless the municipalities agree to extend. Railways are required to report all accidents, whether serious or not, to the board. A penalty of $15 is provided for persons doing damage to telegraph, telephone or power lines. The tolls to be charged are not to exceed 5c. for any distance not exceeding three miles, and beyond that distance not exceeding 2c. a mile for the distance actually travelled, with special fares for pupils attending schools, and for children under 10 years of age. Members of the Legislature are to have free transportation, as well as members and officers of the Railway and Municipal Board, which is created by a separate act to carry the Act into effect. Nine acts are repealed in their entirety, and two in part; the unrepealed portions being incorporated. Many of the special clauses contained in the acts of incorporation of electric and steam railways, operating under provisional charter, are grafted into the general railway act. The Act gives the Ontario Government a more direct power over the railways in the province subject to provincial jurisdiction; a more complete control over electric railways, and through the Railway and Municipal Board, powers which will have the effect of directing and controlling the construction of electric railways in the province. One result of the interest of the province in electric railways is the presence before the Railway Committee of the House of Commons of counsel to see that provincial rights are not interfered with in the numerous bills before the Dominion Parliament for the construction of electric railways entirely within the province.

The second act provides for the establishment of a Railway and Municipal Board, to consist of a chairman at $6,000 a year, two members at $4,000 a year each, a secretary at $2,000, and other officers to be appointed by the Commission. The duties of the Board are to carry out the provisions of the Ontario Railway Act. The sections defining the duties of the Board are similar to those contained in the Dominion Railway Act, 1903, with such alterations as are necessary to make them apply to the province. It also provides (sec. 58) for arbitration by the Board in cases of disputes between employes and the companies, (sec. 59) for mediation in case of a strike or lock-out, and (sec. 63) for the enforcement of municipal agreements with railway companies of all kinds.

The third act deals with the taxation of railways. The tax on railways over 150 miles in length is doubled, rural electric railways running on highways are to be taxed, as well as electric railways running upon their own right of way. The rates of taxation are: Railways under 150 miles in length, $15 a mile for single track, and $5 a mile for each additional track. Railways over 150 miles in length in organized territories, $60 a mile for single track, and $20 a mile for each additional track, and in unorganized territory $40 and $10 a mile respectively. This also applies to electric railways running on their own right of way. It also provides that of the amount realized $30,000 a year shall be utilized towards meeting the expenses of the Provincial Railway and Municipal Commission, and the balance distributed pro rata among the municipalities, less a per capita charge for the maintenance of the inmates of the various provincial institutions belonging to each municipality.

Minneapolis, St. Paul and Sault Ste. Marie Construction Works.

In many respects the most notable piece of railroad construction in the U.S. in 1905 was the building of the Thief River Falls extension of the Minneapolis, St. Paul and Sault Ste. Marie Ry. Starting at Thief River Falls, Minn., on the Minneapolis-Winnipeg line of this road, it runs almost directly west through the counties of Red Lake and Marshall in Minnesota, and Walsh, Cavalier, Towner, Rolette, Bottineau and Ward in North Dakota, to Kenmare, on the main line from Minneapolis, the objective of which is the Pacific coast. The total distance is 296¼ miles, and the rapidity with which it was built is one of its features of note. The first dirt was moved on April 7, grading was completed Nov. 15, and tracklaying four days later. The season was unusually wet, in fact the wettest experienced in this region in 14 years, and there was also a scarcity of laborers, due to the great demand for harvest hands. These conditions caused unexpected delays to the contractors, both in grading and tracklaying.

Location was begun in Sept., 1904, and completed in April, 1905. It was made under a great many difficulties owing to the severe conditions of the winter. The location being practically all the way in a prairie country, the members of the engineering parties living in tents suffered a great many hardships owing to the numerous snowstorms and blizzards. On the prairies it is very rare to have a calm day, and with the thermometer ranging from zero to 45 deg. F. below for weeks at a time, a great deal of time was lost. On account of these conditions the practicability of doing any locating work during the winter on the prairies is very seldom counted on.

The line is remarkable in regard to its alignment and grades, there being one tangent of 50 miles and one of 40 miles, and numbers of others of 20 miles. The curvature is very light, there being but one 3-deg. curve at the extreme west end at Kenmare, two 2-deg. curves, and the rest 1-deg. and 30-min. curves, principally the latter. The gradients are very light, being three-tenths of 1% eastbound from Grano, 275 miles west from Thief River Falls; westbound gradients are principally three-tenths, with the exception of the gradients getting out of the Red River valley and the Moose River valley, 20 miles east of Kenmare, which are five-tenths of 1%. The line is well built with roadbeds in cuts 30 ft. wide and embankments 16 to 20 ft. wide, depending on their heights. The grading and construction work was let to Winston Bros. Co., of Minneapolis, the latter part of March, 1905, to be finished by Oct. 15, the company furnishing all bridge and culvert material.

At the east end of the line the country was very flat, wet and without drainage, necessitating practically all material being hauled on the first 15 miles with extreme hauls of 1½ miles where it was contemplated being able to borrow along the sides. These conditions required the changing of the plant from wheelers and slush-scrapers, which had been hauled in during the winter, to dump cars and track, and was the cause of considerable delay in getting the grading finished.

At the west end, for the first thirty miles, the work was heavy, averaging about 35,000 cu. yds. per mile, and being a hard clay

TORONTO AND WINNIPEG

material, it was very difficult to handle and very slow progress was made. The rest of the work was ordinary prairie work, averaging about 15,000 cu. yds. per mile, and no difficulties were met with except in obtaining laborers, which at all times were very scarce and difficult to get. The country traversed is practically without waste land, and is one of the richest wheat belts in the country. It is said to be practically one continuous wheat field for the entire length of the line. A conservative estimate of the men shipped out from Minneapolis is 10,000, and not over 10% went to work on the railway, the remainder mostly going to the harvest fields where wages of $2.50 and $3.00 a day and board, and $6.00 a day for teams and board, were paid, against $2 a day for men, and $4.50 for teams without board paid by the contractors. Under such conditions it is remarkable that the contractors were able to maintain a sufficient force and to get the work done.

The plant force engaged on the work consisted of 30 grading machines used in connection with dump wagons, 14 of these machines being hauled by traction engines with a great deal of success, the rest of the machines being hauled by teams; 3 steam shovel plants, 300 dump cars and the necessary track, and 300 to 400 wheel and slush-scrapers. The average daily force of men was 1,500, including teamsters, and 800 teams. The actual number of working days was reduced to 120, after deducting loss of time on account of rainy weather and Sundays.

In grading the line there were 4,500,000 cu. yds. of earth handled, averaging about 38,000 cu. yds. each working day; 4,000,000 ft. b. m. cedar timber were used in culverts and 2,000,000 ft. Washington fir and white pine in bridges, all bridges being of timber construction, excepting the Red River crossing, which consists of a single track, 241 ft. metal draw span and one 50-ft. metal through girder span.

The track was laid under contract by E. J. Brennan, of St. Paul. Tracklaying machines with rail and tie trams operated by steam were used. Track was laid from each end, commencing at the east end July 1, and at the west end Aug. 11, which was about 40 days behind the time originally intended to commence at these ends, due to unfinished grade work. The tracklaying was finished Nov. 19, and for each working day each crew averaged 2.1 miles of main line mileage, besides laying 18 miles of side-tracks and passing tracks, and seven miles of tracks at two division points. The average daily force of each tracklaying crew was 110 (a full crew being 130 men), which would lay 6,500 ft. of track in 3½ hours, being full tied (3,000 ties to the mile), spiked and lined. This record of tracklaying is very remarkable, taking into consideration that the average per day did not include mileage of sidings, etc., and the delays caused in putting in 12 railroad crossings.

The road was put in operation for business Dec. 4 with all stations, terminal plants, etc., built. Thirty-two stations were located on the line, including 11 junction towns.

In addition to building the Thief River Falls line, the company built the Underwood extension of 20 miles on the Bismarck line, and the Egeland branch of 21 miles, the latter a branch of the Thief River Falls extension, both branches being in North Dakota. It also did 10 miles of revision work on its main line in Minnesota, making a total main line mileage built for the season of 347½ miles. We are indebted to T. Green, Chief Engineer, for the foregoing information.—Railroad Gazette.

Divisional Organization.

A railroad corporation on account of the extent of its operations and the diffusion of its energies requires a particularly flexible and adaptable organization. Railroads are vulnerable to blackmailers, to demagogues, and to hostile critics of all kinds, chiefly because their work is conducted to a large extent away from headquarters, and because the subordinate officers are not kept sufficiently informed as to the general policy which is to be pursued, and are not given sufficient leisure to keep their fingers on the pulse of trade and public opinion. Again, the possibilities of disaster through dishonesty and inefficiency are so many, that the senior officers often feel it their duty to restrict the authority of the juniors, and to indulge in criticism and a closeness of supervision which is irritating to a high-spirited man in the ranks below. Then there are the semi-technical departments, which require on the part of officers a special training. Such officers resent the intrusion of the authority of general officers who have not had that special training, but who, on account of organizing ability and operating experience, must necessarily carry the burden of general direction. The difference in the points of view of operating and of traffic officers is frequently a source of discord. The ambition of the traffic officer is to secure the business against all comers. The most powerful auxiliary he can have is a high-class operating service, more expensive than any competitor can afford, or considers desirable. The aim of the operating officer is to maintain the minimum service necessary to handle the business, at a maximum of efficiency, and at a minimum cost. The comparative ability of a traffic officer is estimated by heads or by tons, while that of the operating man is estimated by dollars.

The operating forces of a railway are usually divided into three classes: (a) those employed in maintaining the property; (b) those engaged in maintaining the rolling stock; (c) those whose duty it is to move the traffic. The problem for the railway manager is to decide at what point the three classes will merge into each other. There must, of course, be a head governing the forces, (a), (b), and (c), responsible for the results obtained by their combined efforts. On English railways the three classes merge under the control of the Chairman of the Board; on American railways, owing to their length and physical peculiarities, the unit of authority is found in the Superintendent, General Superintendent, Manager, General Manager, or President. It would be foolish to dogmatically prescribe any apportionment of authority to apply to all railways; but I consider that, generally speaking, the best results are obtained by making the Superintendent the unit of authority controlling the three classes of operating employes.

In defining the boundaries of a Superintendent's district, the great considerations should be density of traffic, and the physical conditions of the road. The headquarters of a Superintendent should be as convenient as possible to the physical centre of his district. The dispatching office should be similarly located. In no case do I consider it advisable to have more than one dispatching office on a district. There should be on each district officers controlling the three branches of the service appointed by the Superintendent, with the approval of his superiors. Such district officers should report to, and receive their instructions from, the Superintendent only. On an ordinary district, these officers should comprise an Assistant Superintendent, or Trainmaster; a Master Mechanic; a Resident Engineer; a Chief Train Dispatcher; a Bridge and Building Master, and Roadmasters. Every five or six districts, according to traffic and roadbed conditions, should be grouped in a division, with a General Superintendent in control. He should be assisted by a Division Engineer, a General Master Mechanic, and a Car Service Agent. The duties of the Division Engineer should consist of the compilation of records; a detailed semi-annual inspection of the division; the promulgation of standards (furnished by the Chief Engineer); the preparation of plans, specifications, contracts, estimates, etc. He should be a consultant for the superintendents with respect to engineering matters, and should assist the General Superintendent by means of his technical attainments. The General Master Mechanic should be the General Superintendent's counsellor on mechanical matters; he should distribute power between districts; keep a check on round-house practice; keep himself informed as to cost of repair work, and general condition of motive power; and should frequently inspect and report to the General Superintendent on the operations of the District Master Mechanics.

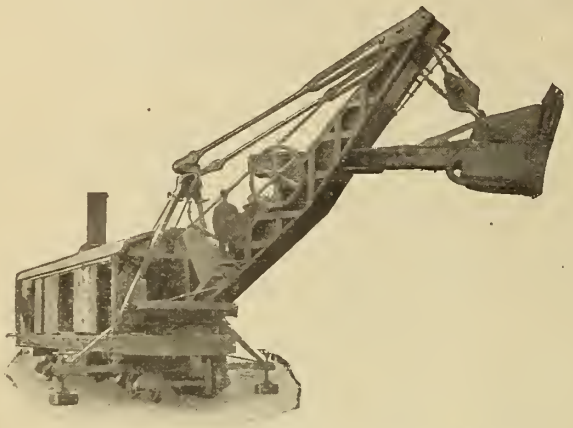
STEAM SHOVELS



We build shovels in sizes from 22 to 110 tons, with dipper capacity of ¾ to 4½ cubic yards. Our new design represents the accumulated experience of many years in steam shovel building. Some of the features that we would call attention to are the use of cut gears, swinging jack arms, and the heavy construction of car body. Write us and describe your work, and get our specifications and proposition on your requirements.

VULCAN IRON WORKS CO.

113 VULCAN PLACE, - TOLEDO, OHIO

RUSSELL INSPECTION CAR NO. 12

"THE CAR THAT GOES"

Has four wheels of equal size with engine midway between the rails.
Can be turned or removed from the track easily and quickly by one man, handling from the rear.
Weighs only 300 lbs. yet is strong and durable.
Can be readily lifted and carried by two men.
Can be run at any speed required up to 30 miles per hour.
Can be quickly taken apart for storage in baggage car.
Carries comfortably three passengers and luggage.
Is guaranteed to take any railway grade with ease.
It is just the simple and easily operated car that RAILWAY MEN have been looking for.

HAMILTON, CANADA **LIMITED**

The Car Service Agent should distribute cars between districts; follow all fast freight graphically; and report to the General Superintendent on all deviations from authorized car movements. Where conditions warrant it, the General Superintendents should report to a Manager, who would have the necessary technical experts on his staff to assist him in adopting and following the best general practice, and in accepting the best standards, in order to make the system of operation as uniform as diversity of climate and traffic conditions would permit. This plan of organization is called divisional, for the reason that by it all operating forces are controlled by one head on each operating sub-division of the railway. It is impossible in the majority of cases to secure men for superintendencies who will be expert in all branches of operation; but the only general bases of selection must be character, experience, and executive ability. They should be assigned to the various sections according to conditions. If traffic is dense and physical conditions normal, the Superintendent should be selected primarily for his transportation ability and experience; if traffic is light and roadbed and climatic conditions out of the ordinary, the Superintendent should be chosen for his maintenance of way knowledge; if through bad water, etc., locomotive troubles are chronic on a district, the Superintendent placed there should be a man of mechanical training. This is the general line on which I have proceeded in selecting Superintendents; and while, I am sorry to say, we have not a strictly divisional organization theoretically, it is working in actual practice gradually to that end, and when the powers that be can be induced to place their seal of approval on that system, I anticipate still more satisfactory results.

There are details in connection with such a scheme of organization which hardly come within the compass of a general paper of this nature, but I may possibly, with advantage to us all, discuss one or two features which would require consideration. If large repair shops are located on a district, they should not be under control of the District Master Mechanic, but of a Works Superintendent reporting to the General Master Mechanic. The main manufacturing shops of a system should be in charge of a Works Manager, reporting to the Superintendent of Motive Power. General Master Mechanics should have inspectors in the large repair shops who would specify what work was to be done on locomotives in for repairs, and who would see that the stipulated work was satisfactorily done. Large works of improvement or construction, involving contracts, which it might be deemed inadvisable to leave to the district forces, who are usually fully occupied with other work, might be placed directly under the Division Engineer, but in the general operation of a district he should have no commanding voice. In locating district officers, it is preferable to assign them to districts as far as possible removed from those on which they have served their apprenticeship. Officers placed in charge of large bodies of men should have magnetism and forceful personalities. Such faculties are born in a man's system, and cannot be acquired, or artificially stimulated or injected The man born to command can maintain strict discipline, and yet command the general good-will of his subordinates. Nothing should be left undone to develop esprit de corps, and to build up a sense of proprietorship in every employe. The men should be encouraged to make suggestions, and frequent conferences, or cabinet meetings, of district officers should be held, to which it might be advisable to invite a few employes of good standing, and with influence amongst their fellows. Such men would doubtless be gratified to find the confidence reposed in them, and the respect in which they are held by the other men, would prove a valuable asset to the company in the effort to bring its interests and its policies closer to the sympathies of the mass of employes.

Railway officers frequently assume the functions of coroners, and spend valuable time in holding post mortem investigations on the same old skeletons day in and day out, without ever drawing any practical lessons from the findings. Nagging, short-grained letters, written on ex parte evidence, cannot possibly accomplish anything. Nothing weakens an organization as much as to enmesh the district officers in red tape, or to frown on any evidence of initiative. Rather should they be instructed in the policy of the company, counselled when necessary, and given latitude on broad lines to accomplish what is expected of them. A system as uniform as is possible in a world which is always in evolution can be built up, and at the same time the individuality and initiative of the officers be preserved to the great advantage of the corporation.

It may be contended that this is an age of specialization and that departmental chiefs should have full swing. No man can dispute that it is necessary to have technically trained men in railway service, but the benefits of their special experience and knowledge can be diffused without placing operating forces under their control. When a strictly departmental system is followed, it will be found that some departments invariably make a favorable showing at the expense of another. In thus advocating the divisional organization, I am constrained solely by the fact that it is the co-operation of all operating forces under one head on an operating district, which will most effectually contribute to efficiency at the lowest possible expenditure of money.

[Paper read by G. J. Bury, General Superintendent Central Division, C.P.R., Winnipeg, Man., at Officials' Conference, C.P.R. Western Lines, Field, B.C.].

Comparative Performance Tests to Determine Locomotive Efficiency.

By Thomas McHattie, Master Mechanic, G.T.R., Montreal.

For a number of years the G.T.R. Co. has periodically conducted a series of tests of the different types of its larger capacity locomotives, for the purpose of determining what results could be obtained by innovations in the matter of design, which are introduced from time to time, calculated to increase the efficiency and service of the locomotive. Trials were made during Aug., Sept. and Oct., 1905, for comparison between a simple class mogul engine 20 x 26 inch cylinders, 63 inch driving wheels, carrying 200 lbs. steam pressure, with a long narrow fire-box having 33.43 square feet grate area, which has been taken as a base in making the comparison, and a two-cylinder compound class mogul engine, 22½ in. and 35 in. x 26 in. cylinders, and the diameter of wheel, the steam pressure and the grate area the same as on the engine before mentioned; they were practically sister engines with the exception of the compounding feature. The third engine put under test was also one of the two-cylinder type mogul class, sister to the former engine, with the exception that it was one of the semi-wide fire-box class with 41.51 sq. ft. of grate area. The steam pressure, size of cylinders, and the diameter of driving wheels were the same as the previous engine mentioned. The fourth engine under trial was one of our consolidation two-cylinder compound class, size of cylinders 22½ in. and 35 in. x 32 in., diameter of driving wheels 57 in., carrying 210 lbs. steam pressure, and having a fire-box with 53.00 sq. ft. of grate area.

These tests were not less interesting nor the data obtained less valuable than that which had been obtained from practically similar trials, which were conducted along the same way and under practically the same conditions, during previous years, and following out the same general practices so as to make the trials as complete in every detail as it was possible to do. It seems to me that railway companies do well to hesitate, or, at least, proceed cautiously, before making any very radical departure in locomotive design, as it is far better to determine by actual test and experiment that it is desirable to make a change.

Now and again there seems to be a tendency among motive power men or the builders, or both, to make some radical departure in the design of locomotives in some part. This inclination seems to spread like a fever, and certain types of engines are put into commission regardless of the prevailing conditions of the service, even though it is work for which they are not at all adapted. Therefore, to avoid any difficulty of this kind, it would seem that the railway companies (who usually suffer the most by reason of these experimental changes) should devote some time in making exhaustive tests to determine exactly what type or design of locomotive best suits their own requirements, rather than be guided by attractive reports regarding results that may be obtained elsewhere by certain types of locomotives, possibly without knowing much regarding the conditions under which these engines work. For this reason it has been the policy of our company to proceed cautiously and with careful investigation and consideration before making any radical changes in its locomotive practices. While it is perhaps the proper thing to be progressive in this work, still the practice should be to couple progress with prudence, and this can be accomplished by railway companies which make periodical locomotive tests, which should be conducted with the greatest care possible, so that the data gathered may be strictly accurate in every detail.

All the tests we have conducted have been made over the territory between Montreal and Brockville and return. This district is slightly undulated, with numerous gradients, double track, and is an ideal section for making tests of this kind. The run is 126 miles in one direction. The double track avoids the troublesome delays in crossing trains, etc., so that the only stops to be made are for water supply and train examination purposes, and the section being practically of a level character permits handling a good train; 2,150 tons gross, exclusive of the weight of the engine and tender, being handled on the east-bound trip with the mogul class, while the consolidation engine handled 2,400 tons in the same direction. On the west-bound journey 1,450 and 1,700 tons, respectively, were handled by these two classes without any assistance being given. The runs were all made during the day, as near as possible between 10 a.m. and 6 p.m. The average time was six hours, making the run at an average speed of 21 miles per hour.

The data obtained was as follows:—No. of engine, simple or compound; date of test, name of coal, destination, number of cars on train, gross weight of train in tons, average weight per loaded car, total engine miles, total train miles, total car miles, total ton miles, coal consumed in lbs. (exclusive of lighting up), coal consumed in lbs. per engine mile, coal consumed in lbs. per train mile, coal consumed in lbs. per car mile, coal consumed in lbs. per ton mile, coal consumed in lbs. per sq. ft. of grate area per train mile, coal consumed in lbs. per sq. ft. of grate area per hour, actual running time, total water evaporated in lbs., water evaporated in lbs. per lb. of coal, total weight of ashes in lbs., ashes per 100 lbs. of coal, actual running time, detentions, total hours engine under

steam, average speed in miles per hour, average boiler pressure, total number of stops, average temperature of air, average temperature of water, miles run with one ton of coal, wind, weather, rails, diameter of exhaust nozzle, weight on driving wheels, total weight of engine, type of boiler, type of valves, diameter of driving wheels, size of cylinders, grate area, number and diameter of flues, heating surface, type of engine, brick arch, size of stack, diameter inside, working pressure.

Each engine was submitted to the test for six consecutive days. All engines were given the same grade of coal and were handled by the same engineer, fireman, and train crew. Two of our mechanical experts were assigned to the work of noting all the details for compiling data previous to starting, while on the trip, and at the end of the journey, so that everything possible was done to obtain a practical and thorough test and accurate report of same. The whole report of these trials comprises such a voluminous mass of figures, that they would take up too much of your time, but touching upon some of the more important points, I may say that the coal consumed per ton mile on all the compounds showed over 20% decrease. The water evaporated per lb. of coal also gave a considerable increase in the percentage in comparison with the simple class engine. Better average speed was made with the compound engines, while a greater tonnage was handled. We found that the average coal consumed per ton mile was practically the same in the long narrow fire-box as in the wider fire-box class, from which it would appear that in the matter of fuel economy there was no practical advantage in the wide fire-box. A noticeable feature of these tests was, that notwithstanding they were made with different engines, but of the same type from those used in the tests made in former years, yet practically the same results were obtained, *i.e.*, the compound engines gave much superior results than the simple class engines. All the engines entered the trial in first-class condition, and the oil consumption, cost of running repairs, were practically the same while under the test.

The foregoing was read before a recent meeting of the Canadian Railway Club.

Prompt Handling of Competitive Freight.

In considering the prompt handling of competitive freight, we might first take package, or less than carload freight. Merchants shipping such freight should be advised that it will be received at the company's freight sheds up to a certain hour, say 5 p.m., or 17.00 k.; any such freight delivered after that hour being liable to be held over until the following day. Up to 17.00 k. such freight should be received and passed through the shed direct to the various cars being loaded for the several competitive points, a carload being made up for each station where possible; cars for such freight to be carefully selected as to fitness for fast service, and so placed on the house track that they can be moved from the freight shed first without disturbing other cars being worked. This L.C.L. competitive freight in carloads should be red carded with a card having a large white letter C printed on it, as quick information to all concerned of the contents of the car. Waybills should be stamped competitive, and enclosed in envelopes also so stamped, and cars started out in time for the most distant car to reach its destination and be placed at the freight shed for delivery at 7.00 k. of the next day, and shippers should be at once advised of its arrival. Thus on a run of say 100 to 200 miles from the loading point, a car containing L.C.L. competitive freight for the various towns along the run would be placed for delivery the morning following its receipt by the company. The same handling should be given freight for distant competitive points, and where full carloads cannot be made for beyond junction stations part cars should be loaded for junction points, where freight, if any, to come out could be removed, and competitive freight that is collected at such junction points could be promptly added and car go forward for distribution to the smaller stations along branch lines.

In the handling of carload competitive freight the same should be red carded and billed as above mentioned, switched out promptly at the close of business at 18.00 k. each day, and made up into, as far as possible, solid trains, the cars for furthest competitive points being placed to the rear of the train, and so on, to avoid switching en route, and trains started out on fast freight schedules under designating numbers, such numbers being used consecutively, and the movement of these fast freights reported from each train terminal point, the car numbers in such trains being wired under the letter C, and designated number of train, so that close check may be kept on the general movement of such traffic by the central office. Cars of competitive freight should be collected at junction points and added to such trains. The clerk in charge of fast freight records should be, preferably, one having experience in the operating department, conversant with schedules of trains, grades and other conditions of a local nature on different parts of the line.

In order to ensure schedule time with such freights, all terminal yards should be piped for air so that air brakes can be promptly tested, fully looked over, and train charged before the engine is coupled on. Engines on these trains should not be loaded as heavily as they now are, the engineer, having a greater amount of energy available than would be constantly in use, would thus be in a position to overtake unexpected delays that are sure to occur on long runs. Train dispatchers could thus count on such trains making regular performance, and could give such orders as would carry them over the section without requiring further interference or additional stops to re-arrange orders; each extra stop causes delay that must be regained at the expense of the engine, if from no other standpoint than the consumption of fuel. Therefore, if these trains were run 15% light under normal conditions, instead of 10% light as at present, and similar per cent. of reduction allowed for unfavorable conditions, it would be a step in the desired direction of maintaining our fast freight schedules.

Further, regular engine and train crews should be assigned to the runs, and engines kept in the best possible shape for the performance required, instead of being sent out on these trains haphazard, as at present. When selected engines and crews are used there is an individual pride in making the record required that is not obtained where any engine or any crew, whose turn out it may happen to be, is placed on the train.

Our greatest need at this time to secure more satisfactory handling of competitive freight is in our train performance, and to this end I would particularly recommend that regular engines, engine crews, and train crews be assigned to such service. There is nothing in our wage schedules which prevents such an arrangement, and if there is, it should be eliminated. Further, engines should be so distributed as to allow such trains to be handled through intact, and thus avoid the breaking up of trains at any terminal; where necessary to take care of accumulating competitive freight in long distance movement, a second section of such fast freight could be started.

The hands of our freight traffic officials would be strengthened if fast freight schedules were absolutely maintained, and they would be relieved of any temptation to exaggerate in advising shippers of time that can be made by having to draw upon their imagination. They should be able to assert our adherence to our fast freight schedules in the same confident manner as our passenger officials rely upon our passenger schedules, and shippers could then be given these schedules with the same measure of confidence and assurance of actual performance as passengers are given time-tables.

We should look the facts fairly in the face, which requires that we admit little or no actual observance of fast freight schedules in the past, and give our very serious consideration to the remedying of such performance by improving the conditions whereby our fast freight schedules may be at all times maintained.
